

BOARD OF DIRECTORS

Thursday, July 6, 2006

Hyatt Regency Sacramento
1209 L Street
Sacramento, California
(916) 443-1234

9:30 a.m.

1. Roll Call.
2. Approval of the minutes of the March 9 and May 11, 2006 Board of Directors meetings.
3. Chairman/Executive Director comments.
4. Presentation to the Board on the Proposition 63/Homeless Phase II Initiative. Dr. Steven Mayberg, Director of the California Department of Mental Health and Darrell Steinberg, Chair, Mental Health Services Oversight and Accountability Commission will discuss the Initiative and the partnership with CalHFA. Staff will also be available for discussion and questions by the Board.
5. Discussion, recommendation and possible action relative to the organizational documents and procedures of CalHFA's Board of Directors' Audit Committee. (Dennis Meidinger; Jack Shine)
6. Discussion, recommendation and possible action relative to the possible creation of CalHFA's Board of Directors' Compensation Committee. (Terri Parker)
7. Update on Bay Area Housing Plan. (Kathy Weremiuk/Edwin Gipson)
8. Reports 231
9. Discussion of other Board matters.
10. Public testimony: Discussion only of other matters to be brought to the Board's attention.

NOTES:

HOTEL PARKING: Parking is available as follows: (1) overnight self-parking for hotel guests is \$18.00 per night; valet parking is \$24.00.

FUTURE MEETING DATE: Next CalHFA Board of Directors Meeting will be September 7, 2006, at the Hilton Burbank Airport & Convention Center, Burbank, California.

Board of Directors Meeting held on March 9, 2006

1 BE IT REMEMBERED that on Thursday March 9, 2006,
2 commencing at the hour of 9:32 a.m., at the Holiday Inn
3 Capitol Plaza, 300 J Street, Sacramento, California,
4 before me, DANIEL P. FELDHAUS, CSR #6949, RDR and CRR,
5 the following proceedings were held:

6 --oOo--

7 *(The following proceedings commenced with*
8 *Jan Boel absent from the hearing room.)*

9 ACTING CHAIR SHINE: Well, it's time.

10 Good morning. I would like to call the meeting
11 to order. My name is Jack Shine. I am a fill-in. Our
12 chairman had some business matters which made it
13 impossible for him to be here this morning, and he asked
14 me if I would fill in at this session, which I am doing
15 here. So there you have it.

16 --o0o--

17 **Item 1. Roll Call**

18 ACTING CHAIR SHINE: Do we want to do a roll
19 call first?

20 MS. OJIMA: Yes. Thank you.

21 Mr. Pavao for Mr. Angelides?

22 MR. PAVAO: Bill Pavao for Treasurer Angelides.

23 MS. OJIMA: Thank you.

24 Mr. Carey?

25 *(No audible response)*

Board of Directors Meeting held on March 9, 2006

1 MS. OJIMA: Mr. Czuker?
2 *(No audible response)*
3 MS. OJIMA: Ms. Nevis?
4 MS. NEVIS: Here.
5 MS. OJIMA: Thank you.
6 Ms. Galante?
7 MS. GALANTE: Here.
8 MS. OJIMA: Mr. Augustine for Ms. McPeak?
9 MR. AUGUSTINE: Here.
10 MS. OJIMA: Mr. Morris?
11 MR. MORRIS: Here.
12 MS. OJIMA: Mr. Shine?
13 ACTING CHAIR SHINE: Here.
14 MS. OJIMA: Mr. Courson?
15 *(No audible response).*
16 MS. OJIMA: Mr. Walsh?
17 *(No audible response)*
18 MS. OJIMA: Mr. Genest?
19 *(No audible response)*
20 MS. OJIMA: Ms. Parker?
21 MS. PARKER: Here.
22 MS. OJIMA: We have a quorum.
23 ACTING CHAIR SHINE: By the skin of our teeth.
24 MS. OJIMA: By the skin of our teeth, correct.
25 //

Board of Directors Meeting held on March 9, 2006

1 **Item 2. Approval of the minutes of January 12, 2006,**
2 **Board of Directors Meeting**

3 ACTING CHAIR SHINE: Okay, we have minutes of
4 the January 12th meeting.

5 I will entertain a motion for approval and any
6 comments?

7 MR. MORRIS: So moved.

8 MS. NEVIS: Second.

9 ACTING CHAIR SHINE: Any comments from anybody?

10 *(No audible response)*

11 ACTING CHAIR SHINE: If not, all in favor?

12 *(A chorus of "ayes" was heard.)*

13 ACTING CHAIR SHINE: Then I'll go ahead and call
14 the roll, which -- now, do you see what happens to an
15 interim?

16 MS. OJIMA: Mr. Pavao?

17 MR. PAVAO: Having not been at the meeting, I
18 was inclined to abstain.

19 Do you need a vote for the quorum? Then I vote
20 "aye."

21 MS. PARKER: Well, the only thing we could do is
22 move it over to the next Board meeting. But we need six
23 votes.

24 MR. PAVAO: Then I vote "aye."

25 MS. OJIMA: Thank you, Mr. Pavao.

Board of Directors Meeting held on March 9, 2006

1 Ms. Nevis?

2 MS. NEVIS: Aye.

3 MS. OJIMA: Ms. Galante?

4 MS. GALANTE: Aye.

5 MS. OJIMA: Mr. Augustine?

6 MR. AUGUSTINE: Aye.

7 MS. OJIMA: Mr. Morris?

8 MR. MORRIS: Aye.

9 MS. OJIMA: Mr. Shine?

10 ACTING CHAIR SHINE: Aye.

11 MS. OJIMA: The minutes have been approved.

12 --o0o--

13 **Item 3. Chairman/Executive Director comments**

14 ACTING CHAIR SHINE: Okay, in that case, I would
15 like to make comments. It says "Chairman and Executive
16 Director." But as acting chairman, I have no comments to
17 make. So, therefore, I will not make any.

18 But I'll turn it over to Terri, who I know has
19 some things that you want to hear.

20 MS. PARKER: Thank you, Mr. Chairman.

21 And my grateful thanks to all the Board members
22 who are here today.

23 If you were not here, we would have a serious
24 problem of being able to do the business of the
25 organization and meet our commitment to our borrowers.

Board of Directors Meeting held on March 9, 2006

1 I have a couple of announcements to make.
2 Certainly, I wanted to introduce Bill Pavao, who has
3 taken Laurie Weir's place in representing the Treasurer.
4 Bill has been known, I think, to many of us at CalHFA
5 because of his long tenure in the Department of Housing
6 and Community Development, where most recently he ran the
7 Multifamily Housing Program. So we welcome Bill.

8 And we know you'll do a fine job, representing
9 the Treasurer.

10 The other introduction that I want to make is,
11 as you all know, I have chatted with you about some of
12 the great loss to the Agency of our longtime staff. And
13 with the retirement of Dick LaVergne, the retirement of
14 Nancy Abreu, we have had challenges of filling our
15 Director of Homeownership and with changes in the
16 Multifamily area. So at least the first of those four
17 positions we've made some progress on, and paperwork is
18 in to the Governor's office to appoint Steve Spears.

19 Steve, if you would stand up, so you all know
20 him.

21 Steve has an outstanding background to bring to
22 the Housing and Finance Agency. He not only has an MBA
23 in business and a CPA, but he also has a law degree.
24 He was Deputy Treasurer for Matt Fong, and did the
25 municipal finance side of the Treasurer's office. He's

Board of Directors Meeting held on March 9, 2006

1 well-known and respected on Wall Street, and has done
2 consulting in the financial area for the last several
3 years.

4 So we are very fortunate to have him. We're
5 teaching him how to be a "houser." But other than that,
6 he has a tremendous background to bring to the Agency.
7 So we're fortunate to have him; and you'll be hearing
8 more from him over the next months, if he is with the
9 Agency. And if I'm not available, Steve is the next
10 person for you all to contact.

11 John asked me, when he said he couldn't
12 attend this meeting, to do one thing, and that is to
13 make an announcement for him. At the last meeting, he
14 talked about his desire to form an audit committee.
15 And in doing so, he has talked to a couple of the Board
16 members to ask them to participate on that audit
17 committee. And he has asked Jack Shine to chair the
18 committee. He has asked Carol Galante and Peter Carey
19 to be members on the committee on a rotational basis, so
20 that we always, you know, are not in a situation where
21 we have all three members coming on and off at the same
22 time.

23 So Jack's appointment is for one year, Carol's
24 is for two years, and Peter's is for three years.

25 Since Jack has a dubious distinction of being

Board of Directors Meeting held on March 9, 2006

1 the first Chair of the audit committee, he will be
2 working with Tom Hughes, our General Counsel, and Dennis
3 Meidinger, our Comptroller, in developing an audit
4 committee plan -- a charter -- and will be coming back to
5 the Board members and talking a little bit about the
6 activities that they are going to be doing. So I just
7 wanted to give you kind of a heads-up on that.

8 We have a very good meeting to talk with you
9 about. A couple of deals for us to be doing. We're
10 going to be doing a report on the Bay Area Housing Plan.

11 A big part of our meeting is to talk with you about
12 concepts for our business plan, which we'll be bringing
13 back to you to adopt next May. But I think this is going
14 to be a crucial time for the way we are going to be
15 talking to you about the business plan of how we best
16 want to use our resources, how best we want to
17 essentially move the mission of the organization, and
18 also whether or not we will have the resources to do so.

19 As a little special treat, our Marketing folks
20 have done some PSAs on the Agency. So before, as an
21 introduction to our business plan, we're going to give
22 you a little bit of -- a couple 30-second PSAs about the
23 organization and the mission that we're doing.

24 And then last, but not least, we'll have a small
25 closed session to talk with you about some court

Board of Directors Meeting held on March 9, 2006

1 litigation that we're involved in.

2 So we appreciate you being here, and we
3 appreciate your time and attention to the matters before
4 you today.

5 With that, Mr. Chairman, that concludes my
6 report.

7 ACTING CHAIR SHINE: Thank you.

8 --oOo--

9 **Item 4. Discussion, recommendation and possible action**
10 **relative to final loan commitments for three**
11 **projects:**

12 **Resolution 06-09 (Indio Gardens Apartments)**

13 ACTING CHAIR SHINE: I'd like to just then go
14 into the three projects that we have before us today, the
15 first of which is Indio Gardens Apartments.

16 MS. FRETZ-BROWN: Thank you, Chairman Shine.

17 I'm Beverly Fretz-Brown, Interim Director of the
18 Multifamily Housing Programs, CalHFA.

19 Our first loan commitment request is Indio
20 Gardens. It's a portfolio loan for the purpose of
21 acquisition and rehab.

22 Laura Whittall-Scherfee, the Chief of Lending,
23 will be directing the remarks on this program.

24 Thank you.

25 MS. WHITTALL-SCHERFEE: Good morning.

Board of Directors Meeting held on March 9, 2006

1 This is a final commitment request for Indio
2 Gardens Apartments. Indio Gardens Apartments is an
3 Agency portfolio loan. It's a 151-unit family project.
4 It's located in Indio, which is in Riverside County.

5 The project was constructed in 1981. It is
6 100 percent Section 8. It has 100 percent Section 8
7 subsidy right now, and the renewals expired in 2002.

8 The request is for an acquisition rehabilitation
9 loan, a Section 8 second mortgage, and then permanent
10 loan financing.

11 The acquisition rehab loan is in the amount of
12 \$4,400,000, at a variable interest rate for 24 months;
13 and the financing is tax-exempt.

14 The second mortgage, which will go into place at
15 the same time as the acquisition rehabilitation loan, is
16 for 4,800,000. It's comprised of \$1,090,000 of earned
17 surplus, and 3,710,000 of tax-exempt financing. It's for
18 16 years, which is the remaining term of the half, with
19 the extensions.

20 The permanent loan is in the same amount as the
21 acquisition loan. It's for \$4,400,000, at 5.45 percent
22 for 30 years.

23 There are no other sources of financing.

24 And with this, Jim Liska is going to explain the
25 project in a little bit more detail.

Board of Directors Meeting held on March 9, 2006

1 This is very, very similar in structure to what
2 you saw with Palm Springs Senior, at the last Board
3 meeting. The ownership of the property is going to
4 include Bental, and the actual name of the ownership
5 entity is going to be "Indio Gardens Affordable LP."

6 Go ahead, Jim.

7 MR. LISKA: The project is Indio Gardens,
8 located in Indio.

9 This is a close-up of the aerial. And it's a
10 three-story elevator, two buildings: Building A and
11 Building B.

12 Right here is the community room. And off to
13 the right here is the office center. The community room
14 will see some rehab, as far as updating.

15 The project was built in 1981. And overall,
16 it's in our portfolio, and it is in pretty good
17 condition; but we will be doing approximately
18 1.9 million dollars' worth of rehab. We're at
19 12,000-plus per unit.

20 The roofs are -- basically, they're a foam
21 covering and reflective to help us with the sun, since
22 it gets warm, as you know, down there during the summer
23 months.

24 We understand the warranty is good through
25 approximately 2012 on these roofs.

Board of Directors Meeting held on March 9, 2006

1 Back here, this is a senior project. We have a
2 nice little garden plot where individual tenants can grow
3 various flowers, vegetables, fruits, what have you.

4 On the back side are apartments. To the right
5 are apartments. Across the street are, again,
6 apartments.

7 It is gated with security gates and automatic
8 openers.

9 I think this is one of the better projects
10 I have seen as far as with ADA compliance, since we do
11 have a lot of seniors, a lot of handicapped here.

12 Off to the left is a seven-acre date farm; and
13 adjacent to that is open land.

14 This gives you a little bit wider aerial on it.
15 We're looking west, down the street.

16 At the corner of Monroe and our street is a bus
17 stop. About a quarter mile away in this direction
18 (pointing), just past Highway 101 in Monroe, we have a
19 little shopping center, as far as Rite Aid for drugs,
20 Food 4 Less for our grocery, and approximately a mile
21 away is the hospital.

22 So all in all, there, the services are all
23 within about a half a mile distance of the project.

24 This is a view of the subject from Requa Avenue.

25 Just looking east on Requa.

Board of Directors Meeting held on March 9, 2006

1 Looking west on Requa.

2 This is an interior view of the grounds,
3 property. The landscaping is very nicely done,
4 well-maintained, well kept up. And we have a little bit
5 of rehab to do, some ongoing work there.

6 A typical kitchen.

7 As far as interior unit amenities, we are going
8 to be seeing new cabinets, new appliances. Flooring for
9 both the bathrooms, carpeting, paint.

10 This is a typical unit interior.

11 We can digress a little bit on this one.

12 Again, those that were here in January for Palm
13 Springs, we have our Section 8 exceeding the market rate.
14 It's 862 versus 725.

15 Again, we have a 16-year half contract
16 remaining. And in the cash flow for the first six years,
17 two years' worth of rehab plus the first four years of
18 amortizing, we have flatlined it. We have not trended
19 those rents until -- for the Section 8 -- until such time
20 as the market catches up with the Section 8, then we are
21 permitted to go back to HUD to get our annual increases.

22 With that, I'm open for questions.

23 ACTING CHAIR SHINE: Questions from anybody?

24 MS. GALANTE: I have one.

25 I wasn't at the last meeting, so I didn't --

Board of Directors Meeting held on March 9, 2006

1 you're referring to a structure on a previous deal, and
2 I apologize. But is this project being acquired from an
3 existing?

4 MR. LISKA: This project is being acquired
5 from --

6 MS. GALANTE: This is not a refinancing?

7 MR. LISKA: No, it's not a refinancing. This is
8 an actual sale. And the current owner is selling it.

9 As part of that sale, since it is in our
10 portfolio, this property, based on yield maintenance,
11 the seller of the property will be paying a
12 1.6-some-odd million dollars prepayment penalty to us.

13 MS. GALANTE: So is that the earned surplus?

14 What's the earned surplus?

15 MR. LISKA: The earned surplus is from our own
16 funds, and it's to supplement and use, since this is a
17 pre-80 project, the project can have surplus funds, in
18 addition to our own tax-exempt financing.

19 ACTING CHAIR SHINE: I have just a question
20 here.

21 In computing the first and the second, when you
22 add them together, it's \$90.2 million.

23 MR. LISKA: That's correct.

24 ACTING CHAIR SHINE: So that's like an
25 80 percent loan based on value after completion; right?

Board of Directors Meeting held on March 9, 2006

1 MR. LISKA: That's correct.

2 ACTING CHAIR SHINE: I just wanted to make sure
3 it's still there.

4 MR. LISKA: Yes, it's still there.

5 Again, the tax-exempt is a little bit less,
6 8.1 million. And then the \$1,090,000 is the HAT earned
7 surplus money, our own Agency's funds. And we have it at
8 5.45 percent interest rate for 16 years.

9 ACTING CHAIR SHINE: Okay, any further comments?
10 Questions?

11 MR. MORRIS: If I can make one comment.

12 I think it's a great project. I mean, this area
13 is one of the fastest growing cities in the state, and
14 housing prices have increased dramatically in the last
15 several years, just like other parts of the state. So
16 this is good. This is a good project.

17 MR. LISKA: You see the signs going down the
18 freeway at the site. You're looking at three to five
19 hundred thousand-dollar homes.

20 MR. MORRIS: Right.

21 MR. LISKA: Your observation is right.

22 ACTING CHAIR SHINE: Okay, all right. Do we
23 hear a motion?

24 MR. HUGHES: Mr. Chair, just to remind you,
25 before the Board votes on anything, we do have to make

Board of Directors Meeting held on March 9, 2006

1 sure we've solicited any input or comments from the
2 public.

3 ACTING CHAIR SHINE: Oh.

4 Comments from the public?

5 *(No audible response)*

6 ACTING CHAIR SHINE: Hearing none, I'd entertain
7 a motion.

8 MR. MORRIS: I move.

9 MR. PAVAO: Second.

10 ACTING CHAIR SHINE: Call the roll.

11 MS. OJIMA: Mr. Pavao?

12 MR. PAVAO: Aye.

13 MS. OJIMA: Ms. Nevis?

14 MS. NEVIS: Aye.

15 MS. OJIMA: Ms. Galante?

16 MS. GALANTE: Aye.

17 MS. OJIMA: Mr. Augustine?

18 MR. AUGUSTINE: Aye.

19 MS. OJIMA: Mr. Morris?

20 MR. MORRIS: Aye.

21 MS. OJIMA: Mr. Shine?

22 ACTING CHAIR SHINE: Aye.

23 MS. OJIMA: Resolution 06-09 has been approved.

24 //

25 //

Board of Directors Meeting held on March 9, 2006

1 **Item 4. Discussion, recommendation and possible action**
2 **relative to final loan commitments for three**
3 **projects. (continued)**

4 **Resolution 06-10 (Seven Directions)**

5 ACTING CHAIR SHINE: Okay, our next project is
6 Seven Directions in Oakland, Alameda.

7 Are you ready?

8 MS. FRETZ-BROWN: Thank you, Mr. Chairman.

9 Laura will also give the comments on the Seven
10 Directions project.

11 Thank you.

12 MS. WHITTALL-SCHERFEE: We are having to lean
13 forward into this mike because this is as far as it's
14 going to go. So if we look like we're practically trying
15 to lean over the table, that is why.

16 Tina Ilvonen is going to help me with Seven
17 Directions. You did receive very late, and I apologize,
18 a substitute page. That substitute page includes the
19 information on the appraisal that we received after this
20 was published, but we wanted you to be aware of what the
21 appraisal was. We are still reviewing parts of the
22 appraisal, but the loan-to-values are something that we
23 felt that the Board needed to have.

24 Seven Directions is -- we're requesting
25 permanent and construction loan financing on Seven

Board of Directors Meeting held on March 9, 2006

1 Directions. It is a 36-unit infill project with a
2 20,000 square-foot community-based health care facility
3 in Oakland, which is in Alameda County.

4 The project will be owned by Seven Directions
5 Housing Limited Partnership, and will include EBALDC,
6 which is East Bay Asian Local Development Corporation,
7 and the Native American Health Center, Inc. The Native
8 American Health Center, Inc., will be owning and managing
9 the health centers that are part of the project. And we
10 have a long history with the EBALDC. I think this board
11 probably remembers a couple of projects, Coliseum I was
12 a recent project we brought to this board, as was
13 Coliseum II and III.

14 The construction loan that is being requested
15 today is in the amount of \$8,750,000, at a variable rate
16 for 18 months with tax-exempt money.

17 The permanent loan will be for \$1,600,000 at
18 53 percent for ten years. This project is going to have
19 18 project-based Section 8 vouchers provided by the
20 Oakland Housing Authority. And as you saw, we have a
21 large construction loan and a small permanent loan. The
22 reason being, there are a multitude of other sources on
23 this particular project.

24 There's money from the Redevelopment Agency of
25 the City of Oakland in the amount of \$3,289,000 for

Board of Directors Meeting held on March 9, 2006

1 55 years at 3 percent, residual receipts. The City of
2 Oakland has two loans, one in the amount of \$1,216,000
3 for 55 years at 3 percent, residual receipts, and then a
4 deferred interest loan in the amount of \$93,972 for
5 55 years.

6 The Department of Housing and Community
7 Development and the Multifamily Program is for \$2,606,331
8 for 55 years at 3 percent, residual receipts, as well as
9 an SSS loan from MHP, the non-residential space for
10 supportive services, in the amount of \$250,399 for
11 55 years, at 3 percent.

12 There's also an AHP loan in the amount of
13 \$227,368 for 55 years.

14 And with that, Tina will take you through the
15 project.

16 MS. ILVONEN: Good morning.

17 Seven Directions will be located in the
18 Fruitvale neighborhood of Oakland, two miles south of
19 downtown Oakland in Lake Merritt, which is up here, and a
20 quarter mile north of the Fruitvale BART station, which
21 is about four blocks south of this side.

22 This is a close-up of the neighborhood around
23 the project.

24 This is the new Cesar Chavez Educational Center,
25 which actually continues another three or four blocks

Board of Directors Meeting held on March 9, 2006

1 north. And this is the Goodwill retail facility.

2 This is another charter school.

3 This building here is the Fruitvale Medical
4 Center; and this building here, on the corner of 29th, is
5 a grocery store.

6 This is a closer-up view of the surrounding area
7 next to the project.

8 This is a furniture store right next to the
9 project.

10 On the corner of Twenty-Ninth and International,
11 this is a restaurant.

12 This is a 16-unit apartment complex abutting the
13 project.

14 This building back here is the historic
15 Cohen-Bray House, which was built in the 1870s.

16 Next door here is an IHOP, which is vacant
17 currently.

18 And this is a close-up of the site, looking
19 southeast from International Boulevard.

20 This is a half-acre site. It's been vacant
21 since 1976. It was formerly the location of a retail and
22 furniture warehouse building. There was a Phase I and
23 Phase II completed on the project in 2002.

24 In the Phase I, they had a concern about
25 neighboring properties possibly contaminating our site

Board of Directors Meeting held on March 9, 2006

1 with possible leaks from those properties.

2 There was a Phase II completed, and subsurface
3 sampling was done. Low concentrations of diesel were
4 found, but they were below regulatory levels and they
5 were not required to be removed.

6 These reports have both been reviewed by our
7 environmental consultant, URS; and they do not have any
8 further recommendations for further investigation. There
9 will, however, be a Phase I update before we close the
10 construction loan.

11 This is just a close-up of the Cohen-Bray House
12 behind the project. It was built in the 1870s. It's on
13 the Historic National Register.

14 Okay, this is a site plan of the project. As
15 you see, the building envelope is taking up almost the
16 entire site, except for the very back, where there will
17 be some trees planted. This will be a five-story
18 building, which will include 36 units and the
19 20,000 square-foot community-based health care facility.

20 The health care facility and the residential
21 units will be divided into two separate legal
22 descriptions. CalHFA's security will be on the housing
23 parcel only.

24 Okay, this slide shows the two very different
25 facades on this project.

Board of Directors Meeting held on March 9, 2006

1 The south facade along International Boulevard
2 is a commercial facade, showing the five stories of the
3 project.

4 In the rear, the project steps down to two
5 stories, and it's a residential facade, in keeping with
6 the character of the residential neighborhood on
7 Twenty-Ninth Avenue.

8 And I wanted to show the floor plans in the
9 slide presentation to show the separation between the
10 health center and the residential units.

11 These areas here are the parking garage. There
12 will be an entrance here, which will be open during the
13 day when the health center is open. There are nine
14 parking spaces here for the health center.

15 There's a gate here, so the residents can have
16 their own gated, secured parking area. There's
17 31 parking spaces here, and the units -- I'm sorry,
18 there's an elevator here. Then there's a separate
19 residential lobby with mailboxes and an elevator.

20 This is the first floor of the health center,
21 which will house outpatient mental health services, as
22 well as conference rooms, offices, and a community garden
23 for gathering.

24 This is the second floor. On this floor, there
25 are three residential units, as well as the community

Board of Directors Meeting held on March 9, 2006

1 room for the residential, which will have social services
2 coordination, job training, and a commuter room.

3 There's also the primary-care medical facility
4 and comprehensive dental on this floor. The elevator for
5 the health center stops on the second floor, and that's
6 the last stop for that elevator, whereas the residential
7 elevator goes all the way up to the fifth floor.

8 The third floor has more units, as well as a
9 community garden and play area for the children, a
10 contemplative garden for adults. And that's in that
11 location, because the Cohen-Bray House wanted quiet
12 neighbors. They're located over here (pointing).

13 This floor also has the manager's unit, the
14 manager's office, laundry room.

15 And the fourth floor has more units. The units
16 in this project are studios, one-, two-, three-, and
17 four-bedrooms. As you can see, the project is starting
18 to step back here.

19 And the fifth floor is only about a third of the
20 floor, with the remainder of the units.

21 Okay, this slide shows the project units and
22 the market rate rents. Project rents range from 30 to
23 60 percent of market-rate rents -- I'm sorry, 30 to
24 60 percent of area median income. The market rents shown
25 on this slide are from the market study, which was

Board of Directors Meeting held on March 9, 2006

1 completed in January. Since the Board package went out,
2 we have received the appraisal. And we are relying on
3 the market rents from the appraisal versus the market
4 study, because the appraisal surveyed market apartments
5 in a tighter area around the project than the market
6 study did.

7 The market rents from the appraisal are 725 for
8 the studio units, 925 for the one-bedrooms, 1,250 for the
9 two-bedrooms, 1,500 for the three-bedrooms, and 1,700 for
10 the four-bedrooms.

11 Lastly, I just wanted to talk about the
12 Section 8. Normally, when there is a Section 8 contract
13 with CalHFA projects, you'll see a 30-year first mortgage
14 and then a ten-year second mortgage based on the
15 Section 8 increment rents. On this project, we are
16 requesting approval for, with just one ten-year loan
17 because the loan size is just \$1.6 million that they're
18 requesting. So we are relying on Section 8 rents to
19 repay the first mortgage.

20 On this project, we have a commitment from the
21 Oakland Housing Authority for 18 project-based vouchers
22 for a ten-year term. We will require that the agreement
23 to enter into the Housing Assistance Payment contract be
24 signed before the construction loan closes and the HAP
25 contract will be signed before the permanent loan closes.

Board of Directors Meeting held on March 9, 2006

1 The underwriting rents that I used on this
2 project are lower than the contract rents that I've
3 received from the Housing Authority, just because I
4 wanted to be conservative on this.

5 Actually, the contract rents are 1,285 for the
6 two-bedrooms, 1,650 for the three-bedrooms. The
7 underwriting rents I used were 1,200 and 1,650.

8 I also did not trend the Section 8 income up at
9 all, so it's flat over the whole ten-year term.

10 And lastly, there's a \$61,800 transitional
11 reserve in the event the Section 8 rents go down at all
12 during the ten-year term. We have that available.

13 The last thing I wanted to discuss was the high
14 cost per unit on this project. It's \$418,000 per unit.
15 There are several reasons for that. This is an urban
16 infill site, so the number of units they were able to
17 construct and spread their costs over was fixed over
18 36 units.

19 Secondly, the rear of the project abuts that
20 historic Cohen-Bray House. As a result, the building
21 envelope was forced to step down at the rear of the site
22 from five stories, to three stories, and then two
23 stories, as you saw on the floor plans.

24 Third, in order to satisfy abutter concerns and
25 the local planning board, the building is designed with a

Board of Directors Meeting held on March 9, 2006

1 commercial facade on the front and a residential facade
2 on the rear, which costs more to construct.

3 Finally, the lower floors of the project will
4 house the Native American Health Center, a full-service
5 health center. And the use of this space by the health
6 center requires additional concrete and waterproofing of
7 the slab between the residential and clinic portions of
8 the building.

9 MS. WHITTALL-SCHERFEE: And with that, we'd be
10 happy to answer any questions. And we're requesting
11 approval of Seven Directions.

12 ACTING CHAIR SHINE: The security for the first
13 trust deed in the amount of \$1.6 million will be the
14 residential portion of this project.

15 Is there going to be a recorded air space map or
16 some means by which you can get title insurance to ensure
17 that you have something to foreclose on, if you have to?

18 MS. ILVONEN: Yes.

19 MS. WHITTALL-SCHERFEE: I don't know.

20 MS. ILVONEN: Yes.

21 ACTING CHAIR SHINE: So those different-colored
22 areas were overall air spaces.

23 Are the individual units of the residential site
24 also air-spaced by unit, or is it air spaced just by the
25 envelope?

Board of Directors Meeting held on March 9, 2006

1 MS. ILVONEN: No. There will be two parcels:
2 A residential parcel, which will include a portion of the
3 land, as well as the portions of the building that are
4 residential-related, and a commercial parcel, which will
5 include a portion of the land and the commercial portions
6 of the building.

7 MS. WHITTALL-SCHERFEE: And our financing is
8 only on the residential portion of the building. The
9 financing for the health center is from another source.

10 ACTING CHAIR SHINE: So the source of my
11 question was, that being the case, can we -- are we
12 comfortable that we can carve out the security for the
13 note and deed of trust that we have?

14 MS. ILVONEN: Yes.

15 ACTING CHAIR SHINE: So that if you have to
16 foreclose, you have something to foreclosure on that
17 would --

18 MS. ILVONEN: We've actually been in discussions
19 with Nicole Slaton from CalHFA, and Tom --

20 MS. WHITTALL-SCHERFEE: She's in our legal
21 department.

22 MS. ILVONEN: -- in our Legal Department, Tom,
23 and the borrower's attorney about exactly how this would
24 be finalized.

25 They're working on the tentative map right now.

Board of Directors Meeting held on March 9, 2006

1 We will have the final map before we record the
2 construction loan.

3 And we're also working on an inter-creditor
4 agreement.

5 ACTING CHAIR SHINE: So there will be an air
6 space map on record before we fund?

7 MS. WHITTALL-SCHERFEE: Yes.

8 ACTING CHAIR SHINE: Any other questions from
9 the Board?

10 MS. GALANTE: I'm very familiar with the area.
11 We actually are working on a project nearby. And I think
12 this is a great addition to the neighborhood and a lot of
13 interest in Oakland in revitalizing this particular
14 neighborhood, and EBALDC is a great sponsor. So I am
15 very supportive of the project.

16 I do have two questions. You say there's
17 18 project-based Section 8. And I am just trying to
18 understand that chart that was up there with the market
19 rate rents and the appraisal rents.

20 Is the CalHFA mortgage purely secured by the
21 Section 8 rents, or are we also relying on achieving --
22 and I'll just state my concern, which is I think these
23 60-percent rents, there's five or six of them, are at
24 or above market for the neighborhood. And, you know,
25 I didn't quite catch all your appraisal rents versus --

Board of Directors Meeting held on March 9, 2006

1 the market-study rents clearly are off-base, there's no
2 doubt about that. And I didn't quite catch all the
3 appraisal rents. But these still seem fairly aggressive
4 to me.

5 MS. ILVONEN: The project rents -- I forgot to
6 mention that one. I did go over that slide.

7 MS. GALANTE: So these may be covered by
8 Section 8. I'm just not clear on how that's working.

9 MS. ILVONEN: The project rents did not include
10 the Section 8 rents. They just included the 30 to
11 60 percent rents that are being charged to the tenants.

12 The Section 8 rents are 1,250 for the
13 two-bedrooms and 1,650 for the three-bedrooms, and that
14 was not on the chart. The cash flow relevance on both
15 the rents from the 30 to 60 percent AMI units, as well as
16 the Section 8 increment. And the project rents are
17 between 40 and 89 percent of the appraised market rents.

18 Did that answer your question?

19 MS. GALANTE: Yes.

20 MS. ILVONEN: Yes.

21 MS. GALANTE: We're relying on these rents.

22 So let me ask another question then. It looked
23 like there's a really high hard-cost contingency,
24 soft-cost contingency. And I assume the project hasn't
25 been bid yet, and trying to be conservative about pricing

Board of Directors Meeting held on March 9, 2006

1 going up.

2 If there is savings, if we don't -- if they
3 don't use all that contingency, can some of that be used
4 to lower some of those 60-percent rents?

5 MS. ILVONEN: Well, actually, okay, there's a
6 couple things. One, at the time this Board package was
7 sent out, we didn't have bids from the investor, either.

8 And the investor bids have come in higher than were
9 shown on this board write-up. So I am expecting that the
10 permanent loan will probably go down.

11 I don't know what an EBALDC will do with the
12 60 percent rents. We haven't talked about that at all.
13 But I expect that CalHFA's final loan on this will be
14 lower than 1.6 million.

15 Also, you're correct, the project has not been
16 bid out yet. Although the design is further along than a
17 lot of other projects that I've taken to board, so it
18 is -- it's further along.

19 And the contractor has been selected and has
20 looked at the plans. So the numbers in the Board
21 presentation are hopefully pretty close to what the final
22 bids are going to be coming in at.

23 There is a large contingency just because
24 they're not final bids. So we wanted to have some room
25 in there.

Board of Directors Meeting held on March 9, 2006

1 MS. GALANTE: Okay, I'm very supportive of it.
2 I just had a little note of caution about those
3 60 percent rents. And I would encourage you all in
4 conversation with the sponsor to think about, you know,
5 if things get better, to think about trying to lower
6 those closer to 50 or 55 percent.

7 MS. PARKER: Yes, we'll take that back to our
8 sponsor and essentially see if that is -- if there is
9 some ability, when all the numbers come in, to see if
10 there's the ability to do something on the rent, reducing
11 the rent.

12 This is a great sponsor.

13 MS. GALANTE: Yes, I agree. I agree.

14 ACTING CHAIR SHINE: Comments from the Board?

15 *(No audible response)*

16 ACTING CHAIR SHINE: From the public?

17 *(No audible response)*

18 ACTING CHAIR SHINE: A motion?

19 MR. MORRIS: So moved.

20 MR. PAVAO: Second.

21 ACTING CHAIR SHINE: Call the roll.

22 MS. OJIMA: Mr. Pavao?

23 MR. PAVAO: Aye.

24 MS. OJIMA: Ms. Nevis?

25 MS. NEVIS: Aye.

Board of Directors Meeting held on March 9, 2006

1 MS. OJIMA: Ms. Galante?

2 MS. GALANTE: Aye.

3 MS. OJIMA: Mr. Augustine?

4 MR. AUGUSTINE: Aye.

5 MS. OJIMA: Mr. Morris?

6 MR. MORRIS: Aye.

7 MS. OJIMA: Mr. Shine?

8 ACTING CHAIR SHINE: Aye.

9 MS. OJIMA: Resolution 06-10 has been approved.

10 --o0o--

11 **Item 4. Discussion, recommendation and possible action**
12 **relative to final loan commitments for three**
13 **projects. (continued)**

14 **Resolution 06-11 (Villa Vasconcellos)**

15 ACTING CHAIR SHINE: Okay, we have a third
16 project in front of us today, 70 units in Walnut Creek.

17 MS. FRETZ-BROWN: Yes, sir. The third project
18 is Villa Vasconcellos in Walnut Creek; and Ed Gipson,
19 Chief of Multifamily Lending will be presenting.

20 MR. GIPSON: This is a final commitment request
21 for Villa Vasconcellos, a 70-unit new construction senior
22 project located in the City of Walnut Creek in
23 Contra Costa County. The sponsor is Resources for
24 Community Development. The borrower will be Villa
25 Vasconcellos LP, a California limited partnership.

Board of Directors Meeting held on March 9, 2006

1 This is a special-needs project. Twenty-five of
2 the 70 units will be for seniors who are homeless or have
3 mental or physical disabilities. There is a construction
4 loan in the amount of \$11,435,000, and they are
5 requesting a permanent mortgage of \$121,518. A very
6 small perm.

7 The construction will be tax-exempt. The
8 permanent is expected to be Agency funds, most likely
9 Housing Assistance Trust funds.

10 This project has received a large number of
11 residual receipt financing. The City of Walnut Creek has
12 provided CDBG funds, RDA funds in lieu of fee funds, if
13 you will. Contra Costa County is providing HOME
14 financing and HOPWA financing. In addition, it has AHP.
15 HCD has provided MHP financing.

16 And with that, I'll let Kathy provide us
17 additional details about the project.

18 MS. WEREMIUK: Good morning. I'm Kathy
19 Weremiuk, and I'm pleased to be bringing this project to
20 you.

21 Resources for Community Development is a sponsor
22 we've worked with many times. They have an emphasis on
23 providing service-enriched housing. In the Bay Area,
24 they currently have 379 port of service units in
25 operation, and they have another 58 in construction.

Board of Directors Meeting held on March 9, 2006

1 The property is in Walnut Creek. It's 15 miles
2 north of downtown Oakland. It's a bedroom community.

3 The project itself is on the junction of Geary
4 Boulevard and Powell Avenue. It's adjacent to the
5 I-680 freeway, about two blocks from it. And this is
6 North Main Street. It's a major road that runs two miles
7 to the south. It will go under -- back under the 680 and
8 turn up in downtown Walnut Creek, which has tremendous
9 facilities for rents in the residents in the town center.

10 It's close to the Pleasant Hill -- a third of a
11 mile from the Pleasant Hill Town Center and BART station.

12 There is a bus stop on the corner of North Main and
13 Geary, providing transportation for the seniors.

14 The general character of the neighborhood is
15 very stable residential.

16 Adjacent to the property, there are some
17 commercial uses. Across the street, there is a vacant
18 commercial parcel that had been a food co-op at some
19 point. It will be redeveloped, although I believe there
20 are some environmental issues on it that will delay the
21 redevelopment of that parcel.

22 There is a gas station and a fast-food outlet --
23 McDonald's or Burger King, I can't remember which -- on
24 North Main. And then the main entry to the project is
25 off of Powell, and it will be through the residential

Board of Directors Meeting held on March 9, 2006

1 portion of the neighborhood.

2 The project itself currently is -- and you'll
3 see -- I was saying what it currently is. It's currently
4 a vacant lot.

5 At the time this photo was taken, it was an
6 abandoned Alzheimer's unit that was in the process of
7 demolition. It has been abandoned for several years.
8 And there are no relocation issues associated with the
9 site.

10 The site had a clean Phase I. The building
11 itself had some asbestos that was in the existing
12 building.

13 We will require that all of that asbestos be
14 abated appropriately and removed appropriately at the
15 time that we take down the construction loan.

16 The only other issue that came up on the
17 property was noise from the I-60 and also from Geary
18 because it's a major arterial. And the remediation is
19 some soundproofing of the walls and windows on the
20 commercial-facing portions of the building. And that's
21 been built into the building design -- the proposed
22 design.

23 On the site itself -- and I'll show it later on
24 the site plan -- this is Powell. The entry will be
25 through Powell. It will be a gated entry for security,

Board of Directors Meeting held on March 9, 2006

1 although the neighborhood is very secure, and it doesn't
2 necessarily require gating.

3 The site is, as you can see, irregular, and it's
4 about a 1.4 acres.

5 This is a front view on it. There's some
6 elevation issues. The site slopes in several directions.

7 I'm sorry, the slide is kind of dark; but I'll just --

8 This is looking across. And it's, again,
9 showing the elevation. This is the vacant parcel. This
10 would be the roofline of the abandoned co-op across this
11 street.

12 This is some of the commercial that's adjacent
13 on Powell Street.

14 The architect is Van Meter Williams Pollack.
15 We've worked with them before. They're terrific. They
16 did the Fremont Oaks special-needs project for
17 hearing-impaired seniors. I thought that project turned
18 out to be more beautiful than any project that I have
19 worked on in the years that I've been with the Agency.

20 This is the front of Geary. Although it is a
21 street frontage, the main entrance for the residents will
22 be from behind. And they've dealt with some of the
23 elevation issues on the property. There's sloping --
24 they've dealt with some of the sloping in the front by
25 putting walkways in on the area of the project that abuts

Board of Directors Meeting held on March 9, 2006

1 the commercial -- North Main and commercial areas.

2 The building will be three-story. It will
3 step down to a two-story building as you get to the
4 residential, the area of the site that has residential
5 abutments.

6 The architect took some renderings and some
7 photos of a model they developed to show us some of the
8 detailing we anticipate seeing: awnings over cornered
9 windows, recessed windows, parapet, overhangs, nice
10 detailing in the stucco. It will be a stucco building
11 with some wood siding. And it has two interior
12 courtyards, a fairly attractive interior lobby.

13 This is the site plan for the building. It's
14 built around two interior courtyards for the senior
15 residents. Most of the units are off of double-loaded
16 corridors.

17 The residents will be entering through the
18 community section of the building here (pointing).
19 There's a very large community room and kitchen and a
20 very extensive supportive service base, five offices for
21 services and management.

22 Built into the project is a coordinator
23 position. Half of that position will be funded through
24 the operation of the project. The remainder will be
25 funded through fund-raising.

Board of Directors Meeting held on March 9, 2006

1 The service provider is Pittsburg Preschool
2 Community Council. It sounds like a strange name for a
3 senior project; but they, in fact, started as a
4 preschool, expanded. And they're doing other senior
5 supportive housing projects with RCD currently.

6 They have joined forces with the County Aging
7 and Adult Services Group, the Health and Homeless Service
8 programs, and a group called New Connections, so that
9 they'll be providing, through those connections with
10 other agencies, mental health services, medical case
11 management, crisis management, and substance abuse
12 assistance for the residents.

13 The services will be available to all
14 69 residents in the building. Not just for the 24 units
15 that are getting supportive services, but the services
16 will be more intense for the supportive services
17 residents.

18 Because of the very, very small size of the
19 permanent loan, we have been talking with HCD staff; and
20 we think that it's more appropriate for HCD, who has a
21 larger loan, to do most of the monitoring on this
22 project. And so you'll see a scaled-back management plan
23 for Villa Vasconcellos because we have only a \$120,000
24 permanent loan. HCD would monitor placement reserves.
25 And also we'll follow their service plan recommendations

Board of Directors Meeting held on March 9, 2006

1 and not add any additional recommendations from the
2 Agency.

3 Because it's a senior building, there will be a
4 longer lease-up period. There is a small reserve for
5 rent-up.

6 The units -- 35 percent of the units will be the
7 20 and 35 percent units. Those will be for the residents
8 that need supportive services. We anticipate those will
9 lease up in two months.

10 There are 44 units that are 50 percent AMI.
11 They're at \$739. They're about 75 percent of market.
12 And those units, there will be a longer lease-up period.

13 There are no subsidies for this project at this
14 point in time, in part, because they're just not
15 available in Contra Costa County right now. There may
16 be some Shelter Plus Care available later on; and if
17 there is Shelter Plus Care available later on, you may
18 see a small increase in our permanent loan.

19 With that, I'll entertain any questions that you
20 have.

21 Thank you.

22 ACTING CHAIR SHINE: From the Board, comments,
23 questions, concerns?

24 *(No audible response)*

25 ACTING CHAIR SHINE: I have just two minor

Board of Directors Meeting held on March 9, 2006

1 questions, and it had to do with mathematics. You know
2 what I'm going to say.

3 MR. GIPSON: I'm guessing.

4 ACTING CHAIR SHINE: We have 500 85 square-foot
5 units, and if you do the math, that adds up to 42,000;
6 and yet we're building 60,000 feet. Is the common area
7 18,000 feet?

8 MS. WEREMIUK: There is an extensive common area
9 in the building. But I'm not sure, and I'd have to go
10 back.

11 ACTING CHAIR SHINE: So 30 percent of the
12 project that we're building is common area?

13 If that sounds like the deal, that's the deal.
14 I just wanted to know.

15 MS. WEREMIUK: They're double -- it may be the
16 counting of the double-loaded corridors, and also we may
17 have counted, when we did that, the two interior
18 courtyards. And I think that's something that we would
19 have to go back to the plans and do a second takeoff on
20 it.

21 ACTING CHAIR SHINE: It doesn't change the
22 project.

23 MS. WEREMIUK: Right.

24 ACTING CHAIR SHINE: I was just curious.

25 The only other comment that I have, or question,

Board of Directors Meeting held on March 9, 2006

1 is under use of funds of new construction, you had a
2 construction contract line item for 9.4 million. That's
3 a duplicate of the other costs in there. Otherwise, it
4 adds up kind of funny.

5 MS. WEREMIUK: Let me take a quick look at that.

6 MS. PARKER: It's at page 201, Kathy.

7 ACTING CHAIR SHINE: The seventh item down, it
8 says --

9 MS. WEREMIUK: Oh, yes, it is a duplicate.

10 ACTING CHAIR SHINE: That's a non-add --

11 MS. WEREMIUK: It's a mistake. It's just a --
12 we take our -- it's just a total. We take a reserve off
13 of that total cost, absent the utility and test
14 inspections.

15 ACTING CHAIR SHINE: So your contract is going
16 to be \$9.4 million, even though the work may be less or
17 more than the line items?

18 MS. WEREMIUK: Right.

19 ACTING CHAIR SHINE: That's fine.

20 Any other comments from the Board?

21 *(No audible response)*

22 ACTING CHAIR SHINE: From the public?

23 *(No audible response)*

24 MS. WEREMIUK: The project is pretty far along,
25 too, in terms of the numbers. These takeoffs were done

Board of Directors Meeting held on March 9, 2006

1 at 60 percent completion.

2 Right now, they're going in for permits. I
3 think they'll be filing permits next week. We do expect
4 an upgrade and a new bid on 100 percent complete
5 drawings. But the number is fairly good at this point in
6 time.

7 ACTING CHAIR SHINE: Good.

8 If there's no --

9 MS. GALANTE: I just want to comment.

10 This is a fabulous location. And then all the
11 resources they've been able to pull together is pretty
12 impressive as well to take this on. So I think it's
13 great.

14 ACTING CHAIR SHINE: Okay, there being no
15 comments, do I hear a motion?

16 MS. GALANTE: I move.

17 ACTING CHAIR SHINE: Second?

18 MR. AUGUSTINE: Second.

19 ACTING CHAIR SHINE: Okay.

20 Call the roll.

21 MS. OJIMA: Mr. Pavao?

22 MR. PAVAO: Aye.

23 MS. OJIMA: Ms. Nevis?

24 MS. NEVIS: Aye.

25 MS. OJIMA: Ms. Galante?

Board of Directors Meeting held on March 9, 2006

1 MS. GALANTE: Aye.

2 MS. OJIMA: Mr. Augustine?

3 MR. AUGUSTINE: Aye.

4 MS. OJIMA: Mr. Morris?

5 MR. MORRIS: Aye.

6 MS. OJIMA: Mr. Shine?

7 ACTING CHAIR SHINE: Aye.

8 MS. OJIMA: Resolution 06-11 has been approved.

9 --o0o--

10 **Item 5. Update on Bay Area Housing Plan**

11 ACTING CHAIR SHINE: Okay, that being the case,
12 we now want to have a little discussion, an update on the
13 Bay Area Housing Plan.

14 MS. PARKER: Edwin and Kathy are the primaries.

15 MR. GIPSON: We're going to provide an update to
16 the Bay Area Housing Plan. We've discussed it many
17 times, and we have been before the Board twice for
18 approval now, up to \$45 million, and rightfully so.
19 We're providing you a progress update on where we are
20 today and a few of the things that have happened and a
21 few of the surprises along the way. Although those
22 aren't great, they took longer than expected. And I
23 think that's really what the key is. And I'll let Kathy
24 go into further detail in explaining where we are and
25 what we expect to have.

Board of Directors Meeting held on March 9, 2006

1 But I'll just add, we do have a handout in front
2 of you. The cover page says "BAHP Purchase Agreement
3 Log." It's just a little handout. It does point out
4 some of the projects that have been -- sites identified
5 as some other things.

6 And with that, I'll let Kathy Weremiuk elaborate
7 further.

8 MS. WEREMIUK: Hi. In January, when we came
9 before the Board and asked you for an additional
10 permanent loan commitment of up to 45 million and an
11 additional preliminary commitment taking the total
12 financing up to 120 million, we fully anticipated that
13 we would be through the facilities closing at this point
14 in time. We are not.

15 We brought that project to the Board so that the
16 Agency wouldn't be the party that held back the ability
17 of the master developer, DDS, and the regional centers to
18 meet the Agnews closing deadlines of December 2007, which
19 had been set by the Legislature.

20 The reason that it really did not happen is the
21 incredible complexity of the project and of the closing
22 process that we're going through. It's new ground. It's
23 new ground for all of us.

24 The Agency -- through the Agency and with the
25 help of Morgan Jones from McDonough, Holland & Allen,

Board of Directors Meeting held on March 9, 2006

1 have developed more than 30 new loan documents, some of
2 them completely from scratch, that are out and being
3 circulated for comments from Bank of America, the three
4 regional centers, the three nonprofits, the master
5 developer DDS, and the attorneys for the syndicate Bank
6 of America has put together to participate in the
7 project.

8 Some of the documents are almost at
9 finalization; some are still waiting for comment. And
10 that's only our set of documentation. B of A has its
11 loan docs and the loan purchase agreement. The regional
12 centers have all the Bay Area Housing Plan docs which
13 need to be updated. Some needed to be rewritten.
14 They have agreements with the NPOs. DDS had contract
15 language, as well as several legal opinions that we
16 needed.

17 We are close to finalization on everything that
18 has to do with the Department of Developmental Services,
19 and fairly far along on the work that we're doing with
20 Bank of America.

21 Our current expectation on this is that the
22 closing will occur at the end of this month or the
23 beginning of April. And there will be two closings that
24 will occur. It will be the Bank of America facilities
25 closing, which would mean essentially approval of every

Board of Directors Meeting held on March 9, 2006

1 document that's going to be involved in the transaction,
2 all the way through, from the beginning to our loan
3 purchase -- or purchase of the 72 loans over the next two
4 and a half years.

5 And there will also be a syndication closing,
6 with the several banks that are participating in the
7 syndication by assignment that Bank of America has put
8 together for this process. I think they've identified --
9 Gabriel Speyer is here from Bank of America, and I think
10 they've identified all those banks, and they've got their
11 documents ready to go out to them in almost-final form on
12 Friday.

13 Through this process, we have really not changed
14 our term sheet; but I would say crystallized a range of
15 issues that had to be dealt with, both in terms of what
16 the loan purchase would look like and anticipating
17 transactions on properties we've never seen two years
18 hence, to crystallizing exactly what would happen with
19 the sale of our bonds, working through all of the bond
20 issues, with Bond Counsel and our Finance Department,
21 working through a myriad of legal issues with our Legal
22 Department, billing issues with our Accounting
23 Department, and how we would handle the asset management
24 of this, as well as working through what kind of scope of
25 work master design guidelines we would get from the

Board of Directors Meeting held on March 9, 2006

1 master developer of the project.

2 We're close. It's a lot to pull together. And
3 I think we have been working full-time and working hard.

4 We wish we were done. I know I do.

5 The master developer, as he promised at the last
6 meeting, has continued to go out and look for properties.

7 They've surfaced 20 -- or 19 properties that they could
8 have bought. Ten they lost because of the delays in the
9 closing. They made offers on nine. They have two under
10 contract.

11 The surprise that they have found is that,
12 despite what the newspapers say, the real estate market
13 is not quiet. They've lost a couple of properties on
14 overbids and not being able to move as fast as the
15 sellers wanted them to move.

16 There are still five that are pending. They
17 also found they lost some because they hadn't coordinated
18 all of the signatures they needed from the Regional
19 Center steering committee, and how they got that whole
20 process working, they've perfected that as they've been
21 going along.

22 Their offers are, at this point, with funds that
23 are refundable because they haven't put hard money down.

24 They will, as soon as the close takes place. And we
25 anticipate that as the facility's close happens, we will

Board of Directors Meeting held on March 9, 2006

1 probably have properties that we'll be taking official
2 action on within 10 to 20 days after that facility's
3 closing.

4 The material that I provided for you was a
5 tracking sheet from the master developer on the
6 properties they've identified. I wanted to let you know
7 that they have been working on this, our term sheet, and
8 how that's developed.

9 And then a checklist -- I didn't give you the
10 documents, but the 108 steps in our closing checklist
11 that would take us through the facility's closing
12 process, all the way through the steps that we would take
13 with Bank of America agreeing to add the property to
14 collateral and acquisition, what we would need for that
15 at the point at which we approved the plans and specs,
16 which would be before the first construction draw. The
17 point that we agree that we will take down the loan when
18 it has stabilized and everything is set; and we agree
19 that we'll buy the loan within 180 days, and then what
20 our bond steps would be and what closing would look like.

21 Each of those steps represents documents,
22 thoughts, and work that we've been putting into it.

23 We'd welcome any questions.

24 ACTING CHAIR SHINE: Huge job. Good show.

25 Any comments or questions from the Board?

Board of Directors Meeting held on March 9, 2006

1 MS. PARKER: Mr. Chairman, I know that we have
2 some of our colleagues from Bank of America that are
3 here. I just want to make sure that we recognize Garrett
4 Bell is here. I don't know if anybody else on your team
5 is.

6 MR. GIPSON: Yes. Gabriel Speyer is here today
7 from Bank of America.

8 MS. PARKER. If you would stand up.

9 MR. GIPSON: And Morgan Jones from McDonough,
10 Holland & Allen, our outside counsel, who has been
11 working diligently.

12 I will say, it has been a monstrous effort,
13 without a doubt. I'm very proud of the team and
14 everybody who has put stuff into it to move a great deal
15 of the way. Because you can take a look at that
16 checklist. And rest assured, there will be a few more
17 items on it, without a doubt. But this whole process, we
18 are trying to be very careful, concerned; and we are
19 trying to give them what they need in a timely manner.

20 All parties have different understandings and
21 different expectations in certain areas, certain groups
22 who we are working with are not familiar with real estate
23 as well, so making sure they have the appropriate
24 counsels, and working with them and working through the
25 details.

Board of Directors Meeting held on March 9, 2006

1 MS. PARKER: Is anyone here from the Department
2 of Developmental Services?

3 MR. GIPSON: I don't believe I saw anybody
4 today.

5 MS. PARKER: That's the other leg of the stool
6 that brings in huge complexities: the Department of
7 Developmental Services and the regional centers.

8 MR. GIPSON: And the regional centers.

9 MS. PARKER: So it is many cats to herd. I say
10 that with great affection.

11 MS. WEREMIUK: It's also the Department of
12 Health Services. I mean, their Department of Social
13 Services, we've been in discussions not just with DDS,
14 but a range of parties as we've been doing this. But
15 DDS has been incredibly helpful and gracious through the
16 process, and really has been trying to facilitate it from
17 their side.

18 ACTING CHAIR SHINE: Does anybody in the public
19 want to say anything, ask any questions or make any
20 statements or comments?

21 MR. SPEYER: I'll echo what Kathy said regarding
22 the complexity of the project.

23 Thank you.

24 ACTING CHAIR SHINE: It is not a small
25 checklist.

Board of Directors Meeting held on March 9, 2006

1 MS. GALANTE: We have an expression that says,
2 "If it were easy, someone else would have done it by
3 now."

4 ACTING CHAIR SHINE: That being the case --

5 MS. PARKER: This is an information item only,
6 Mr. Chairman. There is no action to be taken. Just
7 given the significance of this, we believe it's really
8 important to continue to give you information at every
9 Board meeting about where we are at in this process.

10 We'll be chatting a little bit more about it
11 when we go through our business plan update because --
12 our concept business plan -- because, obviously, it will
13 fit into the Agency's production goals for the next year.

14 ACTING CHAIR SHINE: That being the case, let's
15 take a 15-minute break.

16 (A recess was taken from 10:36 a.m.
17 to 10:47 a.m.)

18 MS. PARKER: The majority of staff here are
19 really from the Agency, because we've had the meeting
20 in Sacramento, we try to have as many of the staff come
21 and be able to participate and see what an actual Board
22 meeting is like, see the Board member, see the
23 decision-making process that you go through. So that's
24 why there's considerably more people in the audience than
25 there would normally be if we were in the Bay Area, if we

Board of Directors Meeting held on March 9, 2006

1 were in Los Angeles.

2 ACTING CHAIR SHINE: Good.

3 MS. PARKER: So, Ken, do you want to come up and
4 introduce these PSAs?

5 Ken Giebel, our Director of Marketing.

6 MR. GIEBEL: Just a couple of words on this --
7 good morning, by the way.

8 About three years, we made some PSAs, and cut it
9 together from some footage we had shot for a video. One
10 of our initiatives this year was to redo the PSAs,
11 humanize them. The people you are going to see -- and I
12 will let Evan talk about this a little bit -- this is
13 Evan Gerberding, our Assistant Director of Marketing.
14 And Evan is our video person. She comes from TV. So
15 these are Evan's work, along with our ad agency.

16 And with that, Evan, why don't you explain what
17 we're attempting to do here? And I think we've been very
18 successful, at a very small cost.

19 MS. GERBERDING: The intent was to show real
20 borrowers. These are actual borrowers in all cases but
21 one. And they're real stories. So we're trying to be as
22 authentic as we possibly can here. And I think that
23 you'll see that they are very genuine.

24 We have four 30-second TV spots. Two are
25 general market, homeownership spots. One is the same in

Board of Directors Meeting held on March 9, 2006

1 Spanish. And then we also have one that focuses on what
2 our Extra-Credit Teacher Program is. We're also going to
3 air 60-second radio spots as well.

4 MR. GIEBEL: Just one other thing to let you
5 know. These are PSA spots. Typically, they're run at
6 the stations whenever they feel like it.

7 MS. GERBERDING: Three o'clock in the morning.

8 MR. GIEBEL: Whenever they have excess air time.

9 But we are working with the California Broadcast
10 Association, and they have a special program where they
11 buy -- they position it as a PSA that stations have to
12 run under the federal laws; but they inventory and
13 actually buy the excess inventory on radio and TV with
14 138 stations across the state. And at a very nominal
15 cost, we can buy this air time in specific markets, and
16 ensure that these are run from 6:00 in the morning to --
17 what is it, midnight?

18 MS. GERBERDING: From 6:00 a.m. to midnight.

19 MR. GIEBEL: Midnight.

20 MS. GERBERDING: And many end up in prime time,
21 believe it or not.

22 MR. GIEBEL: So it's excess inventory, that they
23 now get the inventory under their -- if you sign up with
24 them, and all the independent stations are.

25 So we plan on running these in the spring. The

Board of Directors Meeting held on March 9, 2006

1 homeownership ones will probably sit on the ECTP one, the
2 Extra Credit Teachers Program, a little bit longer.

3 Okay.

4 **(Public service announcements played as follows:**

5 *"Ten years ago Matthew Nichols*
6 *found this used guitar in a small*
7 *music shop. He spent days repairing*
8 *it before it would play. And while*
9 *he worked, Matthew dreamed of someday*
10 *owning a home of his own and fixing*
11 *it up, too. But the rising cost of*
12 *homes in California seemed out of*
13 *reach, until he learned about the*
14 *California Housing Finance Agency.*
15 *They've helped Matthew and many*
16 *others become first-time homeowners.*

17 *"To find out how CalHFA can help*
18 *you, call us or visit our Web site."*

19 *--oOo--*

20 *"This photograph has never been*
21 *far from Kathryn and Philip Kay.*
22 *Even when they moved from across the*
23 *world, Kathryn insisted in holding it*
24 *in her lap during the trip. They*
25 *also held on to a dream that one day*

Board of Directors Meeting held on March 9, 2006

1 it would hang in a home of their own.
2 But the cost of housing in
3 California seemed out of reach, until
4 they learned about the California
5 Housing Finance Agency. They've
6 helped Kathryn and Philip and many
7 others become first-time homeowners.

8 "To find out how CalHFA can help
9 you, call us or visit our Web site."

10 --oOo--

11 "With a teacher's moderate
12 income, who can even dream of owning
13 a home in California? Thanks to
14 CalHFA, Rodney can. By taking
15 advantage of CalHFA's Extra Credit
16 Teacher Program, Rodney was able to
17 realize his dream of owning a home.
18 The California Housing Finance Agency
19 has helped nearly 1,200 California
20 teachers become first-time
21 homeowners.

22 "To find out how CalHFA can help
23 you, call us or visit our Web site.")

24 MS. GERBERDING: Now this last one you are about
25 to see is in Spanish, but we've added English subtitles

Board of Directors Meeting held on March 9, 2006

1 to it. This, of course, isn't going to air that way, but
2 just for your benefit, they're on there.

3 *(Public service announcement played in Spanish.)*

4 MR. GIEBEL: Thank you.

5 ACTING CHAIR SHINE: Nice. Very nice.

6 MS. PARKER: I want to make one other pitch for
7 our Marketing Department, and that is, they've been
8 working particularly on the Extra Credit Teacher Program,
9 and had a major breakthrough with the assistance of the
10 Treasurer's office in getting the CTA to waive an
11 original denial for us to be able to have our Extra
12 Credit Teacher Program marketed in competition with some
13 of their other vendors. So I really want to appreciate
14 and acknowledge the efforts of the Treasurer's office in
15 helping us with that program that I know is very
16 important to the Treasurer.

17 I'm going to swing around here and participate
18 in the presentation of our business plan.

19 MR. MORRIS: Just one question on the PSAs.

20 MS. PARKER: Good, yes.

21 MR. MORRIS: Are those going to be on the Web
22 site as well?

23 MS. GERBERDING: Yes.

24 MR. GIEBEL: Yes.

25 MR. MORRIS: And also, is it possible -- I think

Board of Directors Meeting held on March 9, 2006

1 the Governor's Web page probably gets the greatest amount
2 of hits.

3 Is there any way they will let us put those
4 on --

5 MR. GIEBEL: We'll have to ask them. But at the
6 very least, we should be able to get a link.

7 MR. MORRIS: Yes, that's what I mean, a link
8 from there.

9 MR. GIEBEL: Right. We're linked to HCD and
10 some of the others and TC&H.

11 MR. MORRIS: Okay, great.

12 --oOo--

13 **Item 6. Progress Report on Development of CalHFA**

14 **Five Year Business Plan**

15 MS. PARKER: It's still "good morning."

16 So we've tried -- every year in the March Board
17 meeting, we essentially start out the new fiscal year --
18 in January updating where we are and a business plan from
19 a midyear update. Then we come back in March, and we
20 essentially talk with you about a concept proposal for
21 the business plan to be adopted by the Board in May.
22 This is based on us having meetings with some focus
23 groups, some of our customers, to find out what's going
24 on in the market, what we think some of the major needs
25 are. And also us looking at our internal resources and

Board of Directors Meeting held on March 9, 2006

1 capacities, to see what we think we can stretch and
2 propose to the Board as a business plan that, once
3 adopted then, this becomes the instructions to the staff
4 of what our goals and missions are for the next upcoming
5 year; but also to our community, what our business plan
6 is for the next three to five years, so they can plan on
7 these resources and these lending programs being
8 available, if they can't have access or are working in
9 the middle of a deal now that may not come to fruition to
10 apply for our loan products for the next year or two.

11 So I am going to walk you through with the
12 assistance of the senior managers; but I think what I
13 wanted to start doing just for the first is, is to tell
14 you how we're going to do this presentation.

15 The first thing we're going to do is start off
16 by giving you an overview of the Housing Assistance Trust
17 funds for program initiatives. And that's really our
18 Agency's resources for us to have the maximum flexibility
19 of investments to further our mission and goals.

20 From that, once we set that stage, we're going
21 to talk about the production goals for Homeownership,
22 Mortgage Insurance, Multifamily, and other lending
23 programs; and then we're going to talk a little bit about
24 where we are on our Asset Management and our REO
25 properties, and talk with you about some of the

Board of Directors Meeting held on March 9, 2006

1 considerations that we also want you to be aware of in
2 order for us to meet what these concepts are, and may be
3 some impediments to meet those concepts.

4 So to begin with, I'm going to ask Bruce to
5 provide a segue between some of the discussions we've had
6 and last meetings, going through our financials, going
7 through the updates by Gene Slater on our assets and our
8 portfolio that bring us to what our recommendation is: of
9 using the Housing Assistance Trust funds that are on the
10 slide before you.

11 MR. GILBERTSON: Thank you, Terri.

12 Good morning. Unfortunately, I look at the
13 Board that's sitting in front of me today, and I don't
14 see many faces that participated last year in the
15 analysis that we did. We called it the resource
16 allocation study. There's a few of you; but some of the
17 Board members are new, and people simply weren't able to
18 attend some of the meetings. But we did contract with
19 CSG Advisors during 2005 to conduct what we refer to as a
20 "resource allocation study." We did this in conjunction
21 with an annual effort of running our consolidated cash
22 flows that we do for bond-rating agency purposes.

23 We shared the results of the resource allocation
24 study and the cash flow analysis with the Board at two
25 times during last year. There was an April special

Board of Directors Meeting held on March 9, 2006

1 session of the Board, and then as a part of the
2 July board meeting.

3 The good news is, of course, we passed even the
4 most stressful rating agency runs for our two primary
5 indentures. But what it did illustrate to us is that
6 there were some serious restrictions, if some of the most
7 stressful runs were to actually happen. And these are
8 situations where interest rates go to extreme levels, or
9 prepayments go to extreme levels. And what we came away
10 with from that exercise, is that we wouldn't be able to
11 withdraw large sums of monies from the indentures to pass
12 stressful environments in our two primary bond
13 indentures: the one we operate our single-family housing
14 program from and the Multifamily Program.

15 The second phase of that resource allocation
16 study was to model up the business plan that the Board
17 approved last May. So we took the annual production
18 levels and assumed that we would reach all of those
19 production levels. We would issue bonds accordingly.
20 We modeled that over a five-year period, using management
21 expectations. Not stressful expectations of interest
22 rate environments that we don't really foresee ever
23 happening or prepayment levels that we would ever foresee
24 happening.

25 So part of that, we used an amount of about

Board of Directors Meeting held on March 9, 2006

1 \$65 million from the Housing Assistance Trust to support
2 special program initiatives of the Agency, similar to
3 those that you see on the slide in front of you.

4 The expected case cash flow analysis, what that
5 pointed out to us is that over that five-year business
6 planning period, beginning in 2005, running to 2010,
7 continue to show positive growth of fund balances.
8 However, the growth was at a slower pace than what we had
9 realized historically within the Agency.

10 That analysis has not been updated since last
11 summer. I think we last looked at that in July.

12 We have since then seen financial statement
13 results as a part of the annual auditing process. And I
14 think that was brought before you in November. Operating
15 results were not robust, perhaps the lowest that this
16 agency has realized in a number of years. \$21 million of
17 net income.

18 With all of that as background, we felt that a
19 prudent management level of expenditure utilizing our
20 Housing Assistance Trust funds would, again, be a
21 \$65 million number.

22 MS. PARKER: I think the importance of this is,
23 in the past we have essentially talked with you about,
24 you know, production levels in these programs, but really
25 haven't brought into focus the utilization of the Housing

Board of Directors Meeting held on March 9, 2006

1 Assistance Trust funds. And at the end of the day, for
2 the Board, this is really your decision-making process,
3 because the production levels in those different programs
4 will fall out, depending on what you do here.

5 So we are -- and we're trying this last year to
6 discipline ourselves, and holding ourselves to the
7 \$65 million, so that we manage the amount of money that
8 we're taking out of our indentures on a planned stream;
9 that we don't use any one of any great amount in any
10 given one year, and then not have that in an upcoming
11 year, or more heavily rely on increased profitability
12 that may or may not come.

13 So what we're trying to do here is, given the
14 additional information that we have been able to do
15 through this analysis, looking at profitability and also
16 what we want to achieve from a public benefit stand, we
17 have come back and made our recommendations to you here.

18 And we will talk through, if the Board decides
19 to adopt this strategy and/or wants to make some changes
20 to it, what we think that that may mean from the
21 productions that will follow this.

22 So I am just going to go through and give you
23 some sense of what this actually means in the
24 productions.

25 We're proposing to have about \$35 million be

Board of Directors Meeting held on March 9, 2006

1 available for Down Payment Assistance.

2 Now, two years ago, the Agency spent almost
3 \$85 million of Housing Assistance Trust fund and Down
4 Payment Assistance to do about \$1.2 billion with
5 single-family production.

6 We decided that we just could not maintain
7 that amount of resources, of scarce Housing Assistance
8 Trust funds for Down Payment Assistance. And that's why
9 the last year we made some changes in some of the
10 single-family products that we did. We moved to an IO,
11 35-year loan product; and our regular 30-year product
12 being 100 percent loan, so that the Down Payment
13 Assistance or Prop. 46 could be on top of that.

14 But Agency funds for Down Payment Assistance
15 wouldn't be used to the extent that it was in the past.
16 So these -- we'll talk about what these are specifically
17 to be utilized in production in high-cost areas.

18 But we were able to discipline ourselves, and
19 even with that, increase our housing production. That
20 allowed us to be able to put more Housing Assistance
21 Trust funds into some of the programs in the Multifamily
22 area, which we started last year: Habitat For Humanity
23 programs. Continuing to fund our HELP program at a
24 \$20 million level. Continuing to have a special business
25 development program. And more importantly also, put a

Board of Directors Meeting held on March 9, 2006

1 \$10 million commitment in for funding for -- liquidity
2 funding for Homeless Projects. And that ties into the
3 Governor's proposal that was put in his May budget, and
4 adopted by the Legislature, for a Homeless Phase I
5 Initiative.

6 So we're building on that for the 2006-2007
7 level, going forward.

8 And if you see what we have proposed as far as
9 HAT budget commitments, it is to keep Down Payment
10 Assistance in single-family at about 35 million.

11 Our Self-Help Business Development -- or
12 Self-Help Business program at two and a half million, we
13 are proposing -- and we'll talk about this again when we
14 go through the individual ones -- is to create a new
15 subsidy program, or substitute program in Multifamily
16 lending, which is the AHP -- we'll talk about that -- to
17 maintain the commitment of \$5 million for Habitat.

18 To have a \$30 million locality program, half of
19 it being funded from HAT, the other half of it coming out
20 of Prop. 46 funds that we got legislation passed last
21 year to create this residential development loan program,
22 where we would use Prop. 46 funds to offer to, under this
23 proposal, localities for them to do homeownership kinds
24 of construction.

25 The portfolio management needs to reshore up

Board of Directors Meeting held on March 9, 2006

1 through some lending for some of our existing projects.
2 And we're proposing that at \$4 million.

3 The last column over here is what we are -- our
4 expected HAT utilization. And as you can see, that
5 numbering goes down to \$65 million. And when there are
6 variances between what we're proposing the budget to
7 contain and what we expect -- expecting utilization, it's
8 just, frankly, our best against, particularly for some of
9 these new programs, of what the utilization will actually
10 be. If we are surprised, we can handle it, we can manage
11 it; but we think it's important that the community know,
12 for example, that there's going to be \$10 million in this
13 new Multifamily lending program in order to create
14 additional business, see it by developers that this could
15 help projects pencil out. But the reality is that we
16 don't think we're going to have any more than about a
17 \$6 million demand next year.

18 So I'd be happy to answer any questions. But
19 we wanted to lay it out this way because, you know, this
20 is really, you know, the major decision-making point for
21 the Board.

22 MS. GALANTE: I just have some clarifying
23 questions.

24 You've got broken down between single-family
25 programs and Multifamily programs. But some of the

Board of Directors Meeting held on March 9, 2006

1 things listed under Multifamily programs are actually
2 going to Homeownership; correct? So it's -- is this
3 really kind of mortgage versus production? I mean,
4 Habitat For Humanity, and then you mentioned under the
5 Prop. 46 money, my sense was that some of that help was
6 for ownership, which I'm just trying to make sure I'm
7 understanding.

8 MS. PARKER: Right. I think as we go through
9 the slides, the reason why it's under Multifamily
10 programs is because the director of Multifamily
11 administers -- it really manages these programs.

12 MS. GALANTE: Great, great.

13 MS. PARKER: On our slide, they'll show up as
14 special lending programs.

15 MS. GALANTE: Great.

16 MS. PARKER: Good question.

17 Okay, I'm going to let that settle.

18 And let us go in, and we'll talk about the
19 programs specifically.

20 To walk us through Homeownership, Jerry Smart.

21 Jerry?

22 MR. SMART: Good morning.

23 In the Homeownership program, we're proposing to
24 set a significant goal for our first mortgage production.

25 It represents about a 25 percent increase over the

Board of Directors Meeting held on March 9, 2006

1 current fiscal year.

2 This year, our goal was 1.2 billion for
3 first-time home buyer lending; and we're proposing to
4 increase that to 1.5.

5 We're fairly confident that we'll be able to
6 achieve that with the support of the HAT Down payment
7 Assistance-funded funds, the 35 million, plus Prop. 46,
8 the four programs that we have there, will help support
9 the origination of those first mortgages.

10 And as coupled with our continuation of the
11 *interest only* PLUS program, since we introduced that last
12 March -- April, I think it was -- we have seen that
13 program increase to where it's now, roughly, about
14 38 percent and growing over our current portfolio. And
15 that's without our major originating lenders
16 participating. It's taking them some additional time to
17 come on board.

18 Wells Fargo, Countrywide, Chase just started
19 this last month. So once those major lenders
20 participate, we think that this will continue to grow
21 significantly.

22 We are also introducing the 40-year mortgage.
23 In fact, we issued a bulletin last Monday to introduce
24 this.

25 The lead time for programs in Homeownership

Board of Directors Meeting held on March 9, 2006

1 takes a while. And reservations that are taken today,
2 it's going to take 90 days before we see delivery on
3 those. We figure that our lenders are going to need at
4 least 30 to 60 days just to get their systems up to date
5 and ready to handle the program. So by the time all of
6 this kicks in, it will be the beginning of the fiscal
7 year.

8 And we think the 40-year, although it's not
9 going to be as sought after as I would imagine the IOP --
10 the *interest only* -- I think it will become a significant
11 part of our business going forward.

12 Homeownership will continue to evaluate and
13 introduce new loan products to meet market changes and
14 customer demand. For example, we're working with
15 Fannie Mae and other HFAs across the country -- Mass
16 Housing, to name one -- which we're developing standard
17 branded products, or standardized loan products, such as
18 the 40-year mortgage, so that can be utilized by HFAs
19 across the country. And we will continue to look at
20 that.

21 We'll continue to look at our current programs,
22 to see if we can -- if they need to be amended or
23 targeted to specific areas to improve productivity.

24 And we'll be implementing marketing and IT
25 enhancements to stimulate production. For example, we

Board of Directors Meeting held on March 9, 2006

1 are looking at developing -- or we are in the process of
2 developing a lead generation program. Currently, it's
3 going to be very similar to the CalPERS lead generation,
4 which will identify active loan officers, originators of
5 CalHFA loans; and try to refer them -- or give them
6 referrals -- loan referrals.

7 When we receive phone calls from interested home
8 buyers, we can refer them to their most active
9 participants, and turn those into real loans. Whereas,
10 if they just go out now, they go to our list of potential
11 lenders. And some of those, we'll never see again. They
12 get flipped into something that's probably less
13 beneficial.

14 So it's our hope that we set up this program,
15 and with the follow-through that we visualize with these
16 lenders, that we'll be able to turn these into potential
17 CalHFA loans.

18 And we're continuing with our Homeownership
19 origination project, to upgrade the loan reservation
20 system. It includes a better business practice process,
21 in which we'll analyze the current processes within
22 Homeownership, and look at outside -- other HFAs and
23 lenders to see what better business practices they have
24 that we can adopt to improve our productivity and
25 streamline our program.

Board of Directors Meeting held on March 9, 2006

1 So with that, that's --

2 MS. PARKER: Before I have you answer questions,
3 I'm going to also introduce Greg Carter, who is our
4 Interim Director of Mortgage Insurance.

5 And I think it's important for us to talk about
6 Mortgage Insurance and our first mortgage loan programs
7 together. Because, as Greg will tell you, these programs
8 are really going hand in hand.

9 So, Greg?

10 MR. CARTER: Yes, we see our role in this
11 business plan as actually supporting Homeownership's goal
12 of 1.5 billion. In order to do that, we have looked at
13 the history. In 2003, 12 percent of what we insured was
14 Homeownership product. 2004 it was about 26 percent. In
15 2005, 51 percent of our insurance was on Homeownership
16 product. And the trend is upward.

17 With the introduction of the new programs that
18 Jerry has talked about and about to roll out, we see that
19 we have to start to realign our resources to cope with
20 the production levels that Jerry is going to do,
21 translating into \$840 million a year in that fiscal year
22 for Mortgage Insurance.

23 So we need to be sure that our resources, both
24 financial resources are available, as well as our
25 physical resources: Can we handle that amount of

Board of Directors Meeting held on March 9, 2006

1 business?

2 And, obviously, we think we can; but these are
3 the things we're looking at.

4 We want to continue to participate in the CalHFA
5 loan program by offering low mortgage insurance premiums,
6 as well as other products, similar to the HomeOpeners
7 program, which is an unemployment insurance aspect of
8 that.

9 We also want to participate as much as we can
10 in helping promote and to train lenders on the CalHFA
11 products, and to be involved in the outreach events that
12 involve CalHFA, as well as insurance products.

13 MS. PARKER: And I think as Greg was saying, one
14 thing we did, we essentially looked at the kinds of
15 insurance products that we have had in the last five
16 years or so. Some of them have really declined in
17 production. One that is most notable is a partnership we
18 had with the state teachers' pension fund. And we had a
19 meeting with them recently, and said, as much as we would
20 like to, their -- they wanted to raise their sales price
21 limits and their income limits, which is really not our
22 goal, custom, or group. And it would have taken
23 resources available, away from us that we could be using
24 in matching with the CalHFA first mortgages.

25 So we really have gone through, to some extent,

Board of Directors Meeting held on March 9, 2006

1 a refocus of our capacity to better serve what we believe
2 is our targeted group.

3 So with that, if there are any questions on the
4 homeownership side, insurance side, we're prepared to
5 answer.

6 Mr. Morris?

7 MR. MORRIS: Yes, on the home mortgage products,
8 you said about 38 percent are the *interest only* PLUS
9 product. Maybe you can just go through your asset
10 allocation of how you envision where we see 1.5 billion
11 in new products this year. What would be the major loan
12 programs that you think would be the most successful,
13 or --

14 MR. SMART: Going forward, I would think that
15 the *interest only* PLUS would represent about 40 to
16 45 percent of our total loan production, of the 1.5.

17 The 30-year fixed-rate mortgage would
18 probably -- in this coming fiscal year -- represent about
19 45 percent as well, or maybe 50 percent, and the
20 remaining balance would be the new 40. That's, you know,
21 just --

22 MR. MORRIS: How will that work out?

23 MR. SMART: It's quite early right now to make
24 any intelligent guess as to what we're going to take in.

25 But I think it will probably be overall --

Board of Directors Meeting held on March 9, 2006

1 MR. MORRIS: So the *interest only* and the
2 30-year are about equal in popularity right now?

3 MR. SMART: I would say so, yes.

4 MS. PARKER: Okay, thank you both, gentlemen.

5 Let me introduce our Multifamily team and have
6 them come up and do their presentation on our Multifamily
7 production goals; and that will not only be Multifamily,
8 but also special lending.

9 MS. FRETZ-BROWN: Beverly Fretz-Brown, interim
10 director, Multifamily.

11 The production goals for next year were being
12 quite ambitious; and we'll fill you in, in terms of why
13 we think we can make it.

14 As you see there, the total production we're
15 hoping for is about 320 million; and that includes the
16 Bay Area Housing Plan, of those figures. But even with
17 or without the Bay Area Housing Plan, that represents
18 about a 38 percent increase over this year, over our
19 expected new final commitments.

20 As you recall from the midyear meeting, the
21 Multifamily division this year has been concentrating on
22 closings. And by the end of this fiscal year, we will
23 have closed approximately 450 million dollars' worth of
24 loans. It's been an incredible effort. It's three times
25 the number of closings of last year. And last year was

Enclosures

Board of Directors Meeting held on March 9, 2006

1 Assistance Trust funds. And at the end of the day, for
2 the Board, this is really your decision-making process,
3 because the production levels in those different programs
4 will fall out, depending on what you do here.

5 So we are -- and we're trying this last year to
6 discipline ourselves, and holding ourselves to the
7 \$65 million, so that we manage the amount of money that
8 we're taking out of our indentures on a planned stream;
9 that we don't use any one of any great amount in any
10 given one year, and then not have that in an upcoming
11 year, or more heavily rely on increased profitability
12 that may or may not come.

13 So what we're trying to do here is, given the
14 additional information that we have been able to do
15 through this analysis, looking at profitability and also
16 what we want to achieve from a public benefit stand, we
17 have come back and made our recommendations to you here.

18 And we will talk through, if the Board decides
19 to adopt this strategy and/or wants to make some changes
20 to it, what we think that that may mean from the
21 productions that will follow this.

22 So I am just going to go through and give you
23 some sense of what this actually means in the
24 productions.

25 We're proposing to have about \$35 million be

Board of Directors Meeting held on March 9, 2006

1 available for Down Payment Assistance.

2 Now, two years ago, the Agency spent almost
3 \$85 million of Housing Assistance Trust fund and Down
4 Payment Assistance to do about \$1.2 million with
5 single-family production.

6 We decided that we just could not maintain
7 that amount of resources, of scarce Housing Assistance
8 Trust funds for Down Payment Assistance. And that's why
9 the last year we made some changes in some of the
10 single-family products that we did. We moved to an IO,
11 35-year loan product; and our regular 30-year product
12 being 100 percent loan, so that the Down Payment
13 Assistance or Prop. 46 could be on top of that.

14 But Agency funds for Down Payment Assistance
15 wouldn't be used to the extent that it was in the past.
16 So these -- we'll talk about what these are specifically
17 to be utilized in production in high-cost areas.

18 But we were able to discipline ourselves, and
19 even with that, increase our housing production. That
20 allowed us to be able to put more Housing Assistance
21 Trust funds into some of the programs in the Multifamily
22 area, which we started last year: Habitat For Humanity
23 programs. Continuing to fund our HELP program at a
24 \$20 million level. Continuing to have a special business
25 development program. And more importantly also, put a

Board of Directors Meeting held on March 9, 2006

1 a refocus of our capacity to better serve what we believe
2 is our targeted group.

3 So with that, if there are any questions on the
4 homeownership side, insurance side, we're prepared to
5 answer.

6 Mr. Morris?

7 MR. MORRIS: Yes, on the home mortgage products,
8 you said about 38 percent are the *interest only* PLUS
9 product. Maybe you can just go through your asset
10 allocation of how you envision where we see 1.5 million
11 in new products this year. What would be the major loan
12 programs that you think would be the most successful,
13 or --

14 MR. SMART: Going forward, I would think that
15 the *interest only* PLUS would represent about 40 to
16 45 percent of our total loan production, of the 1.5.

17 The 30-year fixed-rate mortgage would
18 probably -- in this coming fiscal year -- represent about
19 45 percent as well, or maybe 50 percent, and the
20 remaining balance would be the new 40. That's, you know,
21 just --

22 MR. MORRIS: How will that work out?

23 MR. SMART: It's quite early right now to make
24 any intelligent guess as to what we're going to take in.

25 But I think it will probably be overall --

Board of Directors Meeting held on March 9, 2006

1 MR. MORRIS: So the *interest only* and the
2 30-year are about equal in popularity right now?

3 MR. SMART: I would say so, yes.

4 MS. PARKER: Okay, thank you both, gentlemen.

5 Let me introduce our Multifamily team and have
6 them come up and do their presentation on our Multifamily
7 production goals; and that will not only be Multifamily,
8 but also special lending.

9 MS. FRETZ-BROWN: Beverly Fretz-Brown, interim
10 director, Multifamily.

11 The production goals for next year were being
12 quite ambitious; and we'll fill you in, in terms of why
13 we think we can make it.

14 As you see there, the total production we're
15 hoping for is about 320 million; and that includes the
16 Bay Area Housing Plan, of those figures. But even with
17 or without the Bay Area Housing Plan, that represents
18 about a 38 percent increase over this year, over our
19 expected new final commitments.

20 As you recall from the midyear meeting, the
21 Multifamily division this year has been concentrating on
22 closings. And by the end of this fiscal year, we will
23 have closed approximately 450 million dollars' worth of
24 loans. It's been an incredible effort. It's three times
25 the number of closings of last year. And last year was

Board of Directors Meeting held on March 9, 2006

1 our highest closing.

2 So with a great concentration on closings, with
3 at least part of this year, a poor interest-rate market
4 for us, and with very, very significant competition from
5 the private market, particularly on the construction loan
6 side, we've had a real dip in our production. We want to
7 reverse that, and we're committed to reversing that. And
8 we believe the new products that we are proposing to you,
9 or at least giving you a heads-up that this is what we're
10 looking for, and coming forward for you in the business
11 plan in May, that we are confident that with these new
12 products and some internal changes and processing of the
13 Agency, we'll be able to get up to that loan production
14 expectation that's before you today.

15 The first new lending program we'd like to talk
16 about briefly is what we call our 30/15. And Ed Gipson
17 is going to describe that briefly.

18 MR. GIPSON: Yes, it's part of the new permanent
19 loan program. Basically, historically, we've had a
20 30-year amortization on our permanent loans with no right
21 to prepay. And more and more difficulties, the reality
22 is particularly with these tax credit deals, that after
23 you're 17, something has to be done to recapitalize the
24 project or get your equity investor out of the deal. And
25 so trying to meet the balance of both worlds, we've tried

Board of Directors Meeting held on March 9, 2006

1 to work through all the details to provide the 30-year
2 amortization, but prepayable after year 15. So that for
3 those who need to get out, now have the option and a way
4 to do so; and those who want to maintain their fixed-rate
5 mortgage for the life of the loan, they can now stay.
6 And there seems to be quite a bit of excitement about
7 that. So we try to meet the difficulties and provide the
8 flexibilities needed to the borrowers, and then maintain
9 our traditional rates.

10 The second piece that's right behind that -- and
11 I'll just tag right onto the -- is the architectural
12 review. We've had years and years in different
13 processes; but parts of the manual and things are rather
14 old now. So we are currently in the process of
15 identifying what is now important to us.

16 One of the things we're actually going to look
17 for and provide better and more clear detail to everyone
18 out there, is what those issues are. And the things that
19 aren't our issues, we're going to stop --

20 MS. FRETZ-BROWN: Reviewing.

21 MR. GIPSON: -- providing the review over those.

22 So that, let each group manage their piece; but just
23 focus on the pieces that are most important to us. And
24 in addition, as part of that, we're actually going to
25 reach out. So we're going to go through -- we're doing

Board of Directors Meeting held on March 9, 2006

1 our research with other HFAs and other groups out there.

2 We're talking to the architects who design these deals.

3 We'll start with architects who we know more familiarly
4 and are friendlier with, and we'll work with those who
5 have had issues in the past, to actually get their input.

6 In addition, we will talk to the engineers and we will
7 talk to the developers as we incorporate this scope. And
8 once we get all that down, as well as talking to our
9 internal staff -- and once we get all that down, we will
10 go out and talk about, you know, how we got here and what
11 this is all about and what we hope to accomplish by it;
12 and also help to provide basically a resource and an
13 understanding to those out there in the community. And
14 we see a great deal of Multifamily deals. A lot of
15 deals.

16 *(Jan Boel entered the room.)*

17 MR. GIPSON: And we have a great deal of
18 information about common things that happen to each of
19 these deals.

20 And so perhaps from all of this, you'll be able
21 to get the value input of things that will help build the
22 building for less money, avoid costly construction
23 errors, and have materials involved inside the project
24 that actually have a longer life, probably the same basic
25 costs as you would have had, anyway, but, actually,

Board of Directors Meeting held on March 9, 2006

1 providing operating efficiency. So we look at providing
2 a valuable resource.

3 MS. FRETZ-BROWN: Thanks. Predictability and
4 value are really the touchstones for the changes that
5 we're proposing in the architectural review process. And
6 as I mentioned before, this is a huge activity, and I
7 really commend the staff for taking it on with great
8 vigor.

9 The second new product that we are proposing, we
10 call -- really, for lack of a better term -- an AHP
11 substitute. But it really is that.

12 One of our nemeses in construction lending has
13 been the Agency's inability to access the Affordable
14 Housing Program funds of the Federal Home Loan Bank
15 System, and which puts us at a pretty significant
16 disadvantage in construction lending, so -- which is why
17 the AHP funds are typically brought in, for good reason.

18 We can't compete on a dollar to dollar,
19 forgivable-loan basis with the Federal Home Loan Bank's
20 program, but Laura will describe for you what we think we
21 can do to get ourselves to be more competitive in that
22 construction loan market.

23 MS. WHITTALL-SCHERFEE: I'd like to start by
24 saying that we hope to come up with a little bit snazzier
25 name than "AHP substitute." But it is very descriptive

Board of Directors Meeting held on March 9, 2006

1 of what we're actually trying to achieve.

2 We know that in addition to the changes that
3 Edwin already discussed, that one of the issues is we
4 need to come up with a program that is similar or
5 substitutes for AHP.

6 We're still working on the general parameters,
7 but some of the things that we're looking at include
8 becoming a residual receipt lender on the AHP program.
9 We feel that that's critical. We can't expect this loan
10 to be a second mortgage with fixed payments. So we're
11 looking at something that's along the lines of a
12 \$5,000-per-unit loan, up to perhaps a \$375,000 cap with
13 an interest rate, unlike AHP, of approximately 3 percent.

14 That would be using HAT funds, as we've talked about;
15 but we also have an opportunity to perhaps use Agency FAF
16 funds. And that will maybe help us make this rate a
17 little bit more competitive. The 3 percent seems to be
18 something that is achievable.

19 In addition, we would be a residual receipt
20 lender, and we would be a junior -- in a junior lien
21 position. We would step away from requiring that we be
22 senior; and we would just be repaid on a pro rata basis
23 using our residual receipt loan and comparing it to other
24 residual receipt lenders. And that is probably the lien
25 position that we would be ready to accept as well.

Board of Directors Meeting held on March 9, 2006

1 Whatever is commensurate with our dollar amount, compared
2 with everybody else.

3 The goal is to use these three changes to make
4 our construction lending program more attractive. And
5 even though I gave you parameters, like interest rates
6 and dollars per unit and anticipated maximums, we really
7 expect to come back to you in May with something a little
8 bit more concrete. Because one of the things that we're
9 doing is, we're talking and working with our Finance
10 Department, to make sure that while trying to create
11 programs that make us even more competitive, that we're
12 not walking away from money that we shouldn't be walking
13 away from.

14 If this -- it's a 30-year loan. It's
15 anticipated to be a 30-year loan; but it would tie in to
16 the permanent loan, in that it would be either 30 years
17 or paid when the permanent loan that we make is prepaid.

18 Because the expectation is, there will be a minimum
19 permanent loan amount that is required to take advantage
20 of this AHP substitute program.

21 MS. FRETZ-BROWN: So that's the balance that
22 we're still working at in terms of a significant
23 incentive, but still maintaining the Agency's
24 profitability in lending.

25 Thank you both.

Board of Directors Meeting held on March 9, 2006

1 And we're very hopeful. We've had a lot of
2 discussions with nonprofit and for-profit agencies, with
3 intermediaries and consultants; and we think that these
4 are two sound products.

5 Do you want me to start with the homeless stuff?
6 Or do you want to --

7 MS. PARKER: I'll do homeless.

8 I think, as I mentioned earlier on, I talked to,
9 several times, about the Governor's Homeless Initiative
10 Phase I. And clearly that's one that Judy Nevis is well
11 aware of because HCD is really the major partner with
12 CalHFA and the Department of Mental Health in
13 implementing this proposal with the use of Prop. 46
14 funds, MHP funds, and also through the Department of
15 Mental Health, some of their Prop. 63 funds.

16 In developing the Governor's budget going
17 forward, there was a discussion about trying to continue
18 the work in the area of homeless. And right now, the
19 homeless initiatives are really coordinated out of the
20 Governor's Office of Planning and Research. Jan Boel,
21 who is representing Sean Walsh today; and Sean has talked
22 about it at a couple of our Board meetings.

23 But there were some further discussions
24 about homeless programs, particularly because with the
25 passage of Prop. 63 in November of 2004, the father of

Board of Directors Meeting held on March 9, 2006

1 that initiative, Darrell Steinberg, has been talking at
2 the committees, oversight committees of Prop. 63 about
3 the utilization of Prop. 63 funds for creating permanent
4 housing for chronic mentally ill. And so we have had
5 some internal discussions between the Department of
6 Mental Health and the California Housing and Finance
7 Agency about the ability to see if we could produce some
8 kind of a model to take advantage of these funds. And a
9 proposal has been put together for consideration by the
10 Governor's office. And we're at that point in time for
11 the Governor's office to be making a decision about
12 whether or not to announce this initiative.

13 So I've put it down here because it certainly
14 would be a major workload and add to our production, but
15 also add to the degree of complexities and difficulties
16 of what the Agency would be trying to run and administer.

17 And, you know, some of that will fall into the
18 discussion of other considerations, at the end.

19 But I do want to let you all know that it is
20 something that's being talked about. And if it is likely
21 to occur, what I would propose to do at our next Board
22 meeting in May, is to -- we've thought about doing it
23 now -- but to ask Darrell Steinberg and our other
24 colleagues to actually come and chat a little bit about
25 it, because it would be really a fantastic initiative.

Board of Directors Meeting held on March 9, 2006

1 We're talking about the opportunity, if we're able to do
2 this, to create in the next 20 years over 10,000
3 permanent units of housing for chronically mentally ill,
4 homeless.

5 MS. FRETZ-BROWN: That's huge.

6 Okay, thanks.

7 That's hard to follow.

8 The Multifamily Division at CalHFA also
9 supervises a number of the special-lending programs that
10 are discussed in the slide.

11 The first one to this, obviously, is the
12 continuation of the HELP program. This is a loan
13 program, two localities, for a variety of low- and
14 moderate-income housing. Overwhelmingly, about
15 90 percent of those loans to localities go for rental
16 housing that are very low-income households.

17 Just briefly, to date, the HELP program has lent
18 about \$138 million to 97 different cities, counties,
19 redevelopment agencies, and housing authorities
20 throughout the state, which expect to produce 17,300
21 units. Again, 91 percent of them actually are
22 multifamily. Very affordable units.

23 It has been an extremely successful program.
24 We're looking forward to the repayments under that
25 program -- they are ten-year loans -- so that it can be

Board of Directors Meeting held on March 9, 2006

1 self-supporting in the future, versus sustainable --
2 self-sustainable, like I say, in the future.

3 So, clearly, we are very interested in
4 maintaining the volume of HELP activity, and are
5 proposing the business plan not be maintained at
6 50 million a year.

7 The second one, the Habitat for Humanity
8 program, was a brand-new one this year. We put out our
9 first notice of funding at the \$5 million level. And
10 this is a purchase program. We purchased seasoned
11 Habitat loans under some very favorable conditions, where
12 the local affiliate of Habitat International can
13 repurchase those loans. If something goes bad, they can
14 pay on those loans for a year before repurchase, or they
15 can find a substitute borrower who assumes the loans.

16 The Agency under this program would also do the
17 servicing for the local Habitat affiliate.

18 What this purchase program does, obviously, is
19 give the local affiliates capital that they typically
20 didn't have available. And so it's a very significant
21 part of any capital campaign.

22 In the first round of funding, we received loan
23 purchase requests for approximately 2 and a half million
24 dollars. We expected more. We are contacting other
25 affiliates. And for a variety of reasons, some wanted to

Board of Directors Meeting held on March 9, 2006

1 take a little more time in trying to figure out whether
2 and how much of the loans they would like to be available
3 for purchase. Others are really waiting until their
4 capital campaigns come in the future. So we think this
5 is a very good start.

6 It's an important partnership as well, with a
7 significant element of nonprofit community.

8 The third program is new. We talked a little
9 bit in the midyear board report, and that's the
10 Residential Development Lending program. This is one
11 where we're using 75 million of Prop. 46 funds that were
12 originally designated to CalHFA for Mortgage Insurance.
13 Actually, it was, I think, about 86 million; but
14 75 million basically was remaining. And it wasn't quite
15 working as one would anticipate.

16 So those funds could roll over into what we call
17 "Residential Development Loan Program." And they would
18 be for loans to stimulate ownership housing that's
19 affordable to low- to moderate-income folks in urban
20 infill areas.

21 After a number of meetings and discussions with
22 housing developers, as well as with local government
23 officials, the program that we're considering -- and it
24 will come forward in the business plan in May -- is a
25 loan to localities patterned after the HELP program. The

Board of Directors Meeting held on March 9, 2006

1 maximum loan being somewhere around \$4 million, with a
2 four-year term. The purposes would be acquisition and
3 related predevelopment expenses. Again, ownership
4 housing, infill areas, it can be condominiums as well as
5 fee-simple properties. And there would have to be a
6 minimum percentage of those units in a development that
7 would be affordable to no more than 120 percent of area
8 median income.

9 And with that loan also would come a reservation
10 of our Down Payment Assistance funds. So our goal is to
11 make available \$10 million. Upon this program's approval
12 in May, our goal would be shortly thereafter, to make
13 available \$10 million by the end of May, the beginning
14 of June. And the program would be let out at the same
15 time as the HELP program, so that these two programs for
16 localities would basically be run -- would have parallel
17 tracks.

18 Again, as in the HELP program, we certainly
19 intend that these funds be revolving loan funds. And so
20 that ultimately our investment of HAT and Prop. 46 money
21 will revolve back and create a certain sustainability to
22 maintain these programs over time.

23 MS. PARKER: Just to add to what Bev is saying,
24 and to make sure that we foot and cross foot; we're
25 proposing a \$15 million level of the Residential

Board of Directors Meeting held on March 9, 2006

1 Development Loan Program, so that our programs to local
2 partnerships would be \$30 million, in totality.

3 MS. FRETZ-BROWN: Thanks.

4 MS. PARKER: Are there any questions for Bev on
5 any of the areas of Special Lending or Multifamily?

6 MS. NEVIS: I just had one question, and that is
7 the four-year term, is that the idea that then some other
8 financing will be found or --

9 MS. FRETZ-BROWN: Oh, absolutely. We -- the
10 conversations we've had with developers in localities is
11 that this up-front money with acquisition is the
12 toughest. And in many instances, the localities will put
13 in their money. Our money could help reimburse for some
14 of those costs, but basically it would keep those
15 projects moving more quickly. And so we see this for
16 acquisition and predevelopment. And it clearly would be
17 taken out --

18 MS. PARKER: The idea would be in that
19 particular case, that when the units are sold, they would
20 pay back all the instructions, land -- all those
21 different costs.

22 MS. FRETZ-BROWN: That's right.

23 MS. PARKER: Carol, I can't believe you're not
24 going to say something about the changes in our term.

25 MS. GALANTE: I was just going to ask you -- I

Board of Directors Meeting held on March 9, 2006

1 don't have any questions. I have all kinds of comments
2 on a number of these programs. I was kind of waiting
3 until the end to comment, because I have -- and they're
4 all positive comments. So whenever you're ready for
5 comments.

6 MS. PARKER: Well, I think for now -- and,
7 again, you know, whether you do it individually or we do
8 it all at the end -- because, I mean, it is a zero sum
9 game of where we put everything. And we'll finish, and
10 then you can decide. But I think we are very, very
11 excited about what the Multifamily staff has come forward
12 with. And clearly, it's our intention to make sure that
13 the Multifamily community knows CalHFA's and the Board's
14 commitment to Multifamily.

15 So we can bring people up, if there are more
16 questions.

17 But then let me switch and bring in -- have
18 Chris Penny come up and talk about Asset Management.

19 Many of you may or may not know, but Chris Penny
20 is Margaret's second in command, and Margaret has had a
21 family emergency.

22 So, Chris, if you want to walk the Board
23 through -- because we have \$4 million of HELP fund
24 committed to -- or Housing Assistance Trust funds
25 committed to Asset Management goals.

Board of Directors Meeting held on March 9, 2006

1 MR. PENNY: Yes, good morning. In terms of the
2 HAT loans that are set aside for Asset Management, what
3 our thinking is, is that as the Agency is in its thirty-
4 first year, we have quite a few projects that are getting
5 older, they're aging.

6 And typically, between the fifteenth and
7 twentieth year, projects need to be recapitalized, to
8 various degrees. And we have found in our portfolio that
9 we have a handful of these that we're trying to focus on,
10 assess their physical needs, and try to set aside some of
11 the HAT funds for rehabilitation, things that the
12 projects are unable to accommodate in the normal
13 replacement reserves that we require. So that's a big
14 goal of ours for this year, in addition to continuing
15 our contract administration for our approximately 150
16 Section 8 projects that we work with HUD. That work
17 brings in about \$1.5 million a year in Section 8
18 administrative fees from HUD. And that's a major part of
19 our staff's time.

20 A special project that we're working on right
21 now, and hope to finalize and complete this year, is the
22 sale of our REO portfolio. We have six REOs around the
23 state. One of the REOs is being taken out of this
24 current offering because of some fire damage that the
25 project suffered recently. So we currently have five

Board of Directors Meeting held on March 9, 2006

1 being offered, and we have a broker that is helping us
2 market those properties. And hopefully by the next Board
3 meeting, we might have some more information on that.

4 MS. PARKER: If there's any questions of Chris?

5 *(No audible response)*

6 MS. PARKER: If not, I'm going to move to our
7 last slide, which is "Other Considerations."

8 Thank you, Chris.

9 MR. PENNY: Yes.

10 MS. PARKER: And I would ask Steve and Bruce if
11 he'd come back and join me.

12 Mike?

13 I will just segue, given Chris' comments on the
14 REOs, it does present an opportunity for the Agency to
15 look at what might be an initiative for the corpus of
16 those funds.

17 And Steve's going to talk a little bit about
18 that.

19 MR. SPEARS: Well, we're starting the process of
20 looking into putting all of our employees in Sacramento
21 under one roof. As you probably know, we're in the
22 Meridian Building, we're also in the Senator Hotel. Both
23 those leases expire simultaneously, so the good planning
24 of our administrative folks, and that occurs in about
25 three years. And so the idea is to try to get everybody

Board of Directors Meeting held on March 9, 2006

1 under one roof.

2 We're starting this process. We're going to
3 have some consultants help us sort through the issues and
4 help us sort through the numbers, the economics, of build
5 and buy versus lease, and that sort of thing.

6 And there are a number of different ways to
7 finance it. At present, bond financing requires some
8 legislative changes. There's REO sale proceeds that
9 might possibly be used towards this sort of thing.

10 And, of course, you could use something on the
11 order of long-term tenant credit lease. All those things
12 are being sorted out at this point.

13 We just wanted to alert you to the fact that
14 this is on the horizon. It's a really important project
15 for us because we really would like to have those in
16 Sacramento under one roof. And it will avoid colds and
17 the flu by trooping back and forth from the Senator and
18 the Meridian building, if nothing else.

19 MS. PARKER: Some of you who have been around
20 CalHFA for many, many years, and when it was CHFA, the
21 prior Executive Director, Karney Hodge, actually
22 considered the purchase of the Senator Hotel. And, you
23 know, that may be a little bit like people's comments
24 about some of our other elected officials who have had
25 visions of, you know, getting satellites and being a

Board of Directors Meeting held on March 9, 2006

1 little bit ahead of their time. But I think it is
2 something that we now want to take a look at and see from
3 an economic standpoint if it makes sense.

4 Michael, are you going to do the IT?

5 MR. HOWLAND: Yes, my name is Mike Howland; and
6 I'm the Director of Information Technology for the
7 Agency.

8 During the last year, the Agency has engaged in
9 some very extensive reviews of our IT organizational and
10 technology infrastructure, and also the technologies that
11 support our various business operations.

12 As a result of those reviews, we have initiated
13 several efforts to upgrade -- update, if you will -- our
14 organizational and technology infrastructures, as well as
15 actually initiating several projects to address the
16 future technology needs of our program areas. Among
17 those, are the one that's on the slide, which is to
18 service debt management. But we've also initiated
19 projects for Multifamily, Homeownership, and Fiscal
20 Services as well.

21 We have a lot of very interesting and
22 challenging Information Technology initiatives that are
23 going on in the Agency right now.

24 MR. GILBERTSON: Pass the microphone around
25 here.

Board of Directors Meeting held on March 9, 2006

1 The third bullet there, or arrow, relates to
2 product profitability. That was an outgrowth of this
3 Resource Allocation Study that we did during 2005.

4 There were two things that came out of that,
5 that we wanted to spend additional time on: One was to
6 make sure the Agency had adequate capital that could be
7 placed in reserves for rating-agency purposes. Because
8 many of the real-estate-related risks in our programs are
9 set aside -- we set aside specific amounts of capital for
10 those purposes. So we're underway with that process.

11 The other thought that came about, was that we
12 should analyze a combination of loans that we put
13 together into a product, be it for Homeownership purposes
14 or Multifamily purposes.

15 My staff and I worked on that, and we had our
16 first meeting about that -- I would guess about a month
17 ago. We looked at two or three combinations. We need to
18 do many more combinations, to look at the profitability.

19 The initial results were -- and I don't think it
20 would be any surprise -- that we make more money on a
21 long Multifamily project, one that's out there for
22 30 years, than we do on a single-family Homeownership
23 loan with today's prepayment speeds is only around for
24 three, four, or five years.

25 On top of that, we wanted to layer on the

Board of Directors Meeting held on March 9, 2006

1 operating expenses of the overhead of the Agency to
2 initiate that product and to oversee that loan or product
3 over its lifetime. So that's an ongoing initiative that
4 we have.

5 Of course, at the end, we will be measuring
6 product profitability versus public purpose benefit,
7 trying to find the right balance for all of our programs
8 going forward.

9 Oh, the next one is mine, too.

10 The investment management strategy is something
11 that we've been talking about. The Board of Directors
12 established an investment policy for this Agency, I'm
13 guessing it's ten or twelve years old by now. I think
14 what this really relates to is that we want to go back
15 and revisit that policy. That policy really documented
16 what we were doing at the time. And primarily our
17 investment strategies have been to use the State
18 Treasurer's investment pool and to go out for bid for
19 guaranteed investment contracts, when we issue bonds.

20 I think in today's day, it ought to be a
21 broader -- we ought to look at different investment
22 alternatives. We ought to perhaps segment pieces of the
23 balance sheet and say that maybe we can go longer on the
24 yield curve, perhaps pick up a couple of additional basis
25 points.

Board of Directors Meeting held on March 9, 2006

1 So that's something that I would think, over the
2 next 12 to 18 months, we'd come back before the Board
3 with a revised policy and perhaps an investment
4 management strategy.

5 MR. SPEARS: For Bill's benefit, part of that
6 process will be coming over to talk to Dan Dowell and the
7 staff, and really explore this. Because there are a lot
8 of different ways to do this. We could have something
9 separately managed over there or farm something out. But
10 there's a lot yet to be studied about it.

11 MS. PARKER: Mr. Morris?

12 MR. MORRIS: The comment would be, 12 to 18
13 months where you have the investment management strategy,
14 I think that's really important. And I think maybe
15 that's something that we ought to try to accelerate and
16 not wait 12 to 18 months to address that.

17 MR. GILBERTSON: I was giving myself a pretty
18 big cushion.

19 MR. MORRIS: We'll be off the Board by then.

20 ACTING CHAIR SHINE: Of course, you noticed.

21 MR. GILBERTSON: There are two aspects to it,
22 and I didn't bring up the other, is that we can certainly
23 revisit the policy, that's the easy part of it. We also,
24 as a part of the IT initiatives, would like to build some
25 additional tools for us to better manage cash and

Board of Directors Meeting held on March 9, 2006

1 investments within the Agency. And they do at some point
2 kind of tie in together.

3 MR. MORRIS: Maybe we could --

4 MS. PARKER: Yes, I think the point here is that
5 we're starting in this business plan when we come back to
6 you and talk about our operating expense. We're
7 building, you know, these things in -- you know, we're
8 starting now to essentially add them into our overall
9 management information infrastructure. So we will -- to
10 the extent that resources permit, which will segue into
11 my next discussion, you know, it's certainly -- we are
12 self-motivating ourselves on all of these kinds of
13 enhancements, because we think that they are crucially
14 needed to manage the complexity of the funds that we
15 have, and certainly be available for the Board for your
16 decision-making process.

17 MR. MORRIS: Would it help you, as you develop
18 these tools, to review the investment -- to review these
19 management -- excuse me, the investment management
20 strategies earlier, so that that can be part of the
21 input, as they are developing the tools? In other words,
22 I just think that that's something we should address
23 earlier.

24 I understand the need to coordinate that with
25 the tools that you're developing, but I think it's

Board of Directors Meeting held on March 9, 2006

1 something we should address earlier.

2 MS. PARKER: I think we'll come -- let's take
3 that feedback.

4 Again, what we're looking for from you today
5 really is the feedback for where we should prioritize and
6 concentrate. So these are all very helpful discussions
7 to us.

8 Let me bring up the last line item here because
9 in some respects it is the most significant item to
10 everything that we have talked about in the last 15, 20,
11 30 minutes.

12 You will see at your seats that our most recent
13 rating agency analysis from S & P is on our G.O. bond
14 capacity, and it's a very good rating. We've always, you
15 know, had very good rating analysis, very comprehensive.

16 If you read through the paragraphs on
17 management, you will see that this is the first time,
18 although the rating agency, S & P congratulates us on the
19 competency of our staff -- and I would say, you know,
20 with the loss of some of the significant people we have,
21 the corpus of people who are here today in the Agency are
22 doing outstanding work. But it is really -- is that
23 enough, given the complexity and the degree of difficulty
24 that we have before us?

25 And if you read that paragraph, you will see

Board of Directors Meeting held on March 9, 2006

1 that the rating agency makes a notation about the loss of
2 our staff and the need to recruit and retain and the need
3 to be competitive in the market that we have to recruit
4 and retrain from. And the problems that we have to be
5 competitive, given our compensation that is dictated in
6 the state and our Agency by the Governor's office and the
7 Department of Personnel Administration.

8 We have talked to them -- in fact, Steve, as I
9 mentioned, his paperwork is over at the Agency -- the
10 Governor's office, and it has been since November. And
11 the reason why -- it's not that they don't know Steve and
12 want to hire him, but it is a salary issue that we are
13 debating about. And the recruitment of the Director of
14 Multifamily, the Director of Mortgage Insurance and the
15 Director of Homeownership are all going to be based on
16 what compensation.

17 We have hired a recruiting firm to help us. The
18 recruiter has essentially told us that the existing
19 salary that we have to offer will not provide the level
20 of competency that we need.

21 So we are in a discussion right now with the
22 Governor's office about whether or not we can continue
23 to do the kinds of complexity of programs we had done in
24 the past, and what will be our future.

25 Now, we have combined this at the moment with

Board of Directors Meeting held on March 9, 2006

1 this initiative of Homeless Phase II. And, in fact, we
2 have told them in order to be able to implement that
3 program, even though some of it's special-need funding,
4 some of which we have done in the past, that we do not
5 have the resources in the Agency to run that program
6 unless we can go out and hire them.

7 And so we have negotiated and talked about
8 legislation that we would need not only to set that
9 program up, but also legislation to allow us to have the
10 flexibility to have those salaries be set, based on some
11 survey of our marketplace in order to be able to get the
12 kind of competent people, and offer the rating agencies
13 the security of knowing that that kind of competency
14 would be in the Agency over the long run.

15 I do want to embarrass him a moment and point
16 out Stan Dirks being here from Orrick, our Bond Counsel.

17 Stan has worked on this initiative with me and
18 particularly helped us craft what would be an initiative
19 on the homeless side, but also what we would need on the
20 compensation side; a structure that would allow the
21 Governor's office to have involvement, but the salaries
22 would be set by the Board based on salary survey
23 methodology approved by the Department of Personnel
24 Administration.

25 So I tell you all this because we have put

Board of Directors Meeting held on March 9, 2006

1 before you a business plan that is presumed we will be
2 able to hire the people that can run these programs.

3 If we do not have those, then we will be coming
4 back to you in May with something that will be completely
5 different than this. It will have substantially plain
6 vanilla Multifamily kind of lending programs, and
7 substantially reduced Homeownership lending programs,
8 because we will not have the people to keep developing
9 these kinds of innovative programs in the marketplace and
10 deal with the -- particularly the credit controls that
11 we'll need in order to maintain the risk of the Agency.
12 So I want to leave that with you.

13 We have presented the happy scenario, because
14 that's what we feel we need to do. But at some point in
15 time, I need to -- just for the Agency to continue --
16 deal with the reality that if I don't have those kind of
17 staff, what the rating agency's analysis will be on us,
18 and what we can actually produce for our borrowers and
19 our partners, you know, in the housing industry.

20 ACTING CHAIR SHINE: Thank you very much.

21 And kudos to all of you. It's a wonderful
22 presentation. It gives us a good under-an-hour thumbnail
23 sketch of the future, potentially. And very complete.
24 And thank you.

25 Any comments or questions or ideas from the

Board of Directors Meeting held on March 9, 2006

1 Board?

2 Yes?

3 MS. GALANTE: A couple of comments.

4 I think this was an incredibly thoughtful plan
5 that you all have outlined, and clearly it has taken a
6 lot of internal conversation and evaluating where you are
7 and where you want to go to make all this happen. And I
8 just think some of the ideas that I've seen are really
9 great.

10 I want to say that the HELP program has been
11 fabulous. I don't know how long now it's been around,
12 Terri; but I --

13 MS. PARKER: I think we're seven years?

14 MS. FRETZ-BROWN: Eight years.

15 MS. PARKER: Eight years.

16 MS. GALANTE: I would be remiss if I didn't say
17 I was at the California Redevelopment Association annual
18 awards luncheon yesterday in Monterey, where our Mandella
19 Gateway project got an award that has CalHFA financing.
20 But I think probably four of the various categories had
21 HELP financing, because they list kind of all the
22 financing at the bottom. It's a very well-used program.
23 And I think adding that residential for the for-sale
24 component is just absolutely right on. I think
25 communities are going to love it.

Board of Directors Meeting held on March 9, 2006

1 I think the AHP substitute, my comment is, I
2 wish you could be the Federal Home Loan Bank and do a
3 real AHP substitute. I think the idea of it in terms of
4 adding to your business is really great.

5 (Mr. Morris left the hearing room for the day.)

6 MS. GALANTE: I would say, I would caution not
7 to emulate or mirror some of the problems that exist in
8 the AHP program. Because we have gotten to a point where
9 we didn't really want to use it anymore, because for the
10 small amount of money, the amount of requirements put on
11 you by the Federal Home Loan Bank -- you know,
12 empowerment-this and, you know, services-that is just so
13 over the top, it's not worth \$300,000. So you have to be
14 really, really desperate at this point to take AHP.

15 So I think if you can find a substitute program
16 without all the headaches, it will be a real competitive
17 service. So I just want to add that.

18 So there's a lot of other things here that you
19 mentioned that I think are great.

20 And my last comment is, if there's anything
21 that we as a Board need to do to help you on this
22 competitiveness, then, you know, I'd love to hear that.
23 Because I do -- as a nonprofit leader, I face some of the
24 same challenges. And I just think this one has to be
25 solved for the Agency to be effective.

Board of Directors Meeting held on March 9, 2006

1 MS. PARKER: I agree, Carol.

2 You know, I've told everyone that I think that
3 this -- we have done everything that we can, and we have
4 been very fortunate in the recruitment that we've done in
5 the last couple years. But we have just come to a point
6 in time where we've hit the wall. And we have to solve
7 that now, particularly because, you know, we have to
8 provide predictability in our marketplace.

9 We have been very fortunate with having, in the
10 interim, Bev Fretz-Brown work for us and continue our
11 efforts in the Multifamily side. But Bev did this as a
12 favor, and committed to only a few months. So we're
13 going to be losing -- and we don't have the ability to
14 hire staff on contract to do, you know, the day-in and
15 day-out work. So if we can't solve the salary problems,
16 we will change the business that we do. And part of it
17 is just flat-out an education process. There is a lot of
18 people who work in state government, they don't really
19 understand what we do. They think we're the same as the
20 Infrastructure Bank. They think that we're the same as,
21 you know -- they don't understand that we are not backed
22 by the full faith and credit of the State. And so it's
23 really the investors who we report to, not the taxpayers
24 who pay our salaries. But the problem is that state
25 salaries are not competitive.

Board of Directors Meeting held on March 9, 2006

1 And, you know, when we look at our salaries
2 relative to our sister housing finance agencies and the
3 rest of the country, my colleagues have told me that
4 they're behind me because California is bringing down the
5 overall averages considerably. And yet you look at where
6 we are relative to them. We're at the top of complexity
7 with the number of outstanding swaps we have, with the --
8 you know, we are a \$9 billion financial institution.

9 So we're going to see, and you can all keep us
10 in your prayers; but I think what we're trying to do is
11 make the education, make the best comments that we can.
12 And also, you know, what we have done is certainly
13 demonstrated on the merit.

14 Nobody else in state government could have done
15 the Bay Area Housing Plan. You know, we're saving the
16 State of California millions of dollars in programs for
17 the developmentally disabled because of CalHFA. The
18 Infrastructure Bank couldn't do that.

19 So, again, we need to hear: Are we on the right
20 track with what we're proposing to use our HAT funds for?

21 Anything -- you know, I've talked to John Courson, who
22 last year wanted to amend so that we had more money for
23 HELP, and he signed for this amount of money. But if you
24 guys are, you know, taking into consideration the
25 comments of Mr. Morris and Ms. Galante, we'll come back

Board of Directors Meeting held on March 9, 2006

1 and we'll be preparing a business plan that will further
2 be built on these premises, unless I have to come back
3 and essentially give you something that will change,
4 given the realities of the internal resources that the
5 Agency has.

6 ACTING CHAIR SHINE: I would venture to say that
7 given what we've heard here today and the few comments,
8 that everybody kind of would like to see you get to the
9 next step on this program.

10 Am I speaking out of line? Is everybody here on
11 the Board okay on that? Okay.

12 MS. PARKER: I think our real concern is that we
13 really hate to -- and that's why we haven't done it -- to
14 bring you an alternative business plan. I thought about
15 it: Should I bring it, too? I think we're in denial.
16 We don't want to do that.

17 But I think we recognize -- and you all are very
18 mindful -- once we get out of the competitive lending
19 market, even if we were to get, a year from now, the
20 ability to hire people, it will take us so long to get
21 back in. So that's my biggest fear.

22 With that, Mr. Chairman, I think we think move
23 on to the final portion of the meeting, which is the
24 closed session.

25 //

Board of Directors Meeting held on March 9, 2006**Item 7. Reports**

ACTING CHAIR SHINE: Okay, there's some reports as part of your public package, if anybody has any questions on that.

--o0o--

Item 8. Discussion of other Board Members**Item 9. Public Testimony**

ACTING CHAIR SHINE: Is there any other discussion for the Board before we go into private session?

(No audible response)

ACTING CHAIR SHINE: Okay, then we're going into closed meeting now.

MR. HUGHES: We have to have Item 9, which is Public Testimony, just to make sure that there isn't any out there.

ACTING CHAIR SHINE: I think I just asked them for that, and nobody said they wanted to speak. So that's why I decided it's okay to go into closed session.

MR. HUGHES: That's fine.

ACTING CHAIR SHINE: Am I incorrect?

MR. HUGHES: No, that's fine. I just wanted to confirm that.

I did want to put one comment on the record before we go into closed session. We don't transcribe

Board of Directors Meeting held on March 9, 2006

1 the closed sessions, and I wanted to make sure this was
2 on the record.

3 We have two different matters to discuss in
4 closed session. The one that's listed as number one,
5 California Housing Finance Agency v. Gateway Apartment
6 Partners, is not a matter that's come before the Board
7 before. I wanted to say that there is a conflict of
8 interest issue that is involved with this, perhaps
9 indirectly, but that we worked on extensively.

10 The owners of that project, Gateway Apartment
11 Partners, are the Agency's borrower. Adjacent to that
12 property is a property owned by BRIDGE Housing, which, of
13 course, Ms. Galante is an officer of.

14 And BRIDGE has no involvement with Gateway
15 Apartment Partners or the project, the Ridgeway Apartment
16 Projects. However, the reason that this litigation
17 exists, is that there are construction defects on the
18 Ridgeway Apartment side.

19 The BRIDGE side -- different parcels, different
20 borrowers, different owners. The BRIDGE side was
21 constructed at the same time and shares some of those
22 construction defects. And there has been
23 construction-defect litigation pending in Marin County
24 Superior Court, in which both BRIDGE and Gateway
25 Apartment partners have participated. Those cases were

Board of Directors Meeting held on March 9, 2006

1 consolidated.

2 So I have discussed the potential conflict
3 issues extensively with BRIDGE's attorney. And as a
4 result of that, Ms. Galante has scrupulously avoided any
5 participation in the Ridgeway controversy from the BRIDGE
6 side.

7 BRIDGE was also proposed to be a potential
8 manager or a potential owner of a new entity that would
9 acquire Ridgeway. That's now off the table.

10 I wanted to mention that I have advised
11 Ms. Galante today that I do not think that there is --
12 because there is no action to be taken, nor any action
13 contemplated to be taken by the Board in this case, I
14 don't think there is a conflict of interest in terms of
15 attending the closed session, nor do I think there's an
16 attorney-client privilege issue that would be seriously
17 implicated.

18 My understanding from talking to Ms. Galante is
19 that she has elected not to attend the portion of the
20 closed session part of the session regarding the first
21 matter, the Gateway Apartment Partners, and will attend
22 the other part, relating to our HC case.

23 So my request is that we take those in reverse
24 order, so that we can deal with the second one first, and
25 then have Ms. Galante leave.

Board of Directors Meeting held on March 9, 2006

1 Does that correctly state -- it's long-winded.

2 MS. GALANTE: Now that you've heard the whole
3 thing. Yes.

4 MR. HUGHES: But I wanted to make sure that was
5 on the record, to make sure it was clear to everyone what
6 sort of the underlying ground rules have been on this.

7 And I think with that, we can go into closed
8 session.

9 --oOo--

10 **Item 10. Closed Session**

11 *(Closed executive session was held from*
12 *12:03 p.m. to 12:32 p.m.)*

13 ACTING CHAIR SHINE: We've reconvened out of
14 executive session; and we've adjourned the meeting.

15 *(Proceedings concluded at 12:32 p.m.)*

1 BE IT REMEMBERED that on Thursday, May 11, 2006,
2 commencing at the hour of 9:30 a.m., at the Hilton
3 Burbank Airport and Convention Center, Gala Conference
4 Room, 2500 Hollywood Way, Burbank, California, before me,
5 YVONNE K. FENNER, CSR #10909, RPR, the following
6 proceedings were held:

7 --o0o--

8 CHAIRPERSON COURSON: Good morning, everyone.
9 I'll call the meeting to order, and our first order of
10 business is to call the roll.

11 --o0o--

12 **Item 1. Roll Call**

13 MS. OJIMA: Thank you.

14 Mr. Pavao for Mr. Angelides.

15 MR. PAVAO: Bill Pavao here.

16 MS. OJIMA: Thank you.

17 Mr. Carey.

18 MR. CAREY: Here.

19 MS. OJIMA: Mr. Czuker.

20 MR. CZUKER: Here.

21 MS. OJIMA: Ms. Galante.

22 (No audible response.)

23 MS. OJIMA: Ms. Jacobs.

24 MS. JACOBS: Here.

25 MS. OJIMA: Mr. Augustine for --

1 MR. AUGUSTINE: Here.
2 MS. OJIMA: -- Ms. McPeak.
3 MR. AUGUSTINE: Here.
4 MS. OJIMA: Thank you.
5 Mr. Morris.
6 (No audible response.)
7 CHAIRPERSON COURSON: Mr. Shine.
8 MR. SHINE: Here.
9 MS. OJIMA: Mr. Walsh.
10 (No audible response.)
11 MS. OJIMA: Mr. Genest.
12 (No audible response.)
13 MS. OJIMA: Ms. Parker.
14 MS. PARKER: Here.
15 MS. OJIMA: Mr. Courson.
16 CHAIRPERSON COURSON: Here.
17 MS. OJIMA: We have a quorum.

18 --o0o--

19 **Item 2. Approval of the minutes of the March 9, 2006**

20 **Board of Directors meeting**

21 CHAIRPERSON COURSON: The next order of business
22 is the approval of minutes. However, in reviewing those
23 minutes with staff, it appears as though there are a
24 number of incorrectly identified speakers and attendees
25 at the meeting. So it runs sort of throughout the

1 minutes, not only from the list of attendees but those
2 who are speaking and those who are identified as
3 speaking. So the suggestion of the Chair is -- in
4 talking to counsel, is that we'll postpone the approval of
5 those minutes, we'll have them corrected, and then we
6 will approve them at our next meeting along with the set
7 of minutes from this meeting.

8 --oOo--

9 **Item 3. Chairman/Executive Director Comments**

10 CHAIRPERSON COURSON: So having said that, I'll
11 just make a couple or three brief comments and then turn
12 it over to Terri for hers. I had the -- I've had the
13 opportunity, actually on three occasions, to travel to
14 Kentucky for various reasons and had also the pleasure of
15 meeting Terri's counterpart, who is their executive
16 director, and my counterpart, who is the chair of the
17 Kentucky Housing Corporation, as they call it.

18 And in the last couple of conversations we had,
19 and meetings I was in with them, we talked about some of
20 the initiatives that we're doing here, some of the
21 partnership opportunities in homelessness, and I was just
22 down there last week. And it's really remarkable, and
23 they give credit to CalHFA. In fact, I was in a couple
24 meetings, met with two or three of their board people
25 along with their chair. He clearly credited California

1 sort of planting the seed of what they could do outside
2 just their normal course of business in terms of
3 homelessness and partnering. And they now have built or
4 designed, and I saw the design of, a prototype homeless
5 with mental health support, and they're going to build
6 that in 17 communities throughout Kentucky.

7 So I think from the staff standpoint and our
8 standpoint, here once again, we sort of can be a model or
9 prototype of the types of things HFAs can be doing.

10 I'll mention also, and this may well have an
11 indirect impact on us, IRS came out with a rule you may
12 or may not have seen earlier, I guess it was last week,
13 that no longer will the down payment assistance
14 companies -- the Nehemiahs, AmeriDreams; there's a
15 number of those that are down payment assistance -- be
16 tax exempt. And when that ruling came out, it sent a
17 obviously shock wave through the lending market because
18 of the FHA loans that are done, a substantial percentage,
19 up to almost -- I've been told almost half of the loans
20 done FHA are done with some form of down payment
21 assistance.

22 And so having done that, FHA now has stepped back
23 and will be issuing new regulations and likely not
24 recognizing or -- recognize or insuring loans that have
25 that down payment assistance.

1 At the same time FHA is revitalizing, I met with
2 the secretary and the FHA commissioner, really doing a
3 full court press to revitalize FHA to recapture market
4 share as an alternative to some of the subprime products
5 that are out there. But with this absence and with their
6 inability -- because they've been trying for three years
7 to get 100-percent loan to value financing -- the
8 inability to get that, and the absence of their down
9 payment assistance if, in fact, FHA can be a more viable
10 product, it may well put more pressure on our down
11 payment assistance.

12 We've always said, and I've said I think in
13 public forums, that down payment assistance funds have
14 been relatively robust and easy to find, and I now
15 retract that statement based on the new set of
16 circumstances. And I think they may be very difficult to
17 find and will put some pressure on us as we get involved
18 in some of our loan programs, particularly FHA, to
19 provide down payment assistance. So I think that's
20 something we'll have to watch carefully. It will
21 certainly have an impact on our business plan going
22 forward.

23 Let me make one other statement, and those of
24 you -- I was sorry to miss the last meeting for business
25 purposes, but I know you spent a lot of time talking

1 about sort of the first cut of the business plan. Terri
2 and I have worked together now for over two years, and I
3 will tell you that over the last probably four to six
4 months, no one that I've seen has been more dogged, more
5 determined, more aggressive, more in your face, if you
6 will, throughout Sacramento to really push for CalHFA and
7 the resources and the tools that we need to carry out not
8 only our mission now but our mission as it expands
9 through other initiatives.

10 So I will tell you that you are well -- we are
11 all well represented by Terri and she -- the word "quit"
12 is not in her vocabulary that I've seen, and so, Terri, I
13 personally thank you for staying -- staying the course.
14 And there were times when we'd have conversations and
15 we'd say, "Well, I guess we'll just go a different
16 direction," but even though she'd say that, I know down
17 deep there was this little seed back there saying, "I'm
18 just not giving up." For that, we are making great
19 strides now. So -- and we'll see that in the business
20 plan today.

21 So with that, I will turn it over to Terri
22 Parker.

23 MS. PARKER: Thank you, John.

24 I want to express my appreciation to all the
25 Board members for their attendance today. We think we

1 have an excellent meeting for you to exercise your
2 oversight and responsibility and leadership with the
3 California Housing Finance Agency.

4 I have four or five different points I want to
5 make. First of them is at your desk, you will find an
6 overview of the housing bond that's going to the November
7 ballot. I think many of you may know that the Governor
8 and the Legislature successfully negotiated a package of
9 bonds for infrastructure throughout the State of
10 California last Friday. One of them included a bond for
11 housing that I think was in the neighborhood of \$2.85
12 billion. The majority of it will be with our sister
13 state agency, the Department of Housing and Community
14 Development. We will be partners in working on the down
15 payment assistance programs. But I just thought it would
16 be worthwhile for you to have a little cheat sheet for
17 you to know what was in the bond.

18 We -- the question was raised about what
19 abilities Board members may have of voicing their support
20 for this bond. And we've asked our esteemed general
21 counsel to do some research on that and get that out for
22 the benefit of the Board members. I think as many of the
23 staff and those people who are staff of state government,
24 we are precluded both by statute and to some extent
25 perceptions from being and doing advocacy roles on

1 initiatives before the voters. We have the ability to
2 give factual information, but we want to make sure it's
3 clear for the Board members who are not compensated and
4 hold positions in government about what their ability and
5 legal ability is to advocate on behalf of the bond.

6 As John mentioned, and I think for those of you
7 who were at our Board meeting last time, we talked about
8 an issue that CalHFA has been working on with their other
9 sister state agencies through the Department of Mental
10 Health, Health and Welfare, HCD to have the Governor make
11 an announcement on a homeless initiative using Prop. 63
12 funds. That announcement was sort of leaked in The
13 Sacramento Bee this morning, so I'm at liberty to not
14 feel that I am disclosing confidential information, but
15 it will be incorporated into the Governor's May revision
16 that's presented to the legislature tomorrow.

17 It is an initiative that will make a commitment
18 of \$75 million of Proposition 63 funds for up to 20 years
19 for the creation of permanent supportive housing for
20 chronic mentally ill. The idea is to essentially use
21 those funds to leverage the private capital market,
22 whether it be tax credits, entrepreneurial funds, or
23 philanthropic funds. And I'm going to invite Darrell
24 Steinberg, who's to some extent the father of that
25 initiative to our board meeting in July to talk a little

1 bit more about that.

2 But I do want to bring it up because the business
3 plan that was sent to you a couple of weeks ago made an
4 assumption that because of staffing resources, we were
5 going to take the business plan down because we didn't
6 believe that we would have adequate resources to deal
7 with the continued complexities, the kinds of lending
8 that we've been doing.

9 In the discussions with the Governor's Office
10 about the homeless initiative, it was also recognized
11 that the uniqueness of this program necessitated the kind
12 of staffing that would ensure investors' comfortability
13 with these kinds of bonds and financings to be sold. So
14 we have -- are continuing our discussions with the
15 Governor's Office, and it's our understanding that with
16 that recognition, that we are now in a position to put
17 before you a much more positive business plan, the kind
18 of business plan that we had talked with you about at our
19 March meeting. So we will go through it, but to some
20 extent the numbers that we sent to you are all changed,
21 and we'll walk you through that in our discussions later
22 today.

23 The -- a little bit of housekeeping. I'd like to
24 make an announcement that we have added another person to
25 our staff. Chuck, Charles, McManus. Chuck has joined

1 us. Chuck has an incredibly long and distinguished
2 career in mortgage insurance, and we are incredibly
3 pleased Chuck is working with us on contract. But given
4 the concerns about our fiduciary responsibilities with
5 that portfolio and particularly given how much of a role
6 the insurance program is playing in our overall
7 homeownership lending, we felt it was really important to
8 be able to bring someone on to provide management and
9 leadership for that fund and to deal with -- since it is
10 a separately rated fund -- questions or concerns by the
11 rating agencies.

12 Another change that we have made, we have done
13 our triennial RFP with selection of bond counsel under --
14 bond counsel to work with our underwriters. We made a
15 change this time to, in that sense, have the benefit of two
16 outstanding bond counsel firms, both in California and on
17 the East Coast. We continue to have the outstanding
18 services of Stan Dirks and Orrick, and we will also be
19 having Hawkins join in doing bond counsel duties for us.
20 They have previously served a lot as underwriter counsel.

21 And then last but not least, I wanted to ask Tom
22 to make some comments to the Board. Last session we had
23 a closed session on a litigation matter, and although
24 we're not going to discuss it in that context, Tom was
25 going to report a little bit on where we were and sort of

1 the culmination of that case.

2 MR. HUGHES: Yes.

3 MS. PARKER: So, Tom, I will turn it over to you.

4 MR. HUGHES: At the last meeting, we did have a
5 closed session to discuss the litigation concerning the
6 construction defects in the Ridgeway Apartments project
7 located in Marin City, California. That has been a
8 project plagued with construction defects, and CalHFA has
9 had a security interest in the borrowers' causes of
10 action against the contractors. So the Agency has played
11 a direct role in that litigation, although we're not a
12 party.

13 At this point we have through many, many, many
14 meetings and discussions and debates, nailed down the
15 financial settlement that we want, and that is about
16 99.9 percent close to a settlement. The only remaining
17 issues involve the actual terms of the settlement
18 agreement and whether the Agency needs to be a party.
19 But I will be in Marin County Superior Court at 9:00 a.m.
20 sharp tomorrow morning, and I'm going to try and get the
21 thing nailed down so hopefully we will be able to report
22 that we have -- we will have access to the funds needed
23 to make that project right again.

24 MS. PARKER: Unless there are any questions,
25 Mr. Chairman --

1 CHAIRPERSON COURSON: Mr. Morris.

2 MR. MORRIS: Could you just refresh my
3 recollection who the developer was and who the contractor
4 was, and also do we have any other projects with them?

5 MR. HUGHES: The contractor is an entity called
6 Devcon, and there are numerous subcontractors involved.
7 It's one of these cases with 20 or 30 parties. And our
8 Borrower is called GAP, Gateway Apartment Partners.

9 MR. MORRIS: Do we have a lot of other projects
10 with them?

11 MR. HUGHES: I don't know the answer to that.
12 I'm not aware of any. This project involved a number
13 of -- some not atypical kinds of construction defects but
14 others that were pretty unusual such as subsidence, which
15 eventually caused hangers that held plumbing to bend and
16 plumbing to crack and resulting in water damage. So the
17 particular geology to that location was a part of the
18 issue there as well. So I don't know if you can draw
19 project- or portfolio-wide conclusions from that.
20 There's -- it's a very large and complicated construction
21 defect litigation.

22 CHAIRPERSON COURSON: Let me -- two things. One,
23 let the record show that Mr. Morris has joined us. He
24 joined just after the roll call. And second, I was remiss
25 and I mean to welcome, even though she has already spoken

1 as being in attendance, the new Director of HCD, Lynn
2 Jacobs. And Lynn joins us a member of the Board. This
3 is her first Board meeting. And we've always had a --
4 obviously, we're sort of joined at the hips between CalHFA
5 and HCD, and we're looking forward to getting to know
6 Lynn better and working with her during her tenure.

7 Having said that and if Terri's completed her
8 remarks, we'll move to the -- item 4 in our agenda, which
9 is the consideration of the Lion Creek Crossings project.

10 --o0o--

11 **Item 4. Discussion, recommendation and possible action**
12 **relative to final loan commitment for the**
13 **following project: Lion Creek Crossings**

14 MS. WHITTALL-SCHERFEE: Good morning. This is a
15 request for a final commitment on Lion Creek Crossings.
16 Lion Creek Crossings is a project that's 106 family
17 units. It's located in Oakland, California, which is in
18 Alameda County.

19 You're probably familiar with this project
20 because it is Phase III of what might be known to the
21 Board as Coliseum I and Coliseum II. This could
22 technically be called Coliseum III except for they've
23 changed the whole project to the Lion Creek Crossings
24 HOPE VI Master Planned Development.

25 The project will be owned by Creekside Housing

1 Partners Limited Partnership. The general partners in
2 the joint venture partners in project are the East Bay
3 Asian Local Development Corporation and the Related
4 Companies. They are the same partners that are on
5 Phase I and Phase II.

6 CalHFA committed the construction and permanent
7 loan financing on Coliseum Gardens I. We were not the
8 construction lender on Phase II, but we are the permanent
9 lender on Phase II. And just to give the Board an
10 update, next week is going to be the grand opening of
11 Coliseum Gardens Phase I and it's going to be the
12 groundbreaking for Coliseum Gardens Phase II.

13 So this request is for construction and permanent
14 financing. We're asking for approval of a construction
15 loan in the amount of \$22 million, \$22,585,000. It will
16 be a variable construction rate loan for 22 months, and
17 it's going to be tax exempt bond financing.

18 • Then the structure will convert to a permanent
19 loan in the amount of \$3,815,000 for 40 years at
20 5.7 percent. The second mortgage will be in the amount
21 of \$475,000 for ten years at 5.5 percent. This second
22 mortgage is based on the income stream from the Section 8
23 vouchers, project-based vouchers, that the Oakland
24 Housing Authority has issued an initial commitment on.

25 The Oakland Housing Authority owns the ground,

1 very similar to Phase I and Phase II. There will be a
2 ground lease for approximately 65 years. It's going to
3 be a prepaid ground lease. There will be two payments,
4 one during the construction phase, one during the
5 permanent loan phase, for a total of approximately a
6 million dollars.

7 Back to the permanent loan structure, there will
8 also be a third mortgage in the amount of \$530,000 at
9 3 percent for 40 years, and this will be FAF funds. This
10 is a HOPE VI project, and as such there is a HOPE VI loan
11 also provided by the Oakland Housing Authority in the
12 amount of \$2,273,000. That, along with the City of
13 Oakland loan for 4-million-6 and an AHP loan provided by
14 Wells Fargo in the amount of 525,000 will be all sources
15 of funds that come in with us during the construction
16 loan. At the permanent conversion, Housing and Community
17 Development will come in with its MHP loan in the amount
18 of approximately \$9 million.

19 As part of HOPE VI loan, there will be a
20 regulatory and operating agreement through HUD. It will
21 restrict 37 units, and we will be getting annual
22 contribution contract payments to help with operating
23 assistance. This is the same structure that the Board
24 saw in Colosseum Gardens Phase I.

25 At this point, Ruth Vakili is going to talk more

1 specifically about the project, and she's going to walk
2 you through the slides.

3 MS. VAKILI: Good morning. The project is
4 located near the BART station in Oakland, as you can see
5 from this lovely aerial. You can also see the BART --
6 I'm not finding my pointer here.

7 MS. WHITTALL-SCHERFEE: There it is.

8 MS. VAKILI: There it is, okay.

9 The BART station is over to the side of the
10 project. You can see the BART line. This is 66th
11 Avenue, and the project is here.

12 In the middle of the project will be a 5.7-acre
13 park site. You can see Phase I that is nearly completed.
14 Phase II has already started construction, and that is --
15 maybe we'll get a better view here. Okay. There we go.
16 Phase II has started grading, and it is along in this
17 area.

18 San Leandro -- 66th Avenue is here. And along
19 66th Avenue consists of light industrial and commercial
20 uses, along with residential. And near to the site is a
21 fire station and some single-family to the east.

22 As stated previously, this is the third phrase of
23 the project. The park in the middle of the project is
24 expected to start construction in the spring. Our
25 subject property is expected to start construction in

1 August. Part of our project will also include a 1.3-acre
2 park adjacent to the site. In addition, the 5.7-acre
3 park site is in the center.

4 Our project itself was formerly a park site,
5 which will -- on which there was some environmental
6 impact. The remediation for the entire project is
7 already under way, and clearances will be had for the
8 project before we start construction. We'll also ask for
9 an updated Phase I report on the site before we close
10 construction.

11 Included in the entire project site is 15,000
12 square feet of community space, which includes social
13 services, recreation areas, and playground areas. Here
14 you can see our job site being the former Coliseum park
15 site. And this is a view along 66th Avenue.

16 This is a very nice view of how the project will
17 lay out. You can see the relocated park, our Phase III,
18 Phase I under construction, and Phase II. There will be
19 a component of for-sale housing, which will start
20 construction sometime next year.

21 And here's an elevation of the property. Our
22 project will be -- a portion of it will be built on
23 podium, two buildings configured on podium, and the other
24 three buildings will be wood frame slab on grade. The
25 construction will consist of a mix of 13 one-bedroom, 34

1 two-bedroom, 45 three-bedroom, and 14 four-bedroom
2 units.

3 Here you can see the completed portion of
4 Phase I, which is already occupied. This is parcel A of
5 Phase I. Parcel B is under construction and is expected
6 to be completed at the end of May. The project, the
7 phase parcel B is already leased up. Occupancy will
8 begin after completion. Here you can see another
9 elevation of parcel B.

10 And here is the rent structure. The rents are
11 based on -- you can see here, for example, the 50-percent
12 rents and 55-percent rents are renting at the same.
13 The -- there is no difference between the rents;
14 however, the developer has the authority to go up to
15 55-percent rents if need be. But the rents on the
16 55-percent units remain at 50 percent at this point, and
17 these rents are based on the previous rents established
18 by Phase I.

19 It's expected that the property will lease up in
20 four months. Using our underwriting criteria, we
21 anticipate -- we have given it a total of a six-month
22 lease-up, which should be more than ample.

23 MS. WHITTALL-SCHERFEE: This project is currently
24 at CDLAC for consideration for bond allocation, and we're
25 expecting and hoping to have that bond allocation by the

1 middle of this month when they announce the CDLAC
2 allocation.

3 And with that we'd be happy to answer any
4 questions you may have, and we request approval.

5 CHAIRPERSON COURSON: Questions on the project?

6 Mr. Czuker.

7 MR. CZUKER: Just a clarification. With all of
8 the ultimate sources for permanent financing, will the
9 CalHFA's first and subordinate debts be senior to
10 everybody else?

11 MS. VAKILI: Yes.

12 MR. CZUKER: In terms of cash flow, will CalHFA's
13 three loans take priority in cash flow distributions for
14 debt service over cash flow requirements on some of the
15 other loans?

16 MS. VAKILI: Yes. The three loans are amortized
17 debt, and also the MHP required debt service goes ahead
18 of the residual receipts debt which is the City
19 contribution.

20 MS. WHITTALL-SCHERFEE: So we're in first, second
21 and third place.

22 MR. CZUKER: Both in security and in cash flow
23 stream?

24 MS. VAKILI: Yes.

25 MR. CZUKER: And you're showing a high year-one

1 debt coverage ratio on the permanent, but is that solely
2 on the A series or does that include the stack of the
3 first, second and third? You're showing approximately a
4 121 debt coverage, year one in --

5 MS. VAKILI: That actually includes our stack.

6 MR. CZUKER: And you anticipate that there will
7 be difficulty in getting that type of debt coverage
8 versus what appears to be a very low appraisal? Why, if
9 I'm reading this correctly, is the appraisal at permanent
10 based on a restricted value of \$6 million?

11 MS. VAKILI: The appraisal contemplates the
12 restricted value without the value of the investment tax
13 credits, so there's always going to be a delta between
14 the investment value during construction and the value
15 upon completion. The loan to value with all of the three
16 loans combined is still 80 percent.

17 MR. CZUKER: Thank you.

18 CHAIRPERSON COURSON: Any other questions on the
19 project?

20 Mr. Carey.

21 MR. CAREY: Could you just explain the backstop
22 commitment for the project based vouchers.

23 MS. VAKILI: The backstop commitment is utilized
24 in case the HUD commitment doesn't come in time to close
25 in August. The August start date is very important for

1 this project to get started before the winter rains and
2 to try to avoid as much delay as possible. While we're
3 very confident that we'll get the commitment, the
4 question is always timing. The Phase II already does
5 have a commitment from HUD. We don't want to hold up
6 closing Phase III into September, October and into the
7 winter for this commitment. And the OHA backstop
8 commitment is -- of course it's subject to review, but it
9 is thought to be a very strong commitment.

10 CHAIRPERSON COURSON: Any other questions? Is
11 there a motion to approve the project?

12 MR. MORRIS: So moved.

13 CHAIRPERSON COURSON: Mr. Morris moves. Is there
14 a second?

15 MR. CZUKER: Second.

16 CHAIRPERSON COURSON: Mr. Czucker seconds. Are
17 there any other comments? Any comments from the public?

18 Seeing none, let's call the roll.

19 MS. OJIMA: Thank you.

20 Mr. Pavao.

21 MR. PAVAO: Aye.

22 MS. OJIMA: Mr. Carey.

23 MR. CAREY: Yes.

24 MS. OJIMA: Mr. Czucker.

25 MR. CZUKER: Yes.

1 MS. OJIMA: Ms. Jacobs.

2 MS. JACOBS: Yes.

3 MS. OJIMA: Mr. Augustine.

4 MR. AUGUSTINE: Yes.

5 MS. OJIMA: Mr. Morris.

6 MR. MORRIS: Yes.

7 MS. OJIMA: Mr. Shine.

8 MR. SHINE: Yes.

9 MS. OJIMA: Mr. Courson.

10 CHAIRPERSON COURSON: Yes.

11 MS. OJIMA: 06-12 has been approved.

12 CHAIRPERSON COURSON: Okay. Thank you.

13

--o0o--

14 **Item 5. Update on Bay Area Housing Plan Financing**

15 CHAIRPERSON COURSON: The next item on our
16 agenda, as we have at each of our meetings, is an update
17 on the Bay Area Housing Plan.

18 MS. PARKER: Mr. Chairman, I would add that Kathy
19 and Edwin are coming up to sit, to give you this
20 briefing, that the actual signing of the documents was
21 accomplished in the interim between last meeting and this
22 meeting. And I just -- I can't adequately give everyone
23 a sense of the degree of complexity and work that went
24 into the signatures by so many different entities, but I
25 can tell you that these folks worked night and day and

1 really did the Agency and the State of California a great
2 pride with being able to bring this together.

3 So I just wanted to publicly one more time thank
4 Edwin and Kathy and really all the staff at CalHFA for
5 the outstanding work. It was a -- really a historic
6 moment and very touching moment by many of the people,
7 particularly those people serving the developmentally
8 disabled population to be able to see something like this
9 come to fruition.

10 MR. GIPSON: Today we just wanted to provide you
11 an update of where we are since the last Board, and as
12 Terri just touched on, a lot of hours and a lot of people
13 came together and worked weekends, evenings, and holidays
14 with Kathy, who will provide us an update in a moment.
15 We worked through the Cesar Chavez weekend, and Kathy
16 diligently worked through the weekend, and we had various
17 e-mails going back and forth.

18 Since we last met, we have closed, and we have
19 some deals. And what is coming in front of you now is a
20 package, and it's like the initial review package.
21 There's one basically semi full one, and then there's
22 just a couple of details on three other projects behind
23 it. So there's a total of four projects, but I'll let
24 Kathy just take us through the details.

25 MS. WEREMIUK: Before we get to that, what I'd

1 say is that's not the review package the Agency would
2 have. It is a preliminary package that the Regional
3 Center's steering committee approved when they approved
4 the projects. They allowed the developer to put soft
5 money on the projects and put them in escrow. But we
6 received a preliminary copy, and I thought -- I wanted
7 you to see what we start with.

8 As Ed mentioned, the Board on September 9th
9 provided a final commitment for this project for
10 20 million with an initial for an amount of \$200 million.
11 On January 11th, we increased that to a \$45 million
12 commitment with an initial increase to \$120 million.

13 When we came to the last Board, we were
14 struggling to close the property. On the 31st of March,
15 we -- all of the documents were signed, although the
16 closing really occurred at 9:00 o'clock on April 3rd,
17 about five minutes before the Department of Development
18 Services had a legislative hearing on the progress on the
19 Bay Area Housing Plan, and that really -- that hearing
20 really timed our efforts.

21 There were seven -- there were seven sets of
22 documents that were closed, and I just wanted to go
23 through it so you get a little sense of the complexity.
24 There was a permanent financing agreement between
25 ourselves and three nonprofit organizations. Those three

1 nonprofit organizations signed as 501(c)(3)s, but in this
2 month they're all changing over to limited liability
3 corporations that will hold the properties.

4 There's a loan purchase agreement, the most
5 difficult document we executed, between ourselves, Bank
6 of America as an agent for a syndicate of banks, and the
7 developer, Hallmark Corporation. There was a
8 construction loan agreement between Hallmark, the
9 developer, and Bank of America.

10 There was an agreement between the Regional
11 Centers and the developer specifying terms under which
12 they could develop the properties. There were similar
13 agreements between the nonprofits and the Regional
14 Centers where they agreed to pick up some liability for
15 the nonprofits.

16 And the Bay Area Housing Plan documents were
17 signed by DDS and the Regional Centers setting up the
18 conglomerate. In addition to that, there were about a
19 hundred additional documents, legal opinions and
20 supporting agreements that came together. Not everything
21 was finished, but everything that we needed to finish for
22 the developers to start purchasing properties were signed
23 and executed.

24 We're still doing some cleanup work on items.
25 The creation of the ONCs is a cleanup item. We're

1 collecting some, getting those reviewed by our bond
2 counsel who was active in this. We're working through
3 appraisal requirements. We finalized those yesterday so
4 that the first properties could be appraised, and the
5 agreement could be signed today and they could start
6 appraisals.

7 We're -- we have our tech people busily involved
8 in reviewing the master scope so that there's a plan for
9 what all of the properties will look like, what materials
10 they would use. That's probably a week away from
11 completion. And we're working on a -- what's a unique
12 situation, it's an engagement letter with our
13 construction inspector where we're not paying them.
14 That's what -- our legal department's currently handling
15 that and some other things, so we're still working on
16 some things that need to be done before the first
17 purchase of the property by the nonprofits.

18 But in the interim, Hallmark and the nonprofit
19 organizations have been able to identify six properties.
20 They've gotten preliminary approvals to -- from the
21 Regional Center steering committee to purchase all of
22 them. We've got four under escrow, which are the ones
23 that you have in front of you today. We anticipate the
24 other two will be under escrow.

25 They have moved forward with their plan. To our
30

1 great relief, they are using one contractor as opposed to
2 multiple contractors so that there can be a learning
3 curve, and we can actually expect that the properties,
4 once they start being rehabbed, will move quickly and
5 that the contractor we work -- they work with will be
6 able to understand exactly what's needed. And this will
7 be expeditious.

8 We made a decision to take only five to six
9 properties through construction at a time, which is the
10 capacity of the general contractor.

11 On another piece, Bank of America with its
12 syndicate banks expects a closing on that syndication on
13 the 15th of this month, and that will come in advance of
14 the first acquisition closing.

15 When I came in this morning -- or before I came
16 in this morning, I got several e-mails including critical
17 paths that told me the first property inspections would
18 occur on Monday and that we could anticipate getting our
19 packages by Friday. We have a five-day turnaround to
20 review all of the proposed plans and specifications and
21 for taking it to our -- I anticipate bringing the package
22 to add collateral to the commitment to our senior staff
23 as early as probably two weeks from today.

24 So we -- we think that this is starting to move.
25 We've gotten very comfortable with the work that's been

1 done by all parties to make this efficient, make it --
2 make the construction thorough, and we think it's moving
3 forward. I don't know yet if we'll be coming to you in
4 July for an additional commitment above the 45 million.
5 That really -- that really for us, we want to see --
6 we've heard very clearly from you that you want to see
7 how this is going before we come back to you for an
8 additional commitment.

9 MR. GIPSON: And so do we. We'd like to see the
10 progress and the status and how it's working before we
11 come back.

12 MS. WEREMIUK: As I mentioned, what's in the
13 packages to you and a little bit of what the developer
14 has found that we've learned in the last few days,
15 property prices are a little bit higher. They are
16 able -- they've been able to tie some properties up at
17 the asking price, no overbids, and some below the asking
18 price. The prices range from 820 to 937.

19 The property that's at 937, it has already been
20 modified for accessibility, so we'll have a much more
21 modest construction schedule and is in terrific shape.
22 Three of the properties that they've been able to tie up
23 were -- and they've gotten longer time lines in terms of
24 escrows only because First Fidelity, a title company, is
25 the trustee for three of the duplexes and so we've gotten

1 some time on the first couple of projects, a lengthy lead
2 time to work through our procedures as we -- as we work
3 with the bank.

4 The properties are in San Jose and Santa Clara.
5 They're attractive to look at. The -- one of the things
6 we found in the duplexes or they found in the duplexes is
7 that they're not able to do any inspections until they
8 have an accepted offer. That's fairly typical for
9 occupied properties, so that they're going in a little
10 blind as they walk in for the first time on the
11 inspections and seeing the properties.

12 And I think that's where we are. It's -- we're
13 encouraged.

14 CHAIRPERSON COURSON: Questions from the members
15 of the Board?

16 MR. SHINE: Could you just review the bidding.
17 Where are we on this thing? We started at 100 --

18 CHAIRPERSON COURSON: We're at 40 -- the Board
19 has approved -- correct me if I'm wrong, but the Board
20 has approved \$45 million in financing. We anticipate
21 that we'll have future requests for additional increases
22 in that commitment, permanent financing, but -- and I
23 think as Kathy and Edwin said, we're also doing this
24 thing in phases because I think the total is 120 million.
25 We really wanted to do it in phases where we could take a

1 look at the progress and make incremental increases in
2 our commitment as we saw progress, as opposed to the
3 initial thought of giving the entire commitment.

4 MR. SHINE: That's my recollection. We started
5 at a ceiling of 120 against which we're making some
6 advances.

7 CHAIRPERSON COURSON: We've done two approvals.
8 The first was for, I believe, 25 --

9 MS. WEREMIUK: Twenty.

10 CHAIRPERSON COURSON: -- and second for 20.
11 Twenty and 25, I'm backwards.

12 MR. SHINE: Are we still looking at 120 million?

13 CHAIRPERSON COURSON: Yes.

14 MS. WEREMIUK: At this point, yes, although we
15 haven't really looked at the implications of the cash
16 flows that we've received. On the properties, I've
17 looked at, they're running a bit higher than what we
18 estimated, and the first package that I got, I've
19 identified at least one error in the way they determined
20 our reserve. So it looks to me like the properties are
21 running about a million-7 as opposed to the million-4
22 that we anticipated.

23 But we -- we haven't been able to analyze this
24 yet or start to analyze it as we just received it
25 yesterday, and we don't know what the trends are. We

1 were -- what they haven't found is that the markets in
2 the Bay Area, we haven't found significant price
3 decreases in those markets.

4 MS. PARKER: And Edwin and Kathy -- our business
5 plan that the Board's going to look at today, presumes
6 about \$75 million worth of lending for the Bay Area
7 Housing Plan.

8 MR. GIPSON: Next fiscal year.

9 MS. PARKER: Next fiscal year.

10 CHAIRPERSON COURSON: Including the existing 45
11 million?

12 MR. GIPSON: No, it's an expectation that we'll
13 get an additional 75 million through the course.

14 CHAIRPERSON COURSON: So in other words, it's
15 commitments to really fund out, if you would, the
16 original \$120 million.

17 MR. GIPSON: Correct.

18 MS. WEREMIUK: We anticipate we'll start -- we'll
19 be starting to close on the Bay Area properties and put
20 our money out during this fiscal year, not commitments
21 but actual bond sales in permanent loan closings.
22 Probably starting somewhere between February -- I would
23 assume right now looking at this, that the earliest I
24 could anticipate we would be doing those closings is next
25 February. And I don't quite know what the volume will be

1 in terms of closings between February and June.

2 MR. SHINE: Back to the reserve that you were
3 talking about, is that the \$5 million reserve that you're
4 talking about?

5 MS. WEREMIUK: No. The \$5 million has already
6 been paid. We -- what the Agency is requiring is
7 approximately an additional \$12 million. It's one year
8 of debt service paid up-front that we are holding as a
9 bond reserve in the unlikely instance that there is a
10 failure of the legislature to appropriate that. We would
11 have the five million plus the --

12 MR. GIPSON: Debt service reserve.

13 MS. WEREMIUK: -- debt service reserve, about
14 17 million available to the Agency to assist us in the
15 year that it would take us to liquidate the properties if
16 there was a complete failure in funding.

17 MR. SHINE: Are you taking that down
18 incrementally per house or something?

19 MS. WEREMIUK: Yes. We're taking down that
20 reserve per house, and we will be taking down the
21 5-million reserve which B of A is currently holding per
22 bond sale so that if we -- we would get that at each --
23 it would come per house, but it would come at -- since we
24 anticipate on the bond sale, we'd have a bond sale and
25 then a closing, we'd be closing on the first 120

1 properties, so we would get that proportion of the 5
2 million with each closing transaction, but we would also
3 get the debt service reserve.

4 So there are two reserves that are in place to
5 assist the Agency. Those reserves ultimately will go
6 back to the -- to the Regional Centers and to DDS and, I
7 believe, ultimately they're planning it would go into
8 some kind of affordable housing fund, if everything works
9 out as we currently anticipate.

10 CHAIRPERSON COURSON: Thank you. It seems
11 certainly we're moving forward.

12 MR. GIPSON: Yes.

13 CHAIRPERSON COURSON: We've got some momentum
14 now, and we'll look forward to another progress report in
15 July and to see where we are and what the needs are. And
16 to both of you and all your staff and I know counsel and
17 everybody has been involved, and I realize it's been a
18 Herculean task, but it's also good to see some product
19 out there. Thank you.

20 MR. GIPSON: Thanks.

21 --o0o--

22 **Item 6. Discussion, recommendation and possible action**
23 **relative to adoption of resolution approving**
24 **Five-Year Business Plan for fiscal years**
25 **2006/2007 to 2010/2011**

1 CHAIRPERSON COURSON: The next item on our agenda,
2 and really where we'll spend the balance of our time, is
3 taking a look at the five-year business plan. I know
4 this -- we went -- as you know, we -- probably Terri
5 said, we went through this at the last Board meeting, and
6 this will be sort of our final take, if you will, or
7 approval of the bill -- five-year business plan. It's
8 had some, what I would term, fits and starts over the
9 last 30 days, but I think now, based upon the information
10 that Terri gave and the Governor's announcement on
11 homelessness and so on, that we have a plan that will
12 allow us to really move in the direction that we've all
13 wanted to move, as opposed to sort of flatlining or
14 standing in place.

15 So with that, Terri, I'll let you take over and
16 share the rest of it.

17 MS. PARKER: Thank you, Mr. Chairman.

18 I am going to do an introduction, and obviously
19 the staff will go through the various portions of the
20 business plan. I just want to call your attention to at
21 your chair there is a -- a handout of slides that we'll
22 be going through today, and there's also a new cover
23 letter from me to the Board. This one has a far more
24 auspicious beginning to it than the one that I sent to
25 you several weeks ago where I said I was offering you a

1 business plan. This one starts out with saying that I'm
2 especially pleased to offer for your consideration this
3 business plan.

4 As I said in my opening remarks, based on the
5 discussion just yesterday, we thought -- and I think this
6 is particularly -- and maybe Curt Augustine will add his
7 comments -- particularly important, and the Secretary
8 thought it was particularly important for the Board to
9 consider what -- what would really be presuming, you
10 know, the planets align, the kind of business plan we
11 would want to be telling the affordable housing community
12 that the California Housing Finance Agency was prepared
13 to offer for consideration during the next year and for a
14 five-year period.

15 We will be, based on the Board's actions today,
16 going back and updating the business plan document which
17 we will publish. As you're aware, many of you who've sat
18 on the Board for a number of years, sometimes the Board
19 has made some changes, and we will go back and reflect
20 the final business plan and publish that.

21 CHAIRPERSON COURSON: Terri, let me ask you,
22 interrupt you. So the detail behind the main pages that
23 takes us program by program, historical and budget, if
24 you will, budgeted production volumes, those numbers will
25 all be changed now to reflect the new 14 billion as

1 opposed to the lower figure?

2 MS. PARKER: Correct, John. We won't go back and
3 update the estimated current year numbers, but we will go
4 in and reflect the program dollars we're proposing by
5 program area. And in at least one case there is a new
6 program that we didn't include in the document itself
7 that we will be adding, but we will certainly be
8 discussing that with you.

9 CHAIRPERSON COURSON: And once that's done, can
10 that be shared then with the Board?

11 MS. PARKER: Absolutely. It will be the
12 published business plan. And I -- you know, again, I
13 thought about this, and we did this very, very quickly
14 yesterday. And while the business plan portion of this
15 is updated, the item that will follow on the
16 administrative budget has not been updated. But we
17 thought since this is a document that gets put in our
18 rating agency's analysis -- we'll be going to see the
19 rating agencies in August -- we wanted to have the Board,
20 you know, not have any kind of a negative, but be able to
21 reflect positive goals.

22 So we have put together, and we can talk through
23 this document, a slide presentation of what the overview
24 of the business plan will be. And we've done the slides.
25 There's quite of a bit of information here. We're going

1 to try to go through these quickly because I think it's
2 about 40 pages. We have done the information here,
3 though. You can take it back and look at it at your
4 leisure. We'll try to go very quickly. However, if
5 you'd like us to slow down, please let us know. But for
6 the moment we'll operate on trying to go through this
7 document.

8 As I've just said in my overview, we are in touch
9 on the accomplishments. We did a little bit of that at
10 our last meeting in March. Clearly this business plan
11 does include more detail than what we sort of chatted
12 about in March. What we talked about in March was really
13 the utilization of the housing assistance trust funds
14 from which the business plan production targets would be
15 based.

16 And we've done that from the standpoint of we
17 really feel that is the crux of the policy issues for the
18 Board to be considering because those -- the distribution
19 of those dollars, that scarce resource we have, really
20 sets the -- I think the policies and the objectives of
21 what the Board wants the staff to be accomplishing.

22 We also will talk a little bit about some of the
23 major initiatives we have up for this upcoming year. One
24 of them is a discussion with, a partnership with, Fannie
25 Mae. This comes about on the homeownership side and to

1 some extent insurance, a little bit, because of work that
2 I've been doing with the National Council of State
3 Housing Finance Agencies where we've talked about the
4 housing finance agencies in totality trying to brand our
5 business with Fannie that clearly needs a predictable
6 source of goal rich loans to meet their HUD goals.

7 And so we are trying to see if we can develop a
8 partnership with them to the benefit of what we can be
9 offering our homeownership programs and in that sense
10 the -- to the mutual benefit of Fannie in California.

11 We continue obviously to have initiatives in the
12 Bay Area Housing Plan. We will talk in greater depths of
13 the use of technology as part of this business plan. And
14 one of the things that we touched on a little briefly in
15 the past meeting is to discuss a proposal that we have to
16 look at trying to develop some kind of a permanent
17 headquarters in Sacramento, either through long-term
18 lease, ownership, some kind of acquisition.

19 I have put down here the challenge of recruiting
20 senior executive managers. Hopefully with the continued
21 dialogue with the Governor's Office and really their
22 understanding, better understanding, of what the Housing
23 Finance Agency does that is unique from the rest of state
24 government, the fact that we are really funded and a
25 concern of the investors who participate in our programs,

1 not taxpayers, and the need to be mindful of their
2 investments, that we hope to continue to find and
3 attract, recruit talented individuals to deliver these
4 initiatives for consideration to the Board.

5 With that as an overview, I just want to draw
6 your attention to the next page which is the use of our
7 housing trust funds. We, I think through the discussion
8 last time that Bruce gave you, are trying to somewhat
9 discipline ourselves to an annual amount of \$65 million
10 in housing trust funds distributed among homeownership,
11 multifamily and special lending programs as a way to
12 achieve this \$14 billion over five-year business plan in
13 totality.

14 There are two sources of funds on this table.
15 One of them is our traditional housing assistance trust
16 fund. The other one is funds that come from Prop. 46
17 through the residential development loan program, and
18 that is something we're introducing as part of the new
19 locality program.

20 But as we go through our presentations, we'll
21 talk a little bit about the better use of housing
22 assistance trust funds during the current year and, in
23 fact, even with reducing them substantially from what
24 they were the previous year, we have been able to grow
25 our lending, particularly in homeownership. So we will

1 talk about this as we go through here.

2 The one program I also would highlight, although
3 we talked about this at the last meeting under
4 multifamily, is the introduction of a new AHP GAP
5 Substitute Program. Putting \$10 million into it of
6 housing assistance trust funds, we expect to be lending
7 about \$6 million, which takes us into our \$65-million
8 disciplined budget mode. Obviously we will try to do it
9 as much as we can depending on the use of housing
10 assistance trust funds in totality, but this is a GAP
11 financing program that we talked to the Board a little
12 bit in our last Board meeting, and Laura will be here
13 when we go to multifamily to talk a little bit more it.

14 But let me --

15 CHAIRPERSON COURSON: Can you -- can you explain
16 the difference between program budget and HAT budget?

17 MS. PARKER: Yes. The program budget includes --
18 these are initiatives and includes both housing
19 assistance trust funds and Prop. 46 funds.

20 CHAIRPERSON COURSON: Okay.

21 MS. PARKER: The next column is the HAT budget,
22 with only our housing assistance trust funds, and then
23 the next is just to give you what we anticipate of HAT
24 fund utilization. We expect for those funds that are
25 Prop. 46 -- and that's primarily again the residential

1 development loan program -- that we would commit all of
2 those funds. But we thought we would do this because,
3 again, this is really the - these are the guts of what is
4 the policy consideration for the Board.

5 So if there are no further questions, Gerry, I'll
6 let you lead into going through the homeownership slides.

7 MR. SMART: Thank you, Terri.

8 Good morning, Mr. Chairman, Members of the Board.

9 What I'd like to do first is kind of do a quick
10 review of the accomplishments in homeownership, then I'll
11 talk about some of the -- what our portfolio looks like
12 today. We have several slides that will show the
13 demographics. And then we'll talk about the strategies
14 and our business plan for the coming fiscal year.

15 As you can see on the slide here, we truly expect
16 to exceed our first mortgage loan volume by about
17 150 million. As a matter of fact, as of today or
18 yesterday, I should say, we're already almost at
19 1.2 billion, which is our goal for the year. With the
20 added 150, we probably will end up about 5200 loans total
21 in our first mortgage program.

22 We have really seen a remarkable volume in our --
23 and acceptance of the interest-only, 35-year PLUS program
24 since we introduced that a year ago March. As of the
25 fiscal year, we've purchased almost 1700 loans for about

1 460 million. The unique thing is the IOP loan is now
2 representing about 40 percent of our total volume, and we
3 expect that probably will increase as some of the major
4 lenders come on line. With Countrywide coming up,
5 they've assured us that they'll be starting, I think it's
6 May 15th. So we'll see another surge in IOP.

7 We introduced the 40-year, 100-percent loan this
8 last March. We've already taken in 62 reservations for
9 nearly 17 million. That won't generate the type of
10 volume that we're seeing with the IOP, but I think it
11 will represent a significant amount of business for
12 homeownership.

13 We have certainly increased our outreach efforts.
14 We've added three new trainers and are now conducting at
15 least 25 or more training sessions or seminars a month,
16 and that's in addition to all the outreach efforts which
17 include trade shows, homebuyer fairs, kick-off events,
18 grand openings at new developments, conferences, guest
19 speaker arrangements at industry trade associations and
20 so forth. And we'll continue that as we go forward in
21 the coming fiscal year.

22 We continue to achieve a significant volume in
23 low-income lending. 43 percent of our total volume goes
24 to those first-time homebuyers. And our Affordable
25 Housing Partnership Program, AHPP, has also -- has

1 expanded. We now have almost 400 new programs in about
2 240 localities around the state. That's city, county and
3 redevelopment agencies. Those programs are providing
4 about 33 million in down payment and closing cost
5 assistance to our homebuyers.

6 This slide gives you a picture of where we are in
7 our down payment assistance. You see in 2001 and '2 the
8 primary programs volume was with our CHAP program and
9 CHDAP. CHAP, we had 19 and a half million, and CHDAP,
10 which we had just started, was 13.5. You can see that
11 CHAP continued to increase through the next four years,
12 but last year, as you know, we have made some changes
13 because that was funded out of HAT, along with the HiCAP
14 program. It became necessary for us to reduce the
15 volume. And the change we made there was to target CHAP
16 to FHA loans.

17 And with the HiCAP, we -- as you can see, it
18 started off as a pilot program back in 2001 and took hold
19 and become a significant part of our program, offering
20 \$25,000 junior mortgages. Again, last year it was
21 necessary for us to control that. And we reduced the
22 loan amount to 15,000. This year it's a little more
23 moderate and -- but very, very successful.

24 And the CHDAP program, I think we're going to
25 come out in the neighborhood of 28.6 million. It's a

1 little under our goal, but it's within control. And --

2 MS. PARKER: The good news about this slide,
3 folks, is not that anybody should think that we are doing
4 less lending. The good news about this slide is if you
5 look at particularly the green bar and the very deep blue
6 bar, that these are down payment assistance programs
7 using the Housing Assistance Trust Fund.

8 The fact that we have reduced those bars in 2005,
9 2006 and done and done what we're projecting to do, \$1.35
10 billion worth of loans, that's the -- that's the success
11 story, because we reduced our dependence on housing
12 assistance trust funds to make those loans, thus either
13 reducing the need of housing trust to come out of our
14 indentures or being able to redirect those housing
15 assistance trust funds to other very worthwhile programs,
16 particularly programs like Habitat, homelessness, and
17 other multifamily programs.

18 MR. SMART: Just to say, we're very pleased with
19 the performance of these down payment assistance programs
20 that are funded out of HAT and Prop. 46.

21 This slide illustrates where we are on our first
22 mortgage program. That consists of three products today:
23 the 30-year fixed, the 40-year fixed and the
24 interest-only 35-year fixed. Back in 2001/02, our goal
25 was a billion dollars. As you can see, we have achieved

1 that, and we've continued to do that every year since.

2 The portfolio now totals 26,822 loans. What's
3 significant about that is it's the first -- first time
4 that we have turned the corner. We have been losing
5 portfolio for the last couple of years through
6 prepayments, and now we've finally turned the corner and
7 are on the positive side. We're increasing our total
8 portfolio.

9 Delinquencies have been real -- I should say
10 very, very good for us. They're 4.7 percent total
11 portfolio. And our conventional loan, which is the
12 majority of your new loans, it's up 2.1 percent. So
13 we're pretty pleased with the performance there. And we
14 have no REFs. I think we've only had one since the
15 beginning of the fiscal year, so that's been pretty good,
16 although that will probably change going forward.

17 This -- this slide -- illustrates the makeup
18 of our loans as far as property type. In 2001 we only
19 had 42 manufactured housing loans. We had 22 percent of
20 our loans in condos or attached PUDs. And the majority
21 were, of course, single-family detached. You can see
22 that over the last five years that has changed, and we're
23 now at 50-percent condo. And that will probably grow as
24 we go forward.

25 And you can also see that in 2001, total loan

1 volume was 6700 loans, almost 7700 loans and has
2 declined. We're down to just under 5300 loans. I think
3 the primary significance of that is -- is the price
4 appreciation we've seen in the market and rising interest
5 rates. It's reducing affordability to the level of
6 homebuyers that we're serving. So it's had a profound
7 effect on total loans, although our dollar goal volume,
8 as the previous slide indicated, shows an increase.

9 CHAIRPERSON COURSON: Let me just make a comment
10 here. I'm sort of struck by the manufactured housing
11 number going to, I think, 207 units, if I'm correct.
12 That in my mind is clearly a reflection that the private
13 market has moved away from that lending. Never a day or
14 a week goes by that another major lender doesn't withdraw
15 from making manufactured housing loans on real property
16 just because of the significant delinquencies and the --
17 and the value issue, initial appraisal versus the value
18 of an REO.

19 So I would just plant the seed that we may be
20 getting adversely selected because as the conventional
21 markets moved away from a product that has demonstrated
22 large losses upon foreclosure, we may become the house of
23 last resort. So we may want to think through our
24 manufactured housing program and exemptions to that
25 product.

1 MR. SMART: We do look at those closely, and we
2 do follow Fannie Mae guidelines on the approval of those
3 manufactured housing.

4 CHAIRPERSON COURSON: So did the lenders that now
5 have the foreclosures. And the problem is even the
6 Fannie Mae guidelines, when you foreclose and you go down
7 and get a current appraisal, what you can sell it for,
8 there's a substantial diminution in the value.

9 MR. SMART: There is the one significant point
10 there where we differ with Fannie Mae in that we have
11 restricted our loan to value to 90 percent, whereas
12 Fannie will go up to 95. So we have a little better
13 cushion there. But, yes, we do need to follow that and
14 keep a close eye on manufactured housing.

15 This slide is to illustrate the -- where we are
16 in the insurance type. As you can see, in 2001 we were
17 predominantly an FHA conduit. 92 percent of our loans
18 were FHA and 4 percent were conventional, and that has
19 shifted over the last five years. We are now primarily
20 doing conventional loans and either mortgage insured by
21 our own mortgage insurance fund or covered by GAP. Those
22 GAP-funded loans are basically loans that are less than
23 80-percent loan to value.

24 That's not to signify that those homebuyers
25 aren't actually putting 20 percent down. A lot of those

1 include huge down payment assistance programs, both by
2 our programs and locality assistance, so through the
3 Affordable Housing Partnership Program and other
4 programs.

5 But it's significant that we're seeing a change.
6 And this is the first year in which our conventional loan
7 business has exceeded the FHA volume.

8 As far as the demographics on our portfolio, we
9 are -- in 2002, 71 percent of our loans went to minority
10 households. That has changed in the intervening years.
11 It's reduced to 59 percent. Still, I mean, a good
12 figure, but it's decreasing, and we're seeing the largest
13 change, of course, in Hispanic volume. And I attribute
14 that again to the change in affordability and the
15 product. We offer higher interest rates and higher
16 loan -- I mean home prices in the market. And it's
17 having a profound effect on that -- that group.

18 CHAIRPERSON COURSON: Mr. Carey.

19 MR. CAREY: It's an interesting contrast. USA
20 Today had a story today about the surnames of homebuyers
21 throughout the country. In California, the top five
22 surnames of homebuyers last year were all Hispanic
23 surnames. So that's kind of an interesting contrast to
24 the picture we have right here.

25 MS. PARKER: Well, Mr. Carey, I think you can see

1 that in 2002, 57 percent, we have really led in this
2 area. And, you know, it's been -- it's declining. This
3 is the biggest drop that we've seen, really, in looking at
4 the data that we've been, you know, tracking for last
5 four or five years.

6 I think because of seeing this, I think all of us
7 were sort of taken aback, and I can tell you that we'll
8 be having some discussions with our marketing folks.
9 But, you know, I think as Gerry said, you're going to see
10 the chart to follow.

11 MR. SMART: I would like to say that our outreach
12 efforts have been significant to all of the minority
13 lending, and particularly Hispanic. We have staff that
14 are bilingual and do trade shows at homebuyer fairs that
15 are set aside for Hispanics. So we do try -- plus we
16 have brochures and material that is in Spanish, so we do
17 try to address that as best we can.

18 MR. AUGUSTINE: This is just a one-year drop.
19 This is not really a trend, right?

20 MR. SMART: It's -- it has been declining from a
21 high of 72 percent back in 2002. Every year we've seen a
22 decrease. This year is the most significant change, so
23 we have seen --

24 MR. AUGUSTINE: Whether it's a one-year
25 aberration, it's not --

1 MS. PARKER: I think this is such a
2 great picture, you know. This tells a lot of the story
3 about homeownership and the ability for homeownership in
4 totality. If we have declining loans --

5 MR. AUGUSTINE: I would caution that we should
6 not draw any conclusions from race-based lending to home
7 pricing. There's a lot of factors that are maybe just a
8 one-year aberration too. I think that that's a
9 conclusion we need to be careful of drawing.

10 MS. PARKER: I don't think we're intending to
11 draw any.

12 MR. AUGUSTINE: Well, you've said it a couple --
13 it's been said a couple times that it's dropped because
14 home pricing has gone up and interest rates have gone up.
15 So I just would caution you, be careful about discussing
16 it in that manner.

17 MR. SMART: Well, here we'd like to illustrate
18 the change in the market. In 2001, the median California
19 price was \$297,000 and has nearly doubled to \$569,000.
20 It's had a profound effect, I think, on the total number
21 of loans that we've seen.

22 The light blue chart is the median income for our
23 portfolio, our loans. In 2001, that was \$36,200. In
24 2005, that had increased to \$55,100.

25 The green is the CalHFA median loan amount. In

1 2001, that was \$126,350, and it only increased to \$235,000
2 in 2005. So we're still well under the market, but
3 finding affordable housing is becoming a much more
4 difficult task.

5 MS. PARKER: I think, Mr. Augustine, too, and
6 maybe it's kind of inappropriate on our part to, you
7 know, make some presumptions because I think that that's
8 probably what we've been doing -- but if you can look at
9 this chart, you can see that the gap between income and
10 sales prices continues to get wider and wider and wider.
11 And that's why, you know, the percentage of people who
12 would qualify are picking up those statistics and it's
13 14 percent.

14 MR. AUGUSTINE: Oh, I understand that.

15 MS. PARKER: So, yeah, it -- it -- I think it is
16 a challenge to all parts of California's economy and
17 population.

18 MR. SMART: This is a -- kind of a reflection of
19 where we are in our Prop. 46 down payment assistance
20 programs and the RDLP. Those programs started back in
21 2003. We had about 270 million total that the Agency was
22 administering. And we have utilized about 55 percent of
23 that in the down payment assistance programs. The RDLP,
24 that 75 million came from the insurance fund, and I
25 believe that if the bond issue is passed, there will be

1 an additional hundred million.

2 MS. PARKER: Yeah, just to add, I think given the
3 sheet that we passed out, this is a good chart to show
4 you, that the bond includes \$200 million, approximately,
5 to -- for the CHDAP program. Of that, a hundred million
6 dollars could be utilized for lending under the RDLP
7 program.

8 MR. SMART: And a hundred million will go to
9 CHDAP, and so that will increase that balance. Of
10 course, by the time that comes about, that would be --
11 should be significantly less than 50 million balance.

12 Our new strategies, we are -- heretofore we have
13 not really identified the loan officers that participated
14 in our program, although we certainly knew what the
15 lenders were, where they came from, the localities, the
16 counties and so forth, but going forward we are tracking
17 our loan officers and that would play into the lead
18 generation program that we are attempting to develop, and
19 I'll talk about that in a second.

20 As Terri indicated, we have made some changes in
21 the past to our HiCAP program. We reduced it last year
22 to 25,000 to 15. This year we intend to expand that
23 program to all high cost areas that are basically
24 underserved. That will be 18 counties, mostly coastal
25 that go from Marin down to San Diego. That's to improve

1 our geographic distribution.

2 We have some major counties like Los Angeles and
3 Orange County that are underserved considerably, and this
4 is an effort to -- to get some parity there in our
5 lending. It will, though, necessitate some changes in
6 the loan amounts again in order to remain within our
7 funding levels that are available. And those changes
8 will probably come about before the first of the fiscal
9 year.

10 We'll continue to provide training to loan
11 officers, processors, as we go forward. As explained
12 earlier, we have hired additional staff. Those efforts
13 continue, and we are in negotiations with Fannie Mae. We
14 have talked to them several times about a potential
15 mortgage backed security program on the conventional loan
16 side. As you all know, we operate a whole loan
17 operation, and this will be a venture into the MBS side
18 if it works out. These loans will come under Fannie Mae's My
19 Community Mortgage Program, and it looks so far that Fannie Mae
20 will be willing to give variances so we can match up
21 our MRB type loans with their My Community mortgage.
22 We're still looking to see if this is economically
23 feasible and what Fannie Mae will be willing to consider.

24 As indicated, we are in the process of developing
25 our lead generation program. If I can find my notes on

1 that. This is a tracking system where we will refer
2 those homebuyers, potential homebuyers, that call in on
3 the 800 line to actual pre-trained and pre-selected loan
4 officers. And we're going after those who are most
5 active with the program. We'll probably start out with
6 about a hundred of them, and that over time will be
7 reduced to around 60.

8 But what we're attempting to do is make sure that
9 the interested parties who call in are actually given to
10 loan officers who know our program and will turn those
11 loans -- those potential leads into actual loans instead
12 of flipping them into some higher cost product. We're --
13 we're pleased with the performance -- the development so
14 far. It will be a mirror image, so to speak, of the
15 CalPERS lead program, and I think it will be a big bonus
16 to us going forward and should there be a positive
17 increase in the total loan volume as we turn these
18 potential leads into CalHFA loans.

19 We'll certainly continue our efforts with
20 marketing and media resources to generate telephone
21 leads. We continually have -- staff and Terri and the
22 other senior managers have been on the radio and
23 television interviews to highlight our programs and
24 generate new leads, and it's been remarkable the amount
25 of phone calls that we do receive. We can see it. As

1 soon as those radio interviews are held, immediately we
2 get a huge volume of increased calls.

3 And as I've indicated in the past, we've been
4 working to replace our legacy system, our loan
5 reservation system. We're working with Eclipse, a
6 vendor, to complete the review of our current portfolio.
7 They've done an as-is analysis. They've conducted better
8 business practice reviews with other HFAs and several of
9 our major lenders and are completing the development of
10 the user requirements going forward and will conduct
11 software analysis and then develop the project initiation
12 documents. They'll make a recommendation whether we
13 should buy or build a system and help us with the RFP
14 that we'll put out.

15 That first phase of the development of this new
16 system should be completed by July, and then we'll move
17 into the second phase, the selection of that new vendor
18 to either buy or build, and it will probably take about
19 18 months to actually complete that process.

20 CHAIRPERSON COURSON: Let me just go back and I
21 mentioned this to Ken Giebel earlier. The one thing that
22 strikes me is my suspicion that probably 90 percent of
23 our single-family business comes from about 10 percent of
24 our approved sellers. And so as we market to those, it's
25 sort of like preaching to the choir, in some respects.

1 We go back and market to the loan officers and the
2 companies that CalHFA is a product prominent among their
3 offerings, and we have a substantial number, a remarkable
4 number, of lenders who are proved, approved sellers, who
5 can't spell CalHFA. And particularly after the last two
6 or three years, they've forgotten it because it just was
7 irrelevant in their drive to refinance the market, the
8 world.

9 Having said that, we're in a marketplace now
10 where every producer, every producing mortgage banking,
11 mortgage lending company, is looking for product and
12 screaming out for alternatives in products.

13 And so I think the other opportunity for us, and
14 particularly to spread CalHFA over a bigger base of
15 sellers, which is a good thing for us, is to try to
16 figure out a way to go to those sellers who are dormant,
17 in effect, who we carry on our rolls, who do little, if
18 any, business with us and either suggest that they need
19 to get on the train in terms of making it -- and help
20 them do that through our training or determine if they
21 really are interested going forward in participating in
22 the program.

23 MR. SMART: Our business plan for the coming
24 fiscal year is certainly aggressive. We have increased
25 that from 1.2 to 1.5 billion. We think this is a very

1 doable goal and achievable, and I believe so because of
2 the various strategies that we'll employ and the new
3 products that are involved: Interest Only, the 40-year
4 product, our lead generation efforts, our outreach
5 efforts, and certainly the lenders coming onboard that
6 will promote those programs. We think it's a very
7 doable program.

8 And in a context that even though our down
9 payment assistance has been moderated to some degree
10 on -- for CHAP and HiCAP, we do think that this is an
11 achievable goal. In fact, I would not be surprised if we
12 exceed that considerably. The 1.5 billion represents
13 probably in the neighborhood of -- based on today's
14 average loan amount -- about 6300 loans. So that's an
15 increase, where we have -- as the previous slide showed,
16 we had been sliding.

17 MS. PARKER: Mr. Chairman, we'll move on to
18 mortgage insurance, but I do want to make one final
19 point.

20 MR. MORRIS: Just one question.

21 CHAIRPERSON COURSON: Mr. Morris.

22 MR. MORRIS: The memo that we received several
23 weeks ago had 6.5 as the activity where now we're at
24 8 billion. Could you just -- what happened over the last
25 two or three weeks to change it, to increase it to

1 1.5 billion?

2 MS. PARKER: We -- we made an assumption that
3 because of the lack of having staff -- actually, I was
4 just going to point out, Mr. Morris, that Gerry has been
5 running the homeownership program single handedly for the
6 past year. They're without a director of homeownership,
7 and his colleague Ken Williams retired last year, and
8 it's just a matter of being able to have the staff and
9 the resources to go out and market and produce those
10 levels.

11 So we think with the ability to hire, you know,
12 one and a second person in the homeownership that we will
13 be able to be as aggressive as we have resources to be.
14 So we took the business plan from reducing it to maybe a
15 status quo of about 1.3 billion and moved it up to 1.5
16 billion because that is how much resources that we have
17 to actually lend should we have the ability to implement
18 all of these new programs and technology.

19 MR. MORRIS: So resources based upon the staffing
20 that you currently have.

21 MS. PARKER: Staffing. It is all about staffing.

22 MR. MORRIS: Well, is there -- maybe this isn't
23 the time to do it, but would there be maybe -- should we
24 readdress that staffing need? Because if it really is a
25 matter of -- I don't know what the additional cost was of

1 this individual, but is there any way to ramp this up by
2 more with more support? In other words, at what point do
3 you feel that additional support doesn't help, or would
4 additional support enable you to go from 1.3 to 1.5 to
5 1.75 or whatever it is? In other words, I -- you know, I
6 don't see where the one person, how you get the 200
7 million more or -- I mean --

8 MS. PARKER: Well, it's -- part of it is --

9 MR. MORRIS: Because you addressed that in your
10 memo before about --

11 MS. PARKER: Part of it --

12 MR. MORRIS: -- the problem of --

13 MS. PARKER: Part of it is --

14 MR. MORRIS: -- personnel.

15 MS. PARKER: -- and we have, the Board in
16 totality, looked at -- you know, the resources that we
17 have to loan are based on the ability for us to get bond
18 allocation from the Treasurer's Office. We have been
19 very successful the last couple years at getting a good
20 amount of allocation, unlike previous years when our
21 allocation amount was maybe about \$200 million, which we
22 leveraged with taxable bonds and recycling of funds.

23 But because the demand on tax exempt bonds has
24 not been as great by other areas of the industry,
25 particularly multifamily and other some -- other

1 single-family issues, we have gotten more of that
2 resource than we have in the past year. So we have
3 developed a five-year business plan making some
4 assumptions about having that tax exempt bond financing
5 available to go to the capital market and sell bonds.

6 We are not like a private lender that we can do
7 that infinitum. We are -- we are confined by how much
8 tax exempt financing we get. So while we have more
9 resources than we had in prior years and we're going to
10 have to be -- come up with products to continue to be --
11 do our market share, we all -- we will -- we'll always be
12 constrained by how much the bond cap that we have to lend
13 out.

14 Part of the other reason again, is we came out
15 last year with the 535 program. We've come out with a
16 40-year loan. As the market adjusts to those programs
17 and other lenders operate them, our feeling was that
18 because we -- we might not have the capability inside to
19 come up with new and creative programs that our market
20 share could stay stagnant and -- and/or decline. And the
21 idea about being able to hire a mortgage banker that
22 would have a better sense of developing those products,
23 that we could continue at a higher level.

24 CHAIRPERSON COURSON: I would respond, and I
25 think Terri is exactly right. I think that the ability

1 to hire that director is only a piece of it. But we
2 really, I think, before -- we have the confidence now
3 based on what we know now versus the last time we looked
4 at this a couple months ago, is the ability to do that and
5 be competitive with hiring that person.

6 Because with -- frankly, without that, we just
7 have to keep -- we have to keep the trains running and
8 deal with the volumes that we're getting at the present
9 time. You've seen now we're talking about new product
10 development. Some of the slides are more trainers, more
11 outreach to lenders, my suggestion of going to those
12 sellers. Those were things that likely would fall to the
13 wayside without a director and somebody in there to push
14 those initiatives, because why bring the staff in to do
15 it and then have the expense and cost without the ability
16 to manage it.

17 So I just look at it as it's -- when you put that
18 director, that management position, assuming you can,
19 that will be able to drive those other initiatives.

20 MS. PARKER: I would hope the Board would also
21 realize our business plan for the current year was 1.2
22 billion. We have done 1.35. We're going to do as much
23 as we can. You know, that's certainly --

24 CHAIRPERSON COURSON: Well, in a rising rate
25 market historically we will do a bigger -- we will do a

1 bigger volume. As rates go up in the conventional
2 market, our tax exempt capabilities in providing housing
3 for first-time homebuyers becomes more significant, and I
4 think that's historical.

5 MS. PARKER: One other thing --

6 MR. MORRIS: So the real answer is that adding
7 additional people won't necessarily increase -- you're
8 limited somewhat by your cap, depending on how close you
9 are to your cap.

10 MS. PARKER: Well, we are -- you know, Bruce can
11 speak to this, but I think we are comfortable with what
12 we have here as far as access to bond cap.

13 One other point that I think it's significant to
14 add for the Board's consideration, because, again, this
15 goes to all of you, your direction to us, we -- it's not
16 to us just about lending 1.5 billion. It's really where
17 and to whom that we're lending that. You know, Karney
18 Hodge used to -- when he was the Executive Director, used
19 to get teased before the Legislature because Karney could
20 do all the lending in Fresno that anybody could ever
21 conceive. We're trying to use this billion-five to push
22 into those areas where there is least affordability, to
23 those income limits -- to those people with incomes where
24 they have, you know, the biggest gap.

25 So that's the reason why we changed, for example,

1 our HiCAP program to put something in Los Angeles because
2 we're not serving it as great. So we're going to try to,
3 you know, not just do a billion-five, but to do it in
4 areas where we're, you know -- we have more geographic
5 distribution, you know, try to hit more loans to people
6 who are at less than 80 percent of median income. Those
7 kinds of things we also thought were important
8 programmatic considerations for us to make.

9 CHAIRPERSON COURSON: Okay.

10 MS. PARKER: Gerry, thank you.

11 CHAIRPERSON COURSON: We have one more question.

12 MR. CZUKER: Thank you, Mr. Chairman.

13 The -- I think to also address in a slightly
14 different way Mr. Morris' question, I do believe that
15 with the rising interest rate environment and given the
16 creativeness of what CalHFA has focused its attentions
17 on, with additional staff the volume could be increased.
18 I think there is the potential for additional debt limit
19 allocation and tax exempt. That is available potentially
20 if the demand was there. And I think that if there was
21 no bond limit allocation available, just as CalHFA has
22 done in the past, they would come up with creative ways
23 of recycling old bonds or layering taxable on top of tax
24 exempt to stretch the allocations that it does receive.

25 In both cases what that means to me is the

1 volume could be increased with additional staff. And
2 that raises the specter for future debate for this Board
3 of not only how much additional staff and how many
4 additional bodies would be enhancing the public purpose
5 of reaching out to those in need throughout the state,
6 but also to attract the quality of the type of
7 individuals that we'd like to see to address the need to
8 raise the salary limits of everybody from the top of the
9 line down. Because without raising the top salaries for
10 the top executives, those lower salaries that are pegged
11 off of some of the higher salaries means that quality
12 people are moving to the private sector, and it's very,
13 very difficult to attract the caliber, sophistication of
14 the type of people we'd like to see working for CalHFA.

15 So I think that we need to address both salary
16 limits and additional staff. And I think the ability to
17 reach out and do more does exist and that this is sort of
18 a comfort zone that we're seeing that is achievable that
19 is being proposed, but if we really wanted to tax and
20 stretch the resources, that these limits could be
21 enhanced and greatly increased with a little pushing.

22 CHAIRPERSON COURSON: Mr. Carey.

23 MR. CAREY: I just wanted to comment, back to
24 that median income sales price chart. I think it's
25 impressive that the Agency has done so well at expanding

1 the reach from the available incomes up to the house
2 prices. And many would watch the house prices go up and
3 simply write off that income sector at the bottom. I
4 think it's important that we all remember that that light
5 blue is the people who simply don't become homeowners.
6 And I think that's the toughest challenge, is that reach
7 down to that income level that is being left behind, even
8 while we recognize the fact that there's a big segment
9 there that, without CalHFA, would not be homeowners today.

10 And I think that's the challenge. I don't think
11 it's going to get easier to continue to reach down there.
12 I appreciate Terri, despite the fact I think there's
13 nothing wrong with lending in Fresno, the focus on the
14 who that we're lending to.

15 MS. PARKER: One other thing that I didn't
16 mention that I think is important too, we have very much,
17 the last several years, been focused on trying to get
18 homeownership through our lending. And last year we
19 talked about this and with the successful passage of
20 legislation to create the residential development loan
21 program, we're really trying to get in on the housing
22 stock side and -- because that's really -- the dilemma is
23 supply and demand. Insufficient stock raises prices.

24 And so to the extent that we can get this program
25 out -- Doug is going to talk about it in a little bit --

1 that is another approach of getting at the stock side
2 that we can then come in and have, you know, housing that
3 our customers can qualify for. So we are very, very
4 excited about that.

5 CHAIRPERSON COURSON: Okay.

6 MR. CZUKER: One other thought that I would
7 share, and that is I believe what we're going to be
8 seeing in the coming weeks and months are projects that
9 were on the board on a conventional basis no longer going
10 forward on a conventional basis, and perhaps, talking
11 about stock, there is an opportunity to reach out to both
12 municipalities and developers alike to say maybe you
13 should reconsider what was going to be a high-rise,
14 mid-rise, low-rise apartment or condominium project
15 downtown L.A., downtown San Diego, in high-cost areas,
16 metropolitan dense demographics where the economics no
17 longer work in a rising interest rate environment, and
18 those projects are being put on hold or scrapped where
19 the municipality can become your advocate to reach out to
20 those developers and reposition those new development
21 opportunities into affordable housing with some subsidies
22 that are being discussed and some creative financing that
23 only CalHFA can provide.

24 Additionally there have been those that have
25 taken apartment stock off line to do conversions to

1 homeownership, and many of those are having difficulty as
2 well. And so I think in terms of just identifying stock,
3 there is a unique opportunity perhaps to take projects
4 that are stalled and reposition them from market rate to
5 affordable housing stock for CalHFA's resources.

6 CHAIRPERSON COURSON: And clearly we've always
7 intended that -- to do that in partnership with those
8 municipalities. That's been the plan from when we
9 converted those funds from down payment assistance from
10 the onset.

11 Mortgage insurance.

12 I will note that the Chair does not plan to take
13 a break, so if you need to excuse yourselves or want some
14 coffee or so on, you're on your own.

15 MR. CARTER: Good morning.

16 MS. PARKER: I want to make sure I introduce Greg
17 Carter.

18 Greg, would you walk us through the mortgage
19 insurance slides, please.

20 MR. CARTER: Sure.

21 Let me first take a look at our accomplishments
22 and address each of those. The first one obviously shows
23 that we exceeded our 485-million goal for the year. Some
24 of that can be attributed to the initiatives we're
25 involved in that are reflected on the slide and

1 marking -- the marketing of conventional product.

2 The first point we did during that -- at the
3 beginning of the last fiscal year, we reduced our
4 mortgage insurance coverage from 50 percent to
5 35 percent, effectively lowering the premiums to the
6 homebuyers. And while that perhaps played a small part,
7 it really did add to the affordability and we think made
8 the conventional product more attractive.

9 The other initiative that we were involved in was
10 offering what we call the homeowners -- HomeOpeners
11 Mortgage Protection Plan, which essentially is -- insures
12 mortgage payments should a borrower become involuntarily
13 unemployed. That is actually provided through our
14 reinsurance agreement with our partners, and it is at no
15 extra cost to our homebuyers, in fact, no extra cost to
16 the Agency as well. It's just a nice supplement to any
17 loan that has mortgage insurance coverage.

18 The other initiative we're involved in was
19 rolling out a hundred-percent loan program that was
20 mortgage insured. And we offer this on all CalHFA loan
21 products. We'll offer to insure all of those. And we
22 offer additional options now to home borrowers who didn't
23 have the -- the resources for down payment. And we have
24 noticed that in the mortgage insurance area, 50 percent
25 of what we are now insuring are a-hundred-percent loans.

1 Another initiative that we were involved in was
2 the Interest Only PLUS Program. That too will go to a
3 hundred percent. And it's probably been the most
4 significant, not just for homeownership's production
5 being increased or maintained, but also it's contributed
6 greatly to the mortgage insurance business. In fact,
7 fiscal year to date, 60 percent of what we're insuring is
8 the Interest Only PLUS Program.

9 While an accomplishment is not the decline in FHA
10 loans, that too has contributed to the increased interest
11 in conventional business and ultimately mortgage
12 insurance. Three years ago 84 percent of our business
13 was FHA. This year, 2005, 27 percent, gravitating
14 towards conventional business.

15 My slide looks a little bit like the slide that
16 Gerry talked about in his production, but my focus is, of
17 course, the gold bar, which is increasing insurance
18 business over those years. The golden bar reaches up to
19 the 2000 -- 2005/06 year where we're expecting to insure
20 what homeownership is projecting to be a \$1.35 billion
21 year. That, in our numbers, equates to we'll probably
22 now insure 760 million in that fiscal year.

23 The mortgage insurance portfolio looks like this
24 as of a week or so ago. We have a \$1.3 billion portfolio
25 of almost 5500 loans. That's up from a year ago, from

1 930 million. We were in a decline, just like
2 homeownership's business was dropping with refinances.
3 We've seen a steady growth, and that's a good indicator
4 for us.

5 Additionally, the -- we have of that 1.3-billion
6 portfolio, 560 million -- just over 560 million is
7 actually risk in force that is insured, and we reinsure
8 that and transfer the risk to a reinsurer for about
9 420 million of that.

10 Our portfolio has been experiencing or mirroring
11 very close to the prime market as far as mortgage loans
12 go in being less than 1 percent delinquency rate. In
13 fact, this month we are at .6, so we've very proud of the
14 delinquency or the work that goes into it and the
15 mechanism in the market that have certainly kept us low.
16 We've actually had no claims filed in the last -- for the
17 last three years' business.

18 Hundred-percent loans have increased too, now we're
19 at 52 percent. I mentioned this before. The point was
20 we've risen from last year at 30 percent of what we're
21 doing was a hundred percent to now 52 percent of what we
22 insure is hundred-percent loans. And I'll talk a little
23 more about condominiums in just a moment.

24 Because we are now -- because CalHFA is now our
25 most valued client, almost 99 percent of what we're doing

1 is CalHFA business, we wanted to take a look at the
2 profile of the makeup of CalHFA loans. And this chart or
3 this table shows a comparison between what the 30-year
4 loan looks like versus the Interest Only PLUS Program
5 versus the FHA. What is obvious to us is the Interest
6 Only PLUS is averaging a higher loan to value amount
7 while serving a lower income group and yet not
8 sacrificing the credit quality, reflected in the average
9 FICO score there.

10 This slide, our condominium slide, we looked at
11 the trending of condominiums. Obviously as an insurer
12 we're very interested in the makeup of the types of
13 properties that we're insuring. This is CalHFA's trend
14 over the last ten years. In the last five or six years,
15 it's been a steady incline to where now 52 percent of the
16 loans that are being purchased are, in fact,
17 condominiums.

18 The interesting thing that we noted here was that
19 the average sales price of a condominium is just over
20 300,000 as compared to a non-condominium or site detached
21 dwelling, which is about 200 and -- I'm sorry, 300,000
22 sales price on condominium versus 270,000 on a detached
23 dwelling, indicating that condominiums are certainly
24 servicing the high-cost areas. And we also noticed that
25 we require a little more income in those as well. We

1 expect condominiums to continue to increase as the most
2 affordable home available in California currently.

3 We expect to ensure approximately 56 percent of
4 what homeownership will produce this year, and that
5 equates to 840 million of insurance, in loans. We intend
6 to do this by working closely with homeownership to -- in
7 developing within our area ways to handle that increase
8 in business, whether we can use our stop resources,
9 technologies that we're developing right now and
10 processes that we're working on.

11 Additionally, we intend to be very much involved
12 in the promotion of CalHFA products and particularly
13 those that carry mortgage insurance. And we'll be
14 involved with homeownership in the events, the training
15 events, the seminars, and the conventions and hopefully
16 working also with the lender clients so that they fully
17 understand the CalHFA conventional product and the
18 benefit of our mortgage insurance.

19 MS. PARKER: Mr. Chairman, I invite any questions
20 on the mortgage insurance side. If there are none, we'll
21 move on.

22 I'm just noticing the time. I presume that you
23 want be out of here by noon and we do need to do the
24 budget, so I'm going to ask my folks to, you know -- I
25 know there will be questions. Laura, if you and Edwin

1 will come up. I think we talked a lot about what the
2 accomplishments have been, so I would ask you if you
3 could go through to the charts of really what are the --
4 begin on page 27 with where we are on some of the charts
5 and go directly to what our business plan is and try to
6 discipline ourselves to be finished with this segment
7 with 15 to 20 minutes to do our budget.

8 MS. WHITTALL-SCHERFEE: We'll jump right to
9 committed loans. Our expectation, including Lion's Creek
10 this morning, is that we will have commitments for
11 \$238 million worth of loans through the end of this
12 fiscal year. This is not what we had hoped to achieve,
13 but it is what we've been able to achieve in this
14 particular market. And it's -- this chart, if you look
15 at it, it seems to say that 2004/2005 was certainly a
16 banner year, and I would like to point out that it was.
17 It was the most exceptional year for multifamily
18 production in terms of loan commitments.

19 This year was much more in keeping with what
20 we've seen since the advent of the construction loan
21 program in the year 2002 and 2003. This year, the
22 238 million that we will actually achieve is broken out.
23 It includes the Bay Area Housing Plan, and it includes 17
24 other projects. We will have committed funds to add an
25 additional 1,261 units of affordable rental housing in

1 the State of California.

2 We're seeing, on average, construction loans of
3 about 13 million. And we're seeing, on average, between 70
4 to 80 units a project in those committed loans.

5 In terms of closed loans, the good news is that
6 we make commitments, and we have been working very, very
7 hard to close them. This year we will -- we're
8 estimating \$418 million of closed loans. That means
9 approximately 46 projects, 3,750 units. Last year was
10 the single biggest year in our history for loan closings,
11 and we closed 40 projects, and we closed 269 million of
12 loans.

13 We expect that next year we will probably be more
14 in line with 2004/2005. We're estimating about 39
15 projects closing for about \$260 million worth of loans.

16 MR. GIPSON: As part of our new strategies as we
17 move forward, we have done in this last -- the current
18 fiscal year, a large number of closings. It is larger
19 than last year, which was a record year. And we continue
20 to move forward and look at the things in the market.
21 And as we spoke about before, we are going to introduce
22 the 30-year fully amortized mortgage product that will be
23 prepayable after year 15, which will allow those who need
24 the fully amortized loan to still have it, but those who
25 need to refinance and rehabilitate somewhere after year

1 15 or just finance their tax credit equity investor out
2 of the project will be able to do that now.

3 In addition, we are going to continue to work
4 with other state and local housing and social service
5 agencies. This year, as you know, we did the Bay Area
6 Housing Plan, very large. In addition we worked with HCD
7 on the Governor's homeless initiative for which we also
8 worked with Department of Mental Health. And so together
9 we're providing supportive housing. And the Agency's
10 role in that is to provide the construction financing for
11 those projects.

12 As part of our ongoing effort, we are updating
13 the architectural review process. The manual has been
14 around about 30 years. It's had bits and pieces updated
15 along the way, but we are thoroughly doing a complete
16 overhaul of that now, and staff is looking at new
17 technologies and new ideas and making sure that those are
18 incorporated into the designs of today as we move
19 forward.

20 In addition, one of the last pieces we're
21 implementing is the implementation of a new database.
22 The database that we have is currently very old. This
23 new database will help incorporate our underwriting, our
24 project management, and other divisions will be able to
25 tap into it to provide the useful information that we all

1 need to operate on a daily basis.

2 MS. WHITTALL-SCHERFEE: In addition, this
3 database provides an important tool because what it's
4 doing is it's incorporating our multifamily underwriting
5 into the database so instead of having to do a lot of
6 manual data entry, we'll have a lot of uploading
7 features. It will help ensure that our database is
8 current, that it's accurate, and that we can pull
9 information off of it very, very readily.

10 Terri did ask that I mention a little bit about
11 the AHP GAP substitute program. Many of you were here at
12 the last Board and so you heard a little bit about it.
13 The AHP substitute program, as we're currently
14 contemplating it, would be a residual receipt loan. We
15 would be junior to whoever has more residual receipt
16 money in the deal than we do.

17 We would make the AHP GAP loan to loans on a
18 construction basis. The money would go in during
19 construction. And the expectation is that there will be
20 a permanent loan of not less than \$2 million on any
21 project where we provided the AHP GAP financing.

22 Our loan amount would be based on 5,000 a unit to
23 a maximum loan amount of \$500,000. And what we've been
24 hearing from various nonprofits that we've spoken with is
25 that this is a very important new program because it will

1 allow them to have the AHP loan where we couldn't
2 otherwise qualify it -- qualify for it. And that's why
3 we think it's an integral part of what we're trying to do
4 in the next fiscal year to achieve our goals.

5 MR. GIPSON: This last chart shows our projected
6 budget for the next five years, if you will. As you see,
7 \$70 million in permanent loans, about 170 in
8 construction. A somewhat aggressive number, but in
9 compilation with the AHP GAP substitute and the new
10 30-year mortgage, we think we can attain that, but it
11 will be an aggressive goal.

12 In addition, as we come down there's another
13 5 million for preservation, 75 million for Bay Area
14 Housing Plan, and I'll just touch on the
15 homelessness/special needs program, which is a
16 \$10-million carryover from last year's budget. As we
17 look forward to working with the Corporation for
18 Supportive Housing and developing a loan program for
19 acquisition or development financing for supportive
20 housing projects, that money has been earmarked for that
21 project. And so we are working on putting some of the
22 details with Corporation for Supportive Housing with that
23 right now.

24 In addition, there's in our budget, \$4 million for
25 asset management and portfolio assistance for loans

1 inside the portfolio that may need some additional
2 rehabilitation or something along the way, so we have
3 provided for that as well in our current budget.

4 With that, I'll turn --

5 CHAIRPERSON COURSON: Questions on multifamily?

6 Mr. Czucker.

7 MR. CZUKER: Again, I believe with the right
8 staffing and the right pay scale that these volumes could
9 be significantly increased. And as stated slight -- you
10 know, in the prior on single family, I don't see why we
11 shouldn't focus on some senior staffing as well as
12 support staffing to reach out and increase the permanent
13 loan side of this equation.

14 And there's no reason it shouldn't be a hundred
15 to 170 million to 200 million on the permanent loan side
16 as a target, once appropriate levels of staffing could be
17 put in place and especially with some of the innovative
18 financing structures and support that have been
19 discussed, including the ability to prepay and including
20 reaching out to municipalities and developers to
21 reposition housing stock for projects that haven't gone
22 forward because conventional interest rates are rising.

23 So I'd like to keep this as a work in progress to
24 attain and increase the potential for multifamily
25 affordable housing, which I realize we're confined, given

1 the current staff issues, and, of course, we'll address
2 some of that in the budget discussion.

3 CHAIRPERSON COURSON: All right.

4 MS. PARKER: Mr. Chairman, thank you.

5 I brought Margaret Alvarez, our Director of Asset
6 Management, to come up.

7 Margaret, if you want to add anything on the last
8 item there, the housing assistance trust funds for --

9 MS. ALVAREZ: Yeah, I plan to address that in my
10 slides.

11 MS. PARKER: Okay. I just wanted to segue there
12 for the portfolio assessment.

13 MS. ALVAREZ: As you'll see on this slide, we now
14 have 428 permanent properties that we're overseeing, over
15 33,000 units, and about 1.4 billion in outstanding loans.
16 Our unit also is the contract administrator for HUD, and
17 although our portfolio is dwindling through sales and
18 payoffs, which I'll explain in a minute, we still
19 continue to generate about a million and a half each year
20 for that work.

21 The portfolio, as you know, is long-lasting, 30
22 to 40 years -- we don't really allow prepayments -- but
23 it's not static. We only had one loan modification this
24 past year. Typically we have many more. We also did
25 four transfers of physical assets, but we have 12 in the

1 pipeline. So things are always constantly changing
2 there.

3 On our Section 8 portfolio, we had two payoffs
4 through the OHMAR/OHAP process, and that's with HUD's
5 program that allowed them to finance elsewhere with some
6 long-term affordability restrictions that were actually
7 greater than ours, and so we've been letting those go.

8 We had two payoffs this year. One property taken
9 by Caltrans for eminent domain, three permanent loans
10 that were closed with Agency sales and refinance as new
11 buyers with the Agency providing the funding, and six
12 more in the pipeline. And we see that in asset
13 management as a really good thing. It really gives the
14 properties a chance to recapitalize and get in a better
15 position for a longer term.

16 I put up there that we have new hires and that we
17 filled six vacant positions. And I mention that because
18 for our unit this is really very substantial. It's the
19 first time in my ten years at the Agency that I was even
20 able to find one person much less six in one year. It's
21 really allowed us to take a major shift with how we look
22 at our portfolios. Instead of focusing our time just on
23 what happened last month, last year, and where the
24 property is today, we're really able now to use that
25 brain power to focus forward.

1 With an aging portfolio that needs
2 recapitalization, with Section 8 contracts terminating
3 down the road here, it's very important that we take that
4 shift and be able to look forward, not back. And finding
5 some really good people to work for us has been a boon to
6 us in that area.

7 I did want to mention on our strategies, we have
8 established in the last couple years, a Section 8 work
9 group to look at our portfolio and see what we can do to
10 recapitalize those properties and keep them going
11 forward. As it turns out, we have 45 30-year loans and
12 45 40-year loans, and we're really focusing our attention
13 on the 30-year loan product.

14 And, of course, the Agency would like to find
15 economically practical ways for us to do refinancing, but
16 also meet the owners' goals and objectives. And I'll
17 tell you that the two aren't a hundred-percent matching.
18 So it's been a -- it's been quite a process to go through
19 this work group strategies. But we find that in our
20 30-year portfolio, about one third of those loans expire
21 between now and 2015, so it is something we have to
22 address and we have to address it pretty soon and
23 aggressively.

24 About 67 percent of our 30-year loans or
25 approximately 40 of the 45 loans, 67 percent are

1 financially or physically in fairly poor condition. So
2 they need -- they need something. So we're in the
3 process of finalizing our analysis that we plan to
4 present to senior staff and get some decisions made on
5 maybe what we could do on that portfolio.

6 But our preliminary assessment really is that the
7 best way to do it is through a sale and the Agency doing
8 the new financing. So as I said, we're very happy to see
9 that that's already happening without our really pushing
10 it.

11 The properties, just as a reminder to people, are
12 all now 25 years old or older. And the other great
13 mystery in that -- in making that program successful for
14 us and for the owners is HUD, and they're what I call the
15 great unknown because their policies and processes are
16 ever-changing, and there wasn't really an end game plan
17 for what to do with those when the loans terminated, so
18 not only are we trying to figure that out, but HUD's
19 trying to figure it out.

20 And then lastly, I would -- let's see, I'm sorry.
21 I lost my place here. Our capital improvement loan
22 program for 80/20 properties, that's the 4 million that
23 Ed was showing on the previous slide, the Agency has set
24 aside HAT funds to take the non-Section 8 properties that
25 are also starting to age in the portfolio, where funds

1 tight, we've been lending, deferred or residual receipt
2 loans, low interest rate for the sole purpose of doing
3 some necessary rehab to keep those -- to keep those
4 going.

5 On our earned -- HUD earned surplus loan program,
6 that's where the owners are limited in what they can take
7 at the end of the day as far as funds from the cash flow,
8 and so those transfer to us, and we have an earned
9 surplus loan fund. Some of it really belongs to HUD,
10 some of it really belongs to the Agency. This past year
11 we were able to loan almost \$6 million. And it actually
12 wasn't loans. This was all HUD's money, so they actually
13 gave permission to give that money that the projects
14 generated over the last 20 years back to the sites to do
15 capital improvement projects. So we haven't had to loan
16 anything out of our portion of the HUD funds, so that's
17 been very successful also.

18 And then the last thing I would mention is that
19 one of our initiatives last year was to sell our six REO
20 properties. We got that ball rolling, and had a fire in
21 one of the properties that wiped out four of the units,
22 and that is almost completed in our 25-unit building in
23 Compton. But the other five, we did offer for sale. We had
24 55 offers come in, and we're in the very early stages of
25 the whole thing, so don't really have much to report on

1 that because the balls keeps bouncing. But as those get
2 permanent and finalized, I'll come back with a report on
3 those.

4 MS. PARKER: Thank you, Margaret.

5 CHAIRPERSON COURSON: Questions on Margaret?

6 Okay. Special needs.

7 MS. PARKER: Come up and join us on our special
8 loan programs.

9 I think this is one that the Board is pretty
10 familiar with, has some of our really innovative
11 programs, HELP and our Habitat. I think Doug can tell
12 you about what's in store for next year.

13 MR. SMOOT: As you know, we have basically four
14 programs in the special lending unit for major programs.
15 Two are existing. We have a HELP loan program, which is
16 a loan program to local governments. We have a small
17 business loan program which is a revived program, hadn't
18 originated loans for about four or five years and brought
19 to this unit. And we've got a couple loans in process.
20 And we have a new program that we initiated this year
21 which was the Habitat for Humanity loan purchase program.
22 And we have one in development, which is the residential
23 development loan program that I think will be out before
24 the end of the year, before this current fiscal year.

25 The HELP program really has been in production

1 for eight years. On Monday we received the second wave
2 of applications for this year, which would put us in
3 about the 160 million mark in commitments when those --
4 when those decisions are made.

5 The Habitat for Humanity loan program, we've got
6 3 million in loans that we're looking at right now that
7 were applied to us earlier. We've made commitments to
8 the local affiliates, seven affiliates with Habitat sent
9 in loans, about 44 loans that we think we'll be
10 purchasing, and we'll be doing that through the summer.

11 We have two loans with the small business loan
12 program. We've actually closed one of them and are in
13 the process of funding that right now, probably within a
14 couple of days. And we have a second loan that will
15 close shortly. That program is really a capital funding
16 to very small developers, and it's an attempt to grow
17 those developers into, you know, larger scale producers
18 of affordable housing.

19 We're working, we have some -- we're ready to do
20 some internal discussions, final discussions, about the
21 residential development loan program. That is, as you
22 know, an acquisition predevelopment loan structure that
23 really is a loan to locality, loan to local government
24 entity, for an in-fill single-family for-sale housing
25 product. Okay. So it really would be similar to our

1 HELP program, similar in process. And we think we'll be
2 able to put that 10 million out well before the end of
3 this fiscal year.

4 And moving on to the next slide, you can see that
5 we budgeted in the residential development loan program
6 10 million before the end of this year. We think we're
7 going to put out two more 10 million funding rounds in
8 the next fiscal year. That would give us -- although not
9 large in individual rounds, that would give us
10 \$30 million. We're really testing the water to be able
11 to see what kind of demand we're going to have for that
12 product.

13 We know that we have another hundred million
14 dollars in a future bonding initiative, if that passes.
15 We have 75 million total to date to work with. Some of
16 that is early reserved at some point in time to go back
17 to be able to feed back into our CHDAP loan program as
18 those funds become short.

19 The HELP program, we're going to put out two
20 waves of \$7-and-a-half million during the year. And
21 Habitat we'll continue with an expectation to be able to
22 do up to \$5 million in this next fiscal year to
23 purchases. We'll probably put that out in one final
24 wave.

25 CHAIRPERSON COURSON: Questions on --

1 MS. PARKER: This chart shows that special
2 lending over the five-year plan.

3 Mr. Chairman, that concludes the presentation of
4 the business plan. I think at your desk is a -- sort of
5 a summary page of how it breaks down by programs for the
6 five-year business plan that is essentially almost
7 \$14 billion. So with this, we would certainly be anxious
8 to hear about your comments. And we can take this
9 resolution separately from the resolution on our staff.

10 CHAIRPERSON COURSON: Is there a motion -- the
11 resolution that we're considering is on page 185 -- to
12 approve the business plan?

13 Mr. Czucker.

14 MR. CZUKER: So moved.

15 MR. AUGUSTINE: I'll second.

16 CHAIRPERSON COURSON: Is there a second?

17 MR. AUGUSTINE: I'll second.

18 CHAIRPERSON COURSON: Is there any discussion?

19 Mr. Morris.

20 MR. MORRIS: Just kind of overall as it relates
21 to the business plan and just moving forward, we had
22 discussions about the audit committee --

23 CHAIRPERSON COURSON: Yes.

24 MR. MORRIS: -- that we were going to have. Maybe
25 you can update us on that.

1 CHAIRPERSON COURSON: I can. The audit
2 committee --

3 MR. MORRIS: One other thing too, one of the
4 other issues in this business plan clearly has been the
5 ability the attract qualified senior management and also
6 compensate them properly. One thing you might want to
7 consider -- we don't need to discuss it now given the
8 time, but I think we should have a compensation committee
9 that consists of the Executive Director and a couple
10 Board members so that on a regular annual basis we're
11 reviewing that and come to the Board with that.

12 CHAIRPERSON COURSON: Let me make two comments.
13 On the audit committee, which was enacted I think at the
14 last Board meeting, has been appointed. Mr. Shine is the
15 Chair. Ms. Galante and Mr. Carey are the other two
16 members. Their first task working with counsel is to put
17 together a charter, if you will, and process and
18 procedures. Counsel, I -- in talking yesterday, I know
19 has put together a draft of that. I think it's ready.
20 He's going submit it to the committee for them to look
21 at, and they'll be back at the July meeting. There will
22 be an agenda item where we'll sort of approve the
23 charter, working function, and outline of that audit
24 committee to move forward. So that process is moving
25 forward.

1 On the compensation side, I would say that that
2 really is out of our hands, and I'll let counsel or Terri
3 correct me, but our compensation is really set by virtue
4 of state compensation levels. And as a Board, I guess if
5 we could, we would. But one of the issues of attracting
6 other staff is what we can do by virtue of statute, being
7 part of the state government structure. So I don't know
8 what a compensation committee, what latitude, if any, it
9 has, but Terri, you might be able to --

10 MS. PARKER: Yeah. Mr. Chairman, Members, the
11 salaries for the staff of the California Housing Finance
12 Agency are -- staff really are kind of two groupings.
13 One of them is that they are positions that are
14 gubernatorial-exempt appointments. Those -- the
15 compensation for those positions and other managers is
16 not something that is collectively bargained, but it is
17 set by the Governor's Office and the Department of
18 Personnel Administration. Then those positions in the
19 Agency that are civil service that their salaries are
20 competitively negotiated based on compensation across
21 state service.

22 So if we have an accountant in CalHFA, that
23 accountant gets paid the same thing that the accountant
24 in the Department of Motor Vehicles or the Department of
25 Parks and Rec. That's the way it is.

1 That -- and that leads to the problem that we
2 have had with compensation is because it is set by the
3 Governor's Office and the Department of Personnel
4 Administration, we haven't been able to have it done --
5 set on a -- any kind of a competitive basis. We have
6 done some salary surveys recently, and the discussions
7 that we've had on compensation, we have information which
8 demonstrates how disproportionate our salaries are even
9 to other housing finance agencies across the country, not
10 just to what would be an appropriate labor pool in
11 California that would include other governmental housing
12 entities.

13 So it is a -- salary compensation is an issue in
14 state government in totality. But the difference in
15 CalHFA is for us is that it's -- unlike maybe our other
16 sister state agencies, they may not be able to do things
17 in as timely a fashion or perhaps as well as they would
18 like to. In our case, we either do the business or we
19 don't do the business. And that is the problem with the
20 need for qualified staff.

21 So we're having that discussion. It is either --
22 some of it can be solved through changes, definitely
23 changes in statute. And in fact, I would point out it's
24 kind of interesting when the Agency was first created in
25 statute, if you look at our statute it says that the

1 Board will set compensation. However, that has never
2 really been put into practice because before that
3 occurred, the discussions within the executive branch is
4 that -- that the Department of Personnel Administration
5 would set those salaries.

6 So if there was more flexibility, I don't think
7 we would have gotten to the place that we are at now.

8 CHAIRPERSON COURSON: I think we have to --
9 unfortunately, we're in a position on both of those --
10 categories --

11 MR. MORRIS: No, I'm talking about -- see, I'm
12 not talking administrative, I'm talking about the
13 senior -- senior executive.

14 CHAIRPERSON COURSON: And those are the ones --

15 MR. MORRIS: And there is a range in those
16 because at least in the Board material I got --

17 MS. PARKER: They're --

18 MR. MORRIS: -- there was a range.

19 MS. PARKER: All the salaries are at the top step
20 of those ranges.

21 But, Mr. Morris, just for an example, we hired a
22 recruiting firm four or five months ago to recruit for
23 the Director of Multifamily. The salary, the top salary
24 we have to offer for that position is 118,000. The
25 recruiter came back and basically said there is no one

1 that they can recruit for that salary with the
2 qualifications that we need and, in fact, pretty much
3 told us that the salary range that we would need would
4 probably be in 150- to \$165,000 range.

5 This is something we started to talk about last
6 time, and I think Ms. Galante also reiterated that was
7 what she was aware of from recruiting efforts that she's
8 done for similar kinds of positions. So until we have
9 salaries like that, it's -- you know, we can't attract
10 someone who meets those qualifications.

11 CHAIRPERSON COURSON: So along those ranges,
12 we're at the max, and we're really at the -- now at
13 playing the hand that's dealt us through the Department
14 of Personnel for those senior folks. And what we're
15 doing now, Terri's talked about and the reason you've
16 seen some of the changes in the plan, we have, based on
17 those discussions, hope we can bring to the Board the
18 fact that we are going to be able attract and be
19 competitive in those we're hiring. That's what leads us
20 to be optimistic.

21 MS. PARKER: I think one of the things that makes
22 it so difficult in the sense I think there's sort of two
23 bites at the apple. One is the salaries aren't really
24 competitive relative to their -- to counterparts, but the
25 fact that there has been in some cases little or no

1 salary increases over a four-to-six-year period, that
2 those salaries have fallen even more significantly
3 behind. And I think the salary survey that we looked at,
4 I think we tried to look at some comparable positions,
5 perhaps PERS and STERS, that are somewhat along the same
6 lines of financial institutions were probably 20 to 30
7 percent below where those salaries are.

8 CHAIRPERSON COURSON: And in my comments when I
9 talked about Terri being dogged, this is the area where
10 we really have spent a substantial amount of time and
11 have some, I guess, guarded thoughts that we will be able
12 to get those salary levels to where we can attract and
13 recruit the folks we need.

14 Unfortunately, the decision to do that is out of
15 our hands, just based on the structure. But clearly it
16 will be back on the -- we'll talk about it again in July
17 because as we move forward now we do have some momentum
18 moving in that direction in July and a lot of the plans
19 you see are --

20 MR. MORRIS: That's fine. I still think there
21 should be a committee. I mean, you know, I understand
22 what you're saying, but I still think that there should
23 be a committee that's, on an annual basis, reviewing this
24 and making more of a case to get the salary we need to be
25 competitive. So that's -- you know, that's your --

1 that's your feeling, and my feeling is very strong there
2 should be a compensation committee.

3 MR. CZUKER: Mr. Chairman.

4 CHAIRPERSON COURSON: Mr. Czucker.

5 MR. CZUKER: Isn't there a disconnect also in the
6 sense that CalHFA is a self-funding entity and it's not
7 imposing on the state budget or utilizing resources or
8 taxpayer money from the state budget, and therefore based
9 on the self-funding nature, shouldn't there be a little
10 bit more autonomy in terms of salary? And to the extent
11 that the original charter legislation provided for the
12 Board to set the salary limits, shouldn't that perhaps be
13 tested and to the extent that we're willing to take some
14 heat, perhaps be a little more aggressive in saying our
15 charter was founded on the premise that we would be
16 self-funding and not hitting the state budget; we are not
17 hitting the state budget, and therefore we need to be
18 competitive with industry standards and need to have
19 autonomy in salary limits to achieve our goals and public
20 purpose?

21 MR. SHINE: Yes.

22 MS. RILEY: I have to say we have used that
23 argument many times in the past, and unfortunately, folks
24 at the Department of Personnel administration are
25 administering salaries across the board, across state

1 government, and they have said very clearly that while
2 they recognize the difference, that they cannot single
3 out our agency and make exceptions. Because if you look
4 at a general fund department and a special fund or
5 someone who's kind of off line generating their own
6 revenue, everybody in state government would then want to
7 rush to come to work for us because we aren't subject to
8 those variances of general fund dollars, and they don't
9 want to treat employees differently regardless of funding
10 source.

11 CHAIRPERSON COURSON: Let me --

12 MR. CZUKER: With all due respect, if you take it
13 out of their domain, they have no authority and no
14 standing to say anything, and maybe it's a legal question
15 that takes it out of their jurisdiction completely. And
16 maybe we should ask the lawyer to give us some direction
17 here.

18 MS. PARKER: Mr. Chairman, let me just say, you
19 know, this is a very, very frustrating issue for us.
20 And, you know, I just -- I've written you in my letter I
21 cannot say enough good things about the staff that are in
22 this room and the job that they have done. And the
23 compensation, you know, I tease my folks because the
24 Executive Director, my colleague, in the state of Wyoming
25 makes 155,000. As the Executive Director here, I make

1 127,000, and many of my colleagues make twice that. It's
2 a very -- it borders on being demoralizing to some extent
3 because the Agency prides ourselves on really wanting to
4 do a good job.

5 It is the reason why we have tried all of the
6 good, meritorious arguments for quite some time that
7 Mr. Czucker is talking about. And we haven't been
8 successful with them. That was the reason why, frankly,
9 I proposed this strategy of bringing to the Governor an
10 initiative on homelessness that's announced tomorrow with
11 the quid pro quo that if the administration wanted to
12 take this initiative, it could only be accomplished if
13 there were the appropriate qualified salaried individuals
14 to do it.

15 We have gone through six months' discussion about
16 that with people asking us every other way imaginable to
17 figure out how to do this without dealing with the
18 salaries and finally they have come down to recognize
19 that it cannot be done, that the laws that govern
20 positions do not give me -- although I can hire anybody
21 on a contract, I cannot displace a gubernatorial
22 appointment with a contract. And that is the reason why
23 finally there are discussions going on this. I hope in
24 the next 30 to 60 days to have more information on this.

25 But believe me, I think we have tried every

1 conceivable constructive positive way to go about this,
2 and if I thought that bringing a lawsuit would be helpful
3 in the long run, I would be making that suggestion. And
4 I think actually I've mentioned that to our Chair.

5 But I would like to just ask for your patience
6 and give me a little bit more time. I would not have
7 made the changes to this business plan that I did if I
8 did not think that we were going to be successful in
9 being able to finally make a change to this, and if
10 you'll give me a little bit more time to come back and
11 report to you on it.

12 But I have not given up on this, and I feel so
13 strong, personally, because it is the success of the
14 Agency in the future. If we don't deal with this now, we
15 won't have the people to do the business. And once we
16 get out of the marketplace, it will be very, very
17 difficult to get back into it.

18 CHAIRPERSON COURSON: Let me -- let me close the
19 loop. I think Terri's right on that. We have worked --
20 she certainly has worked, and there is some optimism that
21 there are some -- there's going to be the capability of
22 filling these positions we're talking about at
23 competitive salaries. Having said that, however -- and I
24 think we'll explore that and have a lot of more
25 definition when we get to July.

1 But to respond to Mr. Morris, if, in fact, you
2 think strongly enough, as you do, that there should be a
3 compensation committee, I think the Board would be happy
4 to consider that. I would ask if you would maybe put
5 together some bullet points what the -- based on what we
6 know, sort of the role or function, if you would, the
7 job, as we did for the audit, share that and we'll get it
8 in for discussion as to what the role of that committee
9 would be.

10 And at the same time, even though we are moving
11 forward, I think it would be of interest to revisit at
12 least what is in statute versus what is in practice and
13 see where the differences are and what statute says so
14 the Board at least knows what the statute says are our
15 authorities are versus what the current practice is and
16 then -- and then have that to revisit. At least we have
17 a base therefore to make some decisions about what
18 actions this Board wants to take, so moving forward with
19 the process we've got going but also looking going
20 forward beyond what we're doing on a more short-term
21 basis.

22 MS. PARKER: I would say one other thing that I
23 presume is obvious to all of you, it goes without saying, but
24 each of you individually to the extent that you wish to
25 take this issue on and if there is a public forum for

1 this issue to be taken on, I would, you know -- I could
2 give you, staff would be happy to supply you with any
3 information that you would like that clearly has been
4 done as work in this arena.

5 CHAIRPERSON COURSON: Well, I think where we're
6 headed is to take a look at what are the avenues available
7 to us as a Board to take these issues on, statute versus
8 practice. And if you do, then obviously it does dovetail
9 back in then to -- to the Board itself having a
10 compensation structure. So I think we should move
11 forward along those effect, but also keep -- we've got
12 the trains on the track. Let's not derail those, but
13 also be prepared and in July have some of this
14 information to look at.

15 Mr. Augustine.

16 MR. AUGUSTINE: Yes, thank you.

17 I wanted first off to echo your comments about
18 Terri being the tireless advocate of this. Let me --
19 rest assured to all of you that she certainly is. Also,
20 my immediate boss, Secretary McPeak, is also the person
21 who's been -- within the administration who has been
22 pushing this issue. While it affects this Agency as
23 we've talked about, it affects other departments within
24 our agency including Caltrans, which has its engineers
25 regularly hired into both the private sector, but more

1 significantly into the public sector at much higher
2 salaries.

3 So it is an issue that we are addressing at the
4 administration. It's significant everywhere. It's
5 probably more significant here and in Caltrans and many
6 other agencies, but it is there. Secretary McPeak has
7 formed a working group within our agency to solicit --
8 which Terri is a member of that committee as well as
9 other department directors, making recommendations to the
10 administration. As you can see from the discussions
11 we've had, that we -- the administration is sensitive to
12 this issue. It -- addressing this.

13 While you certainly have the opportunity to avail
14 yourself of all your options, I would -- I would think
15 that as you're reviewing that, that the discussions of
16 the lawsuit at the point in time that we're finally
17 seeing an opening, you certainly can review that but I
18 would strongly offer that you need to think about that at
19 the exact moment that you're finally seeing a
20 breakthrough. To take a fairly dramatic action like that
21 may not be the most prudent, but you certainly have every
22 right and opportunity to consider that.

23 CHAIRPERSON COURSON: I just think the Board -- I
24 sense the Board wants to take a look at what the statute
25 says versus practice and what our options are in going

1 forward.

2 MR. AUGUSTINE: And I concur, you have every
3 right and opportunity to do that. I didn't say --

4 CHAIRPERSON COURSON: What we do from that is --

5 MR. AUGUSTINE: And that's my point is the next
6 step is -- I think you would have -- you need to have
7 some deep thought about that in considering this at the
8 exact moment that we're making some breakthrough on the
9 issue you've been pushing for several months.

10 CHAIRPERSON COURSON: Mr. Morris.

11 MR. MORRIS: We'll address it at the next Board
12 meeting. I think that's the way to do it.

13 CHAIRPERSON COURSON: Right. It will be on the
14 agenda.

15 MR. MORRIS: And I think there is a unique
16 opportunity here now, especially in an election year.
17 I've talked to two of the three individuals running for
18 governor about CalHFA, and both of them said, "Get back
19 to me if you have any ideas of what we can do to improve
20 things." So we'll reach it.

21 CHAIRPERSON COURSON: Great. As I recall, there
22 is a motion and a second to approve the resolution on
23 page -- Resolution 6-13.

24 MS. PARKER: I'll just tell you to the extent of
25 what's in here, what's not in here, to the extent that we

1 are successful in the salaries and whatnot, those --
2 there are no changes in salaries. And to some extent we
3 didn't go back through here, given we changed the
4 business plan. Perhaps to -- we'll have to go back and
5 look at areas of, particularly homeownership, and see if
6 there are staff resources. But for now, you know, it's a
7 very modest budget in that sense. We've --

8 CHAIRPERSON COURSON: We're still on the plan
9 portion of it.

10 MS. PARKER: The business plan we didn't adopt?

11 CHAIRPERSON COURSON: No.

12 MS. PARKER: Sorry.

13 CHAIRPERSON CZUCKER: I'm trying.

14 MR. CZUCKER: So moved.

15 CHAIRPERSON COURSON: We've got a motion. We've
16 got a second.

17 MR. AUGUSTINE: Second.

18 CHAIRPERSON COURSON: Is there any
19 discussion on Resolution 6-13?

20 Is there any comment or discussion from the
21 public?

22 (No audible response.)

23 CHAIRPERSON COURSON: Would you please call the
24 roll.

25 MS. OJIMA: Thank you, Mr. Chairman.

1 Mr. Pavao.
2 MR. PAVAO: Yes.
3 MS. OJIMA: Mr. Carey.
4 MR. CAREY: Yes.
5 MS. OJIMA: Mr. Czucker.
6 MR. CZUKER: Yes.
7 MS. OJIMA: Ms. Jacobs.
8 MS. JACOBS: Yes.
9 MS. OJIMA: Mr. Augustine.
10 MR. AUGUSTINE: Yes.
11 MS. OJIMA: Mr. Morris.
12 MR. MORRIS: Yes.
13 MS. OJIMA: Mr. Shine.
14 MR. SHINE: Yes.
15 MS. OJIMA: Mr. Courson.
16 CHAIRPERSON COURSON: Yes.
17 MS. OJIMA: Resolution 06-13 has been approved.

18 --o0o--

19 **Item 7. Discussion, recommendation and possible action**
20 **relative to adoption of resolution approving**
21 **fiscal year 2006/2007 CalHFA Operating Budget**

22 CHAIRPERSON COURSON: The next in our book is the
23 before alluded to budget.

24 And so, Terri, I will now turn it over to you.

25 MS. PARKER: I think I'll take my foot out of my

1 mouth and let Jackie make the presentation.

2 MS. RILEY: As Terri alluded to, this is the
3 status quo business plan budget, and there was really no
4 time to think about redoing it as of yesterday afternoon.
5 It focuses mainly on infrastructure, moving positions
6 around internally. We redirected some positions to focus
7 on our infrastructure, primarily in Financing, Admin and
8 IT.

9 There are minimal, very, very minimal, salary
10 increases that are included for our attorneys that right
11 now, that contract is making its way through the
12 Legislature and calls for about an 11-percent overall
13 increase. We know that attorneys' salaries are at least
14 lacking by 30 percent in the Sacramento labor market, but
15 I guess it's a first step. And also some of the
16 inspectors we have, there were some salary increases
17 there, but they're very, very minimal.

18 The other thing that is of interest in this
19 budget is that our pro rata continues to go up and it probably
20 will because, being funded out of pro rata is what we pay to
21 other state governments to handle personnel, payroll, all
22 of those kinds of things that happen for us. The other
23 thing that's funded out of there that's really
24 significant is retiree health benefits. And our work
25 force at CalHFA, as everywhere, has seen the first wave

1 of significant retirements this year, and they will
2 continue, so that number is going to be going up for a
3 while.

4 The biggest change in the budget as it is is the
5 contract line item I passed out for all of you.

6 CHAIRPERSON COURSON: That's at your place.

7 MS. RILEY: Right. Everybody has this contract
8 sheet. It shows what went in to make up that contract
9 line item, and there's a lot in there for the IT
10 initiatives. They're all over. You know, we're working
11 on IT initiatives in Financing, in Fiscal Services, in
12 Multifamily, in Homeownership. So there's a lot on the
13 plate this next year with IT, so there's a large increase
14 in the IT contractual services.

15 And also Tom with his legal has actually
16 decreased a little bit from last year, but Tom does have
17 some contingency money in there, because we never know
18 exactly what's going to happen. So we sort of plan for
19 everything that we think could happen. We do
20 analyze our expenditures monthly. We do some trending to
21 look at where we're going to be and analyze that pretty
22 closely each month. And right now I will just tell you
23 that at the end of March going forward, it looks like
24 we probably will be under-expended this year by about at
25 least \$2 to 2.5 million.

1 CHAIRPERSON COURSON: And is it fair to say that
2 if, in fact, depending on what happens, this staffing and
3 recruiting and filling these key positions, that we'll
4 then see a revised budget?

5 MS. RILEY: Yeah. Keeping track of that,
6 probably we always do a midyear update.

7 CHAIRPERSON COURSON: But this budget is based
8 upon what we know today.

9 MS. RILEY: Yes.

10 CHAIRPERSON COURSON: But as we make -- if in
11 July when we get to that point and we see we're getting
12 there, we'll see --

13 MS. RILEY: We will be back for an augmentation
14 if we need it.

15 CHAIRPERSON COURSON: Correct.

16 Is there a motion to approve the budget that is
17 on your -- in your book? It's page No. 199, and it's
18 Resolution 6-14.

19 MR. CZUKER: So moved.

20 CHAIRPERSON COURSON: Is there a second?

21 MR. SHINE: Second.

22 CHAIRPERSON COURSON: Mr. Shine seconds.

23 Is there any discussion?

24 Any discussion or comment from the public?

25 (No audible response.)

1 CHAIRPERSON COURSON: We'll call the roll.
2 MS. OJIMA: Thank you.
3 Mr. Pavao.
4 MR. PAVAO: Yes.
5 MS. OJIMA: Mr. Carey.
6 MR. CAREY: Yes.
7 MS. OJIMA: Mr. Czucker.
8 MR. CZUKER: Yes.
9 MS. OJIMA: Ms. Jacobs.
10 MS. JACOBS: Yes.
11 MS. OJIMA: Mr. Augustine.
12 MR. AUGUSTINE: Yes.
13 MS. OJIMA: Mr. Morris.
14 MR. MORRIS: Yes.
15 MS. OJIMA: Mr. Shine.
16 MR. SHINE: Yes.
17 MS. OJIMA: Mr. Courson.
18 CHAIRPERSON COURSON: Yes.
19 MS. OJIMA: The Resolution 06-14 has been
20 approved.
21 MS. PARKER: Thank you all very much.
22 --oOo--
23 **Item 8. Reports**
24 **Item 9. Discussion of other Board matters**
25 CHAIRPERSON COURSON: This is the time where we
