CalHFA Board of Directors Meeting – October 18, 2011

1 BE IT REMEMBERED that on Tuesday, October 18,
2 2011, commencing at the hour of 10:18 a.m., at the
3 Holiday Inn Capitol Plaza, 300 J Street, Sacramento,
4 California, before me, DANIEL P. FELDHAUS, CSR #6949,
5 RDR and CRR, the following proceedings were held:

6 --oOo--

7 **Item 1. Roll Call**

8 CHAIR CAREY: I would like to welcome everybody
9 to the October 18th meeting of California Housing Finance
10 Agency Board of Directors.

11 The first order of business will be roll call.

12 MS. OJIMA: Thank you.

13 Mr. Schmunk for Ms. Creswell?

14 MR. SCHMUNK: Here.

15 MS. OJIMA: Mr. Gunning?

16 MR. GUNNING: Here.

17 MS. OJIMA: Mr. Hunter?

18 MR. HUNTER: Here.

19 MS. OJIMA: Ms. Carroll for Mr. Lockyer?

20 MS. CARROLL: Here.

21 MS. OJIMA: Thank you.

22 Mr. Shine?

23 *(No response)*

24 MS. OJIMA: Mr. Smith?

25 MR. SMITH: Here.

CalHFA Board of Directors Meeting – October 18, 2011

1 MS. OJIMA: Ms. Stevens?
2 MS. STEVENS: Here.
3 MS. OJIMA: Mr. Alex?
4 (No response)
5 MS. OJIMA: Mr. Reyes for Ms. Matosantos?
6 MR. REYES: Present.
7 MS. OJIMA: Thank you.
8 Ms. Cappio?
9 MS. CAPPPIO: Here.
10 MS. OJIMA: Mr. Carey?
11 CHAIR CAREY: Here.
12 MS. OJIMA: We have a quorum.
13 CHAIR CAREY: Thank you, JoJo.
14 --oOo--
15 **Item 2. Approval of the minutes of the July 21, 2011,**
16 **Board of Directors meeting**
17 CHAIR CAREY: The second item is approval of
18 the minutes of July 21st.
19 MR. GUNNING: Move the minutes.
20 MS. STEVENS: Second.
21 CHAIR CAREY: Moved and seconded.
22 Roll call, please.
23 MS. OJIMA: Was that Ms. Stevens?
24 CHAIR CAREY: Yes.
25 MS. OJIMA: Thank you.

1 Mr. Schmunk?

2 MR. SCHMUNK: Aye.

3 MS. OJIMA: Mr. Gunning?

4 MR. GUNNING: Aye.

5 MS. OJIMA: Mr. Hunter?

6 MR. HUNTER: Aye.

7 MS. OJIMA: Ms. Carroll?

8 MS. CARROLL: Yes.

9 MS. OJIMA: Mr. Smith?

10 MR. SMITH: Yes.

11 MS. OJIMA: Ms. Stevens?

12 MS. STEVENS: Aye.

13 MS. OJIMA: Mr. Carey?

14 CHAIR CAREY: Yes.

15 MS. OJIMA: The minutes have been approved.

16 CHAIR CAREY: Thank you.

17 ---oOo---

18 **Item 3. Chairman/Executive Director comments**

19 CHAIR CAREY: I apologize for a bit of a late
20 start. And I also want to apologize for the fact that
21 we had to reschedule this meeting. Several members
22 unavoidably were out of town and couldn't be here. So
23 I appreciate, especially the staff, who had to rework all
24 the arrangements.

25 And with that, I will turn it over to our

CalHFA Board of Directors Meeting – October 18, 2011

1 Executive Director.

2 MS. CAPPIO: Good morning. Just a few items of
3 note.

4 We had a meeting, a team of CalHFA members had
5 a meeting with U.S. Treasury and with Moody's in August.
6 The good news was that the U.S. Treasury has decided, at
7 least conceptually, to extend the Temporary Liquidity
8 Bond program. We don't have the details yet, but it will
9 be forthcoming.

10 And we got a slight haircut from Moody's, but
11 we are still stable.

12 That action and the continuing volatility of
13 the capital and bond markets has caused us to initiate
14 the strategic and budget planning for the following year
15 sooner, and we'll be doing that in the next couple of
16 weeks and months in order to look at new strategic
17 priorities and possible directions for the Agency,
18 supplementing what we do now.

19 And I will be reporting back, hopefully to you,
20 with the details in January.

21 We've been working with our sister agencies,
22 or sister housing agencies, on a number of initiatives,
23 including a permanent source to vet whether we can go for
24 that again in California, to stabilize sources of
25 funding, and also an affordable housing cost study.

1 That request for proposal is going out within
2 the next 30 to 45 days in response to the big and serious
3 concerns about the increasing cost of producing
4 affordable housing.

5 And finally, just to make note, I know that
6 there has been some discussion about the November 17th
7 meeting. Given that we do not know about when the
8 details of the Temporary Liquidity Bond program will be
9 forthcoming from the U.S. Treasury, we may need to call a
10 meeting before the end of the year if you need to take
11 action on the details or arrangement or agreement per
12 that extension.

13 So with that, I end my comments.

14 And thank you very much.

15 CHAIR CAREY: Thank you very much.

16 --oOo--

17 **Item 4. Closed session**

18 CHAIR CAREY: With that, we will be adjourned
19 into closed session under Government Code 11126(e)(1) to
20 confer with and receive advice from counsel regarding
21 litigation.

22 *(The Board of Directors met in closed*
23 *session from 10:22 a.m. to 11:12 a.m.)*

24 CHAIR CAREY: We are back in session.

25 Thank you for your patience.

1 **Item 5. Report of the Audit Committee Chairman**

2 CHAIR CAREY: And our next item of business is
3 a report from the Audit Committee chair.

4 Mr. Smith?

5 MR. SMITH: So the Audit Committee met earlier
6 this morning, and the discussion was regarding the RFP
7 for an auditing firm and the procedures to be followed in
8 the selection process.

9 And the Audit Committee wanted to propose a
10 recommendation to the full board as to how we might
11 proceed.

12 I'm not sure that -- I'm assuming it's in your
13 materials, the RFP proposal that was proposed by the
14 staff.

15 In essence, what we agreed was -- because of
16 the timing, I think our audit needs to start by February,
17 and we need to have a contract in place by February --
18 we recommended that two members from the Audit Committee
19 be designated to work with the two members of the staff
20 in evaluating, one, completing and finalizing the
21 proposal, substantially in the form that it's in, with
22 some recommendations that were made; and, two, to score
23 that proposal, and then bring the results back to the
24 Audit Committee, which would then recommend to the full
25 board which firm we would recommend selecting with all of

1 the information, in terms of how they were scored, so
2 that the full board would have that information, but
3 would allow the flexibility so that at least two Board
4 members would be involved in the selection process and
5 the interviewing process.

6 So I think there's really two items. One would
7 be to talk about the process, which is what I just
8 described; and the other one is a couple of changes that
9 we recommended to the RFP.

10 I think that's it on the actual issue with
11 respect to the procedures to be followed.

12 You -- the full board -- would have the final
13 decision, but the idea to get Board involvement is to
14 have two Board members serve on the committee with two
15 staff members. And then those scoring results would be
16 brought back to the full board.

17 So I think that would be in the form of a
18 motion to ask the full board to approve that process so
19 that we can move forward without having to have any other
20 meetings other than our January meeting, which is where
21 we would bring the results to the full board.

22 MS. STEVENS: So moved.

23 CHAIR CAREY: We have a motion and a second.

24 Any further discussion on that?

25 *(No response)*

CalHFA Board of Directors Meeting – October 18, 2011

1 CHAIR CAREY: This is a result of the Board's
2 interest in being more integrally involved in the
3 selection of the audit firm without hampering the process
4 too much, and it seems to fit that well.

5 So with that, we'll have a roll-call vote.

6 MR. JAMES: Public comment?

7 CHAIR CAREY: Oh, yes, thank you.

8 This is an action item. So we would invite
9 comment from anyone in the public who would like to
10 comment on this particular item.

11 *(No response)*

12 CHAIR CAREY: Seeing none, we'll have a roll
13 call.

14 MS. OJIMA: Did Ms. Carroll make the motion?

15 CHAIR CAREY: Mr. Smith made the motion.

16 MR. SMITH: I made the motion.

17 MS. OJIMA: Thank you.

18 Mr. Schmunk?

19 MR. SCHMUNK: Aye.

20 MS. OJIMA: Mr. Gunning?

21 MR. GUNNING: Aye.

22 MS. OJIMA: Mr. Hunter?

23 MR. HUNTER: Aye.

24 MS. OJIMA: Ms. Carroll?

25 MS. CARROLL: Yes.

CalHFA Board of Directors Meeting – October 18, 2011

1 MS. OJIMA: Mr. Smith?

2 MR. SMITH: Yes.

3 MS. OJIMA: Ms. Stevens?

4 MS. STEVENS: Aye.

5 MS. OJIMA: Mr. Carey?

6 CHAIR CAREY: Aye.

7 MS. OJIMA: It has been approved.

8 MR. SMITH: And then just to give a report back
9 to you in terms of some of the comments that were made
10 with respect to the RFP, one is that one of the questions
11 that was asked by staff is whether Deloitte should be
12 allowed to participate. The Audit Committee felt that
13 that would be fine, provided that they were asked to
14 bring new people in so that we could get a fresh
15 perspective.

16 The idea is, regardless of which firm we end up
17 selecting, that we want a fresh pair of eyes, and at
18 least to consider what that cost would be. But we did
19 want to leave it open. We also asked that it be open to
20 anyone who wanted to apply, and to try to have some more
21 outreach in terms of diversity in terms of who might
22 apply to the RFP.

23 There was also some discussion about joint
24 ventures between diverse firms and majority firms.
25 That's something that I'm not sure applies in this

1 context, so we'll leave that up to the committee to see
2 how that might play out.

3 The other comment was to attach to the RFP the
4 actual contract, so that in the RFP process, if a bidder
5 had any issues with the contract that we were proposing,
6 that would be part of their RFP response.

7 And that way, we could shorten the time frame
8 of when we select someone, because we would already
9 have a basic and approved contract in place, so it
10 eliminates the whole negotiation of the contract. And
11 given our timing, that would expedite our ability to move
12 forward.

13 I think that was the summary of the majority
14 issues discussed, so now the full board has the
15 information.

16 Any questions, let us know.

17 MS. CARROLL: In terms of -- speaking about
18 rotation and getting some different ideas in, how long
19 have we had Deloitte? How long have they been our
20 auditors?

21 MR. SMITH: I know it's at least six years, but
22 I will ask Steve to -- it's been a long time.

23 MR. SPEARS: A very long time. Ten-plus years.

24 MS. CARROLL: I certainly applaud the idea of
25 getting at least new staffing partners in. I think we

1 should consider that in the selection process and the
2 possibility of rotation in the selection process.

3 That's a long time to have one audit firm.

4 MR. SMITH: Right. And I think that's why we
5 asked them to at least make all new members, including
6 the top management. It's not just rotating the staff,
7 but the folks who have been involved in the process.

8 MS. CARROLL: Right, although it is still the
9 same firm.

10 MR. SMITH: Yes, yes. We wanted to at least
11 let them make a proposal, and we could compare it with
12 the others.

13 MS. CARROLL: Sure, sure.

14 CHAIR CAREY: Any other questions?

15 *(No response)*

16 CHAIR CAREY: Thank you very much.

17 Steve, were you going to make some comments
18 about the RFP or -- go ahead. It's yours.

19 MR. SPEARS: Well, Mr. Chairman, do you want to
20 address the issue of the two members who are going to
21 serve?

22 CHAIR CAREY: Yes.

23 MR. SPEARS: I don't have any other comments
24 about the RFP.

25 CHAIR CAREY: Okay, and both Mr. Gunning and

CalHFA Board of Directors Meeting – October 18, 2011

1 Mr. Smith have agreed to serve on that working group.

2 And so just to clarify it, it's a working
3 group, working with the staff, it gives us a hand into
4 the process.

5 Their recommendation will go to the Audit
6 Committee prior to the January Board meeting, and then
7 will come to the full board at the January Board meeting.
8 And that will be the Board's action point, is at the
9 January Board meeting.

10 MR. SPEARS: And the Executive Director will
11 appoint the two staff at some future date.

12 MS. CAPPIO: Soon.

13 CHAIR CAREY: Okay, any further discussion on
14 that?

15 *(No response)*

16 CHAIR CAREY: Okay, moving on to -- so we don't
17 need anything else on the RFP process or anything?

18 MR. SPEARS: No, sir, I don't believe so.

19 --o0o--

20 **Item 6. Update and discussion regarding the financial**
21 **condition of the Agency, including an update**
22 **regarding the status of the U.S. Treasury's**
23 **New Issue Bond Program and the Temporary Credit**
24 **and Liquidity Program.**

25 CHAIR CAREY: Okay, moving on, update and

1 discussion regarding the financial condition of the
2 Agency.

3 Steve and Bruce.

4 MR. SPEARS: And Tim.

5 CHAIR CAREY: And Tim.

6 MR. GILBERTSON: Good morning, Mr. Chairman and
7 Members of the Board.

8 In your binder, you will notice there is a
9 brief memo dated September 12th. Because the meeting was
10 postponed, it hasn't been updated, but most of the
11 information is relevant.

12 We wrote that memo shortly after making the
13 East Coast trip to visit both the United States Treasury
14 regarding the TCLP and whether or not they would be able
15 to extend the program, and then also a lengthy
16 conversation that we had with Moody's just prior to them
17 going to rating committee.

18 I also understand that Board members did
19 receive the rating-letter updates, the notice of
20 downgrades in late September. You know, we lost one
21 notch in both the general obligation rating of the
22 Agency, as well as the HMRB indenture rating.

23 So what we thought we'd do today is kind of
24 give you another update.

25 You've heard from Tim and I many times over the

1 last couple years about the financial situation at
2 CalHFA, our condition, and the credit challenges that we
3 still face.

4 So the easiest way for us to kind of walk you
5 through this, is to lay out the strategic objectives that
6 management has had for the last few years. There are
7 rating levels that are triggers, and they're bright
8 lines, almost. And so we need to maintain, to the extent
9 possible, the G.O. rating of the Agency in the single-A
10 category. Currently, it's at the bottom rung of the
11 A category: A3 by Moody's and A- by S & P.

12 And then we also need to maintain the largest
13 bond-indenture rating of the Agency, a special-obligation
14 indenture, we refer to as the "Home Mortgage Revenue
15 Bond" indenture at investment grade. So that's the
16 bottom rung of the BBB rating levels. Currently, BBB by
17 S & P and Baa2 at Moody's.

18 And all of this is to have this rating
19 framework. If we can keep things in check at those
20 levels, you know, the flow of funds will work, the
21 liquidity of the Agency we believe will be sufficient to
22 get us through this crisis.

23 If, however, we fall below those rating levels,
24 it potentially would interrupt the cash flow and
25 liquidity position of the Agency, causing some other

1 future challenges. And we'll get into that as we go
2 through this presentation today.

3 Here is a history of the rating actions. You
4 can see we've put on here, prior to 2009, for many, many
5 years, the Agency had, you know, mid to low and AA credit
6 ratings. And we had those for years and years. The HMRB
7 indenture was first utilized in 1982, and for the vast
8 majority of all those years it was in the AA category.

9 The first downgrades occurred in July of 2009.
10 And you can see, we've highlighted the current rating
11 levels. And then we've identified where the thresholds
12 are that would cause significant consequence to the
13 Agency, below single-A level and below Bbb-/Baa3.

14 Again, you've seen slides similar to this
15 before. A lot this is the relationships between the
16 credit ratings. They're not stand-alone on their own.
17 There is interplay between the general obligation rating
18 of the Agency and the Home Mortgage Revenue Bond
19 indenture and its rating.

20 Let me walk you through that quickly. We're
21 going to start in the upper left box, the blue box, that
22 is depictive of the general obligation credit rating,
23 currently rated A-/A3. There's \$1.1 billion in bonds
24 outstanding that are backed by the general obligation
25 rating of the Agency. Those are, in large part, our

1 multifamily loan programs, bonds issued to finance
2 multifamily loans.

3 TCLF, the federal government has provided
4 \$676 million of credit and liquidity support for bonds
5 issued under those indentures. And that's a part of the
6 general obligation pledge of the Agency.

7 At the time of this, August 3rd, 2011, we had
8 approximately \$283 million of liquid assets in the
9 general reserves of the Agency, a portion of that was
10 posted to swap counterparties. I'll get to that here in
11 a moment.

12 But what does the general obligation serve as a
13 credit support to, away from the bond programs that we
14 have? Well, the swap counterparties face a general
15 credit obligation rating.

16 In the upper right-hand corner of this slide,
17 you see the white box. We had a mark-to-market on swaps.
18 I think the swap notional amount is somewhere in the
19 neighborhood of \$2.5 billion. The negative mark against
20 the Agency in early August was \$303 million.

21 To give you a sense of how that market value
22 changes, the DV01 represents the dollar value of
23 1 basis-point movement in interest rates. So if interest
24 rates were to go up by 300 basis points -- or 200 basis
25 points, approximately, we would be at break-even.

1 So all rates across the yield curve would have
2 to go up by about 200 to get us to break even, and then
3 the market value would be effectively zero.

4 The other thing of note here is that we've
5 tried to distinguish -- and this is, in large part, to
6 convince Moody's that we have more than enough liquidity
7 assets of the general obligation reserve to deal with
8 swaps under the HMRB indenture. So we've shown both the
9 market value of the G.O. swaps and the swaps that are
10 securing HMRB, or hedging HMRB bonds.

11 You see, that's \$204 million on the slide,
12 meaning, that the Agency would still have approximately
13 \$80 million of liquid assets if, in fact, we had to elect
14 to terminate all of the swaps that are hedging HMRB
15 bonds.

16 We're going to move now to HMRB. And this is
17 the orange-colored box down at the bottom left of the
18 page. Again, BBB/Baa2 ratings from S & P and Moody's.
19 We need to maintain the investment-grade rating.

20 \$4.7 billion of bonds have been issued out of
21 this indenture. \$2.1 billion are these variable-rate
22 demand obligations that need a credit and liquidity
23 support currently offered and provided for by the federal
24 government.

25 And we've added one more graphical depiction

1 here, and that is the Agency is currently administering
2 approximately \$2 billion of Hardest Hit Funds coming from
3 the U.S. Treasury to help Californians avoid foreclosure.
4 Those monies are available not only to our program, but
5 to all Californians if they meet the program criteria.

6 What this is saying is that those monies can
7 help reduce delinquencies and reduce expected loan
8 losses. As they materialize, currently, HMRB has been
9 funded to the tune of \$16.2 million from the Hardest Hit
10 monies.

11 Tim is going to go into another layer of detail
12 regarding the relationships of the G.O. and the HMRB
13 indenture.

14 MR. HSU: The orange box, which is HMRB, I
15 think that many of you know that the single-family
16 delinquencies that's creating a lot of downward rating
17 pressures on the Agency in general, is coming from this
18 orange box. And this chart here is depicting the four
19 supports for that orange box.

20 First, we have the M.I. Fund. This is our own
21 M.I. Fund. We have Genworth and we have GAP reserve and
22 we also have the Hardest Hit.

23 This chart here is depicting the four supports,
24 but it's also noting that the M.I. Fund and the GAP
25 reserve, which are resources under the umbrella of the

1 grade of CalHFA, have been depleted. The last resources
2 in both of those pots were depleted back in August of
3 this year.

4 MR. SPEARS: So the next slide points out some
5 successes that we've had. And we've talked about some of
6 these before.

7 August 1st and February 1st are really, really
8 important dates for us. That's when debt-service
9 payments are made, swap payments are made. And those
10 payments were made on August 1st -- and, again, since we
11 last met in July, this was an important event since we've
12 last met.

13 On top of the fact that we made all of our
14 debt-service payments and swap net payments, we also
15 exercised \$34 million of swap par terminations. And that
16 simply means that those are swap contracts that we are
17 not going to have to make payments on.

18 In fact, you can see that on 2/1/12 is a huge
19 date for us because \$300 million of those swaps go away
20 on a par basis without -- we're not buying those out;
21 they just expire. So a very important date for us.

22 Tim will go over a chart and two or three
23 slides that will show you how this goes down over time.
24 It's rather dramatic.

25 We've had two rounds of swap collateral

1 threshold negotiations that have really put us in the
2 place where we can still be alive and breathe, frankly;
3 and they were very successful.

4 And then the other thing that we've done is
5 gone out and bought fixed-rate bonds at a discount on the
6 open market, and saved us about \$39 million.

7 And I think pretty much all of that went into
8 HMRB equity; correct? So when you see HMRB equity
9 health, that was helped out by \$39 million of some
10 strategic purchases out in the market.

11 The key for us are not only delinquencies, but
12 Genworth. Genworth has to keep making payments to us.
13 And so we've gotten a total of \$275 million over the life
14 of our relationship with them. A lot of it has come in
15 the last two or three years. But \$68 million so far this
16 year alone.

17 And as we said, in that previous slide, we saw
18 those other supports -- the GAP payment and the M.I. Fund
19 payments going away. Genworth's obligation is still
20 there, and that's still going to be there.

21 And as we said, we've had 654 loan
22 modifications, we've talked about before. Not all of
23 those are assisted with KYHC funds. You saw the
24 \$16 million coming over. That's helped some of those
25 loan modifications but not all of them.

CalHFA Board of Directors Meeting – October 18, 2011

1 Should we stop and see if there are any
2 questions at this point, about anything along the way?

3 *(No response)*

4 MR. SPEARS: If not, we'll keep on rolling.

5 MR. GILBERTSON: So what we've done is tried to
6 lay out, there's three primary challenges that the Agency
7 still faces.

8 You may remember, over the course of the last
9 couple of years, this list was much longer. It included
10 a number of others things. We used to talk about bank
11 bonds. We used to talk about the Bay Area Housing
12 Program. Thanks to the collective efforts of the State
13 Treasurer's Office and Cal Mortgage, we were able to deal
14 with that earlier this year.

15 So three things remain: The extension of the
16 United States Treasury's TCLP program. Just as a little
17 bit of a refresher, in October of 2009, they announced
18 two programs to assist housing finance agencies. CalHFA
19 was a big user of both of the programs. TCLP was one.
20 We asked for \$3.5 billion worth of credit and liquidity
21 support at the time. They provided that to us. And we
22 now have approximately \$2.8 billion of that currently
23 attached to variable-rate bonds.

24 The second thing that the rating agencies are
25 always asking about is swap collateral posting

CalHFA Board of Directors Meeting – October 18, 2011

1 requirements that we have because our ratings have been
2 falling, and whether or not we have sufficient liquidity
3 to meet those obligations over the long term.

4 And then the third one, and perhaps the most
5 challenging for us to deal with, is the single-family
6 portfolio that we own. You know, the repricing of real
7 estate in California, where prices went down, were cut
8 in half, has led a lot of borrowers that we financed in
9 appropriate loan products, to default. And so we still
10 have 13 percent delinquency. We'll talk about each of
11 these over the next few minutes here.

12 The good news is, after we met with Treasury
13 in early September, they wrote a brief memo on
14 September 23rd announcing the intention of Treasury to
15 consent to the extension of the TCLP program for a period
16 of three years. So we now go from -- let's see, it was
17 set to expire December 31, 2012. To the extent that this
18 extension does happen, it was just the intention to
19 consent to the extension, it would go out to 2015.

20 They've also, as a part of that notice, that
21 memorandum, they notified us that extension fees would be
22 appropriate and consistent with the fees that we have
23 paid all along.

24 So that is, roughly, we pay between 75 and
25 100 basis points for those facilities today. And they'll

1 probably gradually go up for those three years that the
2 facility is extended.

3 They said that additional details would follow.
4 We've not heard any or seen any of the details since
5 September 13th. We're hoping sometime by late November,
6 we might see those details. So that's good news.

7 And then Moody's took note of this, and this
8 was very powerful as they went into rating committee, you
9 know, assessing our credits.

10 MR. HSU: One of the major concerns that the
11 rating agencies has, is the amount of liquidity or just
12 cash and investments that we have that can be used to
13 post as collateral to the counterparties.

14 I think Bruce mentioned earlier that we have
15 about \$283 million of cash and investments that's
16 available to post as collateral to the counterparties.
17 This chart here is showing that of the \$283 million on
18 that day, \$85 million was posted to the counterparty, and
19 we had \$198 million still sitting back at the Agency.

20 This is basically a risk-management tool to
21 show that if we were downgraded on that day, how would
22 the cash position change? So it shows that if we were
23 downgraded by one notch and were to go to BBB+, we would
24 increase our collateral posting to the counterparties
25 from \$85 million to \$176 million. And in so doing, we

1 would only have \$107 million sitting back at the Agency
2 rather than the \$198 million.

3 The main strategy that we have to decrease this
4 risk of having a large amount of collateral requirement
5 posted to the counterparties, is to try to reduce our
6 swap notional as fast as we can.

7 There is a lot going on in this chart; but the
8 key message here is that over the next four years, we can
9 dramatically reduce our swap notional amounts through a
10 natural amortization that's built into the swaps, and
11 also through these par termination options that we talked
12 about.

13 MR. GUNNING: I'm sorry, Tim, what's
14 "notional"? What's that term?

15 MR. HSU: Swaps are referred to on a notional
16 basis. Interest-rate swaps are referred to on a notional
17 basis because you don't actually exchange that dollar
18 amount.

19 So, for example, if you and I did an
20 interest-rate swap and we are good counterparties, and
21 you and I say that, "Well, we're going to do an
22 interest-rate swap," it's going to be based on \$100.
23 Because it's in the same currency, because we are only
24 trying to -- suppose that I'm going to pay you fixed and
25 you're going to pay me variable. We're exchanging

1 interest rates. We're not really having to exchange that
2 dollar amount.

3 It's referred to as "notional" because you're
4 trying to use that amount to calculate the exchange of
5 the interest rate. So you say, "Okay, well, if I have to
6 pay you fixed, I'll pay you \$5, if it's 5 percent I have
7 to pay you," but I'm not going to pay you \$100 because on
8 that day, in theory, what would happen is that I will
9 give you \$100 of cash and you will give it back to me,
10 but I'll give you \$5, and you give me the variable leg.

11 So you will have a simultaneous exchange of
12 that notional amount. And as such, that amount is not
13 actually exchanged. That's why it's referred to as
14 "notional."

15 So what we're trying to show here is that a
16 combination of the amortization of these swaps, and also
17 the par termination options that we have -- again, these
18 par termination options are options that we purchased
19 when we first got into the swaps.

20 So Steve had mentioned earlier that on
21 February 1st of next year, we have about \$307 million of
22 par terminations to exercise. What that means is that
23 we simply noticed the counterparty that we would no
24 longer use those amounts of the swaps, and we can get out
25 of it without having to pay a market price to get out.

1 This dotted curve here, what this is attempting
2 to show is an effort to project what the mark-to-market
3 would be in the future as we reduce the notional amount
4 of the swaps.

5 So Bruce mentioned earlier that our swaps are
6 in the neighbor of about -- the mark-to-market -- about
7 \$300 million.

8 What you can see here is that what we are
9 trying to depict is that, for example, if you go all the
10 way out to August 2015, even if we were to take a fairly
11 stressful interest-rate curve, if we go out to 2015,
12 instead of \$300 million owing to the counterparties, we
13 could be all the way down to \$100 million.

14 So the gist of this chart is saying that the
15 next three to four years, if we do what we are showing
16 here, we can dramatically decrease this risk.

17 MR. GILBERTSON: And one other thing to point
18 out -- and I'm just going to use it because this slide is
19 up here -- but the Treasury extension, if that were to
20 happen for TCLP, runs through the end of 2015 -- so you
21 can see the amount -- the notional amount of the swaps
22 don't correctly correlate to the variable-rate bonds.
23 But there is some correlation there. And so you can see
24 that as we face the end of 2015, we're going to have
25 significantly fewer variable-rate demand obligations

1 outstanding that might or might not need this credit and
2 liquidity support as we get to the end of an extended
3 TCLP period.

4 So why do we feel comfortable that we can
5 continue to meet the obligations that we have to the
6 counterparties? And, again, I think what Tim and I would
7 say is that we feel very confident, if we maintain
8 A-rating levels for the G.O., we're somewhat comfortable
9 at Baal/BBB+, it probably won't work today. If a
10 downgrade to the mid BBB were to happen, it would be
11 very, very challenging for the Agency.

12 But if that event were to occur two years from
13 now, a different story. So we need to, you know, the
14 time element in perspective.

15 This shows what comprises that \$198 million.
16 These are internal account labels that the Agency has
17 used for many, many years. We have general accounts that
18 have \$111 million. In our operating and financing
19 accounts, we have \$45 million. The Board created
20 something called an emergency reserve account many years
21 ago that has \$31 million. And there's a supplementary
22 bond security account.

23 A total of \$198 million, and an additional
24 \$85 million was posted as collateral to counterparties on
25 August 3rd. But that's a point in time.

1 So what we were trying to do is show you a
2 forecast of what we think the liquidity position of the
3 Agency will be over the next five years.

4 So the first column is the partial period from
5 August 3rd through December 31st, 2011. And then you have
6 four full calendar years.

7 So we're starting with \$198 million. So this
8 is net of the \$85 million that was posted to
9 counterparties in early August.

10 And let's just talk about the sources of new
11 liquidity that come into the Agency on a monthly basis.
12 We have a number of loans that are unencumbered, not
13 attached to specific bonds. And so all of the payments
14 that come in from those borrowers go into the Agency's
15 general reserves and can be used for a variety of
16 purposes.

17 So you can see, for the partial year, the
18 remaining part of 2011, we're expecting \$9.8 million to
19 come in. These are a variety of loan programs. These
20 are old single-family loans from old indentures that have
21 been fully retired that we have access to. This also
22 includes a number of multifamily loans, specifically some
23 Section 8 loans that trace all the way back to the early
24 eighties. All the bonds have been retired, and we get
25 the benefit of the P&I payments as they come in monthly

1 for the general purposes of the Agency.

2 You can see over the time frame -- it's not
3 exactly a straight line -- but \$38 million is accounted
4 for in 2012. It goes up to a peak of \$44 million in
5 2013. And then, you know, back down into the kind of
6 mid \$30 million range over the next two years.

7 And I believe if you were to go out, you know,
8 four or five years beyond this, that would start tapering
9 off over time.

10 We also received a number of admin fees. We
11 service loans, so we get a servicing fee for loans. We
12 collect an administrative fee out of that Home Mortgage
13 Revenue Bond indenture that we collect every six months,
14 and a variety of other loan fees and whatnot, some
15 conduit lending fees, and that type of thing that
16 represents what is \$14.6 million for calendar year 2012.

17 And you can see, it's declining. A lot of that
18 has to do with the servicing portfolio declining over
19 time.

20 The next line item is a reimbursement of swap
21 payments. I just want to make note that under, "Uses of
22 Liquidity," there is also a line item labeled, "Advance
23 swap net payments for HMRB." They're identical, so it's
24 just an offset. But if, in fact, we faced a credit
25 downgrade in HMRB where it fell below investment grade,

1 we would still be burdened with the obligation to make
2 the swap payments out of this pool of money, but maybe
3 precluded, without an amendment, to reimburse the
4 Agency's general obligation, the general reserves of the
5 Agency for those payments.

6 So you can see those amounts over the course of
7 the next four years declining, again, based off of our
8 expectation of the notional amount declining and the
9 forward curve, where interest rates are likely to go over
10 the next three to four years.

11 Then there is one other item in the sources of
12 liquidity. These are some excess revenues that are
13 generated within the multifamily indenture, between
14 \$5 million and \$10 million. We may or may not transfer
15 those; but it is available to the Agency, should the
16 Agency need that for other general obligations.

17 So you can see over time this amount is
18 generally growing. And then we're comparing that to what
19 are the ongoing obligations that the Agency needs to do:
20 It needs to keep the lights on. It needs to pay its
21 employees.

22 So the operating expenses are shown. These are
23 rough estimates. And certainly the Board has a lot of
24 discretion over the operating expenses of the Agency
25 prospectively.

1 So we're showing a \$46 million number for what
2 amounts to the calendar year 2012; and it's going, you
3 know, kind of not in one direction or the other because
4 we had some strategic initiatives, some I.T. projects
5 that we think will continue to require some expenditure
6 over time.

7 You know, a small amount, we had some
8 commitments to still fund some loans. It's unlikely that
9 that \$1.4 million will go out the door, but we want to
10 honor our commitment to the borrower. I think these are
11 loans under our HELP loan program. These are loans to
12 localities to do affordable housing. At this point,
13 there haven't been requests to draw down on those funds.

14 If we don't issue bonds, we, of course, won't
15 have financing costs, you know, up-front costs of
16 issuance. But we've shown an amount, \$1.8 million, the
17 balance of this year, and then \$5 million is a general
18 set-aside over the next four years.

19 And then the GAP claim payments -- Tim
20 discussed this earlier -- the last of the GAP claim
21 payments were made in August. And so that there will be
22 no future GAP claim payments.

23 The bottom line is that you see that over the
24 four- or five-year period, that the liquid assets of the
25 Agency, absent additional collateral posting obligations

CalHFA Board of Directors Meeting – October 18, 2011

1 to our swap counterparties, is generally rising, from
2 \$194 million that we would expect to be there at the end
3 of this year, to \$240 million at the end of 2015.

4 Any questions on that?

5 *(No response)*

6 MR. GILBERTSON: It's unfortunate that Board
7 Member Shine isn't here. He loves to ask this question.
8 I would really like to show him. And maybe we'll have to
9 get him on the phone and run through this with him.

10 But any questions on our liquidity forecast?

11 *(No response)*

12 MR. GILBERTSON: I just want to reassure you,
13 on some of the P&I payments, you know, HELP loan program,
14 we made almost \$200 million of those loans over time.
15 We're not assuming full repayment. We're assuming
16 50 percent repayment on the HELP loans.

17 History to this point has been that they're
18 paying at a much, much higher rate. Well over 90 percent
19 of the localities are paying those loans back as they
20 come due.

21 So we had three challenges, TCLP, we think --
22 keep our fingers crossed -- that Treasury does come out
23 with an extension, getting us out to 2015. That's the
24 best we can hope for now. And I think that will really
25 help resolve that issue with the rating agencies for some

1 time.

2 You know, we feel pretty comfortable that we
3 can meet our swap obligations over time to the extent
4 that we maintain the ratings that we've been discussing.

5 That leaves us the third challenge, which is
6 the single-family portfolio.

7 What we have here is a depiction of delinquency
8 ratio. There is a Board report in the back of your
9 binder. I don't think it's the August 31st report. I
10 think it may be a July report. But bottom line, we still
11 have 13.68 percent delinquencies. This is showing,
12 again, the delinquencies by insurance type.

13 Remember, the federal guaranteed loans, we're
14 not nearly as concerned about as the ones that have
15 conventional M.I. Our Mortgage Insurance Fund, you know,
16 has run out of cash at this point. Genworth is still
17 meeting their obligations.

18 But this is going to have a lot of
19 significance, I think, for the Agency going forward.
20 We have a few charts in here that just show the
21 historical delinquency ratios over the last ten years.
22 Certainly, you can see the run-up. And there's generally
23 been improvement since 2009.

24 The big drop in the FHA delinquencies is that
25 we asked Bank of America to repurchase seriously

CalHFA Board of Directors Meeting – October 18, 2011

1 delinquent loans that they've had for a long time as a
2 servicing agency, and they did that in August.

3 Was that about \$60 million --

4 MR. HSU: That's correct.

5 MR. GILBERTSON: -- of mortgages that they
6 purchased.

7 Here's another depiction of 30- and 60-day
8 delinquencies. It kind of gives you a trend line.
9 Really, that's roughly the same as it has been for quite
10 a while. And then the more seriously delinquent loans
11 and what things look like as of August 2011.

12 So there's a number of things that we're
13 talking about.

14 I don't know if, Claudia, within the Agency,
15 about trying to go after the portfolio, a lot of
16 strategies are being developed at this point. We'll
17 bring those back to the board as they really are put into
18 place.

19 Any other questions regarding -- Mr. Gunning?

20 MR. GUNNING: Is there any reason in the
21 August spike in the 90-day delinquencies?

22 MR. GILBERTSON: The August spike in the
23 90-day --

24 MR. GUNNING: August 10th, this 90-day?

25 MR. SPEARS: 2010.

CalHFA Board of Directors Meeting – October 18, 2011

1 MR. GILBERTSON: Yes, that one back in
2 somewhere -- that's like early 2010, right?

3 MR. GUNNING: Yes.

4 MR. GILBERTSON: I don't recall off the top of
5 my head what that was.

6 MR. GUNNING: No worries.

7 MR. SPEARS: Mike, I think we securitized a lot
8 of FHA loans that were current, and got a premium pricing
9 in a mortgage-backed security. So that took all those
10 good loans out of the denominator, and made this
11 percentage jump.

12 MR. GUNNING: Oh, that's why it looks bad.

13 MR. GILBERTSON: So that's one thing about
14 ratios, you've got to be careful.

15 Remember, the overall thing is that our
16 portfolio of loans, when we started the crisis, we had
17 well over 30,000 -- 34,000 loans, if I remember.

18 We're now down to 23,000 loans. So a third of
19 the loans have actually been dealt with one way or the
20 other.

21 Other questions?

22 *(No response)*

23 MR. GILBERTSON: Thanks so much for hearing our
24 update.

25 CHAIR CAREY: Yes, thank you.

1 funding.

2 And so far, over 2,500 homeowners have received
3 unemployment assistance over -- I'm sorry, I can't even
4 talk anymore this morning. I've already been on the
5 thing all day.

6 So we're close to 7,000. We've gone back,
7 we've reevaluated. You know, at certain points, we go
8 back and reevaluate what is working, what isn't, why
9 people are qualifying, why they're not.

10 Certainly, the single biggest barrier for
11 people getting funding continues to be bank
12 participation. Although we have up to about 50 servicers
13 that are currently signed on -- and that number is
14 continuing to go up -- we have about eight or nine that
15 are currently participating in the Principal Reduction
16 Program. We're continuing to have conversations with the
17 GSEs. And I would describe those conversations as
18 robust.

19 MR. WARREN: Yes.

20 MS. RICHARDSON: And we hope to have some news
21 to announce on that front after the first of the year
22 that we think will be very good.

23 We also have been -- and I think I mentioned
24 this during the last update -- we've become very active
25 with our social media outreach. We do have a Facebook

1 page and a Twitter page, which has been very successful;
2 and it allows people to pass messages on to large groups.
3 We're seeing a large uptick from that.

4 Those of you that text, you can text the word
5 "HOME" to 55678, and you can get information about the
6 *Keep Your Home California* Program.

7 We're finding that some people weren't able to
8 remember the phone number or the Web page. So, you know,
9 that's another avenue that we've pursued.

10 We're getting our average calls -- we're
11 averaging 800 to a thousand calls a day. So we think
12 that our increased media activity has been successful.

13 We are planning a dedicated drop we've worked
14 with Experian to identify. We gave them a list of
15 borrowers who were successful in getting funding, and
16 they created a whole profile for us of what those
17 borrowers look like, so that we could target those same
18 kinds of people through direct mail. We'll be testing
19 that in the next few weeks.

20 We'll also begin doing some cinema advertising
21 in the next few weeks. So when you go to the movies to
22 see your holiday movies and you're sitting there -- you
23 know, those ads that play three or four times before your
24 movies start -- there's a good chance that one of them
25 will be *Keep Your Home California*.

CalHFA Board of Directors Meeting – October 18, 2011

1 You know, I will tell you that as we have
2 continued to reevaluate the program, the Board did -- the
3 CalHFA MAC board did recently take action. And we are in
4 the process of expanding our criteria one more time.

5 You know, we've always said that we would look
6 at things as we progress. And if we have the capacity to
7 open the spigot, we would be happy to do that.

8 So for the unemployment program, we're going
9 to extend that to nine months of assistance, to sort of
10 facilitate -- the unemployment situation in California
11 hasn't unfortunately been improving as we had hoped. So
12 we're going to extend our assistance on the unemployment
13 program. We're going to increase our mortgage
14 reinstatement amount from \$15,000, to \$20,000 in hopes
15 that more borrowers will qualify.

16 And we're also going to eliminate the cash-out
17 and second-home exemptions from the Principal Reduction
18 Program. And we think that that will facilitate more
19 participation.

20 So with that, I'll open it up to questions.

21 MR. GUNNING: So it seems like there's a lot of
22 money left.

23 MS. RICHARDSON: There's a lot of money.

24 We have allocated about \$1.8 million. But, you
25 know, there is still a lot of money left. And, you know,

CalHFA Board of Directors Meeting – October 18, 2011

1 we're seeing a significant uptick, though, not only in
2 the number of calls, but the number of borrowers that are
3 qualifying and the number of transactions that we're able
4 to complete each month.

5 CHAIR CAREY: Do we have projections about how
6 we anticipate that money getting out during the life of
7 the program so that we have somebody to compare, to
8 benchmark things to?

9 MS. RICHARDSON: Yes. And I can send that to
10 you. I don't have that with me.

11 I know that originally -- you know, we had no
12 idea how many calls we were going to get at the
13 beginning. You know, Claudia and I continue to hope that
14 the program is over in a year. I think that that might
15 be a little Pollyanna of me.

16 CHAIR CAREY: And a fairly busy next 12 months.

17 MS. RICHARDSON: Yes, right. It's been pretty
18 busy as it is.

19 You know, we have the funds available to us
20 until December 31st, 2017.

21 And I think, Linn, the last projection, we had
22 it between maybe about four years?

23 MR. WARREN: It would be. I think that what we
24 found with the reinstatement program, we'll probably have
25 to reallocate somewhere in a period of two years. But

1 with the cash-out refi requirement going away, we're
2 going to revisit the Principal Reduction Program and the
3 other ones. And we think that that will be cut in half.
4 I will also add that, as Di said, the banks are
5 continuing to work with us, but not at the speed we would
6 like.

7 I think the settlement talks and other actions
8 around the banks are going to have an impact on this.
9 And there's going to be some changes in that over the
10 next 12 months or so as things begin to coalesce. And we
11 have a meeting, I believe, in November with the banks in
12 Dallas again to discuss this.

13 So the short answer to the projection,
14 Mr. Carey, I think we will be revisiting the projections
15 and see what it looks like. But I think we've got enough
16 in play right now to change our assumptions.

17 MS. RICHARDSON: Right. I think one of the
18 things we've talked about before also is that for our
19 mortgage reinstatement program, we originally anticipated
20 that a lot more of those funds would go along with a
21 modification, that they would be the means to
22 facilitating the modification. And that's been a lot
23 harder for us to accomplish.

24 We've actually been making significant progress
25 on that end. And we're going to be hosting the call with

CalHFA Board of Directors Meeting -- October 18, 2011

1 the other states. You know, the banks are sort of
2 pointing to us now as a model. And if we can get more
3 states to sort of do what we're doing, they might be more
4 willing to participate in that.

5 CHAIR CAREY: Other questions or comments?

6 MR. HUNTER: Could you go back to what you said
7 on the exemption cash-out refinancing?

8 MS. RICHARDSON: Yes. Currently, we had fairly
9 narrow criteria, because we weren't sure what kind of
10 call volume we were going to receive. And we always said
11 that we'd go back and reevaluate. And if we have the
12 capacity to expand the criteria, we would do that.

13 We think we have that capacity, clearly. And
14 so among the three biggest reasons that people are not
15 being able to participate: Their bank isn't
16 participating in that particular program, they've done
17 some kind of a refi somewhere along the line, or they own
18 a second property.

19 And the second-property issue, what we're
20 really finding is a lot of these homeowners -- you know,
21 we look at everybody on the note. Quite often, it's
22 their parents co-signed with them, so their parents own a
23 second home, and that's disqualifying them. And that was
24 never really our intent.

25 The other thing that's happening there is, we

CalHFA Board of Directors Meeting – October 18, 2011

1 firmly believe that if you own a second home, you have
2 other options available to you. But in many cases, their
3 second home is in much worse position than their first.
4 And that's not going to really provide any kind of help.

5 CHAIR CAREY: There was certainly a lot of
6 discussion around those issues.

7 MS. RICHARDSON: Yes, there was. And I'm sure
8 there will continue to be.

9 MR. HUNTER: We actually discussed it.

10 CHAIR CAREY: Yes.

11 MR. GUNNING: Given the amount of money left,
12 has there been any consideration to other plans or
13 funding of other programs, like our -- not necessarily
14 our friends at One LA, but other efforts?

15 MS. RICHARDSON: Yes. Well, actually, you'll
16 recall, we did put out the RFP for the local innovation
17 fund. Three programs were approved by Treasury. One of
18 them is currently operational. It's a San Diego CHW,
19 California --

20 CHAIR CAREY: Community Housing Works.

21 MS. RICHARDSON: Thank you -- Community Housing
22 Works.

23 And that's a program where they're working with
24 smaller community banks to help eliminate second
25 mortgages sort of like the HFAFA program at the federal

1 level that most of the bigger banks are signed on to.
2 So that program has actually just gotten started. And we
3 should see some activity there soon.

4 We did get the One LA program approved for
5 trial. We're waiting for them to take that contract to
6 their city council for approval. That was originally
7 going to happen in September.

8 MR. WARREN: November.

9 MS. RICHARDSON: You know, for some reason, it
10 didn't. Now, we're hearing that they're going to try to
11 do that in November. So we're hoping that that program
12 will get going soon.

13 We have a third program with Sacramento
14 NeighborWorks, in which it's sort of a rent-to-own kind
15 of program, where they work with the homeowner to keep
16 them in the home. And if the borrower goes through some
17 credit counseling and education, they can then repurchase
18 the home.

19 There are some conflict issues there with
20 existing state law that we're trying to work through with
21 them. And as soon as we can get that resolved, we think
22 that will get up and going.

23 And we have continued to look at other programs
24 and other alternatives and evaluate other things. And,
25 you know, some states have done a couple of different

1 things. We're going to see how those work and look at
2 their performance. And certainly, if something is really
3 successful, we're not too proud to copy it.

4 CHAIR CAREY: Questions?

5 *(No response)*

6 CHAIR CAREY: We do have someone in the
7 audience who has requested the opportunity to address the
8 Board on this program.

9 So Ross Romero from Chicanos Unidos, if you'd
10 like to come up.

11 MR. ROMERO: Thank you.

12 My name is Ross Romero, and I'm a housing
13 advocate from Orange County, California. I come here as
14 an individual. But as it's mentioned, I'm a member of
15 the Chicanos Unidos. I'm on the statewide committee of
16 LULAC for housing. I've been involved with various
17 communities organizations in Orange County that deal with
18 housing. And I've been a real-estate professional for
19 over 25 years.

20 And I got involved with housing, and found out
21 about this by way of a seminar, about a month ago. And
22 to my chagrin, you know, to see how much money was out
23 there. And I would like to address the Board regarding
24 the *Keep Your Home* Program, and what I feel has been the
25 underutilitization -- well, let me preface it by saying,

1 I did get a chance to speak with Ms. Di Richardson, I
2 believe it is, and she answered a lot of my questions
3 coming here, and some of the fine things that they're
4 doing.

5 But nevertheless, I'd like to go through my
6 presentation real quick.

7 So I'm here. I feel what has been the
8 underutilization of the \$2 billion that has been awarded.
9 As mentioned, I'm involved with many groups, and as such,
10 I've been able to make contact with the groups that are
11 administering this program in Orange County and even
12 statewide.

13 What troubles me is the low numbers of people
14 that have been able to take advantage of this program to
15 date, particularly considering the housing, the
16 foreclosure debacle that we've been involved with.

17 According to the Web site, approximately 2,000
18 people have completed this program, and approximately
19 another 3,000 are in the pipeline. I think she updated
20 the figures.

21 The Web site also indicates that as many as
22 100,000 could be eligible for this program. Thus, the
23 approximately 7,000 homeowners will mean that only like
24 5 percent of the goal of 100,000 has been accomplished by
25 the end of this year.

1 Now, based on those figures, even if you were
2 to quadruple the output that we had this year, it would
3 still mean that within three years, we wouldn't have even
4 paid out less than 50 percent of the money. And this is
5 what really startles me. Less than half the money would
6 have been spent.

7 And I think I'm here because, you know,
8 homeowners, they need relief now.

9 My recommendations that I have -- and as I
10 mentioned, she had clarified some of these -- is that we
11 do need to, in fact, ease the guidelines for qualifying.

12 You know, in speaking with some of the
13 nonprofits at the beginning of this year, it was very
14 tough.

15 I can tell you, on a personal basis, I referred
16 about four or five people out. When I found out about
17 it, I said, "We got about \$2 billion." And I just put
18 the word out, and some of the people I have already
19 referred have been unable to take advantage of the
20 program.

21 I think we need to do more outreach and
22 publicity. She's gone over some of those items.

23 And, you know, with that, maybe even utilizing
24 the realtor organizations, going to the real-estate
25 professionals.

1 But I think that's very important because, you
2 know, consumers, they're confounded. We've got the
3 foreclosure scams. We've got all these things that are
4 going on. And a lot of times, when you're in this
5 situation, you don't know what's real and what your
6 options are. And it's all about the fact that there is
7 an option.

8 Me personally, that's the first thing I do, is
9 hand somebody a brochure. It is an option that people
10 need to know they have out there. And for whatever
11 reason, in my opinion, the word has not gone out yet.
12 And I'm happy to see what's happening.

13 Secondly, increase the funds for the staff of
14 the processing of these applications, either both
15 internally, state employees, as well as, you know,
16 externally, the nonprofits that are processing these
17 applications.

18 As best hopes, as was mentioned, we get all
19 these applications, we've got to process them. Because
20 people got to know they're going to go into this program,
21 and it's going to be something that's going to work for
22 them.

23 If they go in there and they get tied up for
24 months, quite honestly, during that period they could
25 lose their house.

1 Fourth, work towards gaining participation of
2 all major lenders. And that was talked about. But in
3 particular, I'm really let down about the
4 non-participation of the lenders in the mortgage
5 reduction program.

6 As many of you can recall, two or three years
7 ago, the debate was whether or not, in fact, the banks
8 should be lowering mortgages.

9 The banks came back and said, "Well, that would
10 have a bad long-term effect. And so it was the consumer
11 wanting this reduction, and looking at that as being an
12 option as opposed to the interest and the overall picture
13 of the banks.

14 Well, now we have a program that would minimize
15 that for the banks. You know, 50 percent, as I
16 understand, would be given from the program and
17 50 percent would be contributed from the banks.

18 And as for our state, I think in the long-term
19 it's going to be great, I can tell you as a real-estate
20 professional. Because one of the problems is that people
21 have this hope that the market is going to turn, and that
22 they would, in fact, be able to at some point sell or
23 refinance or whatever.

24 And so in the long-term, this will have a very
25 positive effect on the real-estate market and begin to

1 help with the recovery.

2 I'd like to just close by saying \$2 billion.
3 \$2 billion. You know, our country is in disarray right
4 now. People are out in the streets, and a lot of that
5 has been fueled by what has happened with this
6 foreclosure debacle. In fact, it's become one of the
7 main points of the people that are out here, you know,
8 basically addressing the concerns about the banks right
9 now.

10 I can tell you on a personal basis, I have my
11 81-year-old mother who is sitting in an ICU unit right
12 now in Sacramento, continues to have calls from Indy Mac
13 about her payment, that they're going to put her in
14 foreclosure, over a loan for a house that she has owned
15 for over 30 years, on a loan that was made over a
16 telephone five years ago. You know, this is the
17 desperation. This is where basically, on a personal
18 level, people are just at a point -- and the motivator of
19 why I'm here, we have this money, we need help, we need
20 relief now. This money needs to get out.

21 All the ratings aside and all this other stuff
22 that you guys deal with, from when I look at the
23 \$2.8 billion, and you mention the figure \$6 million has
24 already been spent to date, and another three times that
25 is anticipated to be closed, that's \$1.8 million.

1 That's, like, .10 percent of \$2 billion.

2 So you're telling me by the end of the year,
3 only .10 percent of \$2 billion will be spent?

4 You know, we've got \$2 billion. And how can we
5 best get it out there?

6 I would just really -- I don't know what it's
7 going to take. I, for one, with the organizations I'm
8 involved with, would like to advocate with the banks,
9 the lenders, that we could gather more of their
10 participation.

11 And I thank you for your time.

12 And I think that just whatever we can be
13 supportive of the efforts being done by the Agency to
14 loosen up the manner in which this money goes out would
15 be great because it's a big issue for many people.

16 Thank you.

17 CHAIR CAREY: Thank you very much.

18 MR. ROMERO: Are there any questions?

19 CHAIR CAREY: Any questions?

20 MR. ROMERO: All right, thank you.

21 MS. CAPPPIO: I just have a quick comment that
22 you have my commitment that we will work with you, and
23 that we need all ideas. And I appreciate you coming in
24 and addressing us today.

25 Thank you.

1 MR. ROMERO: Thank you.

2 --o0o--

3 **Item 8. Update and discussion regarding the status**
4 **of the Mental Health Services Act Program**

5 CHAIR CAREY: Okay, next up, we have an update
6 discussion regarding the Mental Health Services Act
7 Program.

8 Bob?

9 MR. DEANER: Good morning.

10 I've given this update a few times, so I will
11 try to make it quick.

12 A quick overview.

13 The MHSAs program was money funded for capital
14 costs and operating subsidies for rental units, it can be
15 utilized in existing buildings under rehab, new
16 construction, or even shared housing. We are seeing more
17 shared housing, where a county will actually buy a
18 property, utilize the whole property with the funds.
19 So it's a partnership with DMH, us, and all the county
20 mental health groups.

21 \$400 million was made available to us in 2007.

22 Although the program really didn't kick off until about
23 2009 because of negotiations with various parties to get
24 the program going, of which two-thirds goes to capital
25 and one-third goes to operating subsidies.

1 And I'll show some slides shortly that shows
2 how successful we've been to put the money out.

3 And each county got an allocation. Most
4 counties -- I believe it was 46 or 47 -- participated.
5 There were some outs of the smaller counties, that were
6 allowed to opt out just because the dollars weren't large
7 enough to utilize the program.

8 So as of June 30th, I had my staff put this
9 together. We've got committed or commitments of about
10 \$222 million to date of the \$400 million. That's a
11 combination of both the operating subsidy and the capital
12 cost that translates into that \$1.5 billion number of
13 leverage we talk about, is the total construction cost of
14 the projects being built.

15 So if you look down a little bit farther,
16 there's almost 6,000 units that are being built of which
17 1,600+ are for MHSA.

18 So a typical deal for us might be a hundred
19 units that are being built for affordable housing and
20 10 percent of the units will be utilized for the
21 MHSA dollars that we're taking folks that are homeless --
22 or could be homeless off, and getting them in and getting
23 SSI, and getting them training, and so forth.

24 And then the operating subsidy helps cover that
25 difference to help keeps the projects running. So a

1 number of units.

2 And of this almost 6,000 units, almost all
3 those are 100 percent affordable. These are usually
4 deeply affordable projects.

5 Just some program successes.

6 Over the last two and a half years, 116
7 applications from 32 counties, of which 1,500 units were
8 on the rental side. And then I talked about the shared
9 housing. We're seeing more of those, about 132 units.

10 The smaller counties will buy actual houses and
11 convert a six-bedroom or an eight-unit facility, so they
12 can get 16 MHSA folks, because they can share the units.

13 A couple more highlights I'll go through
14 quickly. 225 of the units are for seniors today, and
15 174 are for transition youth.

16 Some of the counties that have spent all their
17 money: Madera, Merced, and Nevada. That's all good.

18 And then we are ahead of pace to hit a goal
19 that we -- a benchmark of just the \$400 million -- there
20 were other dollars at one point talked about after this
21 to go into the program. But of just the \$400 million, we
22 are looking at about 2,500 units. And today, if we're at
23 1,600 and change, we're ahead of schedule to meet our
24 commitment. So a big success.

25 And then the numbers kind of speak for

1 themselves.

2 We have had some counties that have kicked in
3 additional dollars, which they're allowed to do,
4 \$5.3 million. But you can see the \$222 million that's
5 either closed or committed.

6 \$43 million at the county level. What that is,
7 is developers that have come into the county and have
8 requested -- they have projects available. They evaluate
9 first, and then they apply to us for the funds.

10 And then \$79 million in pre-applications, which
11 are folks that are calling us, developers with projects
12 and the counties that they believe they can utilize.

13 So doing my quick math on that, that was
14 \$344 million of the \$400 million if all those were to
15 come in. Obviously, some will fall out, some will go
16 through.

17 What I did want to do is show a couple
18 properties here real quick to show you how some of the
19 outcomes came.

20 This is in Folsom, Folsom Oaks. This is a new
21 construction deal. We provided a \$500,000 MHSA loan.
22 There was no operating costs because all the tenants get
23 Section 8.

24 So in the case where a developer is able to get
25 a local Section 8, they don't need the operating subsidy,

1 which is a good thing. It ends up, that it was 19 units
2 total, and five of the units are MHSA. So this was a
3 great project.

4 Bay Avenue Seniors is in Capitola, another
5 project we provided a \$425,000 capital loan and \$375,000
6 in operating subsidy. And we did five units of 109 units
7 in this project.

8 And this is a new construction rehab. And the
9 tenants in this will be seniors.

10 And then the last one is Fireside. And this is
11 a deal that the Board had seen many a times in different
12 variations. We had lots of ups and downs, but we've got
13 it closed. It's in Marin County. I think it took about
14 seven years to get this deal closed. I know I have
15 probably a hundred hours into this deal myself.

16 But the MHSA loan that went into it helped make
17 this deal close because of a number of things that
18 happened within the project and the delays. Getting five
19 MHSA units on this project actually helped them gap the
20 deal and close it. And it's a total of 50 units. And
21 we provided a \$475,000 capital loan, with \$250,000 of
22 operating.

23 And then where that leaves us -- being my group
24 and the program, with the dollars that are in process,
25 the deals that have to close and more deals that we see

1 coming in, we project about 18 months left within the
2 program, somewhere in mid-2013. Because even when we
3 close a loan, if it's new construction, we monitor it all
4 the way through the construction phase. We don't just
5 get them the full four twenty-five. We disburse over
6 time. We have a disbursements group. And then it
7 converts to a permanent loan, and then it gets handed off
8 to Margaret's group in Asset Management.

9 So we've got a good year and a half left of
10 work to do on this program. And it's utilizing about
11 80 percent of my staff. It's more manpower than we
12 anticipated just because doing a \$500,000 loan is just as
13 much work as doing a \$5 million or \$20 million bond deal.
14 And I think we have 90+ deals at some level in our shop
15 right now. And it takes a lot of manpower to produce
16 those deals and get them closed.

17 So a very successful program.

18 I don't know if Claudia wanted to mention it,
19 or I can, about the MHSA award that we won at the NCSHA.

20 NCSHA selected our MHSA program in California
21 that CalHFA administers for an award under their
22 special-needs program. So that was a great award that
23 we accepted.

24 And I give all that credit to my staff because
25 they're the ones that do all the work and put in all the

CalHFA Board of Directors Meeting – October 18, 2011

1 hard hours to get these projects through. Because a lot
2 of these projects have four or five, six, seven layers of
3 subsidy in them. And some of these deals can take years
4 before they close. So lots and lots of work.

5 So kudos to them for that award. So a very
6 successful program for us.

7 MS. CAPPPIO: Thank you.

8 CHAIR CAREY: That's great.

9 MR. DEANER: Do you have any questions?

10 CHAIR CAREY: Questions? Comments?

11 MR. HUNTER: I had a lot of involvement with
12 this program from the very beginning, and I've said to
13 people around the state repeatedly, it would never have
14 happened, had it not been for the commitment of CalHFA.
15 And I think one of the things, in terms of the complexity
16 of how these things work, you know, it was like everybody
17 is sitting down and finally agreeing in 2007 that there
18 was money available and it was a good way to use it, and
19 it still took two years to figure out how to make it
20 work. And it was very complex. And some of the things
21 that people were very worried about from the very
22 beginning was not creating ghettos for people with mental
23 illness.

24 And the fact that so many of these projects
25 have leveraged really beautiful homes -- small, modest

1 apartments but beautiful apartments where they're living,
2 integrated into the society. And these are people that
3 many of them have been homeless for years and years. And
4 some of these projects are really amazing.

5 And I just really commend the staff and
6 leadership of CalHFA for sticking with us because it's
7 producing great results.

8 CHAIR CAREY: Great.

9 MR. DEANER: Thank you.

10 CHAIR CAREY: It is nice to have a success
11 story, even as we deal with some of the other challenges.

12 This is what it's all about.

13 MR. DEANER: Thank you.

14 --oOo--

15 **Item 9. Discussion of proposed new energy efficiency**
16 **lending program and funding through the sale**
17 **of carbon credits**

18 CHAIR CAREY: Next up, discussion of a
19 potential new energy lending program.

20 Steve?

21 MR. SPEARS: Thank you, Mr. Chairman.

22 Just one final note on the MHSA program.

23 During the downturn in the economy, there were a lot of
24 projects that came back and asked if we had any of this
25 money available, because they had a gap in financing

1 because of tax-credit pricing or other funding sources
2 that went away. And we were able to, I think, with the
3 MHSA program -- gap financing is probably not the correct
4 terminology, but we were able to offer this feature and
5 get these projects back on track.

6 It's hard to say, you know, definitively, these
7 four would never have made it. But I personally believe
8 that they're projects that would not have made it, had it
9 not been for the work of the staff in this program.

10 The last item here from staff's standpoint, is
11 a new direction, really, that we're thinking about.
12 Claudia and I have been working on this. You have this
13 memo that's been sent.

14 And, Claudia, I don't know if you want to lead
15 off, but I'll take it whenever you want.

16 MS. CAPPPIO: Sure. And, you know, obviously,
17 the memo was in the packet and the hour is late.

18 MR. SPEARS: Right.

19 MS. CAPPPIO: But the container we're thinking
20 about is energy efficiency which aligns itself with the
21 Governor's goals of decreasing our carbon footprint and
22 decreasing greenhouse gases.

23 We'd be establishing a series of tools in order
24 for us to retrofit low- and moderate-income units, both
25 single-family and multiple-family. And then make sure

1 that we have the modeling and data bank available to turn
2 those retrofit projects into carbon offsets. You have
3 to do this following a fairly rigorous verification
4 standard. But once the carbon offset is verified, you
5 have the ability to bank that or to sell it on the
6 voluntary carbon market.

7 So we believe that this could be a successful
8 program. Carbon markets in general are in their infancy,
9 but we have done research to date, and believe that this
10 should be pursued.

11 What we're doing now is figuring it all out
12 for you so that we can come back with some specific
13 proposals. And as we say in our memo, the trick will be,
14 obviously, a source of capital. So if any of you have
15 any ideas, we'd be glad to hear them.

16 Steve?

17 MR. SPEARS: Well, there are a lot of things
18 going on. It's amazing when you start doing the
19 research, how many people are in our same boat, where
20 they would like to get involved, but it's kind of early
21 in the game.

22 The California Air Resources Board -- is it the
23 day after tomorrow, I think --

24 MS. CAPPPIO: Yes, right.

25 MR. SPEARS: -- are meeting to adopt the

1 regulations to establish a cap-and-trade program that
2 will begin in 2013. This might be part of that. But
3 there are other energy efficiency efforts that are going
4 on, particularly at the CPUC. And they were delivered
5 a study this summer by an outside consultant that said,
6 "If you want to do energy efficiency, you are woefully
7 underfunded to do that. And there are not enough
8 financial projects out there for either single-family or
9 multifamily."

10 So we're going to be talking to them as well.
11 There is a lot of work to be done yet. But we do have
12 some of the work that has been done for us in the housing
13 area.

14 Tiny, little MaineHousing got very interested
15 in this. And over a year and a half ago, I had a
16 conversation with the Maine executive director. They
17 went through this process of putting together a
18 verification model for residences, which apparently did
19 not exist anywhere before that.

20 We have hired the consultant that helped them
21 with this model. It needs to be tweaked for California,
22 and a lot of work done. But when they finished this, and
23 they had a fuel oil program to offer incentives for
24 energy efficiency, that reduced fuel oil consumption, and
25 they were able to generate enough offset credits to sell

1 a four-year-forward contract to Chevrolet for a million
2 dollars. So we figure if tiny, little MaineHousing can
3 do something on that scale, perhaps we might be able to
4 do something similar.

5 So no promises, just letting you know that
6 we're getting started in this world. It's a very
7 interesting, different world than we normally deal with.
8 But I think it lines up with a lot of what we do.

9 I hear varying percentages, but somewhere
10 between 25 to 40 percent of all energy consumed in
11 California is in residences, multifamily and
12 single-family. And if you just had a little bit of
13 energy savings in that big segment, it would really
14 create quite a substantial change.

15 MS. CAPPIO: Just for your information.

16 CHAIR CAREY: Yes.

17 MR. SPEARS: Just an information item.

18 CHAIR CAREY: That's interesting.

19 MR. HUNTER: Let me just throw in, in the last
20 six months I've talked to four supportive housing
21 developers that are looking for some kind of financial
22 instrument to do energy retrofits. You know, they're
23 talking about their operating margins are so slim, and
24 increasingly, the operating costs related to energy is
25 eating up the profitability -- the sustainability of

1 their projects. And they can't find sources of capital.

2 One of the groups in Portland did a project
3 that was able to demonstrate that their savings were so
4 immense post the retrofit, that they actually could have
5 afforded commercial loans. But nobody would lend to them
6 because of their asset structures, et cetera.

7 MR. SPEARS: Right.

8 MR. HUNTER: So I really, really hope you keep
9 the multifamily retrofit part of this in the forefront,
10 particularly since there are so many now. In our big
11 cities, San Francisco and LA, there are so many
12 supportive housing projects that are really older housing
13 stock and that are aging out of their tax credit
14 compliance periods and that are really targets for this
15 kind of savings.

16 MR. SPEARS: We've had a couple of discussions
17 with multifamily nonprofit developers. And it seems like
18 the best time to do this is when you're doing all kinds
19 of retrofit on older properties. And you could work this
20 in with everything else.

21 But the thing they told us was that the energy
22 savings on individually metered multifamily is great
23 savings for the tenants, but there's not enough common
24 area for the building owners to generate that.

25 So we're trying to figure out an incentive

1 program that may be funded by some of the sale of these
2 offset credits. But there's also some on-bill financial
3 products that you can have the tenants share in the cost
4 of the financing for that savings. And they net savings
5 on the utility bill, but they help pay that. And then
6 that's also a revenue stream that's -- you know, it's on
7 their utility bill. It's pretty secure. So we might be
8 able to figure out a financing structure built around
9 that.

10 So a lot of thoughts going on. But we had one
11 conversation, one person that said, "Look, we want to do
12 this, but I can't take this to my board and have it cost
13 us money at this point in the economy. It's got to be a
14 break-even analysis for us at this point."

15 MS. CAPPPIO: Thank you.

16 CHAIR CAREY: Great.

17 --o0o--

18 **Item 10. Reports**

19 CHAIR CAREY: Any items in the reports that
20 deserve specific attention?

21 *(No response)*

22 CHAIR CAREY: Great.

23 Now, November, have we reached a decision about
24 the need for a November meeting?

25 MS. CAPPPIO: Not yet.

1 CHAIR CAREY: Okay, so keep it on your
2 calendars.

3 MS. CAPPIO: Right.

4 CHAIR CAREY: And I heard earlier the potential
5 of a potentiality of a special meeting at some point?

6 MS. CAPPIO: If not November, then perhaps
7 before the end of the year to deal with it, if TCLP --
8 If the deal points come in, we'd have to figure that out;
9 and it may require action from the Board.

10 CHAIR CAREY: Okay, great.

11 --o0o--

12 **Item 11. Discussion of other Board matters**

13 CHAIR CAREY: Any other board matters?

14 *(No response)*

15 ---o0o--

16 **Item 12. Public Testimony**

17 CHAIR CAREY: With that, this is the moment we
18 set aside for members of the public to address the Board
19 on matters that are not on the agenda.

20 If there's anyone who would like to speak to
21 the board, please indicate.

22 *(No response)*

23 --o0o--

24 **Item 13. Adjournment**

25 CHAIR CAREY: Seeing none, we are adjourned.

REPORTER'S CERTIFICATE

I hereby certify that the foregoing proceedings were duly reported by me at the time and place herein specified;

That the testimony of said witnesses was reported by me, a duly certified shorthand reporter and a disinterested person, and was thereafter transcribed into typewriting.

I further certify that I am not of counsel or attorney for either or any of the parties to said deposition, nor in any way interested in the outcome of the cause named in said caption.

IN WITNESS WHEREOF, I have hereunto set my hand on the 4th day of November 2011.
