CalHFA Board of Directors Board Meeting – January 14, 2014

1 Eraina Ortega, Deputy Director at the
2 Department of Finance.

3 CHAIR JACOBS: And Dalila?

4 MS. SOTELO: Dalila Sotelo. I'm with The
5 Sotelo Group; and I'm new to this organization.

6 So thank you.

7 MR. PRINCE: Preston Prince. I'm the CEO with
8 the Fresno Housing Authority.

9 CHAIR JACOBS: Good to have everybody here.

10 I wonder if -- I guess we're waiting on a few
11 others. It may make sense, since it's a new year, for
12 all of the Board members sort of to tell a little bit
13 about their interest in affordable housing. Just a
14 couple sentences about why you're here.

15 Janet, do you want to begin?

16 MS. FALK: Hi, I'm Janet Falk. I've been in
17 affordable housing for about 40 years, working for
18 nonprofits and building affordable developments all
19 through the state.

20 MR. GUNNING: Mr. Chairman, Michael Gunning.
21 And everything I know, I learned from Janet. And I just
22 hope I can be of good tutelage to all the learning she
23 provided.

24 *(Ms. Whittall-Scherfee entered the*
25 *meeting room.)*

CalHFA Board of Directors Board Meeting – January 14, 2014

1 CHAIR JACOBS: I'm Matt Jacobs. I'm a
2 developer in the private sector; and hoping that we, as
3 an agency, can innovate in producing a supply of better,
4 more sustainable housing here in California.

5 MS. CABALLERO: Good morning, Mr. Chairman. My
6 name is Anna Caballero. I'm the Secretary of Business,
7 Consumer Services & Housing Agency. And in a former
8 life, I was a City Council member in the City of Salinas
9 for 15 years; and one of our major efforts and success
10 stories is building affordable housing.

11 MR. HUNTER: I'm Jonathan Hunter. I'm
12 currently with the Corporation for Supportive Housing,
13 although I'm in the process of transitioning into work as
14 a private consultant. I've spent about 30 years trying
15 to solve the problems of homelessness in California,
16 particularly for those folks who have disabilities
17 related to mental-health issues and substance-use issues.
18 And certainly affordable housing and the Mental Health
19 Services Act Housing Program have been really critical
20 tools to try to address those needs in California. So
21 that's what brought me here.

22 MS. SOTELO: Again, my name is Dalila Sotelo;
23 and I've been in the housing industry for about 22 years.
24 I started when I was in fifth grade.

25 I've been in the private sector. I've worked

CalHFA Board of Directors Board Meeting – January 14, 2014

1 for nonprofits. I've worked for for-profits; I've worked
2 in city government. So I have a nice array of
3 perspective in terms of the development of affordable
4 housing and the challenges that we face here in
5 California.

6 And I look forward to working with you all as
7 my fellow Board members and with the Agency executive
8 team to see where we can lead California in housing.

9 So thank you.

10 MR. PRINCE: Again, Preston Prince, CEO of the
11 Fresno Housing Authority. I have about 25 years in the
12 affordable housing world. About 8,000 units of housing
13 over a billion dollars' worth of financing.

14 In Fresno, the last five years, we've closed on
15 17 tax credit deals, 1,500 housing units. About
16 \$300 million of investment just in Fresno. So I come
17 from that development side but on the Housing Authority
18 perspective.

19 And if I was to describe myself, I would really
20 say that my goal is to go into bureaucratic organizations
21 that are compliant-driven, and to figure out how they can
22 be much more responsive to outcomes in the communities,
23 such as educational achievement of children, ending
24 homeless, helping parents become wage earners, and have
25 wage progression, and really focus on quality of life for

CalHFA Board of Directors Board Meeting – January 14, 2014

1 seniors and people with disabilities.

2 CHAIR JACOBS: And we have -- actually, Laura
3 came in.

4 MS. WHITTALL-SCHERFEE: My name is Laura
5 Whittall-Scherfee. I'm the deputy director of the
6 Division of Financial Assistance at HCD. I've been
7 involved with affordable housing at the state level for
8 18 years.

9 *(Mr. Gravett entered the meeting room.)*

10 CHAIR JACOBS: And we also have, he's joined
11 the Board, he is -- oh, he just walked in right now -- as
12 an Angeleno, I'm very proud to have Peter Gravett here.

13 He is a distinguished LAPD retiree and also a
14 veteran; and I guess he's the Cal Vet secretary as well.

15 So we are honored to have you here.

16 MR. GRAVETT: Thank you. I apologize for being
17 late.

18 CHAIR JACOBS: No, no worries.

19 We're all just giving a brief introduction and
20 just explaining goals for affordable housing that you
21 might have.

22 So if you wouldn't mind.

23 Please introduce yourself and tell a little bit
24 about you.

25 MR. GRAVETT: Well, good morning, everyone. I

CalHFA Board of Directors Board Meeting – January 14, 2014

1 apologize for my tardiness. I'm nursing a knee here.

2 I'm Peter Gravett. I serve as Secretary of
3 Veterans Affairs. You probably know that we have a
4 housing element in our agency, financing housing. And
5 I'm looking forward to working on this commission and
6 being a part of it.

7 And he mentioned that I'm retired military
8 also, a retired major general; and I spent over 35 years
9 in the military, both active and reserve.

10 So glad to be here.

11 Thank you.

12 CHAIR JACOBS: All right, at some point in this
13 meeting, I would also, just because we have new Board
14 members, I would like to have staff -- the key staff --
15 come up and introduce themselves.

16 We can do that now, if people think that's
17 appropriate, or later on in the meeting.

18 MS. CAPPPIO: We can do it now.

19 CHAIR JACOBS: Yes, let's do it as they
20 present.

21 Do we have any changes to the proposed agenda?

22 MS. CAPPPIO: I don't, but...

23 CHAIR JACOBS: Does anybody have new agenda
24 items to put on here?

25 *(No response)*

CalHFA Board of Directors Board Meeting – January 14, 2014

1 CHAIR JACOBS: Seeing none, let's go ahead with
2 the roll call.

3 JoJo?

4 --oOo--

5 **Item 1. Roll Call**

6 MS. OJIMA: Ms. Caballero?

7 MS. CABALLERO: Here.

8 MS. OJIMA: Ms. Whittall-Scherfee for Randall
9 Deems?

10 MS. WHITTALL-SCHERFEE: Here.

11 MS. OJIMA: Ms. Falk?

12 MS. FALK: Here.

13 MS. OJIMA: Mr. Gravett?

14 MR. GRAVETT: Here.

15 MS. OJIMA: Mr. Gunning?

16 MR. GUNNING: Here.

17 MS. OJIMA: Mr. Hunter?

18 MR. HUNTER: Here.

19 MS. OJIMA: Ms. Carroll for Mr. Lockyer?

20 *(No response)*

21 MS. OJIMA: Ms. Patterson?

22 *(No response)*

23 MS. OJIMA: Mr. Prince?

24 MR. PRINCE: Here.

25 MS. OJIMA: Ms. Sotelo?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MS. SOTELO: Here.

2 MS. OJIMA: Mr. Alex?

3 *(No response)*

4 MS. OJIMA: Mr. Cohen?

5 MS. ORTEGA: Eraina Ortega for Michael Cohen.

6 MS. OJIMA: I'm sorry, Ms. Ortega.

7 MS. ORTEGA: No problem.

8 MS. OJIMA: Thank you.

9 Ms. Cappio?

10 MS. CAPPPIO: Here.

11 MS. OJIMA: Mr. Jacobs?

12 CHAIR JACOBS: Here.

13 MS. OJIMA: We have a quorum.

14 CHAIR JACOBS: Great.

15 --o0o--

16 **Item 2. Approval of Minutes of November 12, 2013, Board**
17 **of Directors Meeting**

18 CHAIR JACOBS: All right, let's move on to
19 the minutes from the last meeting.

20 Are there any corrections to the minutes or
21 clarifications?

22 *(No response)*

23 CHAIR JACOBS: Do we have a motion to approve
24 the minutes?

25 MR. HUNTER: I'll move to approve the minutes

CalHFA Board of Directors Board Meeting – January 14, 2014

1 CHAIR JACOBS: So moved.

2 MS. CABALLERO: Second.

3 CHAIR JACOBS: We've got a second.

4 JoJo, roll call.

5 MS. OJIMA: Is that Ms. Caballero?

6 CHAIR JACOBS: Yes.

7 MS. OJIMA: Thank you.

8 MS. OJIMA: Ms. Caballero?

9 MS. CABALLERO: Aye.

10 MS. OJIMA: Ms. Whittall-Scherfee?

11 MS. WHITTALL-SCHERFEE: Aye.

12 MS. OJIMA: Ms. Falk?

13 MS. FALK: Abstain. I wasn't present.

14 MS. OJIMA: Thank you.

15 Mr. Gravett?

16 MR. GRAVETT: Abstain.

17 MS. OJIMA: Thank you.

18 Mr. Gunning?

19 MR. GUNNING: Aye.

20 MS. OJIMA: Mr. Hunter?

21 MR. HUNTER: Aye.

22 MS. OJIMA: Ms. Patterson?

23 *(No response)*

24 MS. OJIMA: Mr. Prince?

25 MR. PRINCE: I believe I must abstain.

1 MS. OJIMA: Thank you.

2 Ms. Sotelo?

3 MS. SOTELO: Abstain.

4 MS. OJIMA: Thank you.

5 Mr. Jacobs?

6 CHAIR JACOBS: Aye.

7 MS. OJIMA: It does not pass.

8 MS. CAPPPIO: We'll continue.

9 MS. OJIMA: Thank you.

10 CHAIR JACOBS: We're going to run into the same
11 thing again, aren't we?

12 --oOo--

13 **Item 3. Chairman/Executive Director Comments**

14 CHAIR JACOBS: Let's turn to you, Claudia, for
15 the Executive Director report.

16 MS. CAPPPIO: Good morning. I welcome the new
17 board members as well.

18 And may we have a productive and wildly
19 successful 2014. I'm feeling good about it.

20 Before I begin my remarks, I'd like to
21 introduce a student that is interning with me this week,
22 Yikai Wang. He is with Swarthmore College, and he is
23 getting a boatload of information about housing finance,
24 and just development and other American experiences here.

25 So please welcome him.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 As I look forward, I want to give you an update
2 on a couple of things going on.

3 First, the infamous Affordable Housing Cost
4 Study. It is nearly done. We have been editing and
5 doing a little bit more research on some factors that we
6 wanted to make clearer in the report. That has been
7 completed, and publication should be within the next
8 couple of weeks.

9 I will schedule it if the Board concurs for
10 discussion and review at the March meeting.

11 With regard to the progress and working group
12 for implementation of AB 639, which was a bill passed by
13 the Legislature last year which will hopefully recommit
14 up to \$600 million of veterans-focused single-family
15 mortgage money to multiple-family veterans-focused
16 housing, we have formed a good working group with HCD,
17 CalHFA, and Vets Affairs.

18 And I will say that progress is really
19 impressive, and we want to be as ready as we can to
20 implement that program after the June vote, which, of
21 course, we all hope is affirmative.

22 The reorganization between CalHFA and HCD has
23 resurfaced. It was on pause for a little bit last year
24 as other priorities were taking place in the Governor's
25 office; but we have reconvened a working group for that.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 And we should be having clarity and certainty within the
2 first quarter of 2014. At least that is my aspiration.

3 And finally, the Governor's budget that was
4 released last week had two items of note:

5 First, his emphasis on retooling local
6 government for infrastructure projects, and I would
7 include affordable housing in that, with his notion about
8 infrastructure financing districts.

9 You may want to review that. And I will
10 certainly be forwarding more information on that as we
11 look toward the budget process in the next few months.
12 But this would essentially be giving local government an
13 easier tool with which to finance major infrastructure.
14 And housing is included in that, should the local
15 government believe that's appropriate.

16 *(Ms. Carroll entered the meeting room.)*

17 MS. CAPPPIO: And in addition to that, up to a
18 hundred million dollars has been designated for community
19 development of the cap-and-trade money. You may recall
20 that a few years ago, California began this system of
21 the ability for businesses to buy pollution credits,
22 essentially, in an effort to reduce greenhouse gas. And
23 the revenue for that will come and hopefully be applied
24 to projects that would eliminate or reduce greenhouse
25 gas.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 We've been given a chunk of that between HCD,
2 CalHFA, the Strategic Growth Council, CalSTA -- which is
3 the new transportation agency -- and EPA.

4 So we will be all in a new process to discern
5 and distribute that money for specific projects among
6 them -- among the appropriate projects would be
7 affordable housing and infrastructure projects for
8 transportation-related or transit-related areas. So it
9 looks like we are beginning to have a few more financial
10 tools as we enter 2014.

11 I would be glad to answer any questions or
12 comments that Board members have.

13 *(No response)*

14 CHAIR JACOBS: Seeing none, I'd like to invite
15 Tim to come on up.

16 We've had some very good news about an upgrade
17 in our rating from Standard & Poor's and the Agency's
18 credit. And I'd like to sort of walk everybody through
19 the ramifications of that.

20 Oh, yes, Katie Carroll from Bill Lockyer's
21 office has come in and joined the meeting.

22 MS. CAPPPIO: Welcome.

23 CHAIR JACOBS: Actually, if you wouldn't mind
24 just walking the new Board members through who you are
25 and your interest in affordable housing.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MS. CARROLL: Sorry I'm late. I'm Katie
2 Carroll, and I am the --

3 CHAIR JACOBS: There's a button to turn on the
4 microphone.

5 MS. CARROLL: I'm Katie Carroll with the
6 Treasurer's Office, representing the Treasurer on the
7 Board. And I'm primarily a finance person, actually.

8 CHAIR JACOBS: Thank you.

9 --o0o--

10 **Item 4. Update and discussion of Standard & Poor's**
11 **recent annual review of Agency's credit ratings**

12 CHAIR JACOBS: All right, Tim?

13 MR. HSU: Good morning, Mr. Chairman, and good
14 morning.

15 CHAIR JACOBS: That one over there.

16 MR. HSU: Can you hear me now? Can you hear me
17 now?

18 Good morning, Mr. Chairman, and good morning,
19 Members of the Board, and welcome to the new members of
20 our Board. My name is Timothy Hsu. I'm the director of
21 Financing for the California Housing Finance Agency.

22 Just a little bit about me. By this time, I've
23 spent about half of my career in the public sector, all
24 that working for CalHFA. And the rest of the time, the
25 other half, the evil half, you might say, I have had some

1 stints in banking, and also I've worked for a consulting
2 company in a prior life.

3 One of the mandates from Claudia is to elevate
4 our level of engagement with our Board. So for better or
5 worse, you'll be hearing quite a bit from me or members
6 of our Financing Division, including Tony, who is also
7 here today.

8 Over the last couple years, as the economy
9 struggled and as the financial market is in disarray, I
10 often heard in the press and people quoting a supposed
11 Chinese curse that "May you live in interesting times."

12 So last night, I went on to Wikipedia, the
13 source of all things of authority, and I looked up this
14 phrase in Wikipedia. And this supposed phrase is
15 actually loosely related from an old Chinese idiom that
16 roughly translates into: "It's better to be a dog in
17 peaceful times, than to be a man or woman in chaotic
18 times."

19 And I don't think that any of us want to
20 actually say that, when we say that, "May you live in
21 interesting times."

22 But this supposed curse is also -- Claudia is
23 thinking "Where is this going?" -- this supposed curse is
24 also loosely related to another saying, which is that,
25 "May you come to the attention of powerful people." And

CalHFA Board of Directors Board Meeting – January 14, 2014

1 I thought about what the Agency has experienced over the
2 last couple years, and I checked it out, yes. And it's
3 also loosely related to another saying, that "May your
4 wishes be granted," which brings us to this agenda item:
5 The update on the S & P's recent annual review of the
6 Agency's credit ratings.

7 The holiday, right before -- I have wonderful
8 news to tell the Board. Right before the holiday season,
9 S & P concluded their annual review of the three main
10 credit ratings of California Housing Finance Agency.

11 The first one is what we refer to as HMRB,
12 which is Home Mortgage Revenue Bonds, which is our
13 single-family flagship indenture. This indenture still
14 has about \$3 billion of assets in there. It is a special
15 obligation of Agency. And this is a bond indenture.

16 So HMRB and Multifamily III are both bond
17 indentures. And Multifamily III is where we house all --
18 most of our multifamily lending in this bond indenture;
19 and it is a general obligation of Agency.

20 And the last but not least, it's our General
21 Obligation.

22 They concluded their reviews of these three
23 credit ratings, and the following are the actions that it
24 took on these credits ratings.

25 So for the bond indenture, HMRB, they gave us a

CalHFA Board of Directors Board Meeting – January 14, 2014

1 two-notch upgrade from BBB flat to A-minus, and they kept
2 the outlook as "stable," which is important because
3 sometimes the outlook could be a precursor to their
4 actions.

5 And for the Multifamily III indenture, they
6 gave us a four-notch upgrade from A-minus to AA flat.
7 And as I mentioned, the outlook could be very important,
8 so they changed the outlook in that indenture from
9 "negative" to "stable," which is also a very good thing.

10 And for our General Obligation, they didn't
11 change our rating. They kept us at A-minus, but they did
12 change the outlook from "negative" to "stable."

13 And as I mentioned, the outlook is very
14 important because sometimes it foreshadows what they
15 might do next.

16 And as I've said to Claudia and to people I
17 talked to about this, this really took the entire might
18 of the entire Agency to do this.

19 I am fortunate because I am the messenger
20 carrying this fabulous news to the Board. But this
21 really -- there is plenty of kudos to go around. I think
22 that a lot of people worked very hard on this, various
23 aspects.

24 The one good thing where I sit, perhaps, is
25 that I can -- I'm sort of at a privileged position to be

CalHFA Board of Directors Board Meeting – January 14, 2014

1 able to see how a lot of these different pieces around
2 the Agency come together to make things like this happen.

3 Some time ago, I think about one or two Board
4 meetings ago, as an aside, I mentioned to Mike that
5 something really good is going to come to the Agency in
6 the next couple months. So he actually wagered that he
7 would buy me a beer if something, indeed, good were to
8 come to the Agency.

9 And, of course, I didn't know this a couple
10 months ago; but in the spirit of suggesting that this is
11 not just Tim, I think that Mike perhaps needs to buy the
12 entire Agency a drink at Ella's.

13 But all jokes aside, I think this is really,
14 really great news. I know some of the new Board members
15 are joining at exactly the right time as the Agency
16 switches the momentum of where we're headed.

17 And on page 3, just some samples of the quotes
18 from their write-ups in their rating review.

19 The reduction of variable-rate debt and also
20 swaps, and seasoned and proactive financial management.
21 Let me pause there.

22 An improvement in delinquency and foreclosure
23 rates, and also a significant decline in losses in fiscal
24 year 2013.

25 You'll notice that these strengths, if you look

CalHFA Board of Directors Board Meeting – January 14, 2014

1 below, they also twisted these strengths to also become
2 weaknesses for many of these, because these are real risk
3 factors that the Agency has faced over the last couple
4 years. And the fact that they're strengths means that
5 we have been managing these risk factors to their
6 satisfaction. But the fact that they're also weaknesses
7 means that if we don't continue to manage these risks,
8 they could become factors -- risk factors for them to
9 downgrade us or take negative actions.

10 Speaking of switching of the momentum, on
11 page 4 is a history of CalHFA's rating history from
12 Standard & Poor's. You can see that in 2010 -- you can
13 see that with respect to the rating actions that they
14 take, they're quite synchronized. So you can see that
15 in 2010, they downgraded our HMRB Single-Family
16 indenture, but they also took action on our General
17 Obligation. So they downgraded our HMRB indenture, and
18 they also downgraded our general obligation indenture.
19 And then again in 2011, they did the same thing: They
20 downgraded both the HMRB indenture in orange and also the
21 General Obligation in blue.

22 And in around 2012 or so, I guess that you
23 might say that we have -- we reached a plateau, and we
24 retained our rating from where we were in the prior year.
25 So 2012 we remain unchanged versus 2011.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 And 2013, which is this past year, is the
2 upgrades that we just described.

3 A couple things to know here which are of
4 importance is that you'll notice that in the General
5 Obligation, in the blue, I noticed the word "decoupling."
6 What this is, is that historically, our General
7 Obligation and our Multifamily III indenture have shared
8 the same rating. And the primary reason for that is that
9 the General Obligation is guaranteeing the real-estate
10 risk of the uninsured multifamily loans that we have in
11 Multifamily III. So traditionally, it had the same
12 rating.

13 One of the things that we tried really hard on
14 over the last couple of years, is to suggest that there
15 needs to be a decoupling. And the fact that S & P agreed
16 with us and actually split the rating of the General
17 Obligation and also Multifamily III, to us, is a huge
18 success. And the reason why this is important is that
19 we talked earlier about, there is a great need to
20 reduce our variable-rate bonds, to get rid of these
21 variable-rate bonds.

22 At the moment, our variable-rate bonds are
23 backed by a letter of credit from the U.S. Treasury, and
24 that letter of credit expires at the end of next year, at
25 the end of 2015. So one of the key mandates that we have

CalHFA Board of Directors Board Meeting – January 14, 2014

1 is to eliminate all of our variable-rate bonds by the end
2 of next year.

3 Having a higher credit rating -- and to be
4 sure, these variable-rate bonds are housed in the HMRB
5 indenture, which is in orange, and also in Multifamily
6 III. They're not housed directly under our General
7 Obligations.

8 So having a bond indenture, which is housing
9 these variable-rate bonds which is backed by this letter
10 of credit from the U.S. Treasury, having a high rating
11 inside these bond indentures would mean that we would
12 have more options, different tools that will come into
13 play for us to get out of these variable-rate bonds, and
14 having more tools generally means a higher probability
15 that we can succeed in our goal of getting rid of all of
16 these variable-rate bonds. So that was a huge thing.

17 We never imagined, although this is fantastic,
18 that they would decouple the two ratings and have the
19 separation be as much as four notches. But why would you
20 ever question something as good as that? But we never
21 thought we would get that much.

22 As an aside, what you can see here is that this
23 is a great momentum switch from S & P's point of view.
24 But one of the other things I also have come to really
25 appreciate as I age, is that timing in life is

CalHFA Board of Directors Board Meeting – January 14, 2014

1 everything. You will notice here that Claudia, as it
2 turns out, joined the Agency about the first quarter of
3 2011. So she was with us when we experienced that 2011
4 downgrade. But you can see that she, I think, is also
5 instrumental in helping us switching this around.

6 The second year she was here, we were able to
7 manage sort of a carrying forward of our rating from the
8 prior year. And now, we are experiencing some really
9 good news in our ratings. And we feel that this is much
10 like the message I have been telling the Board last year,
11 that we feel that CalHFA is like a phoenix rising from
12 the ashes. This is definitely a momentum change. We
13 realized that last year, but that sometimes it takes a
14 while for the rating agencies to come around themselves.

15 I will pause to see if there are any questions.

16 CHAIR JACOBS: Just on the general ratings,
17 Moody's is how far away, do you think, from looking at us
18 again?

19 MR. HSU: So we're actually undergoing the
20 process with Moody's right now; and we expect that they
21 will conclude their analysis probably in this first
22 quarter.

23 There are some factors there that could
24 complicate things and delay their action, perhaps. But
25 on balance, we expect them to conclude their analysis

CalHFA Board of Directors Board Meeting – January 14, 2014

1 this quarter as well. So it's quite possible that by the
2 next Board meeting in March, that we would also have
3 something to report on that front. And we are hopeful
4 there as well.

5 CHAIR JACOBS: Okay, and I guess later on we'll
6 hear reports on the residential portfolio.

7 I saw in one of the comments, Genworth remains
8 one of their agency's concerns, just the health of
9 Genworth, which is our insurer, ultimately.

10 MR. HSU: Yes. So Genworth Mortgage Insurance
11 Corporation, or GEMICO, provides reinsurance for the
12 Agency's single-family mortgage loans.

13 It is, by far, the most significant credit
14 enhancer for the Agency. The largest is the
15 U.S. Treasury because the U.S. Treasury is providing us
16 that letter of credit. But normally, people don't think
17 there is any credit risk to Uncle Sam. Whereas Genworth
18 is a private corporation, and as a big credit enhancer to
19 the Agency. As their credit sort of experiences
20 volatility in the marketplace, if you will, it has that
21 knock-on effect on our creditworthiness.

22 And -- sorry. I just wanted to give some
23 context on Genworth.

24 And back in December of last year, Moody's put
25 Genworth on CreditWatch for upgrade. And to the degree

1 that they conclude to upgrade Genworth, it would have
2 positive, knock-on effects on our credit as well; because
3 right now, where they are and where we are, they don't
4 give us a hundred cents on the dollar credit on their
5 guarantee.

6 Said a different way: Their risk in force
7 might be \$100; but because of their credit rating,
8 they're haircutted down to, roughly, I believe about
9 45 cents on the dollar.

10 So if they were to get upgraded, depending on
11 where we are and where they are, it's quite possible that
12 that amount of credit we'd get for their guarantee would
13 actually go up, which means that more of our losses would
14 be covered, which means that we could potentially have
15 positive credit actions.

16 CHAIR JACOBS: Any questions?

17 MS. SOTELO: Mr. Chairman, just going back to
18 the review by S & P, congratulations on the increase in
19 rating. And I know it's a very difficult thing to do,
20 so congratulations to everyone for having gone through
21 that process.

22 I just wanted to focus for a moment on the
23 "non-performing asset" comment that was made relative to
24 their report.

25 Is it possible to get a report back or maybe

CalHFA Board of Directors Board Meeting – January 14, 2014

1 just cover that, the purview of that a little bit? I
2 just want to understand how the S & P report commented on
3 the non-performing assets and whether that could be
4 changed or improved or we see the Agency focusing on that
5 in the next quarter and what that will do to our rating
6 overall?

7 *(Ms. Boatman Patterson entered the*
8 *meeting room.)*

9 CHAIR JACOBS: I think that's coming in one of
10 our subsequent reports. But if you want to sort of touch
11 on that.

12 MR. HSU: Let me first create some context for
13 that comment.

14 When S & P compares CalHFA's delinquency ratios
15 to what they say is the market ratio for the state of
16 California, they are -- this is not one of my favorite
17 things -- but they are comparing apples to oranges. And
18 I'll mention -- and this is not an excuse.

19 One of the things that the Agency has been
20 working on -- and this is one of the reasons why this is
21 really an agency-wide effort to get to where we are
22 today -- is to try to work on these delinquency ratios,
23 non-performing loans.

24 Rhonda and Nick are here, who work in servicing
25 and Portfolio Management. They will talk more about

CalHFA Board of Directors Board Meeting – January 14, 2014

1 their efforts. But one of the things that they do, when
2 they do this comparison, is that -- a couple of things.

3 One is that when they look at, for example, the
4 Mortgage Banker Association's ratios, the MBA's ratios,
5 they are looking at ratios that have the benefits of new
6 origination. But one of the problems that we had in the
7 last couple years, is that the financial crisis hit us
8 hard enough that we basically stopped lending. So we
9 don't have the benefits of the new originations improving
10 our ratios.

11 And, as you know, one of the reasons why
12 Fannie Mae and Freddie Mac are, you know, just minting
13 money these days, is that they are making new
14 originations that are performing with higher G-fees.

15 So we don't have that benefit. And that's a
16 big, big -- that's a big factor. Because as you also
17 know, there's been tremendous refinancing activities
18 prior to this summer. So that changes the ratio a lot.

19 And the other thing that's a factor is that
20 they tend to, for better or worse, compare us to prime.
21 They compare us to this MBA number prime.

22 And the short of that is that we are not prime.
23 We are first-time homebuyers with very high LTV. And I
24 know that sometimes that population could be risky from
25 sort of a risk-management point of view. But for better

CalHFA Board of Directors Board Meeting – January 14, 2014

1 or worse, that has been the traditional population that
2 state HFAs have served.

3 So those two sort of variations alone makes
4 that comparison very difficult.

5 But having said that, there will be more
6 discussions later on about some of our efforts there.
7 And that is one of the key things that we have been
8 focused on. We might argue that some of the folks that
9 were working in lending, that, when we stop the lending
10 programs, they're -- that human resources, that sort of
11 capacity all got shifted to servicing and Portfolio
12 Management and Loss Mitigation so that we can improve
13 those ratios.

14 MS. SOTELO: Thank you. That was really
15 helpful.

16 MR. PRINCE: I think it's really interesting
17 that two of my three questions, Dalila covered.

18 So first was, congratulations on the movement.
19 I totally agree.

20 I had a lot of questions about the delinquency.
21 And so I'm looking forward to more information about
22 that.

23 The variable-rate bonds, you said, backed by
24 the letter of credit. The letter of credit ends 2015.
25 So I guess this is more of a question of the analysis of

1 what's going to happen if there's still variable-rate
2 bonds and there's no letter of credit, and what's the
3 exposure after that point.

4 But I assume that will come later as well.

5 MR. HSU: No, now is good.

6 MR. PRINCE: Okay.

7 MR. HSU: Now or never.

8 You should always have dessert first, right?

9 Dessert and a beer first, then the main entrée.

10 We got the letter of credit from the U.S.

11 Treasury at the end of 2009. And at the time, we
12 probably thought that it needed to be quite a long-term
13 commitment from the U.S. Treasury. I venture to say, we
14 were probably asking for this facility to be as long as
15 ten years. They gave us three.

16 So at the end of 2011, they were going to
17 extend the facility because they knew that we were still
18 in the facility and we probably couldn't get out on time.
19 They extended the facility three years, and we're asking
20 for five.

21 So having given you that context, recently I
22 had a call -- with the Financing Division, I had a call
23 with the GSEs who are sort of intermediaries for the
24 U.S. Treasury for this program. And they asked us if we
25 expect there to be a balance of this TCLP support by the

CalHFA Board of Directors Board Meeting – January 14, 2014

1 end of next year. And we are more confident than ever
2 that we are going to be able to get rid of all of the
3 support from the U.S. Treasury by the end of the next
4 year.

5 And these credit-rating upgrades that you're
6 looking at here, as I mentioned, will give us more tools
7 in our toolbox to use different ways to get rid of these
8 VRDOs. And with more tools, it usually means that you
9 can do more things and increase your probability of
10 success.

11 So while I can't tell you exactly all the
12 things we'll do in the next couple years, we do have a
13 chart from Tony which will show you that we've had
14 tremendous success in reducing these balances. We
15 actually started this program at \$3.5 billion at the end
16 of 2009, and now we have \$1 billion. So that's a decline
17 of \$2.5 billion. And on an annualized basis, we've been
18 getting -- reducing them by about 26 percent a year.

19 So if you assume that we are under that sort of
20 rough same clip, that billion dollars can go easily, just
21 from the things that we've been doing, could easily get
22 to that \$400 million to \$500 million. And that's a
23 number that we think that, if there's some end game to be
24 played in sort of the middle or the end of 2015, we think
25 that we can manage that.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 CHAIR JACOBS: Seeing no more questions,
2 anyone?

3 (No response)

4 CHAIR JACOBS: All right, thank you, Tim.
5 That's been a great explanation of that.

6 Our next item on the agenda is --

7 MR. HSU: I'm not done.

8 CHAIR JACOBS: Oh, you're not done?

9 MR. HSU: Yes. As I mentioned, you'll be
10 hearing a lot from me, for better or worse.

11 CHAIR JACOBS: Two more slides in there.

12 MR. HSU: But it's just really one slide
13 because the last slide I already covered.

14 So I don't want to belabor this too much, but I
15 thought that we provide to the Board one of the things --
16 one of the slides we provide to rating agencies to try to
17 help them cross that bridge of this decoupling that I was
18 talking about.

19 So what you're looking at here is a chart that
20 shows, in green, columns -- in green columns. This is
21 the amount of fund equity that we have in this
22 Multifamily III indenture.

23 So you can see, for example, right, as of
24 6/30/13, which is the most recent audited financials, we
25 have, roughly, \$140 million of fund equity. What this

CalHFA Board of Directors Board Meeting – January 14, 2014

1 is, is that this is saying that there's \$140 million more
2 in assets than there are in bonds inside this indenture.

3 At the same time, what this is saying is that
4 if you take all the assets and divide by all the
5 liabilities, you will get to 123 percent. So this is
6 what's referred to as "coverage ratio" or "over-
7 collateralization level," if you're fancy.

8 So what you're seeing here is that, you can see
9 that the Agency has been very conscious and deliberate
10 about increasing the fund equity in this bond indenture,
11 both in absolute levels and also as a percentage. And
12 this kind of effort was part of what focused their minds
13 about decoupling their rating for Multifamily III and the
14 General Obligation.

15 Roughly speaking, the real-estate risk of our
16 Multifamily portfolio, using their sort of doomsday
17 scenario, it amounts to about ten points, meaning, that
18 if there's \$100 of loans, Multifamily III loans that are
19 uninsured in the portfolio, they take about a 10-point
20 haircut.

21 So what you can see here is that we're now well
22 above that. And this kind of, again, is what allowed
23 them to focus their minds about this thought of
24 decoupling the two ratings.

25 So as promised, I think we already covered

CalHFA Board of Directors Board Meeting – January 14, 2014

1 this. We think that they will finish -- Moody's will
2 finish their efforts in this first quarter. And we're
3 hopeful something good can come out of this, too.

4 And that concludes my remarks.

5 CHAIR JACOBS: No questions?

6 *(No response)*

7 CHAIR JACOBS: Before -- I think the next one
8 is the real fun one, the hedging one.

9 But before we jump to that, let's try
10 these minutes, because I see we have Tia here.

11 Actually, would you mind introducing yourself
12 to the new Board members?

13 MS. BOATMAN PATTERSON: Tia Boatman Patterson.

14 I'm the general counsel with Sacramento Housing and
15 Redevelopment Agency.

16 And I think -- I already know one new Board
17 member. And I'm glad to be here. And we have a full
18 house. This is wonderful.

19 CHAIR JACOBS: Thank you, Tia.

20 Let's discuss these November 12th minutes.

21 Does anyone want to move the minutes for
22 approval?

23 MS. BOATMAN PATTERSON: Move for approval.

24 CHAIR JACOBS: So moved.

25 Oh, it was already moved. That's right.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 And we have a second, right?

2 Could we try the vote again?

3 MS. OJIMA: Ms. Caballero?

4 MS. CABALLERO: Aye.

5 MS. OJIMA: Ms. Whittall-Scherfee?

6 MS. WHITTALL-SCHERFEE: Aye.

7 MS. OJIMA: Ms. Falk?

8 MS. FALK: Abstain.

9 MS. OJIMA: Mr. Gravett?

10 MR. GRAVETT: Abstain.

11 MS. OJIMA: Mr. Gunning?

12 MR. GUNNING: Aye.

13 MS. OJIMA: Mr. Hunter?

14 MR. HUNTER: Aye.

15 MS. OJIMA: Ms. Carroll?

16 MS. CARROLL: Aye.

17 MS. OJIMA: Ms. Patterson?

18 MS. BOATMAN PATTERSON: Aye.

19 MS. OJIMA: Mr. Prince?

20 MR. PRINCE: Abstain.

21 MS. OJIMA: Ms. Sotelo?

22 MS. SOTELO: Abstain.

23 MS. OJIMA: Mr. Jacobs?

24 CHAIR JACOBS: Aye.

25 MS. OJIMA: We have a quorum. The minutes have

1 passed.

2 CHAIR JACOBS: Great. Thanks.

3 --o0o--

4 **Item 5. Presentation and discussing of new financing**
5 **strategies for hedging loan commitments**

6 CHAIR JACOBS: All right, so now back to the
7 agenda, the really fun item, heading going forward.

8 MR. HSU: Let's stick with fun, because a
9 couple of people who reviewed this text said that it was
10 dense. And it is a little bit dense.

11 And as I mentioned, that one of the key
12 mandates from Claudia is to elevate our engagement with
13 the Board. And in the spirit of engagement and also
14 transparency, for better or worse, CalHFA is a financial
15 institution. And some people refer to CalHFA as the
16 affordable housing banquet of the state of California.
17 And some of these things that we do, for better or worse,
18 are a little bit dense. They are not -- they are a
19 little bit different, in trying to figure out the pitch
20 of a ramp for a special-needs unit.

21 But having said that, this whole presentation
22 here is about a thought that we have, of how do we go
23 into the next stage of what we're doing.

24 Back in May of last year, one of the things I
25 said to the Board is that it is my greatest aspiration

CalHFA Board of Directors Board Meeting – January 14, 2014

1 that the Board hears less from me and more from our
2 program people. And I say that because CalHFA really is
3 about lending. It's not necessarily about the engine
4 behind the lending, although the engine sometimes can
5 drive the lending; and that's why I'm here to make this
6 presentation.

7 But if these engines are put in place with the
8 Board's approval, it should hum along, and we wouldn't
9 have to revisit this all the time.

10 Some of the common themes I did emphasize the
11 last year, is that we can. Because at some point, as I
12 mentioned, that we stopped our lending program. But one
13 of the things I kept pounding on last year is that we
14 can -- indeed, we must get back into lending because
15 CalHFA is a lending institution. Without that as part
16 of our portfolio, CalHFA for a while did have a lot of
17 existential issues. And we need to get back into
18 lending.

19 And one of the key things to support the
20 thought that we can and, indeed, must go back into
21 lending, is that instead of the director of Financing
22 hoarding the liquidity of the Agency to deal with some
23 of the risk factors that the Agency faces, we started
24 to suggest that we can release some of this liquidity
25 to support lending from the standpoint of providing a

CalHFA Board of Directors Board Meeting – January 14, 2014

1 warehouse line for the lending efforts. So that is
2 something that we talked about a lot last year.

3 But as we get back into lending, as we get back
4 into lending and ignoring, you know, Shakespeare's advice
5 about borrowing and lending -- because he did warn us
6 about that at some point -- we realize that we need more
7 tools. We need more tools to really make him turn in his
8 grave. And what we need is that we need this ability to
9 hedge. And we talked -- I think we talked about
10 this last year. I think it's one of the questions that
11 came up a lot last year and the year before, is that as I
12 slowly tell the Board that "Well, we lost that warehouse
13 line, and we lost that warehouse line, and we lost that
14 warehouse line," one of the things which some Board
15 members wondered about, which is right, is that: "Well,
16 how can you be a lender if you don't even have a
17 warehouse line?" Which is true. And which is why it was
18 really important for us to create this internal capacity
19 to warehouse last year.

20 But one of the things that a lender needs who
21 is not a bank depository institution, there's also this
22 idea of being able to hedge.

23 So what we're talking about here is having the
24 Board consider -- this presentation is informational
25 only. Having the Board consider giving the staff the

1 ability to do hedging as part of the financing resolution
2 in March.

3 So if you'll flip into the presentation, I
4 thought, although I kind of sort of jumped into this
5 page, first create a context of why this presentation is
6 necessary.

7 The existing financing resolutions do not allow
8 staff to enter into new hedges. And this was one of the
9 things that the Board consciously implemented about three
10 years ago as we were dealing with a lot of legacy risks.

11 Just a little bit about financing resolutions
12 for the new Board members.

13 Every March, the Board passes two financing
14 resolutions which authorizes and delegates and also
15 defines what staff can do for the next 12 months. And
16 as I mentioned, this presentation, in some sense, is a
17 prelude to what we are asking the Board for in March.
18 And if there are any questions, if you could direct them
19 at me, or any comments, they'll be wonderful.

20 But those financing resolutions that we expect
21 to bring to the Board in March will contain this, and of
22 allowing staff to do hedging.

23 Hedging, this go-around, is very different than
24 what we used to do perhaps five or six years ago. What
25 we're talking about here is hedging loan commitments,

CalHFA Board of Directors Board Meeting – January 14, 2014

1 which is hedging the interest-rate risk from locking in
2 the rates to closing the loans. What we used to do, is
3 that we used to hedge varied long-dated variable-rate
4 bonds. So these swaps that we used to enter into were
5 sometimes 40 years because we're doing multifamily
6 projects.

7 But here, we're really talking about hedging
8 movements that are much shorter in duration, and they're
9 also meant to be -- I'll cover this in a second -- cash
10 settled when the loan closes.

11 So that's sort of the context of the
12 presentation.

13 And if there's no more questions, let the fun
14 begin.

15 *(No response)*

16 MR. HSU: Okay, one of the things I must
17 apologize about, is that I was hoping that we have our
18 traditional projectors, and I could actually stand up to
19 walk you through some of these boxes. But the setup is
20 a little bit different than I expected, so I apologize
21 about that.

22 So first, that's -- let me sort of go over,
23 what are we talking about, when we talk about a "hedge"?
24 So what you have on page 3, is an idealized example of a
25 hedge that's hedging a loan commitment. So there are

CalHFA Board of Directors Board Meeting – January 14, 2014

1 sort of roughly four quadrants here, upper left-hand
2 corner, upper right.

3 And this is working from the upper left-hand
4 corner, and it's working clockwise to the box in the
5 upper -- I mean, the lower left-hand corner.

6 So in the upper left-hand corner, what you'll
7 see is that the market rate on the day that, let's say,
8 CalHFA is working with the borrower. Suppose that the
9 market rate on that day is 4 percent. And by that, if
10 you're thinking about a mortgage, I mean that it's a
11 mortgage with no points paid down, meaning, that that's
12 par.

13 So on that day, CalHFA offers a 4 percent rate
14 to a borrower. And then the borrower on that same day,
15 they committed to locking in this rate on that day. But
16 it takes 60 days for a single-family loan. And 60 days
17 is -- somewhere around, I would say, 45 days to 60 days
18 is very customary as their amount of time for a loan to
19 close.

20 And another aside is that this particular
21 example here, it's really more apropos to a single-family
22 lending loan, not multifamily. But it sort of covers
23 what we're talking about, when we're talking about hedge
24 for a loan commitment.

25 So it takes 60 days to close this loan. But as

CalHFA Board of Directors Board Meeting – January 14, 2014

1 it turns out, on the day of the closing, on the day of
2 the loan closing, the market rate for that same kind of
3 loan, for that same size, for example, it is no longer 4.
4 The rates have gone up. It has now gone to 4.50. And
5 the amount of money that someone is willing now to pay
6 for a lower rate mortgage loan, that 4 percent loan, is
7 no longer \$100. It's actually \$97, okay.

8 But because CalHFA committed to that borrower
9 that it would fund a 4 percent loan in 60 days, CalHFA
10 will send over to the borrower -- now, I'm in the upper
11 right-hand corner -- CalHFA will send over to the
12 borrower \$100 so that they can buy their home; and
13 then -- this is all a little bit like Monopoly money --
14 so send over \$100 to the borrower so they can close their
15 loan, and then the borrower will start paying a loan that
16 carries a 4 percent interest.

17 On that same day that CalHFA closes that loan,
18 suppose that CalHFA were to then say, "Okay, in order to
19 fund that loan, I will now sell that mortgage to the
20 capital markets." If it turns around and sells that loan
21 to the capital markets, the capital markets, because it
22 could buy a new loan at 4.50, it looks at that 4 percent
23 loan as a discount. It is now only willing to pay \$97
24 for that loan. CalHFA sends over the loan, and gets \$97
25 back.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 So these quadrants on the top, in the upper
2 half here, the net economics or the net cash flow, if you
3 will, to the Agency, is that it's out \$100 and it only
4 got \$97 back. So it lost \$3 from this transaction.

5 And this is the kind of stuff you don't want to
6 do in volume; right? This is the stuff you want to say:
7 I want to avoid this.

8 But on the same day that CalHFA offers a rate
9 lock to the homeowner -- now, I'm working on the bottom
10 left-hand quadrant -- CalHFA enters into a contract. So
11 this is where the hedge piece comes in. CalHFA enters
12 into a contract. And this contract says -- with the
13 hedge provider. This contract says, "CalHFA will deliver
14 a 4 percent mortgage to that hedge provider in 60 days,"
15 and the hedge provider says that "While I will take that
16 4 percent loan, I will commit to taking that loan no
17 matter where rates move in 60 days."

18 So likewise, this hedge contract lasts for
19 60 days. And then on that same day in which we close
20 that mortgage loan, in which we lost \$3, this contract
21 doesn't necessarily contemplate an actual delivery of the
22 loan. This is an issue that's oftentimes cash-settled.
23 But the hedge provider owes CalHFA \$3 because the hedge
24 provider committed to taking that loan from CalHFA for
25 \$100. You can think of it this way: The hedge provider

CalHFA Board of Directors Board Meeting – January 14, 2014

1 committed to taking that loan for CalHFA for \$100. So if
2 CalHFA were to send the loan over, the hedge provider
3 will send \$100 to CalHFA.

4 The hedge -- the hedge provider will -- the
5 hedge provider would send \$100 to CalHFA, but the loan
6 that CalHFA is sending over is only worth over \$97. So
7 the hedge provider will pay CalHFA \$3, okay.

8 I was seeing a lot of nods and then it kind of
9 stopped.

10 CHAIR JACOBS: Tim, is the thought to have just
11 a -- I guess not a revolving line, but some kind of
12 constant amount of hedging capacity out there, so when
13 the pools of loans get bundled together up to a limit?
14 Or how were you seeking to work this through?

15 MR. HSU: So -- can I address that in a little
16 bit? Can I defer to that a little bit?

17 So, again, this contract -- this contract
18 doesn't actually contemplate an actual delivery of the
19 loans. Well, all it's trying to do, is that it's trying
20 to suggest that you're going to exchange the market value
21 of that loan that you committed to each other 60 days
22 ago. And the market value of that loan, because of the
23 direction it's going, is that the contract -- the hedge
24 provider now owes CalHFA \$3.

25 So then if you look on the very top, we lost

CalHFA Board of Directors Board Meeting – January 14, 2014

1 \$3. And then this contract is going to give CalHFA \$3.
2 So in this idealized example, the hedge perfectly
3 neutralizes the loss on the loan piece. And then we have
4 a net loss or gain of zero.

5 And now, with this tool in place, you will say
6 that, well, if I have the ability to neutralize this
7 risk, then I might think about how to ramp up these
8 lending activities.

9 Looking at this chart, though, you're starting
10 to see some inklings or some signs of some of the risk
11 factors.

12 Like, for one thing is that what if this loan
13 does not deliver in 60 days? This is very common, right?
14 What if this loan actually delivers in 75 days? But your
15 hedge is for 60 days. So there is a risk factor that if
16 the loan is delayed, the loan closing is delayed, then
17 your hedge now is only for 60 days, and you might be
18 subject to interest-rate risk from day 61, all the way to
19 75. So that's one problem.

20 And then another problem could be, what if the
21 loan actually fails to deliver, a fall-out risk -- which
22 I'm working my way there -- a fall-out risk because the
23 loan doesn't deliver?

24 So in this example here, as it turns out, if
25 the loan does not deliver, it actually nets in a \$3 gain

1 to CalHFA because a loan falls out, CalHFA didn't have to
2 come \$3 out-of-pocket to fund the loan, and it actually
3 resulted in a positive gain to CalHFA because of that
4 fall-out.

5 But when we talk about avoiding interest-rate
6 risk, we're not just talking about the potential of that
7 upside, we're also talking about the potential of the
8 downside. Because if rates, instead of having gone up,
9 it had gone down, when that loan fails to close also on
10 that hedge piece, instead of positive \$3, we could be out
11 \$3.

12 And we want to -- the thought of running this
13 program is that we're trying to neutralize this risk.
14 We're trying to -- or the fancy word is "immunetize" this
15 risk.

16 But we don't think that this is our business.
17 Our business is not to take interest-rate risk. Our
18 business is to make loans and make money from making more
19 loans, not from taking these interest-rate risks.

20 As it turns out, how you deal with these risks,
21 as it turns out -- this is a little bit of a circular
22 logic -- how you deal with these risks is that you need
23 to have volume. Because when you have volume, you don't
24 deal with the specific loan risks or the specific
25 borrower risks.

1 So suppose you only have one loan that you're
2 trying to hedge, then you have to get various -- this is
3 no different than if you were choosing stocks in a stock
4 market. When you choose one stock, you have to deal
5 with very company-specific risks. And if you're dealing
6 with one loan you're hedging, you have to deal with
7 borrower-specific risks: Who that borrower is, what he
8 is or she is buying, where this person is. Very specific
9 risks.

10 When you're building up in volume -- analogy,
11 when you buy an index fund. When you're building up in
12 volume, you start to smooth away these borrower-specific
13 loan-specific risks. You're now dealing with, let's say,
14 more higher-market level risks. You're dealing with,
15 "Well, when I took in, let's say, a hundred loan
16 reservations 60 days ago, has interest rates gone down in
17 that 60 days?" Because if it has, I should expect higher
18 level of fall-out because people are thinking that,
19 assuming they don't need to look close within that window
20 again, they say, "I'm going to relock with some other
21 lender."

22 When we are dealing with volume, we can now
23 start to smooth away some of these very borrower-specific
24 risks, which are really difficult to hedge just because
25 it's so deep. And we can deal with some of these

1 higher-level risks.

2 So with that as the context, what we're
3 thinking is that we like to be, at any given time, be
4 immunetized of this interest-rate risk. But we also
5 think that we need to have real volume for us to be able
6 to hedge this risk well.

7 So while this presentation is sort of
8 precipitating, or sort of resulting in an ask from the
9 Board as part of our financing resolution in March for
10 this ability to do this, there is no specific time-line
11 right now of when we would do this. Because what we are
12 waiting for still is for our pipeline to build up. And
13 as it builds up and as we reach, at the moment, sort of
14 we have some thought here that once we reach, roughly,
15 about \$20 million of loans being delivered every month,
16 then we can -- that that number is -- we're not committed
17 to that. As I mentioned, there is no specific time-line
18 yet. We can then really think about doing this
19 ourselves.

20 CHAIR JACOBS: This might be a "Rick" question.

21 But when we pool together a bunch of
22 single-family loans and the markets buy them in a pool,
23 are we committing to any sort of minimum duration? I
24 know a lot of prepayment activity, you know, whenever the
25 rates dip, are we exposed to that at all?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. HSU: No. The fancy word is that convexity
2 risk is not being borne by us; and it's built into
3 pricing.

4 So the other way to look at this is that if the
5 park -- this is a little bit inside baseball -- but if
6 the par coupon is 4 percent and somehow you're lending at
7 4.50, the premium that someone pays between 4 to 4.50 is
8 higher than the premium that someone pays between 4.50 to
9 a 5. And the reason is that the premium between 4.50 to
10 5 would suggest that that borrower has much higher
11 incentives to refinance than someone who got something
12 between 4 and 4.50.

13 Does that make sense?

14 Meaning, that the higher the nominal coupon,
15 the higher the incentives to refinance, and the higher
16 the incentives to refinance, the shorter the duration.
17 So the shorter that an actual investor is willing to pay
18 for how long that premium will last. So he or she would
19 actually pay less up-front because they do expect that
20 loan to go away faster.

21 So that risk is priced into how much we get
22 from the loan.

23 CHAIR JACOBS: Janet?

24 MS. FALK: I have two questions.

25 The first is, from past experience,

CalHFA Board of Directors Board Meeting – January 14, 2014

1 approximately what percentage of loans fail to close
2 within 60 days?

3 MR. HSU: Our single-family portfolio
4 historically has experienced about one-third fall-out
5 over time. So one out of three loans were to fall out.

6 MS. FALK: Okay. And the second is, what is
7 the cost of the hedge?

8 MR. HSU: The cost of the hedge?

9 MS. FALK: Yes.

10 MR. HSU: Well, you mean right now --

11 MS. FALK: We're paying something to get
12 somebody to hedge it, I assume? No?

13 MR. HSU: Yes. So at the moment, while we
14 talked about that -- well, I've said that while in order
15 to lend, we need to have this hedging function. But the
16 lending program has started, so you might wonder, well,
17 who is hedging? We're not hedging right now. We have
18 outsourced that hedging function to someone else, which
19 is a part of what this presentation is about, is the
20 consideration of having the ability to in-source that
21 function so that we can do this ourselves.

22 At the moment, our hedging provider is charging
23 us 75 cents per a hundred. So three-quarter dollar per
24 \$100 activity.

25 So I'll walk through an example of that in a

1 little bit, so you can see the economics of that and how
2 the alternative execution will result in a slightly
3 different economics.

4 Is this fun yet?

5 Okay, so with that as a backdrop, I'm going to
6 cover single-family first; and after single-family, I'll
7 cover multifamily.

8 So on page 3 -- I'm sorry, on page 5. So on
9 page 5 as I mentioned, we're going to start in the upper
10 left-hand corner, and we're going to work our way
11 clockwise to the bottom left-hand corner.

12 So as I mentioned that this is a schematics of
13 our existing single-family TBA lending program. And as
14 I mentioned, that there is a need for that hedging
15 function. And at the moment, that hedging function is
16 being provided by a broker/dealer called FirstSouthwest.

17 So let me carefully walk through this one so
18 that you get sort of some sense of how the existing
19 infrastructure is set up. And we might spend a little
20 bit more time on this chart. And then -- but this
21 will -- if the Board sort of gets sort of comfortable
22 with this chart, then it's easier to then think about
23 sort of the alternate executions on the next couple
24 slides.

25 So the first thing that happens -- again, in

CalHFA Board of Directors Board Meeting – January 14, 2014

1 the upper left-hand corner -- is that the hedge provider
2 publishes sort of an array of interest rates at different
3 prices, at different premium levels. They send these
4 rates and premium levels to CalHFA every morning. And
5 then CalHFA in turn will select certain rates to achieve
6 a certain premium level, so that there's enough profits
7 in that lending so that it can fund down-payment
8 assistance loans up to 3 and a half points.

9 So CalHFA, in turn, takes those rates from the
10 hedge provider, publish them to the lenders. And now,
11 the lenders, to the degree that they're signed up on our
12 program, then can work with the potential first-time home
13 buyer to see if they're interested in that program.

14 Suppose there is a hit that they actually want
15 to use our program. Then the lender would actually come
16 onto CalHFA's system and then make a reservation on a
17 loan.

18 At the end of every day -- I think actually we
19 might do this twice a day -- we do it once at the
20 beginning of the day and once at the end of the day, we
21 actually send all the loan reservation to our hedge
22 provider. And then the hedge provider, in turn, will
23 decide on the rates and also the volume they want to
24 hedge. Because as we talked about earlier, suppose we
25 send them ten reservations and, you know, to Janet's

CalHFA Board of Directors Board Meeting – January 14, 2014

1 point, not every single one of those loans are going to
2 close. People expect that some number of those loans
3 will fall out for various reasons because the paperwork
4 is not right, interest-rate movements, et cetera.

5 At some point, they have to decide on how many
6 of these loans they're going to suggest we actually
7 deliver.

8 So the hedge provider here, as I mentioned,
9 they are getting paid 75 cents per every hundred, but
10 they are taking some real risks here as well.

11 So working over to the right-hand -- upper
12 right-hand corner, the lender then will work with the
13 borrower and actually close the loan. So at the loan
14 closing, the lender would actually send over -- provide
15 a hundred dollars for the borrower to close the mortgage
16 loan. And CalHFA would also come out-of-pocket to the
17 tune of \$3.50 to fund this down-payment assistance loan.

18 The lender will warehouse that loan for a week
19 until he is taken out by the master servicer, and CalHFA
20 will warehouse that down-payment assistance loan, so DPA,
21 until the sale of the MBS.

22 Every week, the master servicer would buy all
23 these loans from our lending network, so that the lender
24 is only warehousing for a week. And then the master
25 servicer will buy it.

1 And ideally, the master servicer doesn't really
2 want to hold onto these loans for longer than 30 days.
3 So let's just suppose that every 30 days they would
4 actually create an MBS, securitize all the mortgages, and
5 create an MBS, and send it over to our hedge provider.

6 Just for ease of illustration, for example,
7 this pool that the master servicer sends over to a hedge
8 provider, this particular pool, as they say, is actually
9 worth \$104.75.

10 As I mentioned, FirstSouthwest, as our hedge
11 provider, would keep 75 cents, so there is actually \$104
12 left. Of that \$104, \$100 will get remitted back to the
13 master servicer.

14 One of the key things is that the master
15 servicer here is not doing this just to get repaid back.
16 I'm kind of ignoring, for this illustration purposes,
17 just not to make it any more complicated, the economics
18 that goes into master servicer. But the master servicer
19 will get paid back their hundred dollars, which they have
20 fronted to buy the loans from the lenders, and then
21 CalHFA will get \$4.

22 So the net profit to CalHFA is not \$4 because
23 we had actually, you might recall, warehoused, where we
24 sort of advance that \$3.50 for DPA. So the net economics
25 to CalHFA, upfront, is 50 cents per \$100. And if that

CalHFA Board of Directors Board Meeting – January 14, 2014

1 DPA loan were to repay in the future, it's quite possible
2 that our profit margin would increase over time. But
3 upfront margin is 50 cents per \$100.

4 Let me pause there.

5 Any questions?

6 *(No response)*

7 MR. HSU: Great.

8 So inside the hedge provider box, I've put in
9 here, just for illustration purposes, this will come into
10 play when we contemplate the alternatives. I'm just
11 guesstimating that their actual costs of doing the
12 hedges, meaning, making the trades and perhaps there are
13 going to be a couple loans in which they didn't project
14 the right fall-out ratios, their hedging costs perhaps
15 could be 50 cents per hundred over time, which may
16 suggest that they're actually making a net hedging profit
17 out of this of 60 cents per hundred.

18 So what you can see here is that their upfront
19 profit is actually potentially higher than what CalHFA
20 would get out of all this.

21 Which leads into sort of the thought of, like,
22 well, if this is -- Matt?

23 CHAIR JACOBS: Have we found a competitor who
24 might be priced a little cheaper?

25 MR. HSU: As it turns out, our market is

CalHFA Board of Directors Board Meeting -- January 14, 2014

1 still -- CalHFA is in this sort of niche market of state
2 housing finance agencies. As it turns out, the people
3 who play in our space and provide this service, there's
4 really two or two and a half. So when we bid out that
5 contract, we did have two providers. And you would not
6 be surprised that they actually bid the same fee.

7 So at the moment, as far as we know, there's
8 not a lower-cost provider.

9 MS. BOATMAN PATTERSON: Tim, I have a question.

10

11 MR. HSU: Sure.

12 MS. BOATMAN PATTERSON: What percentage of our
13 portfolio do we actually hedge for the single-family?
14 Is it all of the single-family or just a portion of it,
15 for the loans?

16 MR. HSU: So at the moment, all of the
17 originations -- because perhaps what you're referring to,
18 is that over last year, the Board has been informed of
19 the various different single-family programs that we're
20 launching. All of them are being rate locked with
21 FirstSouthwest, the hedge provider. So you might say
22 that all of them are being hedged right now.

23 MS. BOATMAN PATTERSON: Because you mentioned
24 volume, when Janet asked her question. So if we were to
25 bring this in-house, is your thought that all of them

CalHFA Board of Directors Board Meeting – January 14, 2014

1 would be hedged or just a portion thereof?

2 MR. HSU: That's a very good question.

3 So one of the things that we are more or less
4 focused on -- and it's not clear how this will evolve --
5 again, there is no specific time-line in which we will
6 make this change or make this transformation. And it's
7 just that since we only come to the Board once a year for
8 this kind of authority, that's why you might say we're
9 swinging a little bit early, if you will.

10 It's quite possible -- what Tia is referring
11 to, is that if you look at the array of our single-family
12 offering right now, we do have quite a few products. I
13 mean, there is the FHA-plus, there is the normal FHA
14 product, there's now the energy efficiency. You know,
15 you look at -- you could look at the offerings, and
16 it's -- you know, it's quite a menu.

17 And it's quite possible that some of the
18 offerings in a menu will never really quite pick up in
19 volume. And if they don't pick up in volume, it's
20 probably a better idea for us to continue to outsource
21 those hedging functions. But if we have some segments of
22 the program, or some offerings on the menu that do pick
23 up in volume, then we think that it might make sense for
24 us to come in and somehow in-source those programs for
25 hedging purposes internally.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 But we don't know how this will evolve, but
2 it's quite possible that we don't get rid of this
3 provider at all completely. We'll keep them around to do
4 some hedging functions. And then we also start hedging
5 ourselves.

6 And one of the key things I haven't mentioned,
7 is that by having this function outsourced for the
8 moment, it is also helping us to get reacclimated with
9 the point that Janet was making about fall-out ratio.
10 Because certainly fall-outs from 2005 and 2006 or earlier
11 are different than fall-outs now. The borrower
12 population is slightly different. The entire -- you
13 know, one can argue that the whole world has changed over
14 the last couple years.

15 So we want to get reacclimated with the
16 fall-out ratio that we expect on the new lending, not
17 just what we thought five or six years ago.

18 CHAIR JACOBS: Any other questions, anyone?

19 *(No response)*

20 CHAIR JACOBS: Okay.

21 MR. HSU: So as I mentioned, that one of the
22 reasons why we're suggesting a change is that the
23 75 cents per a hundred that we're paying to the hedge
24 provider is good compensation for that function. And if
25 we were to in-source this hedging function, it's quite

1 possible that we can use some of the savings from, let's
2 say, eliminating this middle person; we could take some
3 of the savings there to offer a low rate, for example.
4 Or we could increase our profit margins.

5 So certainly at some point, there would be a
6 healthy discussion about wanting to keep more profits
7 versus offering a lower rate to the borrower. Because
8 if we offer a lower rate, potentially we can ramp up
9 production. So if we ramp up production, perhaps we're
10 making less per loan, but we're making more money overall
11 because we have greater production.

12 So that's, you know, another discussion that
13 can be had at some point. But if we internalize this, we
14 can lower our cost structure for the entire schematics.

15 And I'm not going to go over all this again.

16 On the top here, the only change is that
17 instead of FirstSouthwest continues to do this hedging,
18 all we are suggesting is that CalHFA is now doing the
19 hedging.

20 As I mentioned, if CalHFA is doing the hedging,
21 it's quite possible then that we will offer slightly
22 lower rates because we can pass some of that savings on
23 to the borrower in terms of offering a lower rate.

24 So if you focus on the bottom half here, in the
25 middle, instead of that mortgage being sent over to the

CalHFA Board of Directors Board Meeting – January 14, 2014

1 hedge provider at \$104.75, now it's being sent over at a
2 quarter less -- 25 cents less, at \$104.50. Again, that
3 25 cents savings is, in theory, passed on to the borrower
4 and since this particular loan now carries a lower
5 coupon.

6 So the \$104.50 gets sent over to the hedge
7 provider. In this case, that's CalHFA. CalHFA did enter
8 into a hedge contract to be able to sell that loan at
9 \$104. We send \$100 back to the master servicer. And
10 \$4 goes down to CalHFA. But the net profit to CalHFA,
11 instead of 50 cents, it's actually 70 cents because we
12 kept 50 cents, after having funded DPA, like we did in
13 the previous example, and we kept an additional 20 cents
14 because we rewarded ourselves, if you will, for 20 cents
15 for doing the hedging function.

16 So one of the things that I also want to talk
17 about is that in the hedging provider box here, which
18 shows CalHFA, despite the fact that we have a lower gross
19 margin than the hedge provider -- we now have 50 cents
20 versus 75 cents for the hedge provider -- even if we
21 double our hedging costs because, I must confess, we're
22 probably not as good at doing this as well as these
23 professionalized servicers. Even if we double our cost
24 of doing the hedging, we can still retain a little bit of
25 profit for that particular function.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 One of the things that Claudia had mentioned
2 that I should emphasize is that the Agency has actually
3 had a very long history of doing hedges. But as I
4 mentioned earlier, a hedging of a different sort of
5 nature. We used to do a lot of hedging for our
6 long-dated variable-rated bonds.

7 These hedges are different in the sense that
8 you're really hedging loan commitments; but there is an
9 existing infrastructure in place that has very deep
10 experience in doing hedging.

11 CHAIR JACOBS: When FirstSouthwest does this,
12 are they trading then with another counterparty? You
13 know, Wall Street Bank to buy in bulk or something like
14 that?

15 MR. HSU: Most probably. They're probably --
16 they're a broker/dealer. So I don't think that they're
17 buying for their own balance sheet.

18 But to be sure, the way that our contract is
19 structured, we're not really privy to what they do behind
20 the scenes; in part, because we don't share any of that
21 risk.

22 So to conclude, that if we lower our cost
23 structure for the overall schematics here, it could be
24 quite possible that we end up offering lower rates than
25 the existing framework; or end up keeping a little bit

1 more profits from the existing framework.

2 MS. CABALLERO: This has been a very good
3 presentation. I appreciate the time that you've taken to
4 explain this to us.

5 I think for future reference, if we're going
6 to vote on this, that it would be helpful to have an
7 identification of the assumptions that you're making in
8 regards to if we went in this direction, here are the
9 assumptions that we feel fairly confident are going to
10 come true, but also the risks. I think you started
11 talking about them a little bit. They may bundle these
12 and market them.

13 What would be the risk to CalHFA if we did it
14 in-house? And what are the things we'd need to look at
15 as you ask us to vote on this that would give us a better
16 sense of whether we're really in a good position to be
17 able to take on this function that someone else is doing
18 right now?

19 MR. HSU: As for risks, I appreciate very much
20 the focus on risks, which is something that we talk about
21 internally.

22 Also attached to this presentation is a draft
23 of a hedging policy that we would ask the Board to adopt
24 in March if we were to have your permission to do this.
25 And inside that document, you can see a very detailed

1 discussion about risks.

2 As I mentioned a little bit earlier, that
3 there's these risks -- when we talked about that example
4 of one hedge, there is the risk of the loan taking longer
5 to close, sort of a delay risk, there's a non-delivery of
6 risk. The loan just fails to close. And that's a huge
7 risk when we are talking about multifamily, because these
8 tend to be multi-million projects, right? Not just --
9 I don't mean to belittle each of our own dwellings, but
10 not a small single-family mortgage loan.

11 So there are these risks have sort of been
12 peppering throughout, but that particular document there,
13 those are a much more detailed job of sort of delineating
14 all the risks that are involved. And there is a fall-out
15 risk, as Janet was mentioning earlier.

16 So suppose we go into thinking that 3 out of 10
17 loans will fall out. What if we end up having more loans
18 that fall out? This is sort of in the same ilk as the
19 loan not delivering. Well, what if you have less loans
20 that fall out? That means we will be underhedged.

21 So over time, those risks are real, which is
22 why I mentioned earlier, that this hedge provider is not
23 just minting money, they are really -- they are providing
24 a service. They are hedging this risk.

25 MS. SOTELO: I think the question that I would

1 have is, what is our operational risk? Not the risk
2 inherent to hedging, because that is -- you know, that's
3 a business model. And I think for me, it would be, what
4 is our risk of getting into this new business in terms of
5 what it does operationally for our staff, what it does
6 operationally for our credit rating?

7 You know, it is entering into a new business
8 for us. I guess we've done it in the past, but this is
9 doing it at a shorter term.

10 And the other thing I'd like to know, and, you
11 know, maybe it's something that you guys can provide
12 prior to us voting on this in March, is what do other
13 housing finance agencies do? And, you know, how does
14 that performance enable them to become more profitable or
15 make better loans or cheaper loans?

16 And just kind of for me putting it into the
17 context of operationally, what does this do to the team
18 and to the staff, and what would we be doing if we
19 weren't doing this?

20 By farming this out to a third party, there is
21 obviously a lot of headache that we save. But what is
22 the upside for us, and how to quantify that?

23 MS. BOATMAN PATTERSON: I was going to ask
24 along those lines. But one of the things that caught my
25 attention was that you said you did have the capacity

CalHFA Board of Directors Board Meeting – January 14, 2014

1 before, that you had done similar work before, but that
2 you didn't really know what the hedgers do now because we
3 don't share in any of the risk. So there's not much of
4 an opportunity to learn or cherry-pick, I guess, those
5 that would do best for us to keep.

6 And so while we're kind of figuring out which
7 direction we want to go in, is there an opportunity to
8 share in the risk so that you can get more information;
9 so, therefore, you do have the capacity internally?
10 Because that's one of the issues, operationally, how well
11 are you going to be able to do this? And are you able to
12 learn from those that are doing it now because you've
13 contracted it out? By bringing it in-house, it's a good
14 idea, as long as you're learning what it is that they do
15 and you're maximizing it under certain efficiencies
16 within your operations that you can do. So I don't know
17 if that's an opportunity. Because right now, you said
18 they don't give us any information because we don't share
19 in the risk.

20 MR. HSU: Let me clarify that.

21 MS. BOATMAN PATTERSON: Okay.

22 MR. HSU: One of the key things that we have
23 to really get our arms around is this fall-out risk.
24 Meaning that if we have ten loans that come in and are
25 reserved today, how many loans ultimately delivers in

1 60 days?

2 Not that you need to be right every time, but
3 you need to statistically be right over the year. What
4 I said earlier, was that -- I thought it was a comment
5 about what FirstSouthwest might do with these loans --
6 I thought it was Matt -- what FirstSouthwest might do
7 with these loans after we deliver them? Do they keep
8 them on the balance sheet or are they entering into
9 offsetting hedges on the other side and laying it off?
10 And that's the piece which we don't know because we're
11 not really sharing that piece of the risk.

12 But in terms of the key thing that we need to
13 understand, which is the fall-out risk, which is that if
14 we get ten loans, how many loans deliver in 60 days, that
15 we can track; and that is information that we can learn
16 from which is, again, a key thing that we need to get our
17 arms around before we even go into hedging.

18 Which is why having them around gives us that
19 sort of a head start in terms of understanding what that
20 risk is so we cap it off.

21 MS. BOATMAN PATTERSON: You have enough
22 information that you can work over the next couple of
23 months, or that you've been working on to be able to
24 analyze what that risk is so that you would be able to
25 come back?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. HSU: Yes.

2 MS. BOATMAN PATTERSON: Okay.

3 CHAIR JACOBS: But also beyond just the
4 fall-out risk, there's the risks that originations fall
5 off one month or far exceed the next month. And if we're
6 able to make a deal with a counterparty to hedge, they
7 may not be willing to sell in exactly the size of a hedge
8 that we want each month, or if we're doing it weekly. So
9 that's worth considering.

10 MR. HSU: That's correct.

11 MS. FALK: Yes, is it possible -- were we to do
12 this and decide that it wasn't working, I assume it's
13 possible to go back to the hedger again in the future?

14 MR. HSU: As we talked about in a different
15 context earlier, that it's quite possible that it's not
16 as bullion, sort of black and white. Meaning, that we
17 could continue to retain them to do some hedging
18 functions for some of the offerings on our menu. We
19 won't just say, "Go away" completely and then come back.

20 MS. FALK: No, but if we started doing a
21 portion of it and we decided after some point that we
22 didn't want to do it, what I'm kind of getting at is, can
23 we set some kind of cap of maybe loss, so that if we
24 experience a loss up to a certain point, we say, "Okay,
25 that's it. We're going back to the hedger"?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. HSU: Oh, that we can do --

2 MS. FALK: And, you know, you might want to
3 think about what that might be for the March
4 presentation.

5 MR. HSU: That, we could potentially do, yes.

6 MS. FALK: So then we know, we're not risking
7 more than a certain amount.

8 MR. HSU: That, we could potentially do, yes.

9 So you're suggesting setting in place some kind
10 of risk-management parameters. So that if we exhaust
11 some of our reserves with that function, that we flip the
12 switch and then go back to having a hedge. Yes, we could
13 think about that.

14 MS. FALK: And it's also so -- and to kind of
15 follow up on Tia's point, then the Board knows exactly
16 how much we're risking if we get into this, so that we
17 would not -- I mean, let's just say whatever --
18 however -- that things just went against you and you did
19 it for six months and we lost, you know, a hundred
20 thousand dollars or whatever the number is. We can say,
21 "Well, that's going to be our cap." And we don't want
22 to -- if we get to that point, we're going to go back to
23 not hedging -- we're going to go back to using a third
24 party and not do it ourselves.

25 Now, I don't know what that number might be or

CalHFA Board of Directors Board Meeting – January 14, 2014

1 how long it might take or whatever. But it would give us
2 some sense of that we had a limit.

3 CHAIR JACOBS: And also, just before we jump
4 into this, if we're going to cut their business down,
5 say, 75 percent, are they going to raise the 75 cents on
6 the remaining hedging activities to 80 cents.

7 We should just make sure before -- and, listen,
8 maybe there is a conversation to have with them to say,
9 "Listen, if you guys can cut this to 60 cents, we will
10 keep going, as we are now," just if maybe there's a deal
11 to make with them.

12 MR. HSU: Let me get back to the point about
13 operations.

14 That's something that we've been thinking a lot
15 about. As part of the hedging policy, we have also
16 included -- on this particular, included the thought,
17 we're in the middle of developing of having a hedging
18 procedure in place.

19 One of the key things that is very different
20 about this, versus what we used to do -- well, first of
21 all, we haven't lost any sort of the capacity in terms of
22 staffing from the past.

23 One of the key things that's very different in
24 this kind of hedging versus what we used to do is that
25 when we used to hedge, let's say, these long-dated

CalHFA Board of Directors Board Meeting – January 14, 2014

1 variable-rate bonds, it's true that at the peak of our
2 issuance, we used to do maybe 10 to 12 bond issuances a
3 year, so that we would go into that marketplace to do
4 these hedging, let's say, 10 or 12 times a year.

5 These loan reservations, they're alive. So
6 we're taking loan reservations in every day. And we need
7 to be able to get our arms around to these intakes every
8 day, so that we can hedge them every day. So the hedging
9 function becomes much more, almost continuous than what
10 we used to do.

11 What we used to do, if we're just using
12 semantics, you might argue that it was continual, and now
13 it's almost continuous. Because these are things you
14 have to do every day.

15 To the degree that, for example, there's an
16 agency party and that we might not have people sitting
17 around to do the hedging because the loans are coming in,
18 and then the people are all at the party, you really --
19 this is a little bit flip -- but you really have to
20 consider whether or not you actually want to have a
21 program that day.

22 So we do realize that, you know, there are
23 certain -- there are real operational issues here in
24 which what we used to do is very different than what this
25 would suggest. And those are things that we're

1 definitely working through.

2 But in terms of capacity, we have them; but in
3 terms of needing to be there all the time, having someone
4 to be able to -- not just me, for example -- you know,
5 having someone there all the time, so that if we are out
6 there on the street in terms of offering rates, we've got
7 to be here to hedge them at the end of the day. So it's
8 very different from that point of view.

9 MS. WHITTALL-SCHERFEE: Tim, how does the
10 single-family volume that we have right now enter into
11 this whole discussion of hedges, and when we might want
12 to take it over, versus when we might want to keep with
13 the hedge provider we're using right now?

14 MR. HSU: So I believe that -- correct me if
15 I'm wrong, but I believe that our reservation now is
16 slated to be about \$10 million?

17 MR. NANN: Eight.

18 MR. HSU: Okay, it's about \$8 million a month
19 or so.

20 So one of the rough yardsticks that we have set
21 in place for now, is that when we cross that -- I think
22 what Tom is referring to, is about \$8 million of
23 reservation a month. But what we're talking about, is
24 delivering about \$20 million a month, then we might
25 consider doing something like this. So we probably still

CalHFA Board of Directors Board Meeting – January 14, 2014

1 have a number of months away from that yardstick.

2 Again, and there is no specific time frame to
3 put this all in place. This is just thinking ahead.

4 I would like to also address the other point
5 that Dalilia made about other HFAs. I'll go into this a
6 little bit in the next couple slides.

7 It is true that other HFAs, in large part,
8 right now are either hiring someone like FirstSouthwest
9 to do all the hedging for them or some are actually doing
10 the hedging themselves. There are a few in which they
11 are, I dare say, they're just hedging with things that
12 they enter into a spreadsheet. And it's not
13 extraordinarily complicated or sophisticated what they
14 are doing.

15 There are -- there is a rumbling, however. And
16 some of it from the rating agencies, which I think is
17 some of the points that Matt is making, is that this
18 particular business model results in an up-front premium
19 to CalHFA. It doesn't create annuities for CalHFA over
20 time. And that business model is no different than,
21 let's say, your corresponding lenders of the world,
22 meaning, that they -- one year, there's huge bonuses
23 being sent out to all the originators because they had
24 a cropper year in terms of refinances, and a big
25 origination year, a big bonus, everybody's happy at the

CalHFA Board of Directors Board Meeting – January 14, 2014

1 party, the holiday party.

2 And the next year, rates go up, much like what
3 happened over the summertime, right? Rates go up, and
4 now they're refinancing until it falls off of -- again,
5 we're not sort of in the refinancing business, as such,
6 but I'm just using this as an example. The refinancing
7 activity falls off the cliff. Wells, for example,
8 announced over the summertime they're going to lay off
9 40 percent of their origination staff.

10 And so then we go from one year in which people
11 are getting big bonuses, into the next year, in which
12 people are losing their jobs.

13 That sort of up-front premium model generates
14 a set of cash flows that's very different from what a
15 less flexible cost structure, like CalHFA, needs.
16 Meaning, that CalHFA is really not necessarily trying to,
17 let's say, have one year in which we're making bundles of
18 money and next year, having no money.

19 Generally speaking, we tend to be of the
20 framework of creating an annuity to guarantee that we
21 have future cash flow to pay for our -- again, I hope I'm
22 not being too mean by saying a less flexible cost
23 structure.

24 So that discussion is happening right now, and
25 out there, in HFA space. And it's also becoming an issue

CalHFA Board of Directors Board Meeting – January 14, 2014

1 with the rating agencies because they realize -- that's
2 why I'm telling you, that most governmental entities
3 don't have a very flexible -- they don't just wave their
4 wand and say "40 percent of my staff is going to go."
5 They don't have that ability.

6 So having that inflexible cost structure
7 probably means that you want to be generating more of an
8 annuity over time versus these ups and downs of being
9 susceptible to the cycles of mortgage origination.

10 Which is a great segue into the next thought,
11 is that if we were to hedge in-house or internalize this
12 hedging function, we could also have this -- potentially
13 this flexibility of delivering some of our originations
14 into our traditional tax-exempt mortgage revenue bonds
15 versus continuing to sell them into the mortgage market.

16 Having said that, having sort of mentioned
17 that -- again, this is all sort of thinking ahead, there
18 is no specific time-line that is in place of doing
19 this -- having said that, in order to not sell some of
20 these pipeline origination -- you know, some of these
21 production to the mortgage market, we need to convince
22 ourselves that: One, we can hedge it -- sort of the
23 hedging thought is that we need to ramp up, at the
24 moment, the yardstick is about \$20 million in delivery
25 every month, we need to do that.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 And, two, is that we need to be convinced that
2 getting paid from the mortgage market up-front is
3 actually not as good as somehow the present value of this
4 annuity that we're generating.

5 So that's also another sort of test that we had
6 to pass. Otherwise, if we continue to get paid very well
7 from the mortgage market, we might want to just stake
8 that, which is what a lot of HFAs have been doing out
9 there. They're saying, "Well, since I'm getting paid so
10 well from the mortgage capital market, I'm not bothering
11 to go into the bond market," which could well be the case
12 for the foreseeable future. But, again, there is
13 rumbling out there of, "Well, you know, at some point you
14 need to get into multi-pronged," because you cannot get
15 too wedded to the thought that you're funding all your
16 operations from revenues that have been generated this
17 year. That can lead down to unexpected results, let's
18 say.

19 So in this chart here -- I won't dwell on this
20 too much -- what we're suggesting here is that in the
21 yellow here, we, as I mentioned, we passed these two bars
22 we talked about, having the production ramp up to more
23 than \$20 million a month, and also convinced ourselves
24 that the present-value economics of the annuity is
25 actually better off than taking the premium from the

1 mortgage market.

2 What we then do is that as the hedge on the --
3 as we hedge to the loan closing, we would then send that
4 to an internal warehouse line that we have. And we would
5 have a healthy debate about whether or not we'll continue
6 to hedge as these mortgages sit in our warehouse line.
7 And then as we accumulate them, we think that if we are
8 reaching that \$20 million threshold, maybe we'll
9 accumulate two or three months of mortgages, and then
10 we'll go into our old tax-exempt Mortgage Revenue Bond
11 market to have a bond financing to take out mortgages.

12 And on the bottom, in the middle there, what
13 you're seeing is that, instead of us getting a premium
14 up-front, we're now kind of generating a small annuity
15 over time.

16 Again, that 10 -- what I'm showing here is
17 about 10 cents per a hundred dollars. That is much lower
18 than the 70 cents that I was showing two slides ago.
19 But what you're hoping is that you're collecting that
20 10 cents for maybe ten years in such ways that the
21 present value of that 10 cents plus, in present-value
22 terms, is greater than that 70 cents that you were
23 collecting two slides ago.

24 So this is, you know -- just to roughly recap.

25 So that we think that if we internalize the

1 hedging function, we can sort of have these branches as
2 possibilities. And, again, not that these are things
3 that we would do today, but these are just branches that
4 can help us deal with some of the risk factors that we
5 have, too. Because we can't get too far along in terms
6 of relying on these up-front premiums to pay for our
7 operations over some intermediate term.

8 Maybe it's okay for a couple years, but not
9 over some intermediate terms.

10 CHAIR JACOBS: So let's talk about the
11 multifamily, if you want to.

12 MR. HSU: Yes.

13 Multifamily, luckily, is a little bit simpler.

14 As I mentioned earlier, in our existing
15 financing resolutions, we don't have the capacity to do
16 hedges. And then coupled with that is that we don't
17 also -- we also do not have the ability to issue
18 variable-rate bonds.

19 So if we are using only fixed-rate bonds to
20 finance our multifamily lending, it does provide certain
21 limitations of what we can provide. And so what I'm
22 showing you here is an example of what those limitations
23 are.

24 So in the upper, sort of half -- on the top of
25 this chart, what you're seeing is a typical multifamily

CalHFA Board of Directors Board Meeting – January 14, 2014

1 transaction in which there was an acq/rehab. I know
2 there is a few construction loans out there, but let's
3 just assume that this is an acq/rehab loan; and that this
4 is most of what we do, anyway.

5 So there's a hundred dollars of an acq/rehab
6 loan due to an acquisition, let's just say for 18 months
7 or so. And then once the project is done, it's leased
8 up, it's placed in service. Around that time is when you
9 kind of expect the tax credits to come in, to pay down
10 the loan.

11 So in this example here, we show that the tax
12 rate is \$60. So you are left with the \$40 loan that
13 amortizes for 30 or 40 years during the rate
14 stabilization period.

15 So how we would finance that kind of borrowing
16 at the moment, if we're only using fixed-rate bonds, is
17 that we would sell \$60 of short-term bonds.

18 So in this example here, I'm showing that
19 \$60 of short-term bonds is going to cost -- the borrowing
20 cost is a dollar -- 1.5 percent. And we would go ahead
21 on day one, sell \$40 of long-term bonds.

22 We do that because we don't have the ability
23 to, let's say, float into variable-rate bonds during
24 acq/rehab or construction, and then use, as I say, a swap
25 to fix our costs beyond the acq/rehab period, right.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 So then if you combine the cost structure of
2 that \$60 and the \$40, and you look at what we can offer
3 during the acq/rehab period, our borrowing cost is
4 actually the 3.1 percent. Because if you look at this
5 box here under the short-term borrowing costs, you will
6 see that 3.1 percent is this average of 60 percent of
7 1.5 percent and 40 percent of the 5.5 percent.

8 So that borrowing cost of 3.1 percent, to be
9 kind, it's not extremely competitive in the marketplace.

10 Our long-term borrowing, however, it's not bad.
11 But the short-term piece is where we kind of get a lot of
12 discussions about how they can get better rates from the
13 private market place. And it's fair. But it's some --
14 that's why I'm showing you this. This is sort of some of
15 the inherent limitations that we have, given the tools
16 that we have.

17 So on page 12, what we're suggesting is that if
18 we combine the public and the private cost structures, we
19 could potentially end up with a more attractive product.
20 We don't know this for a fact, but potentially -- and
21 I'll show you why this is the case.

22 So it's quite possible that we could say to
23 someone who has a project, that "Well, why don't you go
24 ahead and get your short-term loan from a bank who is in
25 your region who wants the CRA credits, who likes the fact

CalHFA Board of Directors Board Meeting – January 14, 2014

1 that they're getting a fee on a hundred dollars and not
2 on \$40?" You know, there's just a lot of nice -- and
3 it's a shorter loan, they like the short loans better
4 than the longer loans.

5 And, you know, some of them have sort of
6 construction lending, sort of monitoring compliance.
7 You know, there are a lot of reasons why they want that
8 short-term piece, and less favorable on the long-term
9 piece.

10 So what we could suggest is that, well, go
11 ahead and get that short-term loan from your CRA bank;
12 and what we would do is that we would enter into, at the
13 moment, the illustration here is a forward-rate option.
14 I won't go into too much. This is actually described in
15 the hedge policy that is also attached.

16 And in so doing, we can commit to offering them
17 a rate, let's say, 18 months from now or 24 months from
18 now, without having to -- because we would actually issue
19 the bonds later on, without having them to sort of tie
20 them to using us as both the short-term piece and the
21 long-term piece.

22 But one of the things I have mentioned here is
23 that "can result" and not "will result," is that it's
24 quite possible, though, if we do that, that that
25 long-term borrowing piece would actually have a slightly

CalHFA Board of Directors Board Meeting – January 14, 2014

1 higher cost of borrowing than if we were to borrow right
2 away. And that's -- this is inside baseball. That's, in
3 large, part because your curve is generally positively
4 sloped, so that a forward-rate tends to be higher.

5 So, you know, what this amounts to, is that
6 this -- we're creating a possibility of possibly letting
7 the borrowers not be sort of wedded to the thought that
8 "I need to get all of my borrowing needs from CalHFA,"
9 because we do hear that out there. "What we really want
10 from CalHFA is a perm piece and not necessarily a short
11 piece," because they can get a short piece from the banks
12 at a cheaper rate. So this is creating that possibility
13 as well.

14 CHAIR JACOBS: But for the developer, there is
15 real value to the certainty of the perm rate? I mean, I
16 think anybody would love that.

17 MS. BOATMAN PATTERSON: Why is it that you
18 can't hedge in multifamily? Is it because of the
19 fixed-rate bonds? Is it because of the money -- the
20 actual money that you're using, the funding source?

21 MR. HSU: So right now, in the financing
22 resolutions, we just don't have authority from the Board
23 to enter into sort of synthetic hedges, where -- like,
24 you know, interest-rate swaps and whatnot.

25 MS. BOATMAN PATTERSON: Right.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. HSU: So in order to, let's say, lock in a
2 perm rate for someone that is going to transition into a
3 perm loan in 18 months, we would sell those victory
4 bonds today.

5 So we sort of lost that ability to do that
6 because we were managing the legacy risks that we have
7 from our swap portfolio.

8 So one of the things about this forward-rate
9 option that we are talking about here -- again, this is
10 described more in detail in the hedging policy -- is that
11 we think that this particular option may actually, on
12 balance, be slightly costly, but it would probably not
13 continue to add on to some of our legacy swap-related
14 collateral posting risks on balance.

15 And we can talk a little bit more about that at
16 the next board meeting.

17 But it's described in detail in the hedging
18 policy that's attached; and that hedging policy, we have
19 draft over it, it is a work-in-progress, and we are
20 trying to put much more details in that policy.

21 MS. WHITTALL-SCHERFEE: Tim, does this impact
22 the Agency's ability to allow prepayment in Year 17
23 because we're going with this long-term bond? And also,
24 how does this work towards making the Agency more
25 competitive compared to other banks?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. HSU: Well, I think that in reverse -- how
2 it will make us more competitive, I think, is that we are
3 suggesting to them that if you use us in combination with
4 some other bank, you might end up with an overall lower
5 cost of funds than if you have to come to us for
6 everything.

7 MS. WHITTALL-SCHERFEE: You're talking about
8 here, a higher interest rate on the perm loan?

9 MR. HSU: Right. But that's because
10 potentially they're saving between 3.1 percent from the
11 previous slide, versus paying 1.5 in the short-term, if
12 they get the short-term borrowing from a bank.

13 So that's why I said if this -- I'm not certain
14 this will definitely work. I think this could be a
15 little bit situational. Because the borrower may decide
16 that 3.1 percent up-front versus a 5.5 borrowing on a
17 perm, I actually like that better than the -- again,
18 these are just examples -- that I may actually like that
19 better than the 1.5 during the acq/rehab period and at a
20 slightly higher rate on a perm piece.

21 MS. WHITTALL-SCHERFEE: But CalHFA could still
22 allow prepayment in Year 17, and it wouldn't impact your
23 scenario that you've laid out? Or would CalHFA be going
24 back to more of the 30 due in 30, 15 due in 15, 40 due in
25 40?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. HSU: We can still offer the 17 prepay.

2 MS. BOATMAN PATTERSON: So the cost on this
3 product is the cost on the front end, on the short-term
4 financing? That's what makes it so expensive?

5 MR. HSU: I'm sorry?

6 MS. BOATMAN PATTERSON: The construction
7 loan -- our construction loan piece isn't as competitive
8 in the market because you can go out and get a
9 construction loan for sometimes cheaper than what you
10 can get it through us. And so the idea is to offer
11 potentially just permanent financing as opposed to the
12 whole enchilada because then it could be more
13 competitive?

14 MR. HSU: That's right.

15 MS. BOATMAN PATTERSON: And so why are our
16 construction loans so costly, I guess, is what I'm
17 asking? Is it a capacity issue? Is it because we
18 historically didn't do construction loans and then we
19 started doing them?

20 I mean, what's the rationale as to why our
21 construction piece is not as competitive?

22 MR. HSU: So if you go back to page 11. So
23 what I'm showing, is that the reason why -- so there's
24 what I think of is sort of -- in your mind, sort of
25 matching durations. So someone may think that, well, if

CalHFA Board of Directors Board Meeting – January 14, 2014

1 I'm borrowing for an acq/rehab for 18 months, my cost of
2 funds should be short-term cost of funds, right? That's
3 what a lot of people would think.

4 But because, if you look at the middle of this
5 chart here, because we need to -- we don't have this
6 ability to transform our long-term cost of funds into
7 short-term cost of funds -- and I'll tell you how we used
8 to do that in a second -- we are actually borrowing
9 long-term already. We're already borrowing 30 years --
10 actually, 32 years, because we're doing a 30-year perm
11 plus two years as an acq/rehab. So we're already
12 borrowing 32 years on \$40 of the loan from day one. And
13 that averaging is making our short-term borrowing go up.

14 So how we used to do this -- and I'm not
15 pitching this -- how we used to do this is that we used
16 to sell variable-rate bonds.

17 MS. BOATMAN PATTERSON: For the construction
18 piece?

19 MR. HSU: During the construction period.

20 So we say, we will sell variable-rate bonds,
21 and the variable-rate bonds would last for 32 years. And
22 then we'll do a forward-starting swap that starts in
23 24 months. So that when it gets placed in service, our
24 cost of fund is synthetically locked.

25 So that's how we transformed during that

CalHFA Board of Directors Board Meeting – January 14, 2014

1 acquisition and construction period, transformed
2 something that looked like long-term into short-term,
3 because we had this variable-rate bonds that gets reset
4 every week.

5 But I think you would agree that that's not
6 something we ought to do now.

7 MS. BOATMAN PATTERSON: Got it.

8 CHAIR JACOBS: So our homework, I guess, is to
9 read this, understand it, and then we come back to you
10 with a bunch of questions.

11 MR. HSU: Now, that doesn't sound like fun
12 anymore, Matt.

13 But as I mentioned, that this is informational.
14 I hope you would agree -- we talked about this -- I hope
15 you would agree that having this presentation is useful
16 as we go into the consideration in March, so that you're
17 not sort of jammed into one piece.

18 So what we are hoping is that at the March
19 financing resolution, we would ask for this authority to
20 do that. And with many of your comments noted are things
21 that we'll work on. Like Janet's thought about creating
22 some sort of capped exposure. We'll think about that,
23 and maybe memorializing that in our procedures, and also
24 the thought about operations.

25 So we'll -- I think, as I mentioned earlier, we

CalHFA Board of Directors Board Meeting – January 14, 2014

1 are making a conscious effort to elevate our engagement.

2 And these comments are invaluable to the staff.

3 CHAIR JACOBS: Do we have any other questions
4 from the Board?

5 *(No response)*

6 CHAIR JACOBS: Any members of the public,
7 questions on any of these informational items?

8 *(No response)*

9 CHAIR JACOBS: Thank you, Tim.

10 MR. HSU: I'm sorry I took so much time.

11 CHAIR JACOBS: It's important stuff.

12 --o0o--

13 **Item 6. Update on CalHFA's Strategic Business Plan**

14 CHAIR JACOBS: And I guess we're moving to
15 Item Number 6, which is Claudia's update on the Business
16 Plan.

17 MS. CAPPPIO: Thank you.

18 Each year, CalHFA has been doing a Strategic
19 Business Plan that is developed and then reviewed by the
20 Board. And we thought a good first step as we begin the
21 year, would be to provide the Board with an overview of
22 where we are, given last year's plan, in terms of our
23 objectives and the actions we have taken.

24 I think we have acknowledged the huge progress
25 we have made. But as the leader here, I also have to

CalHFA Board of Directors Board Meeting – January 14, 2014

1 pound on people about what initiatives have been left by
2 the wayside or left partially done, and what we're going
3 to do about them, and whether they should be carried over
4 to our Business Plan in the coming year.

5 As we enter into a new cycle, I thought I would
6 take the opportunity to review these priorities with the
7 Board, and also to provide a sequence of what we will do
8 between now and May. So this meeting is about reviewing
9 the Business Plan from last year and giving you a status
10 report. And we also thought it would be a great
11 opportunity for the new Board members to hear just a
12 little bit from senior staff about the programs, the
13 operations of the Agency.

14 And then in March, we will be putting forth a
15 draft Business Plan for your review and consideration,
16 but not action, in anticipation of May, being both the
17 final action on the Business Plan and the budget for
18 '14-15. You all have that authority as we are a
19 continuously appropriated agency.

20 So for the first time in my tenure, the
21 exciting piece is that we have the ability to look out
22 more than a year, because as Tim said, I took over in
23 2011. And, frankly, I thought, "Am I going to wind this
24 agency up, or am I going to wind it down?"

25 So we're rolling. And it is really great to be

CalHFA Board of Directors Board Meeting – January 14, 2014

1 able to look out into a time horizon longer than a year.

2 And then the directors and division heads will
3 be designated during this presentation to run through a
4 summary of our status. And I believe that probably the
5 most appropriate sequencing is that as questions come
6 up or comments come up, we will deal with them directly
7 at the time that you have them.

8 So with that, Tony Sertich from Financing will
9 begin.

10 Thank you.

11 MR. SERTICH: Thank you, Claudia.

12 My name is Tony Sertich. I'm the Financing
13 risk manager for the Agency. I work under Tim. I'm just
14 giving him a little break since he has been talking for
15 the last hour.

16 I will go quickly through the first couple
17 slides, and then we'll pass it off to the next group.
18 So the first key strategy that we had in the strategic
19 Business Plan for this fiscal year, was to increase the
20 stability of the capital structure and the liquidity
21 position of the Agency.

22 We believe that we have actually accomplished
23 this, for the most part.

24 The first goal was to reduce our variable-rate
25 debt obligation balance by \$450 million by February 1st

CalHFA Board of Directors Board Meeting – January 14, 2014

1 of 2014. We have actually reduced it by over
2 \$490 million. So this sort of gets back into the
3 question of, how are we going to get out of the
4 obligation we have to the federal government under the
5 Temporary Credit and Liquidity facility.

6 We have, as Tim had mentioned earlier, about
7 just over \$1 billion remaining in this obligation. And
8 so we have two years left to get out. If we were to
9 continue at our around a \$500-million-a-year pace, we
10 will get out of it. It's probably unlikely to continue
11 at that pace, but we think we have other tools in our
12 toolbox now to get out of this.

13 The other strategy was to reduce our swap
14 notional amounts. And this is our legacy swaps. Not as
15 Tim talked about earlier, any future swaps we're doing.
16 But the goal here was to reduce our swap notional balance
17 by \$400 million. We reduced it by \$418 million over the
18 last year. So, again, we accomplished that.

19 This, the notional balance is decreased through
20 two measures. One is a natural amortization of our swaps
21 over time. The other larger factor is, when we entered
22 into the swaps initially, we bought par termination
23 options; and over the last three or four years, we've
24 exercised every possible par termination option available
25 to us to reduce this balance. And we plan on continuing

CalHFA Board of Directors Board Meeting – January 14, 2014

1 to do that going forward.

2 So that -- the swap notional balance is
3 currently at just over \$1.5 billion. And we hope to
4 continue reducing that in the future as well.

5 And I will pass this on if there are no
6 questions.

7 CHAIR JACOBS: Just in terms of overhedging and
8 underhedging, are we pretty appropriately hedged right
9 now?

10 MR. SERTICH: If you look at this chart right
11 here, we are right about fully hedged at this point.

12 In the past, we've always been slightly
13 underhedged, and that's been the strategy.

14 Part of reducing the TCLP balance so
15 dramatically has gotten us to a level hedging position,
16 which actually has worked out okay because we have also
17 been much more aggressive about using cash, which is
18 often invested in variable-rate investments. So we don't
19 have much of that, either. But it's something that we're
20 tracking pretty closely, now that we've reduced that
21 ratio significantly.

22 CHAIR JACOBS: In terms of getting rid of the
23 TCLP, what do the sensitivities look like if the rates
24 move up -- I don't know, a hundred points -- or down in
25 the next 12 months?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. SERTICH: You know, in terms of -- I mean,
2 since we are fully hedged from a risk exposure --

3 CHAIR JACOBS: It doesn't matter at all?

4 MR. SERTICH: -- we're not there, we're not
5 really at risk there; but it does affect sort of the --
6 if we're going to refund out of it, or something like
7 that, it may affect the strategies we use to get out of
8 TCLP.

9 CHAIR JACOBS: Anything else?

10 *(No response)*

11 CHAIR JACOBS: All right, thank you.

12 A few more informational items here.

13 MR. OKIKAWA: Good morning, Mr. Chairman,
14 Members of the Board. My name is Rick Okikawa. I'm the
15 program administrator for CalHFA. I oversee the
16 multifamily lending, single-family lending, single-family
17 portfolio, and single-family loan servicing, as well as
18 the multifamily asset management.

19 A little bit about my background. I have
20 worked in private practice as an attorney, and then
21 started with CalHFA in approximately 1991, and worked
22 there since, and have subsequently retired.

23 And after this financial crisis and things
24 we've seen late, you know, having been dedicated to this
25 Agency and putting a lot of time and effort into this

CalHFA Board of Directors Board Meeting – January 14, 2014

1 Agency, we wanted to see this Agency come back. And
2 under Claudia's leadership, we saw some good signs. And
3 I definitely wanted to come back.

4 As of last September Board, I was given the
5 opportunity to become the program administrator. And I
6 guess the good news about that is, it's no longer subject
7 to the bad attorney jokes, and I'm now an administrator.

8 Anyway, moving forward, we'd like to proceed,
9 as Claudia was saying, in that there's a lot of new Board
10 members here. So we greatly appreciate questions.

11 What we're at is, we're working at the basic
12 ground level, when we're going through the strategic
13 plan. And, obviously, business 101, with the strategic
14 plan, that is the core of the business. And oftentimes,
15 we're given here a unique opportunity because oftentimes,
16 our chief of our divisions don't present -- not that they
17 don't contribute, because they contribute very fully,
18 it's just that you never see what they do unless you see
19 it in terms of what the charts like Tim was showing and
20 in terms of our ratings, in terms of how we're saving
21 money.

22 And so beginning with our first department,
23 we're talking about portfolio management, single-family
24 portfolio management. And oftentimes, this is
25 overlooked.

1 But I may steal some of Nick's thunder here.
2 But part of, you know, portfolio management over the
3 years, with the single-family, we used to sell bonds --
4 billions of dollars' worth of bonds. And with those
5 billions of dollars' worth of bonds, what we did is we
6 purchased single-family loans from, say, about 75 of our
7 approved lenders.

8 So looking on the slides, on the PowerPoint,
9 starting on page -- I believe it's page 4, we have
10 presented, forward, some PowerPoints. And in that, it
11 shows that over the period of time we have bought, like,
12 \$2.8 billion of single-family loans.

13 And considering there is approximately about
14 a 12 percent delinquency ratio, we're looking at about
15 \$340 million at risk.

16 So we do pay very strong attention to our
17 single-family portfolio.

18 And, you know, we want to give you a little
19 picture about where we've been, where we are now, and
20 where we're going. And Nick has gladly stepped up, and
21 he is now our acting chief of Portfolio Management.

22 And these people, like I say, are on the ground
23 level. They can answer any questions you may have. But
24 they can give you also a good picture of where we're at
25 and where we're going.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 So in terms of following this, and for the
2 Board's convenience, we have organizational charts, which
3 all of you have. And Nick is on the organizational
4 chart, he is on page 12, if you want to...

5 This is for your own reference.

6 And as well as we have this -- we will call it,
7 the terms and acronyms. And, as you know, CalHFA seems
8 to have its own language. And I still refer to a lot of
9 the acronyms myself.

10 But without further ado, I'd like to go forward
11 with Nick.

12 And we can start with some of the PowerPoint
13 presentations, I believe on page 4.

14 Nick?

15 MR. KUFASIMES: Super.

16 Good morning, Chairman of the Board and Board
17 Members.

18 As Rick mentioned, my name is Nick Kufasimes;
19 and I'm the acting chief on the Portfolio Management.

20 A little background on myself: I have been
21 in the real estate business for over 24 years now.
22 Approximately over 10 years in the private sector and
23 13 years with the Agency in various departments, but
24 four years with Portfolio Management. My job previously
25 with Portfolio Management was the REO sales and Loss

1 Mitigation.

2 To start the first slide, Portfolio Management
3 is divided into three units. The first is Loss
4 Mitigation Unit. We have a team of SPOCs, which are
5 "single points of contacts," that deal with people that
6 are in pretty tough situations and are applying for a
7 loan mod or a short-sale. Now, these single point of
8 contacts deal primarily with the CalHFA servicing
9 portfolio.

10 The other part of my team is a team of
11 underwriters that deal with the loan mods and short
12 sales. So every servicer out there that processes a
13 short sale or loan mod submits it to the investment side.
14 We review it, we approve it, suspend it, or deny that
15 loan mod or short sale.

16 The second part is the REO Disposition Unit.
17 So when the home is foreclosed on, we take over that
18 property, and we improve it, pay the expenses on it, all
19 the way to the sale of the property.

20 And the third part is the Servicer
21 Administration Unit, which is a team of auditors that we
22 have that audit daily through reports of all of our
23 servicers monthly and every year travel on-site to every
24 servicer's location and audit the files in person.

25 The next slide, as Rick mentioned, currently

CalHFA Board of Directors Board Meeting – January 14, 2014

1 our portfolio has 17,440 single-family loans which
2 equates to \$2,826,986,000.

3 9,442 of those are conventional loans, which is
4 sixty- --- almost 69 percent of our portfolio. 7,998 are
5 government-insured.

6 Approximate overall delinquency is at
7 12 percent. So we have \$339 million-plus that is
8 delinquent at this time.

9 Portfolio Management. The real estate and
10 lending market is always changing, so what we're always
11 trying to do is keep our process and our policies up to
12 date, and change with the market all the time.

13 So in 10 of 2009, we converted everything from
14 paper to electronics. So we have master servicers -- I'm
15 sorry, master brokers that we deal with out there that
16 hire all the listing agents that put together marketing
17 packages for us, which consists of appraisals,
18 inspection, and broker price opinions and other items.

19 But we found it easier to deal with
20 electronically the intake of that and be able to process
21 everything internally electronically.

22 In January 2013, we did the same with the short
23 sale. We converted everything to electronics, so every
24 servicer is able to submit a short-sale package
25 electronically through our secure site to us. And

CalHFA Board of Directors Board Meeting -- January 14, 2014

1 internally, everything is done electronically.

2 In February of 2013, we did the same with the
3 Loan Modification Unit. Again, we created secure sites,
4 and everything was done electronically.

5 CHAIR JACOBS: *Keep Your Home California*, how
6 do you interact with them, and sort of organizationally,
7 how does that work?

8 MR. KUFASIMES: With *Keep Your Home California*,
9 we primarily deal with them on loan modifications. So --
10 I'll go into another slide as far as how we utilize them
11 in the outreach on that.

12 And if you have any questions after any slides,
13 please let me know.

14 MS. CABALLERO: I have a question in regards to
15 the delinquency ratio that you mentioned of 12 percent on
16 page 6.

17 MR. KUFASIMES: Yes.

18 MS. CABALLERO: How does that compare to
19 historical delinquency rates?

20 It seems really high to me, and I'm just trying
21 to get my head around the 12 percent. And I get that
22 we've come through the worst economic -- all that kind of
23 stuff.

24 MR. KUFASIMES: Exactly.

25 MS. CABALLERO: It just seems high, and I'm

CalHFA Board of Directors Board Meeting – January 14, 2014

1 thinking.

2 MR. KUFASIMES: I don't have the numbers as far
3 as past history at this time, but...

4 MR. OKIKAWA: That is about the rate for our
5 servicers, all servicers combined. So that's not an
6 uncommon rate.

7 We can get other rates, if you -- we can get
8 that sort of information if you wish, and we can bring
9 that to the next board.

10 MS. CABALLERO: *(Nodding head.)*

11 MS. BOATMAN PATTERSON: I think she wants to
12 know historically what our default rate has been, too.

13 MS. CABALLERO: Yes.

14 MR. OKIKAWA: Oh, I'm sorry.

15 MS. BOATMAN PATTERSON: And if I remember
16 correctly, pre-2008, you guys were down around 3 percent,
17 5 percent.

18 MR. OKIKAWA: Yes.

19 MS. CABALLERO: And I guess the thing that I'm
20 thinking about is just that, you know, if you see the
21 investment in a single-family home as one of the biggest
22 investments you'll make --

23 MR. OKIKAWA: True.

24 MS. CABALLERO: -- and how hard it is to get
25 into homeownership, it would be good to know a little bit

CalHFA Board of Directors Board Meeting – January 14, 2014

1 more about -- at least right now, if our historical is
2 3 percent, what's driven this, if it's unemployment, then
3 that's understandable. I'm just wondering if part of the
4 challenge is that it's a lot harder to own and keep up a
5 home than one would think. And so that's a different
6 issue.

7 And I'm wondering if we have partners that
8 could come along and help homeowners that are new.
9 Because we service the riskiest -- or the most risky
10 homeowners.

11 I mean, I'm just thinking this through.

12 12 seems really high to me, and I'm just -- I'm
13 concerned about it because we are unlikely to get these
14 individuals into a home again. And so once they're
15 there, we just -- it seems to me, we ought to be working
16 really hard to make sure that they can stay there. So
17 that was just my thought.

18 MR. PRINCE: And Mr. Hsu, is that right. Hsu?

19 MR. OKIKAWA: No, Rick Okikawa.

20 MR. PRINCE: But Tim earlier talked about the
21 portfolio is a different demographic. And I didn't -- I
22 don't want to say I didn't buy it, but I didn't buy it.

23 That it seems to me if you have good
24 underwriting, you can service first-time home buyers or
25 low-income and not have that 12 percent loan default

CalHFA Board of Directors Board Meeting – January 14, 2014

1 rate. And so it did bounce around my head.

2 I thought the default rate has dropped down to,
3 like, 10 and a half percent. I thought I read that in
4 the financial report leading -- okay, so I would love to
5 understand the default rate, the history, why is it
6 there.

7 I agree with the Secretary that maybe there are
8 other programs that could come in and help stabilize
9 families. But it seems to me, it's also about
10 underwriting within this population, so...

11 MS. BOATMAN PATTERSON: Which is I think is why
12 the Chair wanted to know what the interaction was with
13 *Keep Your Home California*. Because if that *Keep Your*
14 *Home California* can be working to reduce our default
15 rate, we -- and I'm sure Di is already working on that,
16 but I think that should be working in connection with one
17 another.

18 MR. OKIKAWA: And, yes, we are. And future
19 slides, we'll show how that applies.

20 CHAIR JACOBS: And I just think it's clear,
21 when you look at the geographic distribution on the
22 following exhibits, I mean, it relates to the counties
23 where there's job troubles.

24 MR. OKIKAWA: Definitely.

25 MR. KUFASIMES: So with electronic, it means

CalHFA Board of Directors Board Meeting – January 14, 2014

1 quicker turnaround times, which is less loss in expenses
2 to the Agency.

3 The next slide. The next slide after that.

4 So with REO, as I mentioned, we converted
5 everything to electronic. We created an internal
6 approval process. We implemented electronic signatures
7 for residential contracts. And with the electronic
8 information that we were receiving, we were able to track
9 the statistics, trends, and report on the sales of the
10 REOs, and better utilization with staff.

11 So, as an example, where we were dealing with
12 paper, it was X-amount of REOs per manager. When we went
13 to electronic, we were able to increase that amount per
14 manager.

15 The next slide?

16 So in the last quarter of 2012, we were seeing
17 the market increasing. So what we decided to do, was put
18 a pricing strategy together for the REOs.

19 So what I do is, every three months, I track
20 the sales of the REOs in the past and determine what
21 we're getting over the appraised value and was priced.
22 So by implementing those per county, which goes to the
23 next slide, we were able, in 2013, to average 120 percent
24 of the appraised value. So what that means is less loss
25 to the Agency.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 The total we had, REOs received were 277. We
2 sold 306. And currently, we have 91 REOs in inventory.

3 Now, with the REO pricing strategy that we put
4 in place, we applied that to the short sales. So with
5 short sales, we average 108 percent of the appraised
6 value on the short sales that we sold, and 109 percent of
7 counter.

8 So from the offers that came in, we were able
9 to get 9 percent more by this pricing counter strategy
10 that we have.

11 Regarding the loan mods. So what we did is, we
12 converted everything to electronic to be able to track
13 the information that's coming in.

14 What we're doing is more outreach to our
15 servicers.

16 Regarding CalHFA's loan servicing, when anybody
17 comes through the door, we immediately refer them to *Keep*
18 *Your Home California*. So we're trying to utilize
19 those dollars. So we hold them accountable to either get
20 a "yes" or a "no" from *Keep Your Home*.

21 If they do get denied, we move them on to an
22 alternative loan-modification program. If that doesn't
23 work, then we do have the short sale or the rental option
24 for that borrower.

25 But, again, we do a lot of outreach right now

CalHFA Board of Directors Board Meeting – January 14, 2014

1 with the outside servicers to get them on board with *Keep*
2 *Your Home*, and utilize those dollars.

3 MS. SOTELO: Excuse me, Nick?

4 MR. KUFASIMES: Yes.

5 MS. SOTELO: Do you have a correlation between
6 your delinquency rate and your actual foreclosure rate?
7 Like, how many of those 12 percent of delinquencies
8 actually go to foreclosure? Or will go to foreclosure
9 based on historical data?

10 MR. KUFASIMES: I understand what you're
11 saying. Of the 12 percent, how many of those actually
12 truly -- what percentage were we able to put in some kind
13 of program?

14 MS. SOTELO: Yes, how many default? I mean,
15 how many do you cure -- or are cured?

16 MR. KUFASIMES: Yes, I don't have that
17 information at this time.

18 MS. SOTELO: To me, it would just be -- you
19 know, just in the context of understanding delinquencies
20 and how we support the families that we --

21 MR. KUFASIMES: Exactly, yes.

22 MS. SOTELO: -- loan to, just understanding how
23 many get successfully through this program.

24 MR. KUFASIMES: Agreed.

25 CHAIR JACOBS: Are we testing when a house is

CalHFA Board of Directors Board Meeting – January 14, 2014

1 marketed for short sale, if the listing broker actually
2 returns phone calls of people that are interested?

3 Because I know the private banks, there is
4 endemic fraud where a house is, you know, put up for a
5 short sale, the broker is not returning any phone calls
6 because the cousin or the friend has been preselected.

7 MR. KUFASIMES: Exactly. We don't own that
8 home when it's a short sale, so it's the responsibility
9 of the borrower to hire the listing agent.

10 All we know is by the offer received and our
11 data that we have on those markets, is that we're getting
12 a fair price. I wish there was something in place to
13 know exactly if that agent was doing their job.

14 The next slide, Trustee Sale Bid. We're always
15 looking at ways to sell the properties before they do
16 become an REO.

17 We looked at being able to sell the property at
18 the trustee sale at the court steps.

19 Part of being able to bid at the court steps
20 is, we would need the information immediately on the
21 foreclosure process.

22 So prior to 2012, we were receiving everything
23 by paper. So what we did is come out with Bulletin
24 2012-9, and we created secure sites to where our
25 servicers can send the information to us, to where we can

1 get that information in a time frame in order to get
2 those bidding instructions out to the servicers when they
3 put the bid in for the trustee sale.

4 So it's just a way to be able to sell that
5 property at value at the steps before it did become an
6 REO. So ways to save the Agency money.

7 REO Rental Program. Back four years ago, on
8 the homes we foreclosed on, we saw a lot of people had
9 vacated the property. Three years ago, we saw -- we were
10 foreclosing on homes where the borrowers stayed in the
11 property. And two years ago, we saw a lot of homes that
12 we were foreclosing had tenants on the properties. Now,
13 with a tenant, you can't evict them from the property if
14 they have a valid lease. So we didn't have a process in
15 place to deal with occupants that did have valid leases.
16 So what we did is negotiated with our master servicers,
17 who are the ones in charge of hiring the listing agents
18 to the properties. So what they would do is
19 property-manage that property the term of the lease. And
20 we would let the borrower -- or the tenant know that, you
21 know, we wouldn't continue the lease, but we would abide
22 by that lease during that time period that they could
23 stay in that home.

24 In 2013, we came -- Bulletin 2013, we changed
25 the guidelines on the policy as far as an individual or

CalHFA Board of Directors Board Meeting – January 14, 2014

1 borrower renting their home. Prior to 2013, a borrower
2 had to have a financial hardship in order to rent their
3 home, and they had to qualify with that mortgage payment
4 if they did move out.

5 In 2013, we did change the policy. So as an
6 example, the numbers I have, we approved 52 prior to
7 that. Forty-four were denied prior to 4/13.

8 When the new program bulletin came out, we had
9 approved 327, and 18 were denied. And the reason they
10 were denied is that the borrower was not current on their
11 mortgage.

12 HARP Refinance --

13 MS. BOATMAN PATTERSON: I have a question.

14 MR. KUFASIMES: Yes.

15 MS. BOATMAN PATTERSON: So if they want to rent
16 the home, it's because they can't afford the mortgage.
17 So how could they ever be current on their mortgage if
18 they're in the rental program? I don't get that.

19 MR. KUFASIMES: Well, you have to be current
20 first in order to rent your property out.

21 MS. BOATMAN PATTERSON: Oh, you mean rent it to
22 someone else? So you're --

23 MR. KUFASIMES: Exactly.

24 MS. BOATMAN PATTERSON: So I'm the homeowner,
25 and I want to rent my home to someone else.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 So this rental policy doesn't really apply to
2 the homeowner who is foreclosed upon? This is applying
3 to people who are in their home --

4 MR. KUFASIMES: Exactly.

5 MS. BOATMAN PATTERSON: -- and want to rent it
6 to someone else?

7 MR. KUFASIMES: Exactly.

8 MS. CAPPPIO: And through the Chair, we used to
9 have a very strict definition, because the loan that we
10 give homeowners basically assumes owner occupancy.

11 MS. BOATMAN PATTERSON: Okay.

12 MS. CAPPPIO: But given the state of the real
13 estate market, we had to deal with reality. And part of
14 that is, that homeowner would quite often be able to sell
15 their house in a healthier real estate market but can't.
16 So due to life circumstances, a change that in the job
17 location, education, whatever, this is an interpretation
18 that we believe still is consistent with the indenture.

19 MS. BOATMAN PATTERSON: So this allows a
20 homeowner to rent their property out?

21 MS. CAPPPIO: Yes.

22 MS. BOATMAN PATTERSON: Okay, I was getting
23 confused with REO rental programs and this rental policy.

24 MR. KUFASIMES: Exactly.

25 MS. BOATMAN PATTERSON: I'm like that doesn't

CalHFA Board of Directors Board Meeting – January 14, 2014

1 even make any sense.

2 MR. KUFASIMES: You can get mixed up with those
3 two.

4 MS. BOATMAN PATTERSON: Okay.

5 MR. KUFASIMES: Exactly.

6 The majority of what we saw with people wanting
7 to rent their homes is, a lot of the individuals bought
8 at the height of the market. So they might have bought a
9 single one-bedroom home. They got married and now they
10 have a family, so they would need to move on to a bigger
11 space.

12 But a person that is delinquent can bring their
13 loan current, and we would approve them to rent their
14 home out.

15 HARP Refinance. That is not part of the
16 portfolio. But what this does, is helps our insurance in
17 CalHIF.

18 There were 500 loans that came in the door as
19 CALHFA loans. They were sold to Fannie Mae. They are
20 being serviced by Bank of America.

21 So Bank of America did not want to participate
22 in the program, so we did find one of our approved
23 lenders -- Guild is the one -- that was able to refinance
24 47 of those 500 loans that are owned by Fannie Mae but
25 insured by CalHIF. So these were 47 loans that could

CalHFA Board of Directors Board Meeting – January 14, 2014

1 have potentially become foreclosures that we were able to
2 keep them in at a lower rate.

3 FHA HAMP. The HAMP program came out in about
4 2009. We were able to get a variance from HUD to not
5 lower the rate or extend the term on the program. Again,
6 with the HUD HAMP program, the rate is lowered and -- if
7 you want to --

8 MR. OKIKAWA: Yes, with the HAMP program, you
9 can basically lower the rates and extend the term.

10 So how does that work if our servicers are out
11 there able to lower the rates, they extend the term?
12 That affects us, obviously, because it now becomes a
13 permanent loss. So then if your interest rate goes down,
14 that affects us. It's related -- if the length of the
15 time goes on, it affects us.

16 So how this works is, because we got this
17 exemption from HUD, we're able to require our outside
18 servicers, our servicers so that they cannot do that.
19 They cannot do the lowering of the interest rate, they
20 cannot extend the term. However, we have the exception,
21 that ability to do so with CalHFA.

22 How do we do that? We usually do that with
23 KYHC. Because if you're able to reduce the principal
24 under the PRP program -- I'm not saying this is
25 exclusive, I'm just saying that this is a good example --

1 if you're able to reduce that principal, and we're
2 thinking "Oh, well, now it's gone from \$200,000, down to
3 \$100,000, maybe an interest reduction or an extension of
4 the term isn't a bad thing, because now the principal is
5 much lower."

6 So we have that flexibility to do so, as well
7 as Guild, who is one of our -- this is the next slide --
8 who has also been very, very active in KYHC.

9 So Mr. Chairman asked, in response to earlier
10 questions, how we deal with KYHC. This is part of that,
11 a part of that package.

12 MS. SOTELO: So from a policy perspective,
13 we're still able to maintain our target market in their
14 homes but not necessarily -- I mean, do it directly with
15 them as opposed to working through our servicers to do
16 that?

17 How does that work?

18 I mean, from a policy perspective, we're still
19 able to keep the individuals housed as opposed to -- and
20 we're able to restructure their debt so that they're not,
21 you know, foreclosed upon?

22 MR. OKIKAWA: Correct. And as well, not only
23 that they are able to maintain and stay in their homes,
24 we made modifications, et cetera, it also prevents,
25 obviously, foreclosure and potential --

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MS. BOATMAN PATTERSON: Through our servicers?

2 MR. OKIKAWA: Yes, through our servicers.

3 MS. BOATMAN PATTERSON: Okay. And do you have
4 policy guidelines or something that -- circumstances of
5 when it dictates when we will basically do an in-house
6 modification, I guess it's what it would be, to extend
7 the term? So our servicers can't do that, but we can do
8 it internally?

9 MR. OKIKAWA: Right.

10 MS. BOATMAN PATTERSON: And so you have a set
11 of guidelines or something that you've adopted to say
12 that under these circumstances is when we will do that?
13 I'm asking.

14 MR. KUFASIMES: Well, the in-house and also
15 with an outside servicer, you're allowed to do it. But
16 it was done on a pilot program where they are allowed to
17 do.

18 MS. BOATMAN PATTERSON: I thought you just said
19 the loan servicers couldn't do it, that we could only do
20 it in-house, that we had the ability to do it in-house?

21 MR. KUFASIMES: We had the ability -- on the
22 HAMP program, we have the ability to do it in-house. And
23 we have one other servicer that is allowed to do that,
24 which is Guild, on that program.

25 MS. BOATMAN PATTERSON: Okay, and so then my

CalHFA Board of Directors Board Meeting -- January 14, 2014

1 question was, have you adopted a set of circumstances or
2 guidelines or policies as to when it would be appropriate
3 for you to extend the terms or reduce the rate for those
4 individuals -- for that small population under the HAMP?

5 MR. KUFASIMES: With the FHA HAMP model, it's
6 done through a model, so there's a series of stages that
7 you go through in order to get to the point where you
8 lower the rate.

9 There is a principal-reduction component of it,
10 too. But you get down to the model of the lower the rate
11 in order to get them into a DTI that's acceptable to the
12 model.

13 So they do run a model to where they get to the
14 lower rate.

15 So as an example, they don't come through the
16 door and automatically get that lower rate. There's a
17 model they have to run through in order to get to that
18 lower rate.

19 MS. BOATMAN PATTERSON: Okay.

20 MR. KUFASIMES: Our servicer administration
21 unit, we're working with I.T. currently to create an
22 electronic data servicer administration system.

23 As I mentioned before, there's a lot of
24 information we get from our outside servicers. So we
25 need to have a system to have everything be inputted to

CalHFA Board of Directors Board Meeting – January 14, 2014

1 and able to dissect in order to come out.

2 And what we're looking at is coming out with a
3 score card to where we could start rating these servicers
4 that are servicing our portfolio.

5 Another part of the service administration that
6 I mentioned before is that every servicer we're looking
7 carefully at right now, that they utilize those *Keep Your*
8 *Home* dollars, we're putting a lot of pressure on them
9 right now.

10 We do see every loan mod; and a lot of them we
11 don't see, we question why are you utilizing
12 those dollars. So going forward, there's going to be
13 more accountability on them utilizing those dollars.

14 The CalHFA Loan Servicing audit started at
15 1/13. So it began yesterday. And our servicer guide is
16 currently at 50 percent. So we hopefully will be able to
17 get that done by the end of the year.

18 Previously, it was looked at Wells Fargo, we
19 were going to make every attempt to take back the
20 servicing on the loans. In the last year, we were able
21 to get them on board with *Keep Your Home*, and start
22 utilizing our loss-mitigation program. So we're seeing
23 more loan mods from them and more short sales. So it was
24 determined at this time to keep them as a servicer.

25 MR. OKIKAWA: And I'm going to back up in a

1 broader picture, just to make sure that new members,
2 everybody understands that we have a loan servicing
3 in-house; but we also have, over the past, when we first
4 started, we didn't have the expertise for loan servicing,
5 so we contracted out.

6 So we have loan servicing in-house; we have
7 loan servicing also that we have contracted out. So
8 Wells Fargo is one of those loan servicing companies that
9 we did contracted out; and at first, we were having
10 issues. And now, we seemed to have ironed those issues,
11 so it's no longer a part of the strategic plan as far as
12 taking that back -- taking it back, as you will see, is
13 when Tim and Rhonda talk about our Bank of America
14 servicing. That's kind of like the direction we were
15 headed. Because of compliance and other things, we've
16 been able to work it out.

17 Ocwen is the title. Ocwen is also another loan
18 servicer. However, it's not one of our approved loan
19 servicers yet. And what happened in May of 2012 is
20 GMAC filed for Chapter 11 bankruptcy, and Ocwen took over
21 their subservice on GMAC's behalf. And so because of the
22 bankruptcy, there has to be a consent to the transfer --
23 it doesn't have to be consent, but we did consent to the
24 transfer from GMAC to Ocwen, subject to Ocwen curing all
25 defaults. Those are approximately about 754 loans.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 In terms of the Strategic Plan Business Plan,
2 we skipped over DA and DB with Bank of America, as I
3 referred to earlier. And here's what we're now
4 presenting, because we wanted to keep the flow going.

5 So what we'd like to do is have Rhonda Barrow,
6 who is our chief of Loan Servicing, give a little bit of
7 introduction about herself. And then Tim and Rhonda, who
8 are intimately involved in the BofA transfer, make a
9 presentation on that.

10 MS. BARROW: Good afternoon. My name is Rhonda
11 Barrow. I am the housing finance chief and Loan
12 Servicing manager for our in-house loan servicing.

13 Pardon me. I'm a little muffled because I have
14 a cold.

15 My background stems from about 24-plus years in
16 the industry. I started out with the First Nationwide
17 Bank as a nighttime, part-time collector, and moved to
18 HomeEq Servicing, where I was the supervisor in APB cash
19 management. And then here to the Agency, around 2006 is
20 when I started with the Agency as the housing finance
21 officer of Loan Servicing. And in 2010, I became the
22 housing finance chief of Loan Servicing.

23 Currently, to date -- this is as of
24 October 31st -- we service in-house 6,474 -- excuse me,
25 6,479 first-mortgage loans.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 The delinquency rate as of October 31st was
2 10.08. We have seen this delinquency number trending
3 down over the last six or seven months significantly.
4 We also service 37,687 subordinate loans currently in our
5 portfolio.

6 MR. HSU: Last year, I think that we talked to
7 the Board a lot about this transaction with BofA, in
8 which we are buying back the servicing from BofA.

9 This particular project, with this particular
10 issue, actually has been under negotiation with BofA I
11 think right before Claudia started back in 2011. So it's
12 been a long time coming for us to consummate this
13 transaction.

14 What I'm showing you on this chart, is just a
15 quick way to show how -- I think that over time we've
16 shown charts like this. But what this is showing is that
17 it's showing the percentages of the loans that a
18 particular service services in blue; and in orange it's
19 showing the amount of the delinquent loans that are of
20 the entire population, how much of the -- how many of the
21 delinquent loans belong to that particular servicer.

22 So, for example, if you look at BofA, these are
23 the FHA loans. What this is saying is that they service
24 about 6 percent of our FHA loan population, but they
25 represent nearly 13 or 14 percent of our delinquent

1 population.

2 So if you look at this across, what you're
3 hoping to see is that the blue bar and the orange bar are
4 fairly close to each other because it just means that
5 their delinquent population is fairly representative of
6 their entire servicing population.

7 So you can notice a couple of things here. You
8 notice that BofA sort of underperforms significantly; and
9 you can see that everybody else is somewhat on par. And
10 you can also see that at CalHFA, we're doing a little bit
11 better than where we should be at. So the blue bar being
12 a higher than the orange bar means that you're doing
13 slightly better.

14 So what this shows is that BofA has been a
15 laggard over time.

16 And the next chart, on page 25, this is the
17 conventional portfolio, looking at the same type of idea
18 but on the conventional side. And what you can see here,
19 again, is that the BofA, on the conventional side, their
20 blue again is lower than the orange, meaning, that they
21 disproportionately represent the delinquent population.
22 And then if you look at CalHFA, you can see that our blue
23 again is higher than the orange.

24 So this is just one way that we kind of look at
25 sort of how the servicer are performing on a relative

1 basis. So these were all sort of behind the scenes, so
2 that if we restructured operational issues in thinking
3 about do we take a poor servicer -- servicing portfolio
4 in-house?

5 And I'm here sort of as a launching pad for
6 Rhonda, in the sense that Linn and I, we're kind of
7 spearheading the business negotiation of the transaction;
8 and then behind the scenes, Rhonda, the Accounting folks
9 that are headed up by Lori, and also the Loss Mitigation
10 folks headed up by Nick, they did sort of the yeomen's
11 work of making this transaction happen.

12 The bulk of the transfers happened in November,
13 which they have a small portion that's going to transfer
14 sometime this month or next month.

15 But, you know, I wanted to make sure that the
16 glory is not here, but it's with Rhonda and Nick and also
17 the Accounting folks.

18 MS. BARROW: And Nick -- Tim covered a little
19 bit of this, but part of the reasons for bringing the
20 loans in-house was the lack of or underutilization of the
21 *Keep Your Home California* programs and loan mods being
22 submitted.

23 The portfolio totals were -- there was 1,192
24 conventional loans and 700 government loans with a
25 delinquency rate of 18.49 percent.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 As of November 1st, the Loan Servicing
2 department acquired 1,571 loans from the BofA transfer.
3 That equals out to 1,132 conventional loans and
4 439 government loans.

5 Upon immediate transfer, 109 of those loans
6 were appointed to single points of contact for Loss
7 Mitigation efforts. Twenty-seven of those loans are
8 currently receiving assistance from *Keep Your Home*
9 *California*.

10 We created and sent special inserts with *Keep*
11 *Your Home California* contact information and program
12 descriptions. We established a task force of collectors
13 that targeted the severely delinquent Bank of America
14 customers.

15 And we also developed a job aid to assist the
16 collectors in speaking with the borrowers that may or may
17 not have had contact with the representative in a very
18 long time.

19 Any questions?

20 CHAIR JACOBS: I've got one question that may
21 be sort of more of a mission question. But we go from
22 single-family to multifamily, and there's no discussion
23 of duplexes or triplexes.

24 I know in other states it's been a big part of
25 the housing finance agency's mission, just as ways for

CalHFA Board of Directors Board Meeting -- January 14, 2014

1 families to create some wealth long-term.

2 Are we looking at more duplex or even programs
3 for granny flats -- houses with granny flats? It could
4 be an opportunity for us to really dig into that more.

5 MS. CAPPPIO: Through the Chair, we have looked
6 at them, and I think it's an excellent suggestion.

7 As habitation patterns change and economics
8 change, it is, I know from my experience as a local
9 planner, that quite often banks are unwilling to lend in
10 a granny flat, even if you can demonstrate the income.
11 So it would be great, and we will add that to the list of
12 stuff to explore next year.

13 MS. BOATMAN PATTERSON: So single-family
14 doesn't include one to four units? Right now, it's
15 really just one unit? Or, for our programs, how does
16 that work?

17 MS. CAPPPIO: Rick, do you know that?

18 MS. BOATMAN PATTERSON: It's one to four,
19 right?

20 MR. OKIKAWA: We are doing one to four.

21 MS. CAPPPIO: One to four, single family.

22 Right.

23 MS. BOATMAN PATTERSON: One to four? Great.

24 MS. SOTELO: Rhonda, do you have any sense of
25 where, geographically, these loans are located? Are they

CalHFA Board of Directors Board Meeting – January 14, 2014

1 throughout the state? Are they concentrated more in
2 Southern California and Northern California?

3 MS. BARROW: They're throughout the state.
4 Mostly Southern California, I believe.

5 MS. SOTELO: Are they mostly urban environments
6 or non-urban?

7 MS. BARROW: Mostly urban.

8 MS. SOTELO: Okay.

9 MR. OKIKAWA: So moving along, next, we'll
10 present on the multifamily part of the strategic plan.
11 And if you would look at page 13 on the org. chart -- I
12 believe we're on page 28 of the PowerPoint.

13 MR. MORGAN: Good afternoon. I am James
14 Morgan. I'm the housing finance chief for the
15 Multifamily Programs Division at CalHFA.

16 I thought for the benefit of the new Board
17 members, we inserted just a brief overview of what
18 Multifamily Programs does. And I say brief. Just three
19 PowerPoint slides.

20 The Agency provides acquisition/rehab,
21 permanent loan, and predevelopment loan financing for
22 multifamily affordable housing developments.

23 Currently, we have in place a Preservation Loan
24 Program, an MHSA -- or Mental Health Services Act Housing
25 loan program, and then also we have a Predevelopment Loan

CalHFA Board of Directors Board Meeting – January 14, 2014

1 Program in place.

2 And indirectly, we have what we call our
3 Conduit Issuer Program, where the Agency acts as a bond
4 issuer via our Prepayment Loan Program.

5 Our Preservation Loan Program is administered
6 with CalHFA's existing HUD Risk-Share Agreement with HUD.
7 That agreement's been in place since 1994. And that
8 provides capital for the rehabilitation of existing
9 affordable housing projects, and also preserves and
10 extends affordability for those existing tenants.

11 Under the MHSA loan program, it is jointly
12 administered by CalHFA and the Department of Health Care
13 Services, which was formerly Department of Mental Health,
14 on behalf of the counties. And this is a derivative of
15 Prop. 63, a one-time allocation of \$400 million set aside
16 for a permanent financing and capitalized operating
17 subsidy reserves for developments of permanent supportive
18 housing projects to serve people with serious mental
19 illness and families who are at risk of homelessness.

20 This program has almost allocated most of its
21 \$400 million, and will most likely be sunseting it this
22 year, at the end of this year.

23 And then, of course, we brought to our Board
24 members last year --

25 MS. BOATMAN PATTERSON: James?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. MORGAN: Yes.

2 MS. BOATMAN PATTERSON: Was that a one-time
3 allocation?

4 MR. MORGAN: Yes.

5 MS. BOATMAN PATTERSON: And so it's not an
6 ongoing?

7 MR. MORGAN: No.

8 MS. BOATMAN PATTERSON: Was that part of the
9 1C bond?

10 MR. MORGAN: It was -- yes, it was Prop. 63
11 bonds.

12 MS. BOATMAN PATTERSON: Prop. 63 bonds?

13 MR. MORGAN: Yes.

14 MS. BOATMAN PATTERSON: And so it was just a
15 one-time allocation?

16 MR. MORGAN: One-time for housing allocation,
17 yes.

18 And then as we brought to you, to the Board
19 last year, we had our Predevelopment Loan Program to
20 cover predevelopment costs associated with affordable
21 housing rental projects that will have CalHFA permanent
22 financing.

23 Next. Next.

24 For those here in the room, we actually have
25 two locations: Sacramento and Culver City.

1 Our Multifamily programs, as you can see on one
2 of the org. charts comprised of Loan Underwriting, Loan
3 Administration, Disbursements, and Construction Services.
4 We have 25 employees here in Multifamily Programs, with
5 15 in Sacramento and 10 in Culver City.

6 So there's your two-minute rundown on
7 Multifamily.

8 With regards to 3-A, we had an aggressive goal
9 of \$125 million -- this is on your Strategic Business
10 Plan -- for our fiscal year in 2013-2014.

11 For the benefit of the new Board members, we
12 were temporarily out of business for about five years on
13 the Multifamily lending side.

14 We were able to have a jump-start back in the
15 Multifamily Preservation Loan business, vis-à-vis the
16 New Issue Bond Program for 2012, and then going into
17 2013, establishing our own Preservation Loan Program --
18 or resurrecting our own Preservation Loan Program after
19 five years.

20 So for us, we spent the first three, four
21 months of the year crafting that, coming to you, coming
22 to the Board, the Board members approving that, and
23 getting the word out. And we started with that process
24 at Housing California in April of last year, announcing
25 not only our Preservation Loan Program, but also the

1 Prepayment Program in conjunction with our Preservation
2 Loan Program. And basically a roadshow from April to
3 July or August, sharing -- going to and attending housing
4 conferences, localities, showing the -- spreading the
5 word that CalHFA is back in business.

6 So for us, it's -- you know, with our existing
7 Preservation Loan Program and trying to develop a
8 pipeline, we have been aggressively pursuing projects.
9 And as we move forward, we will still be able to close --
10 well, we will be closing approximately \$41 million in
11 deals.

12 We've got another \$19 million, \$20 million in
13 the pipeline, hopefully, to bring to you in May. But
14 where we're at is, we're in this process from now to
15 the -- from the fall until the end of the year.

16 Taxable pricing, map lending, there are all
17 different types of projects out there, really going
18 for -- it looks like sharks in the water going for
19 business. And so as we grow our program, you know,
20 Claudia and Tim have explained to me "patience,
21 patience." And so I'm really excited. Pipeline. I want
22 to get out there.

23 But, you know, after five years of silence, and
24 then really -- it's like myself, I have put on 45 pounds
25 in two years, I'm not going to take it off in two days.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 So it's going to take some time. And that's where we're
2 at.

3 We'll get a good idea where we'll be as far as
4 bond pricing. We have an upcoming bond sale coming up in
5 February. And we'll have a really good idea where we're
6 at structure- and pricing-wise.

7 Plus, we're revisiting, you know -- you know,
8 looking at our existing product and trying to develop new
9 products, as Tim mentioned, possibly a "permanent loan
10 only" program, because there is a need for that. There
11 are the construction lenders, the banks that come to us
12 and say, "Wow, we would really like to use you as a
13 permanent lender." So we're looking at de minimis
14 loans -- what works best for the Agency.

15 And we're also looking at other products that
16 might benefit us, like maybe a 35-year, due in 17, which
17 is an attractive product given pricing for our friends
18 in Finance where that product can take us. So we're
19 exploring.

20 So, you know, did we get our \$125 million? No.

21 But the cogs are starting to turn and we're now
22 starting to produce a lot of interest.

23 MS. SOTELO: Excuse me, Jim.

24 MR. MORGAN: Yes.

25 MS. SOTELO: How are you outreaching to the

1 developer community? Are you having conversations with
2 them?

3 MR. MORGAN: Yes. We're on -- MPH Housing
4 Conference, SCANPH --

5 MS. SOTELO: So you're doing it at the
6 conferences --

7 MR. MORGAN: -- California Council for
8 Affordable Housing.

9 We're attending as many conferences as
10 possible.

11 We've also had e-mail blasts to some of our --
12 you know, we have an e-mail database that -- e-mail
13 blasts with regards to announcement of our programs, our
14 own newsletter, constantly marketing our program.

15 MS. SOTELO: Okay.

16 MR. MORGAN: With regards to our prepayment
17 policy, that was in conjunction with the Preservation
18 Loan Program, we announced that at Housing California.
19 Prior to this year, and actually prior to the fall of
20 '08, our documents disallowed prepayment.

21 You were in -- if you had a 30-year loan, you
22 were in for 30 years, which tended to maybe rattle a few
23 people. We had deals that were tax-credit projects that
24 we were looking at to recapitalize. We had projects
25 where grandma and grandpa passed away, and the

1 grandchildren or the trustees don't know what an
2 apartment -- an affordable housing unit is. And so what
3 we decided to do is just open up our portfolio for
4 prepayment. And we established that prepayment policy.

5 It's actually been successful. We've probably
6 received -- and Chris will touch upon this in his Asset
7 Management presentation -- but we have received 60, 70
8 inquiries.

9 And so we're working on the public purpose of
10 that policy, because there are yield maintenance and
11 other costs associated with that. And the cost of that
12 yield maintenance, doing a recapitalization versus our
13 public purpose, we're constantly tweaking it.

14 Currently, that prepayment policy that we have,
15 the portion that is for projects that have seasoned
16 15 years out or longer will sunset at the end of
17 December 31, 2014. So the end of this calendar year.

18 It doesn't mean we can't look at and examine,
19 it may be extending it. It's been quite successful.
20 We'll reexamine that.

21 There is another component to that Prepayment
22 Program for a select few that if they're eligible to
23 prepay that have only seasoned from Years 10 to 15, that
24 that process sunsets at the end of June.

25 So then that will go away. We're not going to

1 resurrect that one at the moment. It seems like we've
2 pretty much put that to bed.

3 With regards to our conduit-issuing activity,
4 as part of the prepayment program, if you select not to
5 use CalHFA as your lender, you will pay a premium in your
6 yield maintenance, and you're also required to utilize
7 CalHFA as your conduit issuer or your bond issuer. So
8 you can't go to CSCDA or CMFA. You have to utilize
9 CalHFA as your bond issuer.

10 So we've been able to recently, just from the
11 existing portfolio, do at least -- we've done one deal
12 and we've got two more in the pipeline.

13 I think with folks just now starting to gather
14 traction about our prepayment program, they're just
15 starting to weigh options: What works best and what can
16 I do?

17 We also, as a part of our business strategy,
18 is that if we're going to have CalHFA as a conduit
19 issuer -- you know, if you have to use CalHFA as a
20 conduit issuer as a requirement of the Preservation Loan
21 Program if you don't use CalHFA as your lender, let's
22 have that conduit issuer program out there for projects
23 that just want to use us for issuance, conduit issuance,
24 bond issuance.

25 So we've had that out there. We know that is

1 not our core business model. We're not looking at that
2 to generate a lot of income. We haven't. It doesn't
3 mean we can't look at that.

4 Our core strength is lending, and that's what
5 we're good at. There are plenty of issuers out there
6 that do that business. But if we're the lender, we're
7 the issuer. But as far as just doing conduit issuance on
8 the side, that really hasn't been our focus.

9 So we've closed three of those to date and we
10 have three forthcoming. So come May, we'll give you a
11 projection of where we're at with regards to closings and
12 conduit issuances, and just kind of a recap of where
13 we're at, trending.

14 And with that, any questions?

15 MS. FALK: James, I have a question.

16 MR. MORGAN: Yes.

17 MS. FALK: In terms of the prepayment, what
18 kind of restrictions are you putting on the developers
19 about rents, if any?

20 MR. MORGAN: Yes. So there are -- and Rick can
21 help me out with this, too -- our existing regulatory
22 agreement will stay in place for the time, for the
23 duration of the allocation period, or...

24 MR. OKIKAWA: If there's a prepayment, there's
25 a refunding refinance, whatever we call that, it would go

1 for the extended term. So it's whatever the -- it's
2 extended affordability. So if there were, like, Year 16,
3 and now we're going to recapitalize for another 30 years,
4 they have a regulatory agreement for that period. The
5 income restrictions would be -- that would be negotiated.
6 But either it would be the same or deeper affordability
7 or extended affordability.

8 MR. MORGAN: That's all criteria of allowing
9 prepayment, Ms. Falk.

10 MS. FALK: I'm particularly --

11 MR. MORGAN: That's one of many of extended
12 affordability, rehab.

13 What's the scope, what it is you're doing to
14 the project. There's different criteria just than
15 saying, "Yes, you're allowed to prepay."

16 MS. FALK: Okay, so you're looking at what the
17 current rents are, even if they're not restricted, to
18 make sure that they're not being raised appropriately?

19 MR. MORGAN: Yes.

20 MR. OKIKAWA: Yes. Part of the criteria for
21 prepayment, in this whole prepayment policy, one of the
22 biggest criteria is public purpose in terms of extended
23 or deeper affordability.

24 The other factor, of course, is, we have fiscal
25 responsibility. And the expectations of our -- what

1 profits, et cetera, we're supposed to make on the loan,
2 what bond issuance it's in, if we need to make changes in
3 terms of bond issuance, those costs. So that there's
4 kind of two aspects to our prepayment policy, and it's
5 fiscal and public purpose.

6 MS. CAPPPIO: Right. We didn't want to -- I
7 mean, I chide the staff. It needs to be capitalism with
8 a purpose. There's a win-win here because quite often
9 the terms are better right now. But we have to make sure
10 to be sure that we deepen or extend affordability.

11 MS. FALK: Right, because there's often huge
12 windfalls to the developers to be able to finance
13 something.

14 MS. CAPPPIO: Exactly, exactly. And I don't
15 mind that --

16 MS. FALK: And none of it goes to benefit the
17 tenants, that's the problem.

18 MS. CAPPPIO: Exactly, yes.

19 MS. FALK: Thank you.

20 MR. MORGAN: Thank you.

21 MR. OKIKAWA: Moving forward, we are going to
22 skip 3-F right now until the end, when Chris Penny can
23 present along with 3-K.

24 But we'll move on to Earned Surplus, RHCP and
25 FAF.

1 What is "Earned Surplus"? Remember, I was
2 saying earlier that there are many funds somewhat unique
3 to CalHFA and many acronyms unique to CalHFA. And Earned
4 Surplus is one of those, in the sense that it was -- I
5 guess the best way to describe it is, you know, what is
6 left over when there was a HUD HAP contract in a housing
7 development.

8 After you've done your rental incomes, and now
9 you have this HAP contract which is up to the contract
10 rents, and certain borrowers can only pay up to so much
11 on those contract rents, usually it's, like, 30 percent
12 of their rents. So that HAP contract covers the
13 difference in terms of what the borrower is actually
14 paying and what the contract rents are.

15 And then what happens is from the rental income
16 that comes from these projects, you've got your operating
17 expenses, which includes, of course, our debt service.
18 Out of that comes the remainder, which is what we call
19 "surplus cash."

20 Okay, now, the borrowers originally, when we
21 did these Section 8's -- of course, there's got to be
22 some incentive for developers. And so what we would do
23 is allow for a distribution. And generally back then, it
24 was a 6 percent distribution.

25 So after the distribution from the profits,

CalHFA Board of Directors Board Meeting – January 14, 2014

1 that comes what we call residual receipts, or what we
2 call "earned surplus." Is that kind of -- I know it's
3 kind of an accounting thing that we've been doing, but
4 that is what we have, and that's what we call "earned
5 surplus."

6 Now, earned surplus for us at CalHFA, what we
7 call a pre '80 and post '80. Now, pre '80 being any
8 contracts before 1980, that earned surplus came to
9 CalHFA, okay. So any of the post obviously went to HUD.

10 Now, a lot of those contracts were 30-year
11 contracts, 40-year contracts. Well, so the 30-year
12 contracts in the early eighties, we're done. And so some
13 of this income stream has stopped, but we still have
14 40-year contracts, which are less. However, there's
15 still some income stream coming in.

16 At the end of that period, the 40-year period,
17 that's going to be it.

18 Right now, we have approximately \$72 million of
19 this earned surplus.

20 What is it with earned surplus that it's
21 difficult in the sense to use, and I won't say difficult
22 to use, but it's more the restriction, which goes along
23 with earned surplus.

24 And if you notice, this is one of our statutes.
25 This is our statutory restriction on earned surplus. But

1 the key is lowering rents, lowering rents for persons of
2 families with low and moderate income.

3 Okay, what is "lowering rents"? So some
4 examples what we have done in the past, is lowering rents
5 is more what is the effect on the project, the use of
6 the dollars and the effect on the project. Not
7 necessarily dollar-for-dollar of lowering rents.

8 And so, for example, if there are capital
9 improvements necessary on a project, which, say, in
10 Chris' department, for Asset Management, the HVACs are
11 out, et cetera, we have made loans at zero percent or
12 lower interest rates so that we can do these
13 improvements, which, in essence, keeps the rents low.

14 So there are many different ideas on how we
15 would use this earned surplus. And this is what this is
16 all about: We're trying to come up with different
17 waterfalls and creative ideas.

18 Another idea that we have been discussing is
19 potentially on interest-rate reductions and for, say,
20 highly public purpose types of projects. And so what
21 would the interest-rate reduction do? Interest-rate
22 reduction would basically lower the interest, which
23 lowers the payment, which it means it's more affordable,
24 and which, in essence, lowers the rents.

25 Okay, that is the concept. This is where we're

CalHFA Board of Directors Board Meeting – January 14, 2014

1 going with each of these different types of funds.

2 And any questions on the earned surplus?

3 *(No response)*

4 MR. OKIKAWA: The next type of fund is the
5 Rental Housing Construction Programs funds, RHCP. I
6 believe these were from AB 333 many, many years ago,
7 early eighties, late seventies. That was the first
8 affordable housing bond I think the State of California
9 issued. They're General Obligation bonds. Originally,
10 this money went through the Housing Community
11 Development, and about a third of that came to CalHFA.

12 Okay, so fast-forward to today. That money
13 that has been coming back from the original RHCP funds
14 through statute -- and part of it was a part of AB 1699.
15 And so through the statutes, what we were able to do,
16 that all funds that are received by the Agency for Agency
17 projects were used to provide assistance to existing or
18 future projects.

19 So the key here is "to provide assistance to
20 existing or future projects financed through the Agency,
21 pursuant to the Agency's affordable multifamily lending
22 programs." Now, that's very broad. And there have been
23 many interpretations of the use of this. And one use,
24 potential use of this is, for example, on warehousing.
25 And, for example, even though the last projects that we

CalHFA Board of Directors Board Meeting – January 14, 2014

1 have done -- say, the last three projects came through
2 CalHFA. Say, for example, if one of the projects needs
3 to close by the end of the last year, but then the rest
4 of the projects are going to close maybe to January,
5 February, March of this year, we don't sell the bonds
6 last year and hold that carrying cost for the projects
7 that are going to close this year, right? So we do
8 something. In the past what we had, was something, a
9 warehouse line. We don't have that anymore. And so what
10 we can use is this money to warehouse to the time we
11 actually sell the bonds.

12 And these are ideas, like I say, that, you
13 know -- you know, we can use this money. And I think at
14 the RHCP, we're looking around, oh, \$8.7 million,
15 currently. Okay.

16 So finally, FAF. And this is in that whole
17 glossary. I believe we put all these acronyms in there.
18 But it's called the Financing Adjustment Factor, okay.
19 And what FAF is about is, as you remember -- or maybe not
20 some of you, you may be too young -- but in the late
21 eighties -- I'm sorry, I mean late seventies, early
22 eighties, almost up to '90, there were double-digit
23 interest rates. Okay, and so for our Section 8 projects,
24 when we had these double-digit interest rates, HUD comes
25 to us and says "Well, you know what?" -- this is like in

1 the nineties sometime. Interest rates are a little
2 lower. And they say, "Hey, CalHFA, why don't we look at
3 this together? And if you can refund those bonds on
4 these existing projects, you know, from 13 percent, down
5 to 9 percent, you know, why don't we share in that
6 4 percent?" And that's kind of like what we did. And so
7 we refunded the bonds in the late nineties on some of
8 these; and then we shared in actual interest savings on
9 this.

10 So FAF money is a little more restricted, but
11 we're probably around \$16 million, somewhere in that
12 range. I think that was what we had, the last figures.
13 And so the restrictions on FAF is for very low-income
14 housing. And it also requires a ten-year regulatory
15 agreement for very low-income housing. And so what is
16 interesting also about FAF is it can be used for a
17 single-family. It's not just restricted for housing
18 developments or multifamily.

19 Anyway, you know, some of the same -- the past
20 uses, real quickly, are we've used this for interest-rate
21 reduction on special-needs projects, which are very
22 low-income projects. In proportion to the number of
23 units, if there are 20 units out of 100 units, that's
24 20 percent. That's the amount of money we would use.

25 I don't know if there are any other questions

CalHFA Board of Directors Board Meeting – January 14, 2014

1 or anything else you may want to contribute.

2 Thank you.

3 CHAIR JACOBS: Thanks for that.

4 MR. OKIKAWA: And moving on -- should we at
5 least finish this portion?

6 CHAIR JACOBS: Yes.

7 MR. OKIKAWA: Okay, so moving on real quickly,
8 next to me is Chris Penny. He is the chief of our Asset
9 Management, Multifamily Asset Management.

10 If you looked at page 37 of the PowerPoint, I
11 think this is next. And then page 14 of the org. chart
12 shows where Chris is.

13 MR. PENNY: Hello. My name is Chris Penny.
14 And I'm the chief of Asset Management here at CalHFA.
15 I've been with the Agency since about 1990; and prior to
16 that, I was at the Colorado Housing Finance Authority for
17 a few years.

18 And today, I just wanted to give you a real
19 brief overview of Asset Management, how it fits into the
20 Agency, and a little bit about what we do.

21 So in general, after the Board approves a final
22 commitment for a multifamily loan and that loan closes,
23 our job, Asset Management's job of monitoring that
24 project begins.

25 And you can put the next slide.

1 And we review operating budgets and annual
2 audited financial statements to monitor the financial
3 condition of each project. We hold and process requests
4 for replacement reserves, insurance impounds, and taxes.
5 We also get involved with a wide variety of activities
6 with the project, including transfers of physical assets.
7 We work with our Legal Department to process those.

8 As Jim mentioned, we worked through prepayment
9 issues, insurance issues, workouts. And on the Section 8
10 portfolio, we process Section 8 rent adjustments.

11 We conduct annual physical inspections to
12 monitor the condition of our properties. And for our
13 Section 8 portfolio, we perform annual tenant file audits
14 in accordance with HUD rules and regulations. And we're
15 basically a traditional contract administrator for HUD on
16 the Section 8 portfolio.

17 And on our non-Section 8 portfolio, we have
18 a Web-based data collection system that gives us
19 information on our regulated units, our income and
20 rent-restricted units.

21 The portfolio today consists of about
22 500 projects, and, roughly, 35,000 units. Twenty percent
23 of the portfolio is project-based Section 8, for which we
24 act as an administrator for HUD. And we're paid
25 approximately a million dollars a year in administrative

1 fees for that, for that work.

2 I do want to back up real quick and just
3 mention that we do work -- in Asset Management, we work
4 very closely with our sister agencies, the Tax Credit
5 Committee and HCD, to try to coordinate our monitoring
6 activities as much as possible.

7 Since we do annual physical inspections, we
8 share those with HCD and TCAC on an ongoing basis. And
9 with TCAC, particularly, we help them out by doing the
10 physical inspections of properties at the same time
11 they're doing their file audits, so they can focus on the
12 file audits and not the physical inspection that they
13 seem to find that helpful.

14 As I was mentioning, we're the traditional
15 contract administrator for HUD on, roughly, 100 projects.
16 And since we're on that topic, I wanted to direct your
17 attention to Item F -- 3-F on the Business Plan that
18 mentions an application to HUD for the PBCA. And the
19 PBCA stands for "performance-based contract
20 administration.

21 And HUD issued a NOFA for the administration of
22 project-based Section 8 contracts for every state in the
23 country. And we applied to be the statewide contract
24 administrator here.

25 And to make a long story short, last August

CalHFA Board of Directors Board Meeting – January 14, 2014

1 we were awarded the contract by HUD. But subsequent
2 litigation has kind of taken that whole process to a
3 halt; and we're just waiting for a resolution of that.

4 The other item on the Business Plan I wanted to
5 mention is Item K, and that relates to our administration
6 of HUD 811, Project Rental Assistance Demonstration
7 Subsidy Program with other State of California partners.

8 HCD asked us to participate in making an
9 application to HUD for subsidy funds available through
10 the 811 Demonstration Program. And HCD, CalHFA, we had
11 participation from Tax Credit Committee. And the other
12 key player was the Department of Health Care Services,
13 DHCS. We worked together, submitted our application, and
14 were awarded, roughly, \$12 million for the five-year
15 demonstration program. We were one of 12 states that
16 were selected in this first round.

17 The goal of the program is to successfully
18 transition non-elderly disabled persons from
19 institutional settings, such as nursing homes, into
20 apartments, fully, with all the services and supports
21 that they would get from Medi-Cal and the rent subsidy
22 coming through HUD.

23 MS. BOATMAN PATTERSON: I was too busy talking,
24 so I missed the first part of that.

25 Where did that funding come from?

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. PENNY: It came from HUD.

2 MS. BOATMAN PATTERSON: And it's for like
3 permanent supportive housing or transitional?

4 MR. PENNY: It's for permanent -- it's a
5 contract-based subsidy so the projects will get a
6 contract for however many units they want to offer this
7 housing for non-elderly disabled people that are coming
8 through institutions.

9 So DHCS and some of the local transition
10 organizations will play a big role in this project.

11 MS. BOATMAN PATTERSON: So is this going to be
12 brand-new? Is this like a pilot program?

13 MR. PENNY: This is a pilot -- yes, definitely
14 very brand-new.

15 This was an initiative at the federal level
16 between HUD and HHS, with the ultimate goal, I think, of
17 trying to see if moving people out of nursing homes can
18 save some money on the Medi-Cal side and Medicaid side;
19 and to see if, you know, net-net of the subsidy and the
20 savings, if this is a good model to go forward with.

21 So CalHFA's role is primarily going to be
22 administering the project-based subsidy. That's what
23 we've done for 30 years as a traditional contract
24 administrator, so that will be our main role.

25 And we anticipate entering into some agreements

CalHFA Board of Directors Board Meeting – January 14, 2014

1 with HUD shortly, and after which HCD will issue a NOFA,
2 and will begin to accept applications.

3 And that concludes my remarks.

4 CHAIR JACOBS: Anything else on the Multifamily
5 programs?

6 MR. OKIKAWA: No.

7 Moving on, should we move on to --

8 MS. BOATMAN PATTERSON: Can I ask a question
9 about Multifamily programs before you move over to
10 Single-Family?

11 So if, like, there was magical, mystical elves
12 that came up with just a big pot of money in your
13 existing Multifamily programs, which program would you
14 think would be the most efficient and best use of the
15 magical, mystical elf money?

16 Am I putting you on the spot?

17 MR. OKIKAWA: I'm not quite -- I'm not quite
18 sure that --

19 MS. BOATMAN PATTERSON: If there's one-time
20 funds that were available.

21 MR. OKIKAWA: Right.

22 MS. BOATMAN PATTERSON: There's a million
23 dollars that's available.

24 MR. OKIKAWA: Right.

25 MS. BOATMAN PATTERSON: And the Legislature is

1 going to give you a million dollars.

2 MR. OKIKAWA: Right.

3 MS. BOATMAN PATTERSON: Of your existing
4 programs, which program would be most helped in receiving
5 the funds?

6 MR. MORGAN: I would take that. In our
7 exiting, we have projects that we've identified in our
8 portfolio that have been languishing. I would take
9 that million dollars and help them out.

10 We have some projects that have -- that need
11 extreme rehab and recapitalization that haven't been able
12 to put anything together.

13 We've worked with them. We may be -- as Rick
14 went through the subsidies, maybe utilizing some of those
15 funds to help these folks out in Farmersville,
16 California, or other --

17 MS. BOATMAN PATTERSON: So it would be targeted
18 rehab of your existing portfolio?

19 MR. MORGAN: Yes, yes. Because these are
20 projects that we've identified over the last -- in
21 conjunction with Asset Management, over the last four or
22 five years that need serious help.

23 MR. OKIKAWA: For example, we -- recently, we
24 have had some RHCP projects that are 100 percent RHCP
25 funded, which over the years are low, very low. I mean,

1 we're low, below 30 percent. And over the years, none of
2 the incomes have been increased. The buildings are
3 starting to dilapidate.

4 Obviously, tax credit doesn't work in this kind
5 of situation. We're stuck in a certain way on how to
6 recapitalize these, at the same time, maintain the
7 affordability. Those types of needy projects.

8 CHAIR JACOBS: A tough question there.

9 MR. OKIKAWA: So should we keep moving?

10 CHAIR JACOBS: Yes, let's keep moving through
11 the Plan.

12 I think Diane?

13 MR. OKIKAWA: I think Claudia is up for 4-A,
14 right?

15 MS. CAPPPIO: Yes. This will be brief.

16 We had, and still have a big job to look at
17 diversifying income sources, revenue sources, and find
18 new ones. We are constantly looking at that. And there
19 are some legislative proposals, most particularly SB 391.
20 I don't know what will happen to that. Have been giving
21 technical assistance in that regard. But we were just
22 figuring that out because the New World Order is upon us.
23 And how we've traditionally or historically gained
24 revenue is not how we're going to keep doing it, at least
25 exclusively.

CalHFA Board of Directors Board Meeting – January 14, 2014

1 MR. OKIKAWA: Continuing with 4-B, where we
2 pursue a single-family TBA model and associated products
3 where we are.

4 Without going back through the entire TBA
5 model, et cetera, which Tim has presented on the
6 Financing end, and we've gone through here at the Board
7 over the last year, but giving you a little bit about a
8 time-line, if you would follow the slide -- I believe
9 it's on page 42.

10 In October, we started researching these new
11 loan products. And as you recall, we had stopped
12 lending. And the importance of lending again, we can't
13 overemphasize that.

14 Originally, when we were lending, we were
15 selling bonds and obviously purchasing loans. But
16 because of the way things have changed in risk management
17 and fiscal responsibilities, we now have developed that
18 TBA model as a vehicle where there's a lot less risk in
19 terms of selling securities and using our down-payment
20 assistance products along with that.

21 So in May of 2013, the Board approved Phase I,
22 which was called our CalPLUS, CalHFA, and FHA, and just
23 following down the time-line. In July, we announced
24 programs to the public.

25 August of 2013, we started accepting these

1 reservations for these new FHA programs. And then in
2 August of 2013, at the same time, we were researching
3 the Phase II, which was a conventional first-time home
4 buyer's loan mod, and the Energy-Efficient Mortgage
5 projects. Followed by a review of that Phase II program
6 to the Board; and then the Board approved Phase II in
7 November of 2013. And then spring is the anticipated
8 release date for that.

9 This has been big for us, that we're lending.
10 Obviously, that's what we need to do, as Tim said
11 earlier. That we need to be lending, because that's what
12 we do. And we're building that machine as we go. And
13 thanks for the cooperation of the Board.

14 However, we've also stated that we will monitor
15 this very closely, given the certain parameters that were
16 given by the Board. And we'll make consistent reports.
17 And that's what we would like to do, is take the quick
18 time now to say where we are with the -- where we are
19 now.

20 And, I'm sorry, this is Tom Nann. He is our
21 lender -- he is a loan officer.

22 I'm sorry, he's not on the bio. But he is our
23 loan officer for the lender outreach. And Tom is really
24 the person that has the feel of what's going on out there
25 because they're out there, educating the lenders and

CalHFA Board of Directors Board Meeting – January 14, 2014

1 doing surveys, et cetera. So I'd like to introduce Tom
2 Nann, and go forth.

3 MR. NANN: Good afternoon Board, Mr. Chairman,
4 Board Members. I am Tom Nann. Like Rick said, I am a
5 housing finance officer. I've been with the Agency for
6 coming up on 24 years prior to being in single-family
7 lending, which started in March of 2012.

8 Prior to that, I was in Portfolio Management.
9 Prior to that, I was in Multifamily Special Programs.
10 And prior to that, I was in Mortgage Insurance.

11 I'm sitting in here for Ken Giebel. He is
12 traveling to Washington, D.C., as we speak.

13 But on updates, we have excitingly gotten back
14 into the first loan business. It is -- not only -- but
15 it is an FHA-based product. We don't have a conventional
16 product yet. That's one of the things we want to talk
17 about in the springtime. FHA is a very competitive
18 market.

19 We have been lending now after our announcement
20 for a little over 120 days.

21 And by your slide, you'll see that we have
22 67 eligible lenders for this program, which that is
23 defined as CalHFA and US Bank approved -- US Bank being
24 our master servicer.

25 The numbers in parentheses are the numbers you

1 received in November Board.

2 We now have 45 lenders that are verbally
3 committed. It doesn't mean they're doing it. They have
4 verbally committed to do the program, meaning, that they
5 are starting to get their corporate communication out to
6 their lenders. That was 38 back in November.

7 We have 12 active lenders, which those 12 have
8 actually reserved loans. That was only four back in
9 November.

10 We have received 35 reservations, totaling
11 \$8 million.

12 I just want to clarify, when Tim turned and
13 said "\$10 million" to me and I said "\$8 million," and
14 then he said "a month," we're not doing a month yet.
15 This is \$8 million since over the last 120 days. We only
16 had 16 reservations back in November.

17 A couple background items here.

18 The average lender turnaround time that we've
19 heard from our lenders, to set up a program, not just
20 ours, any program that is announced, is usually two to
21 four months. And the average HFA production start-up on
22 loans like this were three to six months. Those are
23 feedback we have received from other HFAs that have a
24 very similar product out on the marketplace right now.

25 If you turn to the next slide -- by the way,

1 I am the manager of the Lender Services, which all new
2 lender applications and all lender recertifications come
3 through my unit, as well as the training and the
4 outreach. So part of that communication is talking to
5 the lenders and asking them, "Hey, I know we're not the
6 only fish in the sea out there; but can you give us some
7 idea of what you think some of the barriers are?"

8 The lender feedback has been the following:

9 One of the biggest challenges really has
10 nothing to do with us. It had to do with the QM rule
11 that has recently come out. And a lot of lenders said
12 that they are -- they're tasked with all their resources
13 getting ready for this Qualified Mortgage rule, which
14 went into effect actually Friday, January 10th.

15 That's a rule that, in essence, is -- it's
16 basically a new law that the Consumer Financial
17 Protection Bureau has adopted back in January of 2013,
18 last year; in essence, ensuring that lenders provide the
19 due diligence, known as the ability to repay loans that
20 extended -- credits extended to the borrowers.

21 This has been a very vibrating issue because
22 there was interpretations of this law in the whole lender
23 community that eventually there was amendments in May,
24 July, and October; right about the time when we were
25 launching CalPLUS and the FHA products. So a lot of

1 lenders were saying -- 50 percent of our lenders said, in
2 a survey about a barrier, saying, "It's not you guys.
3 It's Qualified Mortgage rule." It has to do with
4 operations and I.T. internally for them.

5 Also similar to that were some I.T. and system
6 issues themselves. They couldn't do three liens. And it
7 was, again, related somewhat to the QM rule.

8 25 percent of our polled lenders said our
9 pricing wasn't competitive.

10 And then 25 percent, there was some specific
11 program requirement, underwriting guidelines that they
12 thought was prohibitive, one being the 43 DTI, another
13 one being the no manual underwriting, and the last one
14 being, there was no electronic submission capability.

15 We're actually in the process of addressing all
16 of these as we speak.

17 Any questions?

18 *(No response)*

19 CHAIR JACOBS: Thanks.

20 MR. NANN: Great. Thank you.

21 Mr. NANN: Moving on quickly to 4-C. This is
22 regarding AB 637, which was passed in October of 2013,
23 which allows some of the single-family down-payment
24 assistance money to be used for housing developments.
25 And we originally had thought about this in terms of

1 using it for predevelopment loans.

2 We're still working on the best plan for the
3 use of this money. But in the Business Plan, it did
4 pass. And so we have that authority, even though
5 single-family lending has first priority on that money.

6 CHAIR JACOBS: And Section 5 here.

7 MS. RILEY: We're just coming up together at
8 the same time.

9 Good afternoon, Mr. Chairman and Board Members.
10 I'm Jackie Riley. I'm the director of Administration for
11 the organization.

12 I've been affiliated with CalHFA, that used to
13 be CHFA a long time ago, when I started. So I have been
14 there -- I've been affiliated with the organization for
15 a long time, and have come back to help restructure a
16 little bit, help get personnel up and running again, and
17 doing some things like that.

18 So I'm here to talk about, last year at budget
19 time, we assessed all of our units, which we do every
20 year at budget time, to make sure that the positions
21 that they have are needed. And we do that on an ongoing
22 basis. Anytime anybody, any unit, any hiring manager
23 requests a new position, Personnel goes through it, talks
24 with them about the necessity for it, and do they need
25 the position, and trying to keep our overhead and our

1 costs down.

2 I can tell you, last year our budget came in
3 about \$7 million under what it was budgeted for, for
4 2012-13. And that number was \$36,300,000.

5 This year, at midway, we've expended about
6 \$19 million. So it looks like we're going to go over
7 that a little bit this year. And that's because
8 employees had a 3 percent increase. Most employees had
9 that. And also, we have the one strategic project that
10 had a million dollars contract.

11 So we're working very diligently to keep our
12 costs down. And we do that on an ongoing basis.

13 The other thing, that is B, and that's the
14 flexible workforce capabilities with HCD classifications,
15 CalHFA classifications. Some of those things have been
16 looked into. We understand similarities, differences,
17 and all that. But things are kind of progressing slowly.
18 And we'll know more about that when the reorg. is
19 finalized.

20 The other thing I'm speaking for, Tony Sertich,
21 right now, the Enterprise Risk Management Project is his.
22 Tony started that project this year, looking at the whole
23 enterprise and each division: What are the risks
24 inherent in each division. And he has assembled a team.
25 They have started working on it. They're about halfway

CalHFA Board of Directors Board Meeting – January 14, 2014

1 through. And at some point in time, it's anticipated
2 that by the end of this fiscal year, they'll be done and
3 ready to -- when we're done and have come up with some
4 strategies and all that, we'll be presenting that to the
5 Board. And Tony will be doing that.

6 And lastly, I'm switching over to the next
7 page, to E, evaluating staffing levels for scalability
8 and succession planning. This year, we're really going
9 to launch talent management and succession planning,
10 looking at each division to see where we're weak. You
11 know, we need to build our bench in a lot of areas.
12 We've got a couple that are really well staffed for going
13 forward and for continuing leadership; but we are weak in
14 many areas, so we're really looking at some strategic
15 hiring.

16 Thank you.

17 CHAIR JACOBS: Thank you.

18 MS. CAPPPIO: And the other items here, we've
19 covered?

20 CHAIR JACOBS: Cost study.

21 MS. CAPPPIO: So we'll move on to --

22 CHAIR JACOBS: *Keep Your Home California*.

23 MS. RICHARDSON: Sure. I'm Di Richardson. I'm
24 the legislative director for CalHFA and HCD. And I also
25 oversee the *Keep Your Home California* program.

1 You do have a report, I think, in your packet
2 somewhere. I'm not exactly sure where it is in your
3 packet --

4 CHAIR JACOBS: In the appendices.

5 MS. RICHARDSON: -- because I turned it in a
6 little late.

7 And this sort of is an overview of the growth
8 that we made in 2013. And there are just a couple things
9 that I want to bring to your attention for those of you
10 that are new to the Board. I will just give you a brief
11 overview.

12 The *Keep Your Home California* program is a
13 federally funded program. We received just short of
14 \$2 billion to help prevent foreclosures throughout the
15 state of California. We created four programs that we
16 administer ourselves.

17 The first is the Unemployment Assistance
18 Program. This is a program that -- for homeowners that
19 are unemployed, obviously. They're collecting benefits
20 from EDD. They can apply for assistance from *Keep Your*
21 *Home California*. And we will help them out, by making
22 their payment for up to \$3,000 a month for up to
23 12 months.

24 The second program is a Mortgage Reinstatement
25 Program. This is a program that was created for

1 homeowners that have had some kind of a temporary
2 hardship, they fell behind on their mortgage, their
3 hardship has ended, they're in a position now where they
4 can make their payments going forward, but they can't get
5 caught up on those arrearages. We will help make those,
6 and bring them current, up to \$25,000.

7 The third program is a Principal Reduction
8 Program. This is a program where a homeowner that's got
9 an ongoing hardship, we know in -- we've seen a lot of
10 folks that were unemployed, and now they're reemployed,
11 but they are not reemployed at the same level they were
12 before. They've, you know, had a death in the family,
13 they've become divorced, the typical sorts of hardships
14 that you can imagine, we'll pay up to \$100,000 to bring
15 their principal down, to get them again to a sustainable
16 payment.

17 The final program that we administer is the
18 Transition Assistance Program. And this is foreclosure
19 avoidance, in that if a homeowner is able to do a short
20 sale or a deed in lieu, they're avoiding foreclosure.
21 And we know there are costs that are associated with
22 that, so we can pay them up to \$5,000 to help them get
23 resituated in a new living situation.

24 The slides that I've given you, basically
25 demonstrate the growth in the program. You can see that

1 we've made a lot of changes. You know we've made a lot
2 of changes. We've reported on them.

3 And I think that in 2013, we had some pretty
4 phenomenal growth.

5 This program, for me, is kind of like peeling
6 an onion because we think we've nailed it, and then we're
7 constantly looking at why people don't qualify, to figure
8 out what we can do to turn that around. And it makes me
9 cry a lot, I'll just tell you, because I -- it's never
10 quite right.

11 So the fifth page, I think, of your handout is
12 the program highlights for 2013. And these are the
13 things that I really wanted to sort of bring to your
14 attention. And the first bullet talks about the increase
15 in our HAP ratio, from counseling to HAP. And the HAP is
16 the Homeowner Action Plan. Once a homeowner comes
17 through our process and completes counseling, if it looks
18 like they're eligible, they get a Homeowner Action Plan,
19 which details the documents that they need to submit to
20 us, so that we could move forward and process their
21 application.

22 And our counseling-to-HAP ratio increased
23 12 percent in 2013. So that's just an indication that
24 we were making those changes that needed to be made.

25 And just to sort of put that number into a

1 little bit more perspective, our counseling to HAP ratio
2 for 2012 was 59 percent; and for 2013, it was 71 percent.
3 So definitely, I think we're moving in the right
4 direction there.

5 The second bullet, I left off a really
6 important number, but it should say for 2013, the total
7 HAPs represented 45 percent of the HAPs we've had since
8 program inception. So, again, I think that that's
9 definitely showing that we're getting more homeowners
10 successfully through counseling and getting them through
11 funding.

12 We've also, as you know, made numerous changes
13 to the Principal Reduction Program, and 71 percent of the
14 total HAPs for PRP were generated in 2013. So, you know,
15 prior to 2013, we were having to tell a lot of people
16 that they couldn't participate. And one big reason for
17 that was that their servicers weren't participating.

18 We've seen the servicer participation go up
19 from 47 in 2012, to 113 by the end of 2013. So, again,
20 things are definitely trending in the right direction.

21 I think I'll just leave it there to answer
22 whatever questions.

23 CHAIR JACOBS: Yes, any questions?

24 MS. CABALLERO: Yes. Why wouldn't a servicer
25 want their customer to participate in this program? I

CalHFA Board of Directors Board Meeting – January 14, 2014

1 mean, it's ludicrous. I mean, it just --

2 MS. RICHARDSON: That's the part of the onion
3 that makes me cry.

4 MS. CAPPPIO: Will you come with us to the
5 banks?

6 MS. CABALLERO: Yes, I'll go with you to the
7 banks. I just -- it's unbelievable to me.

8 MS. RICHARDSON: Again, I think that as it
9 started out, when the program started, we required a
10 servicer match. That wasn't very successful. So we
11 eliminated that, thinking, "Oh, my gosh, you know, okay,
12 it's \$100,000. How can you say no?" Well, they were
13 still saying no.

14 And so we added this -- we added a recast
15 provision, which basically said, you know, take the money
16 and then recast the loan at that point.

17 And we were able to pick up a significant
18 number of more lenders. They didn't have to adjust the
19 term, they didn't have to adjust the interest rate; they
20 just had to, you know, lower the payment.

21 And that's the -- and then we were still
22 getting an awful lot of noes. And it was like, "What the
23 heck is going on here?" And we figured out that there
24 were a lot of people that had HAMP loans, and those could
25 not be recast. So now, we have a curtailment arm that we

1 use, where there's -- you know, we can't go in and mess
2 with that loan while it's in a HAMP mod. because those
3 servicers are earning an incentive payment for that.

4 And so we've had to come up with a way to allow
5 that HAMP mod., to continue to allow those FHA loans and
6 the VA loans to continue, but still, to lop off, you
7 know, some of that principal, especially for homeowners
8 that are severely underwater, so that they have an
9 incentive to continue to stay in that loan after that
10 trial payment ends.

11 CHAIR JACOBS: Any other questions?

12 *(No response)*

13 CHAIR JACOBS: All right, thank you, Diane.

14 Let's see. Any members of the public have any
15 questions on this Business Plan?

16 *(No response)*

17 CHAIR JACOBS: I know Item 7, we've covered on
18 the integration.

19 *(No response)*

20 CHAIR JACOBS: Seeing none, let's move on.

21 --o0o--

22 **Item 7. Reports**

23 CHAIR JACOBS: I guess we've got reports --
24 everyone, in your appendices, just the reports, a lot of
25 the background data and what was discussed.

1 Any questions about that?

2 (No response)

3 --o0o--

4 **Item 8. Discussion of other Board matters**

5 CHAIR JACOBS: All right, let's see, any other
6 Board matters, anyone?

7 MS. SOTELO: I just have a quick question about
8 the Business Plan.

9 When do we get the update on the next -- I'm
10 sorry, you had mentioned it before, Claudia.

11 MS. CAPPPIO: Right. We will be working on the
12 new Business Plan at the end of the month, through
13 February; and we'll be presenting you a draft at the
14 March meeting.

15 MS. SOTELO: Okay, and, again, you'll give a
16 report --

17 MS. CAPPPIO: Yes.

18 MS. SOTELO: -- as to the status of all of
19 these items?

20 MS. CAPPPIO: Yes, with what we're thinking
21 about in terms of priorities, asking new input, and your
22 sort of sense of priorities. And then that will be
23 finalized for Board action in May.

24 MS. SOTELO: And before then, do you go out to
25 the public, to the development community, to the users,

1 to the servicers, to ask for input on any of those items?

2 MS. CAPPIO: In an informal way. We don't have
3 public hearings. But, obviously, there is a great
4 network here. So that's what we do.

5 CHAIR JACOBS: And thanks to everyone.

6 That was a lot of hard work. I know everyone's
7 probably hungry here, but it was important to get through
8 all of that in detail.

9 All right, let's move on.

10 --o0o--

11 **Item 9. Public testimony**

12 CHAIR JACOBS: Any members of the public have
13 any matters to be brought to the Board's attention?

14 *(No response)*

15 --o0o--

16 **Item 10. Adjournment**

17 CHAIR JACOBS: Okay, seeing none, we can move
18 on to adjourn this meeting.

19 All right, thank you, everyone.

20 *(The gavel sounded.)*

21 *(The meeting of the Board of Directors*
22 *concluded at 1:30 p.m.)*

23 --o0o--

REPORTER'S CERTIFICATE

I hereby certify that the foregoing proceedings were duly reported by me at the time and place herein specified;

That the testimony of said witnesses was reported by me, a duly certified shorthand reporter and a disinterested person, and was thereafter transcribed into typewriting.

I further certify that I am not of counsel or attorney for either or any of the parties to said deposition, nor in any way interested in the outcome of the cause named in said caption.

IN WITNESS WHEREOF, I have hereunto set my hand on the 20th day of January 2014.
