17 MS. OJIMA: Mr. Cohen?
18 *(No response)*
19 MS. OJIMA: Ms. Patterson?
20 MS. BOATMAN PATTERSON: Here.
21 MS. OJIMA: Mr. Jacobs?
22 CHAIR JACOBS: Here.
23 MS. OJIMA: We have a quorum.
24 CHAIR JACOBS: Great.
25 Thanks, JoJo.

1 **Item 3. Chairman/Executive Director comments**

2 CHAIR JACOBS: Before we jump into the agenda,
3 we've got some new faces.

4 So if you wouldn't mind saying hello to
5 everyone, introducing yourself.

6 MS. RIGGS: Sure.

7 Do I need a microphone?

8 CHAIR JACOBS: Yes, if you would.

9 MS. RIGGS: Good morning. My name is Susan
10 Riggs. I am currently on loan from the Business Consumer
11 Services and Housing Agency as Deputy Secretary for
12 Housing. And I'm in the function of the Acting Director
13 of Housing and Community Development.

14 I have many, many years in the housing field,
15 over in the legal policy realms; and I'm just happy to be
16 here and happy to participate.

17 And, actually, I want to give a shout-out to
18 Tia, who was confirmed yesterday by the Senate.

19 *(Applause)*

20 MS. BOATMAN PATTERSON: The Senate Rules
21 Committee. Let's correct it. It was the Senate Rules
22 Committee, and I still have to go to the full floor. But
23 we're part of the way there.

24 CHAIR JACOBS: Welcome.

25 MS. RIGGS: Thank you.

1 MS. AVILA FARIAS: Good morning. My name is
2 AnaMarie Avila Farias. And I'm very excited to be part
3 of the Board and joining some new colleagues.

4 And I'm coming to the Board with 21 years of
5 affordable housing experience. I've had the opportunity
6 to work in various counties throughout the Bay Area:
7 San Francisco County, Alameda County, and currently
8 Contra Costa County.

9 My experience ranges from affordable-housing
10 finance to program management. And I'm looking forward
11 to working here at the Board at the state level and
12 bringing my expertise here.

13 So thank you for having me.

14 CHAIR JACOBS: Welcome.

15 MS. BOATMAN PATTERSON: I just have to tell a
16 quick funny story.

17 So we were at the Governor's reception for the
18 women appointees; and Susan and I were talking, and we
19 were so excited about the new board member, AnaMarie
20 Avila Farias. And so we were chitchatting; and I said,
21 "Oh, yes, she has twenty-plus years experience." And,
22 like, she's standing right there.

23 She had walked over to introduce herself.

24 And I was like, "Oh, we were just talking about
25 you."

1 So welcome. Welcome, both of you.

2 CHAIR JACOBS: And, Tim, have you had a chance
3 to introduce yourself?

4 MR. SCHAEFER: Good morning. My name is Tim
5 Schaefer. I'm the Deputy Treasurer with the California
6 State Treasurer's office, Treasurer John Chiang.

7 My organizational responsibility in that office
8 is for the office's investments, public finance and
9 centralized treasury functions. And in my spare time,
10 I'm supposed to represent him on boards such as this.

11 I'm a newcomer to state service. I have
12 45 years of experience in the public finance business,
13 starting as a trader. I started when I was seven.

14 And progressing through the investment banking
15 function at a couple of major banks -- one in New York,
16 one in San Francisco -- before entering the financial
17 advisory business about 25 years ago.

18 I don't pretend to be an affordable-housing
19 expert, though I do have some housing finance in my
20 background. But bonds are my thing, and that's why
21 I'm here. And I'm delighted to be here and join the
22 shout-out to Tia on her confirmation by the Rules
23 Committee.

24 MS. BOATMAN PATTERSON: Thank you.

25 CHAIR JACOBS: We are lucky to have the three

1 of you joining this board.

2 Thank you.

3 --o0o--

4 **Item 2. Approval of the minutes of the March 17th,**
5 **2015, Board of Directors meeting**

6 CHAIR JACOBS: We've got our March 17th
7 minutes.

8 Does anyone want to bring the minutes up?

9 MS. CABALLERO: I'll move approval.

10 MS. SOTELO: Second.

11 CHAIR JACOBS: JoJo?

12 MS. OJIMA: Thank you.

13 Ms. Caballero?

14 MS. CABALLERO: Aye.

15 MS. OJIMA: Mr. Schaefer?

16 MR. SCHAEFER: Abstain.

17 MS. OJIMA: Thank you.

18 Ms. Gunn?

19 MS. GUNN: Aye.

20 MS. OJIMA: Ms. Falk?

21 MS. FALK: Yes.

22 MS. OJIMA: Ms. Avila Farias?

23 MS. AVILA FARIAS: Abstain.

24 MS. OJIMA: Thank you.

25 Mr. Gunning?

1 MR. GUNNING: Aye. Aye.

2 MS. OJIMA: Thank you.

3 Mr. Prince?

4 MR. PRINCE: Yes.

5 MS. OJIMA: Ms. Riggs?

6 MS. RIGGS: Abstain.

7 MS. CAPPIO: Thank you.

8 Ms. Sotelo?

9 MS. SOTELO: Aye.

10 MS. OJIMA: Mr. Jacobs?

11 CHAIR JACOBS: Aye.

12 MS. OJIMA: The minutes have been approved.

13 CHAIR JACOBS: Thanks, JoJo.

14 MS. OJIMA: Barely.

15 --o0o--

16 **Item 4. Report of the Chair of the Audit Committee**

17 CHAIR JACOBS: All right, Audit Committee.

18 Chairman Gunning, would you like to give a
19 quick rundown of what we discussed?

20 MR. GUNNING: Oh, you're not going to give any
21 comments? Turn it over?

22 CHAIR JACOBS: I turn it over to you for
23 comments.

24 MR. GUNNING: Okay, thank you.

25 The Audit Committee met earlier today. And I

1 think, actually, a very good presentation by our auditor,
2 CliftonLarsonAllen.

3 We discussed the mortgage housing fund. I
4 think we had a clean audit. I think there's still some
5 concerns about what happens down the road with the fund
6 and its ability to pay claims. I think we're going to
7 get some information back from staff with the process to
8 handle that going forward.

9 We also took a look at our charter. I think as
10 new members, a lot of us had not even seen the charter.
11 So Victor helped us understand how that came about and
12 our roles and responsibilities. And I think we decided
13 to leave it as is, so we're satisfied with that going
14 forward. And if there are any issues, staff will present
15 any of the sections we should take a look at or work
16 further through.

17 Finally, we recognize that the auditor's
18 contract expires at the end of the year. And the auditor
19 has agreed to extend the contract for a year under the
20 same conditions, the same personnel, which is very
21 important to staff, for continuity purposes.

22 And so we recommend, from the Committee to the
23 Board, that we do extend the contract for one more year.

24 And that's it, Mr. Chairman.

25 CHAIR JACOBS: All right. Thank you.

1 We've got a pretty weighty agenda here. But
2 I think before we jump into it, are there any members of
3 the public who wish to address the Board?

4 *(No response)*

5 CHAIR JACOBS: No? We have another opportunity
6 at the end of the meeting.

7 All right, great.

8 MR. PRINCE: And I'm sorry, is that something
9 that we have to act on, on the auditor; or does that come
10 in later?

11 MR. GUNNING: No, Tia has authority to execute
12 the contract, so there is no action required by the
13 Board.

14 CHAIR JACOBS: Yes, it's under the limit.

15 MR. PRINCE: Thank you.

16 MR. GUNNING: Good question. Thank you.

17 MR. PRINCE: I was just going to second your
18 motion.

19 MS. BOATMAN PATTERSON: Can I do a report out?

20 CHAIR JACOBS: Yes, Tia, jump in with reports.

21 --o0o--

22 **Item 3. Chairman/Executive Director comments**

23 MS. BOATMAN PATTERSON: A lot has happened.
24 And I know we have a weighty agenda so I'll be really
25 quick.

1 I think since the last time we met, we now have
2 an actual appointed Director of Homeownership, and that's
3 Ken Giebel.

4 We also have made some operational changes on
5 our Multifamily side. Tony Sertich, who was our risk
6 manager, will be stepping in an acting capacity and
7 stepping in as Multifamily Program administrator.

8 You remember Rick Okikawa. Rick Okikawa was
9 program administrator, but he was over both Single Family
10 and Multifamily. And so Tony will be stepping into that
11 role to allow us to focus on our Multifamily lending
12 and operational activities.

13 We have a training contract that we're
14 executing, so that we can build some of those internal
15 capacities, so that we could really get back into the
16 Multifamily lending game.

17 So I'm very excited about the new leadership
18 structure that we're putting in place. I'm very excited
19 about it. And I think we're going to -- the trajectory
20 looks really well for us, and so I'm happy with some of
21 those new moves.

22 Also, at the end of the meeting -- you all had
23 asked at the end of the last meeting that we prepare the
24 approaches and scope and work of the organizational
25 assessment that we had taken on. And that should have

1 been provided to you. The scope of work should have been
2 provided to you and our plan. And we worked very
3 diligently. At the end of the meeting, we will pass out
4 kind of an overview of what the -- assessment the
5 consultant has done so far, and an historical perspective
6 of the Agency. We will pass that out at the end of the
7 meeting. And so that way, for our next meeting, you'll
8 have that material to read through. And should you have
9 any questions about that, we can ask that during the next
10 meeting.

11 Also, one of the items that we have is Item 12.
12 We'd like to move that up to Item 6, to take that after
13 Item 6. That was the overview and the presentation of
14 the MHSA, because we have visitors here who we would like
15 to be able to accommodate to be able to present that
16 item.

17 And you'll see something new in the budget and
18 strategic plan presentation. We are going to present
19 those together. You should have noticed that in your
20 memo. We've usually presented that as separate items.
21 And there are two separate resolutions, but we're going
22 to present that as one presentation. We think that will
23 be a lot clearer for the Board members, so that you not
24 only know, here is what we're asking as our strategic
25 business plans and the goals that we've set out for

1 ourselves; but we'll have the operating budget that goes
2 along with that, so that you know how we're going to pay
3 for those strategic initiatives. And so that will be
4 presented together.

5 One item I wanted to particularly bring to your
6 attention is the out-of-state travel policy. That is
7 completely -- we've revised that, working very closely
8 with our agency, the Business, Consumer Services and
9 Housing Agency and their admin.

10 Because we are independent, that is not subject
11 to approval by the Governor's office. But we wanted to
12 make sure that our out-of-state travel policy completely
13 was consistent with the out-of-state travel policy of
14 other state agencies. And for openness and transparency
15 reasons, we have included a tab that talks about the
16 out-of-state travel, kind of our guideline and an exhibit
17 of the trips that staff and Board members that we want to
18 take. A new item that you will see is an actual breaking
19 out of the Board and Board expenditures. I worked very
20 closely with the Chair to create a budget for the Board.

21 One of the -- there was a BSA audit in 2011
22 that said we wanted to have a more robust Board, which
23 I am so grateful for because I have all of you, and we
24 wanted to have a more engaged Board.

25 And so by having a Board budget that allows you

1 to participate in training activities and allows you to
2 participate in legislative meetings as we go forward with
3 new initiatives, we want to be able to have a board that
4 has the ability to engage on those issues. So you'll see
5 that as well. And we'll make sure, we show you that tab
6 on that Board breakout on that as well.

7 And so I'm very comfortable with the
8 out-of-state budget that we'll be presenting. I think
9 with an overall operating budget of \$40 million, a very
10 modest \$137,000 for out-of-state travel. Essential
11 out-of-state travel, because these are critical items
12 that we have identified that are part of our mission as
13 a lender and having to have those lender relationships.
14 So I'm very comfortable with that. But we welcome any
15 questions and discussions on that when the budget
16 actually gets to be presented.

17 So I wanted to just give you kind of an
18 overview of those things that you'll be seeing as they
19 are presented when staff comes up, so that if you have
20 questions, we can ask you back at that time.

21 CHAIR JACOBS: Thank you.

22 --o0o--

23 **Item 5. Discussion, recommendation, and possible action**
24 **to adopt CalHFA Gift Ticket/Pass Distribution**
25 **Policy**

1 CHAIR JACOBS: Let's jump into Item Number 5.
2 We have a resolution about the gift ticket and pass
3 policy.

4 Did everyone have a chance to read through
5 that?

6 *(No response)*

7 CHAIR JACOBS: Any discussion? Does anyone
8 want to...?

9 MS. FALK: Move approval.

10 MR. GUNNING: Second.

11 MS. CABALLERO: Yes, I just had a -- let me
12 see.

13 MR. GUNNING: I seconded, JoJo.

14 CHAIR JACOBS: We've got a second.
15 We have a comment.

16 MS. CABALLERO: I just had a -- I have a note,
17 and I'm trying to read it real quick.

18 So the only issue I had, it has to do with the
19 request that any changes to the policy can be done
20 without board approval. And while I'm not saying it
21 should come back, I think there should be some kind of
22 notice.

23 The whole gift policy through the FPPC process
24 is very complicated. And over the years, it's changed
25 significantly. And so I think it's good for us, as Board

1 members, to know if the FPPC changes something, and then
2 you're going to change our policies in relation to it,
3 what it is that's been changed. And so just a notice
4 would be good, I think either at a board meeting or
5 however it is that we would keep ourselves apprised about
6 that. That's the only change.

7 MS. BOATMAN PATTERSON: Absolutely, Madam
8 Secretary. We will make a note of that in the
9 resolution, that we will notice the Board of changes to
10 our gift policy --

11 MS. CABALLERO: That would be great.

12 MS. BOATMAN PATTERSON: -- and any gift policy
13 that should be promulgated by the FPPC.

14 MS. CABALLERO: Great.

15 Thank you.

16 CHAIR JACOBS: So do we have a motion with the
17 Secretary's amendment?

18 MS. FALK: So moved.

19 MR. GUNNING: So seconded.

20 MS. OJIMA: Ms. Caballero?

21 MS. CABALLERO: Aye.

22 MS. OJIMA: Mr. Schaefer?

23 MR. SCHAEFER: Aye.

24 MS. OJIMA: Ms. Gunn?

25 MS. GUNN: Aye.

MS. OJIMA: Resolution 15-05 has been approved.
CHAIR JACOBS: Thanks.
--o0o--

**Item 6. Discussion, recommendation and possible action
regarding final loan commitment for:
* Virginia Terrace project (Barstow)**

CHAIR JACOBS: All right, we've got the two
loan commitments.
Ruth, are you...?
MR. SERTICH: Good morning, Mr. Chairman. Good
morning, Board Members. My name is Tony Sertich. I have

1 been here in a different capacity before as the financing
2 risk manager; but I'm very excited to begin my role as
3 the Multifamily Programs administrator.

4 On these two deals that are coming your way
5 today, I have to admit that Ruth has taken a lead on
6 them. I haven't been that involved. So I'm going to
7 pass it off to Ruth Vakili to walk you through the two
8 deals. And if you have any questions, we'll be here to
9 answer them.

10 MS. VAKILI: And you'll all be glad to know
11 that Tony is in charge of the slides, because I tend to
12 not move forward on them. So he is going to keep me on
13 task.

14 Good morning. I'm Ruth Vakili; and I'm here
15 to present the Virginia Terrace, first of all, and then
16 we'll roll into Park Place.

17 Virginia Terrace is, as I said, a 76-unit
18 affordable family project in Barstow.

19 There are 13 one-bedroom units, 48 two's, and
20 15 three's. And this is a new project in our
21 portfolio -- to our portfolio.

22 It's located close to all the amenities in the
23 downtown area of Barstow, where there is a high demand
24 for workforce housing in this area.

25 The project has, itself, 97 percent vacancy

1 rate. Other projects in the area are between 95 to
2 97 percent vacancy and have wait lists. So there's a
3 large demand for this kind of a project.

4 I think that the location of the project and
5 the fact that the workforce housing is a strong element
6 in this market are very favorable.

7 The building itself was built in 1981. And
8 although it's in good condition, it does at this point
9 require substantial rehab of 36,000 a unit.

10 Rehab is planned to extend the life of project.
11 It will also achieve a 30 percent energy efficiency. And
12 the energy savings and overall improvements result in an
13 operating cost decline of 19 percent.

14 So the improvements will help the overall
15 maintenance and annual schedule of replacements that were
16 required in the past.

17 Some of the work that will be done is, on the
18 exterior upgrades, there will be new roofing, exterior
19 paint, new windows, PV solar systems, siding upgrades.

20 On interiors, the upgrades will be new
21 appliances, replacement of the HVAC systems, cabinet and
22 countertop replacements, bath and kitchen upgrades.

23 This is a picture of a typical kitchen and
24 typical bath. And the project is definitely aged. So
25 these will be very welcome improvements for the tenants.

1 The work that's going to be done, the tenants
2 will remain in place during the work.

3 The general contractor, Sun Country Builders,
4 is very well versed in doing the type of repairs and
5 replacements that are done in one day and buttoning up
6 the unit, and the tenant comes back in the evening with
7 their units fully remodeled.

8 So typically, they would do the kitchen, come
9 back the next day, and finish off with the bath and
10 painting. So we're not anticipating any temporary or
11 permanent relocation. And since this is workforce
12 housing, people will be out of their units during the
13 day.

14 This project, we did complete a seismic
15 study, and found that it does qualify for the
16 earthquake-insurance waiver. The PML is 9 percent, so
17 we will be seeking a waiver of the earthquake insurance.

18 In regard to the rent chart, the rent chart
19 shows that 20 percent of each of the unit types are
20 rented to 50 percent AMI. The remaining units are rented
21 at 60 percent AMI. The rents shown are between 73 to
22 88 percent of current market rents for the area. The
23 project also has 75 units, supported by Section 8 HAP
24 contract, which will be renewed to 20 years. And that
25 will be renewed and in place prior to our loan closing.

1 The rent levels represent an improvement in
2 affordability. And the previous restrictions were
3 100 percent of the units were restricted, to 60 percent
4 AMI. We are deepening the affordability and extending
5 the affordability. So this represents an improvement
6 not only for the physical condition, but also in the
7 long-term affordability of the project.

8 We are requesting today a CalHFA HUD Risk-Share
9 loan of \$5.6 million for the acquisition and rehab. That
10 loan will be for a term of 12 months, at an estimated
11 3.75 percent. Upon completion, we will roll into and
12 convert to a permanent loan of 40 years, \$4,165,000.

13 We're estimating right now an underwriting rate
14 of 5 percent, acknowledging that the rates will change,
15 and have been changing recently.

16 The interest rate will not lock until just
17 before closing. So there is room for some fluctuations
18 in the rate.

19 In the transaction, in addition to CalHFA's
20 loan, there are three existing HUD loans. One will be
21 paid off; one is paid down and will be assigned to the
22 new borrowing entity; and the third one will also be
23 assigned to the new borrowing entity.

24 This is a debt restructure, and currently under
25 review by HUD. It's subject to HUD's approval before we

1 close. And the loans will be residual receipts for
2 40 years, 1 percent.

3 The borrower for this transaction will be
4 SFC-VT LP, which is a mouthful. And the general partners
5 will be Step Forward Communities and TDC Development
6 Services. Triton Community Development will be the
7 developer, and CREA will be the tax-credit limited
8 partner.

9 The team as a whole has a broad background in
10 development finance services and management of affordable
11 housing. And Step Forward Communities itself has been a
12 service provider, providing a range of services to
13 tenants, and partnering with a strong developer; and
14 Triton Development is expanding their ability to serve
15 the community. They reach out and serve primarily rural
16 areas. So this will be a good foray into housing
17 development and expand Step Forward's reach and exposure.

18 Other parties involved are the property
19 manager, PMG, Inc. And the architect will be Musser
20 Associates. The general contractor is Sun Country
21 Builders. And Triton Development has done several
22 projects with Sun Country Builders; and all of the
23 principals are very experienced in this kind of
24 development.

25 So with that, I'll take any questions.

1 CHAIR JACOBS: Dalila?

2 MS. SOTELO: Thank you very much, Ruth.

3 And congratulations, Tony. We're excited to
4 have you in the position and excited to see our
5 Multifamily program revived.

6 I just have a couple questions, Ruth.

7 What is the contingency if the rehab doesn't
8 happen in a day and folks are unable to come back to
9 their units?

10 Is there a budget in the -- an allocation in
11 the budget for that?

12 MS. VAKILI: There will be for at least one of
13 the units that will be available. And in that case,
14 Sun Country Builders has demonstrated over and over their
15 ability to, for example, get the work done and get the
16 kitchen back and functional in a day. But in case that
17 doesn't happen, there will be a unit that will be
18 available.

19 MS. SOTELO: Okay. And then two questions
20 related to the financing.

21 The Section 8 contract expires sometime soon.
22 And what is --

23 MS. VAKILI: The current contract -- I'm sorry.
24 The current contract expires in eight years, but it is
25 in the process of being renewed for a 20-year contract.

1 MS. SOTELO: Okay, so our underwriting assumes
2 that that extension will happen?

3 MS. VAKILI: Yes. And that's -- our closing is
4 contingent on that happening.

5 MS. SOTELO: Okay, so you'll get the commitment
6 of the extension prior to the closing?

7 MS. VAKILI: Yes.

8 MS. SOTELO: And then our debt will be senior
9 to the HUD debt?

10 MS. VAKILI: Yes, it will.

11 MS. SOTELO: Okay, great. Thank you.

12 Oh, and just maybe in the future, staff
13 reports, a little bit more information about the
14 nonprofit itself, as a separate paragraph. I think it's
15 important to highlight the importance of nonprofit
16 participation in these properties.

17 MS. VAKILI: Shall do.

18 MS. SOTELO: Okay, thanks.

19 CHAIR JACOBS: Just one other thing going
20 forward on multifamilies also, if we have some discussion
21 on water efficiency, just for all future projects.

22 MS. SOTELO: Yes, that's a good idea.

23 MS. VAKILI: Okay.

24 CHAIR JACOBS: Janet?

25 MS. FALK: Well, following up on Dalila's

1 comment about the nonprofit, I understand that the
2 nonprofit is a new nonprofit and really this is their
3 first project.

4 I'd like to know what kind of guarantees or
5 assurances we have that if the project gets in trouble,
6 there's some resources behind it or backup.

7 You know, what happens if there's problems
8 going down the road, both in construction and in
9 operations?

10 MS. VAKILI: Well, I think that's a legitimate
11 question for any project.

12 And with the team that's been developed for
13 this property, you have vast development, financing,
14 management, service provision experience.

15 And so in the process of working with Step
16 Forward, I anticipate that the development team will
17 bring to bear all of their experience, and work with
18 Step Forward to be a good partner.

19 In addition, you know, our oversight on an
20 ongoing basis during rehab and during operations, is
21 critical in the process; so that if there are any issues
22 that are coming up, we're seeing them early and we're
23 communicating any of our concerns.

24 So the team approach on the developer's side,
25 the team approach on CalHFA's side I think are vital, and

1 would head off any potential issues.

2 MS. FALK: Well, I'm not so concerned -- on the
3 development side, I understand that. I'm more concerned
4 about the operational side and what kind of -- you know,
5 typically, the sponsor -- or the borrower is supposed to
6 have some -- I mean, do they have financials that
7 support, that there are some assets there to take care of
8 things, if things go wrong? And, you know, I was just
9 wondering if you had looked into that, and are there
10 operating-deficit guarantees to the investor? Who is
11 putting those up? You know, who is basically, you know,
12 responsible, and who is -- where are the sort of deep
13 pockets coming from?

14 MS. VAKILI: Okay, Triton Development is
15 providing the guarantees for construction and completion
16 and operating-deficit guarantees. And that will be part
17 of the requirement also of the tax-credit investor, is to
18 put up the guarantees and the operating-deficit deposit
19 and guarantee. So that will be an ongoing obligation.

20 MS. FALK: Okay. I also have another question
21 that has to do with loan.

22 Is our program -- I just want to clarify this.
23 So all these loans seem to be prepayable in 15 years.
24 And I just wanted to raise that as an issue, because one
25 of the things in the past, the loans were not prepayable

1 without CalHFA's permission, and the affordability being
2 extended -- or continued -- well, continued and extended.
3 And that was the only leverage the Agency really had,
4 especially, you know, 15 or so years ago, when the market
5 was really hot and people were turning over projects and
6 getting out of restrictions and so forth.

7 So, you know, the fact that they were not
8 prepayable without going through quite a lot. So I just
9 wanted to raise that as a policy issue for how we're
10 approaching these loans. Because my concern is that they
11 stay affordable for a long period of time.

12 MR. SERTICH: Yes, yes. And we're concerned
13 about the affordability as well.

14 On the prepayment of the loan itself, you know,
15 that was becoming a competitive issue for CalHFA. It was
16 hard to get developers to want to lock in a 30- or
17 40-year loan.

18 On the affordability side, we do have CDLAC and
19 TCAC restrictions on most of our loans that extend out to
20 up to 55 years. So the affordability restrictions on
21 that side are still going to remain in place, even in the
22 case that ours may go away.

23 MS. SOTELO: Yes. I think programmatically
24 that's the issue; right? That programmatically there
25 could be a payoff of the loan, but the covenant still

1 extends with the lands.

2 MS. FALK: Right. No, I understand that. But
3 I mean, it just gave the Agency a lot of leverage in the
4 past, to -- that they were not prepayable except under
5 certain conditions. And this way, they are prepayable,
6 and then you sort of -- you don't have as much leverage
7 to keep them in nonprofit ownership --

8 MR. SERTICH: We understand your concern.

9 MS. FALK: -- or whatever it is that you want
10 to try to achieve.

11 MR. SERTICH: It was just about getting the
12 loans in the door.

13 MS. FALK: Yes.

14 MR. SERTICH: So if we don't have them at all...
15 I mean, it's a balance.

16 MS. FALK: Yes.

17 MR. PRINCE: As one of those who has that
18 lockout, it is not a marketable item. So I do echo that
19 issue raised.

20 So my other concern is the level of renovation
21 is laudable, but at the same time, a little
22 nerve-racking. I assume there's also some kind of
23 physical-needs assessment and what's going to happen over
24 a period of time.

25 I think that the tax-credit market -- the

1 equity syndicators are definitely having issues with
2 deals that they don't have enough renovations, and our
3 portfolio of 25 deals, the one that is not working is the
4 4 percent deal that didn't have enough renovations done
5 upfront. So I just want to make sure, I assume all of
6 the due diligence has happened about making sure the
7 physical assets can be treated well.

8 And it's also good that you have the housing,
9 the Section 8, right? They are to help with the
10 operations. But 36,000 may not be enough, in my
11 estimation; but without seeing the whole physical-needs
12 assessment plan and what's going to happen over time, I
13 trust you have looked at that.

14 MS. VAKILI: We have. We have a PNA, of
15 course. Our staff has been down to the site to make sure
16 that the scope is appropriate.

17 We're also requiring capitalized replacement
18 reserve of a thousand a unit.

19 MR. PRINCE: Good.

20 MS. VAKILI: And I believe \$400 per unit in
21 annual replacement reserve deposits.

22 We go thoroughly through the PNA to make sure
23 that we agree with it. And if we don't, we request and
24 require additional scope.

25 In this case, we did not have to require

1 anything additional. The developer was able to determine
2 exactly what needed to be done on the property.

3 On an ongoing basis, our asset managers also
4 inspect regularly, and make sure that the property, when
5 it's complete, remains in good condition; and if there
6 were any deficiencies, they would be noted and required
7 to be taken care of.

8 CHAIR JACOBS: Any other discussion?

9 *(No response)*

10 CHAIR JACOBS: Anyone want to move this?

11 MR. PRINCE: I'm happy to move for acceptance,
12 or whatever the right term is.

13 CHAIR JACOBS: Do we have a second to this
14 motion?

15 I think we have a -- wasn't there a resolution
16 to approve this one, somewhere?

17 MS. SOTELO: There is, yes. The last page.

18 MS. OJIMA: 15-06.

19 CHAIR JACOBS: Resolution 15-06, I believe.

20 MR. PRINCE: So moved.

21 CHAIR JACOBS: Preston has moved that.

22 Do we have a second?

23 MS. SOTELO: I'll second approval.

24 CHAIR JACOBS: JoJo, let's do the roll.

25 MS. OJIMA: Thank you.

1 Ms. Caballero?

2 MS. CABALLERO: Aye.

3 MS. OJIMA: Mr. Schaefer?

4 MR. SCHAEFER: Aye.

5 MS. OJIMA: Ms. Gunn?

6 MS. GUNN: Aye.

7 MS. OJIMA: Ms. Falk?

8 MS. FALK: Aye.

9 MS. OJIMA: Ms. Avila Farias?

10 MS. AVILA FARIAS: Aye.

11 MS. OJIMA: Mr. Gunning?

12 MR. GUNNING: Aye.

13 MS. OJIMA: Mr. Prince?

14 MR. PRINCE: Yes. And I'm excited for the

15 Multifamily Department.

16 MS. OJIMA: Thank you.

17 Ms. Riggs?

18 MS. RIGGS: Aye.

19 MS. OJIMA: Ms. Sotelo?

20 MS. SOTELO: Aye.

21 MS. OJIMA: Mr. Jacobs?

22 CHAIR JACOBS: Aye.

23 MS. OJIMA: Resolution 15-06 has been approved.

24 CHAIR JACOBS: Great.

regarding final loan commitment for
*** Park Place project (Los Angeles)**

CHAIR JACOBS: And now we've got another project in Panorama City.

MS. VAKILI: This Park Place apartments is in our portfolio currently; and it is located in the Panorama City area of the San Fernando Valley.

The location of the Park Place project, it really couldn't be better in terms of serving the workforce housing at Kaiser, which employs 3,000 people, is adjacent to the property. There's a bus stop right in front of it. It's just ideally located for serving the community.

It was built in 1966; and it has 142 units of family housing, with a mix of studios, one-, two-, and three-bedroom units. It's a three-level building, with a playground, swimming pool, spa, laundry room, and a community room. It's served by two elevators.

The property has been -- as you can see, it's maintained very well. But at this point, there will be some minor rehab of about 8,000 a unit; and replacements would include select windows, lining upgrades, security improvements, elevator repairs.

On the interior, on an as-needed basis, the carpeting will be replaced, countertops, cabinets.

25

And the rehab budget is \$1,163,673.

The improvements that are going to take place will result in an overall reduction in operating costs due to reduction of repair and maintenance costs. And they're anticipating a 13 percent savings in operating budget, as compared to 2014.

This slide shows a typical bathroom. There it is. It looks pretty typical. But on an as-needed basis, all the units will be upgraded.

And the next slide -- see, Tony is trying to get me to move forward. I can see that right now.

Okay, the rents of the property are about 65 to 93 percent of average market rent. And the affordability for this project will be extended. The current affordability restrictions expire in 2031. With a new loan, the restrictions will be extended to 2055.

And currently, CalHFA's affordability restrictions on the property are 20 percent of the units, restricted to 50 percent AMI; with the new loan, will increase the affordability to not only 20 percent at 50, but also at 80 percent at 60 percent AMI.

Our borrower for the project is PPA Associates; Foundation for Quality Housing Opportunities is the general partner; and Dangler, Inc., is the property manager.

1 Gary Braverman is the president of FQHO and
2 Dangler, Inc. And Gary has several projects in our
3 portfolio that have been in our portfolio for some time,
4 successfully and well-managed, very well maintained.

5 And we have a good long-standing relationship
6 with Gary Braverman.

7 The transaction itself will be what we call a
8 transfer of physical assets.

9 The existing borrowing entity will remain the
10 same. And in the process of this transaction, the
11 interest of the current investor, Lehman, the limited
12 partner, will be assigned to new limited partners, a kind
13 of friends-and-family transaction.

14 The interest of the limited partner will now
15 be assigned to Dangler, Gary Braverman, Heidy Braverman,
16 David Skinner, and Katherine Skinner, who are family
17 members.

18 And once the TPA is complete and CalHFA is
19 approved, the CalHFA loan will be paid off by a Citibank
20 loan of \$9.5 million. And Citibank will be the entity
21 that provides the rehab funds, which are moderate rehab.

22 During the 12-month Citibank loan, our CalHFA
23 existing regulatory agreement will remain on title, ahead
24 of the Citibank loan.

25 Once the rehab is complete, our loan will pay

1 off the Citibank loan. So this project is going out of
2 our portfolio for a 12-month period of time, coming back
3 into our portfolio for the permanent period of 40 years.

4 Our permanent loan would be \$11,300,000.

5 We're currently underwriting to a rate of
6 5 percent for the permanent loan; and we're anticipating
7 locking the interest rate 15 days prior to the Citibank
8 loan closing.

9 We acknowledge that rates are changing. We try
10 to underwrite our interest rate with a decent cushion.
11 So at this point, we're estimating a 5 percent interest
12 rate. In this kind of transaction, when another entity
13 is paying off a CalHFA loan and we're locking in a rate,
14 anticipating closing a permanent loan in the future, when
15 we lock the rate, there is a risk if the borrower does
16 not come back to us, that we would be subject to an
17 interest-lock breakage fee.

18 So what we're planning on doing to secure
19 against that kind of a risk is to record a deed of trust
20 and carry a note in second position that would offset
21 the cost of such a breakage. And this would be secured
22 in second, behind the Citibank loan, and it would be
23 released once our permanent loan closes.

24 Are there any questions on the transaction?

25 CHAIR JACOBS: Dalila?

1 MS. SOTELO: So, Tony, have you looked at this
2 transaction, since you've taken over the position in the
3 last two weeks?

4 MR. SERTICH: It hasn't even been that long;
5 but, yes. We were involved with this transaction when
6 I was on the financing side, so we've worked through this
7 with the Multifamily staff, in my former position. So I
8 know the basics of the transaction.

9 MS. SOTELO: So I have a couple of questions
10 just relative to the breakage fee and the structure,
11 which seems to be a little overly complicated for what
12 we're trying to do.

13 Can you tell me the reason why the Citibank
14 loan is coming in, and paying this off, and then we're
15 going to then pay them off? And why that structure needs
16 to exist that way?

17 MR. SERTICH: Well, I'll let Ruth take the
18 lead; but I will jump in if I need to.

19 MS. SOTELO: Yes, that would be great. Thank
20 you.

21 MS. VAKILI: Okay. Yes, it is different. And
22 the reason behind it, is that in our HUD Risk-Share
23 Program, it's an acquisition/rehab program, which
24 requires substantial rehab.

25 This project doesn't -- the scope of work

1 doesn't constitute a level of 18,000 a unit. And so as
2 an accommodation, this is how we worked out the
3 structure, to have Citibank come in.

4 And also, you know, forming a basis of an
5 ongoing relationship with Citibank for potentially future
6 projects, where we would need to do this kind of thing.
7 We're working through the deal points with Citibank.
8 They're very amenable to doing a short-term loan and then
9 getting paid off by a CalHFA permanent loan. So this is
10 how we structured it in order to avoid a substantial
11 rehab requirement.

12 A lot of our projects in our portfolio -- or,
13 say, a number -- are in very good shape. They don't
14 require 18,000 a unit. In those cases, we may see more
15 of these type of transactions.

16 MS. BOATMAN PATTERSON: If I could interrupt
17 for a while.

18 We had talked about how could we position
19 ourselves to make sure that we were filling a niche, that
20 we weren't necessarily competing with Citibanks, but that
21 we could partner with Citibanks and some of our lenders
22 in some of our other communities. And so we have the
23 ability to offer competitive permanent take-out
24 financing. And by using a structure like this, we could
25 go out and partner with a lender who is willing to come

1 in and do the construction financing. So they can come
2 in and do the construction financing; we can come in and
3 do the permanent take-out financing. And so this is us
4 working through what those partnerships look like. And
5 so this is -- this one is the first of probably many.
6 And as we work out the kinks, we will probably see a
7 structure that works a little more simplistically.

8 But this is the way in which we use to mitigate
9 risk to the Agency, but still try to have an opportunity
10 to create those partnerships.

11 MS. SOTELO: And I appreciate the innovation
12 around creating partnerships, because I think -- I do
13 think that it's important to take a look at our portfolio
14 and to breathe new life into the portfolio, and certainly
15 to partner with institutions like Citibank. My concern
16 is that programmatically, it deviates from our approved
17 program and it doesn't encourage what I believe would be
18 the right public policy, which is infusing more dollars
19 into the project to rehab it and bring it up to a
20 different level of amenity.

21 Right now, it's a 1966 building. They're only
22 replacing half of the windows. You know, the Energy Star
23 appliances are certainly a nice thing; but, you know,
24 they haven't done an energy audit. And as part of the
25 write-up, there was an issue around asbestos and lead;

1 and the fact that asbestos and lead is present, but
2 they're trying not to deal with it because, you know,
3 they're not going to touch those areas and, therefore,
4 not disturb the asbestos and lead.

5 So from a policy perspective, I'm just
6 concerned that we not facilitate a program that doesn't
7 give us the type of result that we want.

8 I want to be able to support existing
9 developments and existing loans in our portfolio; but
10 I want to do it in a way that's thoughtful and
11 deliberate.

12 And if the right thing to do is to recapitalize
13 this project and get a new tax-credit investor and apply
14 for credits and, you know, restructure it as a
15 transaction, then I would encourage looking at that as
16 a viable alternative. And if that's not a viable
17 alternative, then I think -- I would be uncomfortable as
18 a Board member approving the transaction as currently
19 proposed, only because I don't think that it meets all
20 our programmatic efforts.

21 So I'm not saying I can't get there. I'm just
22 saying, right now, I'm not there.

23 MS. VAKILI: Okay. And this project was
24 substantially rehabbed in 1998.

25 MS. SOTELO: Okay.

1 MS. VAKILI: And we were involved in that and
2 had a say in what was done. There was extensive work
3 done at that time. And also an important element at that
4 time, was that structural upgrades were completed. This
5 project was, again, reviewed by our structural engineers.
6 And not only does it pass our requirements, but also our
7 engineer applied the criteria that will potentially be
8 in place in the future for the City of L.A. in regard to
9 retrofit upgrades for seismic. And this project passed
10 that criteria as well, which is also a good thing.

11 So it's been substantially rehabbed in 1998.
12 Otherwise, we would have been all over, you know,
13 requiring something that this building really could use,
14 which would be substantial rehab now. If it weren't for
15 that, we would have been doing a more comprehensive
16 scope.

17 Does that answer your question?

18 MS. BOATMAN PATTERSON: Ruth, was there an
19 energy audit at all on this particular project? Was
20 there --

21 MS. VAKILI: There was not an energy audit.
22 This is not a tax-credit project. And so there was no
23 requirement for an energy audit.

24 MS. BOATMAN PATTERSON: But that may have been
25 something that could have addressed some of Dalila's

1 concerns, knowing that this isn't a tax-credit that would
2 require that; but as part of our PNA or our regular
3 assessment of the property, if we had had an energy
4 audit, since it was essentially rehabbed in 1998, what
5 little more we could have done to perhaps boost some of
6 the energy efficiencies.

7 So that is noted, Dalila.

8 MS. SOTELO: Yes, that would be helpful.

9 MS. FALK: Was there a third-party physical-
10 needs assessment?

11 MS. VAKILI: Yes, there was. There was.

12 MS. FALK: So this met all of the things that
13 we're trying to --

14 MS. VAKILI: It did.

15 MS. FALK: Okay.

16 MS. VAKILI: It met the criteria. We did a
17 20-year replacement study. We sized the initial
18 capitalization of the replacement reserve at a thousand a
19 unit; and also, the replacement reserve is \$400 a unit.

20 The owner is a very active owner, and has
21 several projects in his portfolio, and he is very
22 hands-on and maintains. So I expect that that will
23 continue for the project; and there is a healthy reserve
24 in place.

25 CHAIR JACOBS: Michael?

1 Michael, then Janet.

2 MR. GUNNING: I'm sorry. Dalila, help me
3 understand. Because I think that it's good to have
4 private entities investing in these kinds of projects.
5 So is it they may not do at the cost levels, or may not
6 do the rehabs that we can do? Help me understand.

7 MS. SOTELO: No, I think for me it's twofold.
8 When Ruth answered the question around why we were having
9 this complicated structure; and the answer was because it
10 doesn't fit our programmatic goals. And our programmatic
11 goals are to do it at 18,000 per unit and to...

12 You know, so one is just kind of find that
13 deviation; right? And if we're within \$10,000 of that
14 number, I know that that's about \$1.4 million more in the
15 budget, you know, in terms of rehab. So I'm just trying
16 to understand why we're deviating from a physical-needs
17 assessment.

18 And then the more important question to me is
19 just programmatically, on the finance side, you know,
20 paying off the CalHFA loan during a construction period,
21 and then us, you know, paying the construction lender
22 off and doing a forward commitment of our debt. And I
23 appreciate securing the breakage fee as part of a
24 subordinate debt structure in the project. But it seems
25 so much like a programmatic deviation that I'm wondering

1 why we're accommodating that.

2 MR. SERTICH: If I could answer that a little
3 bit.

4 Part of the problem was, when we were starting
5 to look at this loan, the financing tools that we had
6 available to us, we were still working through some of
7 those.

8 MS. SOTELO: Okay.

9 MR. SERTICH: Again, from my old position.

10 But as we've worked through that, I think going
11 forward, we have a better understanding of what we can
12 do, both within the HUD Risk-share Program and with some
13 of the financing tools we have, that a structure like
14 this, it definitely -- I think it works for this deal;
15 but we may or may not be as aggressive in using this
16 going forward.

17 So part of it was just getting back into
18 understanding what we can do on the financing side. And
19 we tried to make it work for this deal. Because another
20 thing is, we are getting more deeper affordability on
21 this, or a broader affordability restriction placed on
22 this apartment as well.

23 CHAIR JACOBS: Janet?

24 MS. FALK: Maybe you can help. I'm kind of
25 confused about exactly how this transfer works in terms

1 of the old parties and the new parties.

2 And so on page 147, in the write-up, it's sort
3 of towards -- there is the summary of the proposed
4 transaction. So there's an investor payment and Lehman's
5 going out. Are these new investors putting that money
6 in? What is happening exactly here?

7 MR. SERTICH: And I think this is another
8 reason that some of this was necessitated, was Lehman
9 Brothers was the tax-credit investor.

10 MS. FALK: Right. So they want out? I mean
11 it's time.

12 MR. SERTICH: I mean, they're in bankruptcy
13 court at this point.

14 MS. FALK: Yes, yes.

15 MR. SERTICH: So that necessitated some of
16 this.

17 MS. FALK: I understand. But I just don't know
18 where -- like this investor payment, and I can't track
19 these numbers with what's in the pro forma, either. So
20 that's why I was a little confused.

21 MS. VAKILI: Well, in the partnership, there
22 is a sale or an assignment transaction, and a value
23 assigned to the property, which was proved out by the
24 appraisal.

25 And the illustration of the transaction is just

1 to show how the payout in settlement to Lehman was
2 derived by the outstanding obligations settled where the
3 CalHFA loan paying off the old maintenance fee and paying
4 off a City of L.A. loan.

5 So the transaction, in terms of settling the
6 obligations, also included the investor payment to Lehman
7 and also the FQHO and Dangler interests.

8 If this were a market sale, the payout to the
9 investor and to Dangler and FQHO would have assigned this
10 value. And so what I was trying to show here is a
11 numerical explanation of the transaction.

12 MS. FALK: So the sales price is being
13 determined by adding up all the existing obligations of
14 the project? Or is it determined by an appraisal?

15 MS. VAKILI: It was determined by an appraisal,
16 and also through a financial transaction and settling of
17 the debts.

18 MS. FALK: Okay, so does this mean that Lehman
19 is getting repaid 3.3 million?

20 MS. VAKILI: Yes.

21 MS. SOTELO: Does that represent their exit
22 taxes? What does that represent? Do we know?

23 MS. VAKILI: I am not sure if it represents the
24 exit taxes. I can ask Gary Braverman to come up and give
25 a better explanation.

1 MS. FALK: So I mean, is it that we're giving
2 them this bigger new loan so that they can pay the
3 investor that amount of money?

4 MR. PRINCE: So, my sense that's happening
5 throughout the country is that these limited partners are
6 stepping in and acting on their rights within the
7 partnership agreements, and either are forcing sales that
8 would then really make the property go private, for the
9 most part, right, or allowing for the purchase of the
10 limited partnership interest. And so I think that this
11 is more and more of what we're starting to see throughout
12 the country.

13 And it does not equal the exit taxes, which is
14 what we always thought it was going to be. I think it's
15 definitely a different situation. It's a different world
16 out there now, with limited partners. That is my sense.

17 Is that a fair summary of your --

18 MR. SERTICH: Yes.

19 MS. VAKILI: Yes.

20 MS. FALK: Well, it's -- in situations where
21 there was no option to purchase on the part of the
22 borrower?

23 MR. PRINCE: No. No, it's actually -- I don't
24 agree with that.

25 MS. FALK: Go ahead.

1 MR. PRINCE: I actually think, it's like within
2 the rights that they have these limited partners; but
3 it's definitely different from what we all expected.
4 I don't know the right way of saying it.

5 MS. SOTELO: Right. There probably wasn't a
6 prenegotiated option to purchase or a right of first
7 refusal that the GP had in the limited partnership. So
8 that makes it open to the LP being able to force the sale
9 without a formula that was preapproved.

10 MR. PRINCE: And I don't think that that's the
11 case. I'd be happy to hear from other -- what I'm
12 hearing from other -- particularly for-profit developers
13 in this situation is that it's actually an enforcement
14 of either forcing a sale or the purchase of the limited
15 partnership interest, even though there are rights of
16 first refusal and rights of first -- right to option,
17 right to purchase.

18 But I'm not very strong on the way that...

19 I've just been --

20 MS. SOTELO: But there is no formula. There's
21 no prenegotiated formula, that's the problem. It's
22 today's formula, as opposed to a formula from 15 years
23 ago.

24 MR. PRINCE: Okay.

25 MS. SOTELO: So is someone here to explain what

1 the 3.3 is?

2 MS. VAKILI: Certainly.

3 Let's call up Gary Braverman.

4 MR. BRAVERMAN: Hello. My name is Gary
5 Braverman. I'm not used to speaking into a microphone,
6 so I'll try not to overwhelm.

7 The world has changed, and you are correct on
8 that.

9 MR. PRINCE: And like I said, it's loud to you
10 when you speak into it, but it's -- there, it's better
11 for us, if you do that. I know it's going to be weird to
12 you.

13 MR. BRAVERMAN: Yes, because you get the echo.

14 When we negotiated the original deal with
15 Lehman 16 years ago, the tax-credit world was: We just
16 want our credits, we don't care about cash, and pay our
17 exit taxes at the end of the day. Nowadays, when -- and
18 you build your deal based upon that understanding.

19 Now, you come to the end of the day, and your
20 investor comes back to you, and they say, "We want cash.
21 Yeah, that's what we thought we wanted in the past, but
22 we want as much cash as we can get now, and we're going
23 to hold you to whatever was in the partnership
24 agreement."

25 The partnership agreement requires that they

1 can force the sale at the end of the 15 years. They
2 basically have come to us and said, "We want you to sell
3 it or buy us out." That was our options.

4 I've lived with this project for 16 years. I
5 like it. I want to keep it.

6 And so what we've done is, we negotiated with
7 them to basically -- in our partnership agreement,
8 there's a waterfall that says if you sell the project,
9 refinance, whatever, this is how you allocate the cash
10 flow. And the 3.3 follows the waterfall based upon the
11 as-is appraised value of the project, as the sales price,
12 plus they nicked and dined us for another \$145,000
13 above that to make the deal. And then following the
14 waterfall, that 3.3 is what it takes to get them out of
15 the project.

16 We've maintained the project through the last
17 16 years, so it didn't need substantial rehab. And I can
18 remember my first conversation with Ruth was, "Don't
19 penalize me for being a good owner and having maintained
20 the property for the last 15 years. I'd rather spend, as
21 I go along, keep it up, and not run it into the ground;
22 and at the end of the 15 years, need to spend 30,000,
23 40,000 a unit on rehab."

24 And one comment I'd like to make: We've been
25 replacing windows over the last 15 years as we could

1 afford it. What we're talking about doing now is
2 replacing the balance of them.

3 MS. SOTELO: That's a good approach.

4 MR. BRAVERMAN: So at the end of the day, we've
5 gone from single-pane to dual-pane and all new retrofit
6 windows throughout the whole complex.

7 The idea is, the things that we were spending
8 on out of operating cash flow that were big-ticket items,
9 we wanted to get and take care of those as part of this
10 rehab, and not have that as an ongoing cost on a
11 day-to-day basis out of the operating cash flow.

12 So the idea wasn't we do a couple of windows.
13 It was, let's get the balance of them done, which is
14 about half of them. So over the 15 years, doing a couple
15 a month, as we can afford it, then we have about half
16 left to do.

17 So we're trying to -- everywhere that we
18 anticipate -- say, elevators, one of the elevators we've
19 had to do extensive upgrades because when the controller
20 broke, they don't have parts for them anymore. So you
21 had to put a new controller in, and a new controller
22 triggered upgrading the elevators to current code.

23 I went to our elevator people and said, "Okay,
24 we've got the front elevator. Give me a list of all the
25 items that could break that we haven't already taken care

1 of. Let's build that in. Let's take care of that as
2 part of the rehab."

3 So, again, the concept is, big-ticket items,
4 long-term items, let's get those as part of the rehab;
5 and then we can continue to maintain it and keep it a
6 good project on an ongoing basis.

7 Didn't get us up to over 18,000 a unit. And
8 I didn't want to spend money that we didn't need to
9 spend.

10 MS. SOTELO: That makes sense. Yes, that makes
11 sense.

12 MR. BRAVERMAN: So a different approach, you
13 know.

14 And what I'm trying to do, as I'm getting
15 older, is not have as many tax-credit investor partners,
16 because they're difficult.

17 So if we could make this work by reinvesting
18 our share of the proceeds back into the project, and
19 be able to spread it to my family and keep it a
20 family-owned project and not have a crazy, psycho
21 tax-credit investor, way better.

22 MS. SOTELO: Any present company excluded?

23 MR. BRAVERMAN: You know, I've been there, done
24 that; and I don't mean to insult anybody, but the more
25 you can be a master of your own destiny and not have

1 a million people looking over your shoulder with a
2 different agenda, and we can just maintain our properties
3 and run them and keep them affordable.

4 I mean, even though we're not going to have a
5 tax-credit investor doesn't mean we're not going to keep
6 it affordable. We have the long-term affordability. It
7 was a tax-credit project. So that's -- we've penciled it
8 to that. It works at that, and that's the way we want to
9 keep it.

10 I always like to have the nicest-looking
11 project with the cheapest rents in a neighborhood. I
12 stay full. I don't have a lot of turnover. It's easier
13 to maintain it. You get better tenants, who appreciate
14 and care about where they're living.

15 We do activities. We -- one of the things we
16 did in the original rehab 11, 12 years ago, was that it
17 had both an outdoor pool and an indoor pool.

18 For L.A., that's insane. We filled in the
19 indoor pool, and split it into two rooms. One room is a
20 school room where we do tutoring programs, ESL classes,
21 and any other activities like that; and the other is a
22 workout room, where we've had Zumba, we've had one of
23 our tenants taught karate classes there. He used the
24 facility for free, charged people less; and our kids in
25 the building were able to compete in the local karate

1 stuff.

2 It works. And it doesn't cost a lot of money
3 to do it, but it works. And that's the fun part of the
4 business.

5 You know, I may be compulsive about our
6 projects, but there's fun parts. And that's part of the
7 fun part is, when you can take a project, see it work,
8 and continue to make it work where everybody is getting a
9 benefit out of it.

10 MR. PRINCE: You're coming across as very proud
11 of your property.

12 MR. BRAVERMAN: I am.

13 MR. PRINCE: So I'm very excited about that.

14 And despite my reputation, I do have friends
15 who are private developers. And I've just been hearing
16 this issue happening throughout the country. And so it's
17 something that I think we, as decision-makers --

18 CHAIR JACOBS: We need to discuss this, yes.

19 MR. PRINCE: -- maybe need to have a training
20 on, maybe we talk with Mark to do something with us. But
21 just so we can think about it.

22 My one quick question for you is, you talk
23 about reducing your operating costs. I'm assuming it's
24 because of those improvements to the elevator and the
25 windows. Because going from 6,300 to 5,500, or whatever

1 your reduction is --

2 MR. BRAVERMAN: I mean, we've been spending
3 probably five to seven thousand a month in window
4 replacement. That alone saves us a ton of money. The
5 elevators, when we did the upgrade on the back elevator,
6 it was over \$70,000.

7 MR. PRINCE: Right, okay.

8 MR. BRAVERMAN: These are big-ticket items.
9 That really impacts the cash flow. Those are the kinds
10 of things we're trying to eliminate. But this pencils so
11 that even if we don't save significant on that, it still
12 runs at a positive cash flow.

13 MR. PRINCE: Okay. So I'll make the motion to
14 approve this, though I'd like to see the other pool
15 become a salt-water pool, maybe.

16 MR. BRAVERMAN: It's filled in now.

17 MR. PRINCE: I'll make the motion to approve.

18 MS. SOTELO: Preston, before the motion, I just
19 want to make sure that staff -- and maybe Tony can take a
20 look at this -- but to Janet's point, we just need a more
21 transparent analysis in the staff report that shows what
22 the acquisition price is, how much is being repaid during
23 construction, and what the take-out is. And then just
24 kind of represent it more graphically in the Board
25 reports so it's more transparent.

1 MR. SERTICH: Okay.

2 MS. CABALLERO: Well, and I'll second the
3 motion, if you've remade the motion.

4 I want to say that it's been really important
5 for you to be here today, because I think your
6 explanations fill in the pieces that -- the questions
7 people had.

8 MR. BRAVERMAN: Yes.

9 MS. CABALLERO: And, you know, our job here is
10 to help support affordability in housing. And we are
11 looking at good policies that work. But sometimes you
12 come up with the exception. And you're doing something
13 that's very different in terms of you're running it much
14 more like a nonprofit and looking at ways to be able
15 to -- incentivizing people moving in, taking care of it.
16 And I really appreciate that.

17 MR. BRAVERMAN: Thank you.

18 MS. CABALLERO: So I appreciate you stepping up
19 and talking, because I think it has made the difference
20 in terms of how we're looking with this.

21 MR. BRAVERMAN: I love to talk, as you can
22 probably tell.

23 MS. CABALLERO: Well, and it's really clear,
24 you have a real appreciation for affordability and what
25 it can do for people's lives. And that's why we're all

1 here is, we're very committed to it. But it's got to
2 work in the world that we operate it in, and so...

3 MR. BRAVERMAN: Well, it's got to make economic
4 sense, or it doesn't work. That's right. That's the
5 struggle.

6 CHAIR JACOBS: Do we have a second?

7 MS. CABALLERO: I do.

8 CHAIR JACOBS: Perfect. We've got to vote.
9 Thank you.

10 MS. OJIMA: Thank you.

11 Ms. Caballero?

12 MS. CABALLERO: Yes.

13 MS. OJIMA: Mr. Schaefer?

14 MR. SCHAEFER: Yes.

15 MS. OJIMA: Ms. Gunn?

16 MS. GUNN: Yes.

17 MS. OJIMA: Ms. Falk?

18 MS. FALK: Yes.

19 MS. OJIMA: Ms. Avila Farias?

20 MS. AVILA FARIAS: Yes.

21 MS. OJIMA: Mr. Gunning?

22 MR. GUNNING: Aye.

23 MS. OJIMA: Mr. Prince?

24 MR. PRINCE: Aye.

25 MS. OJIMA: Ms. Riggs?

1 MS. RIGGS: Aye.

2 MS. OJIMA: Ms. Sotelo?

3 MS. SOTELO: An enthusiastic "aye," after
4 Gary's presentation.

5 MR. BRAVERMAN: Thank you.

6 MS. OJIMA: Mr. Jacobs?

7 CHAIR JACOBS: Aye. And I agree.

8 MS. OJIMA: Resolution 15-07 has been approved.

9 MR. BRAVERMAN: Thank you all very much.

10 CHAIR JACOBS: Thank you.

11 MS. BOATMAN PATTERSON: And thank you for that
12 wonderful explanation.

13 I wanted to just add real quick, the staff
14 report -- we've kind of had this question a couple of
15 times about presentation of the staff report on our
16 projects. And that's one of the things Don, Tony, and
17 I will be looking at. Because we have some of those same
18 questions internally. And so our presentation -- and
19 I know it took us a little bit on our budget presentation
20 and how we got that; and so we're working out the kinks.
21 So we commit to you that we will look at a way to better
22 lay that out to answer some of these questions that Board
23 members may have.

24 MR. PRINCE: Yes, I totally agree.

25 I think it's a really hard thing to do. But

1 at some level, to kind of say, "Here were our
2 considerations," so that we're not having to go, "Okay,
3 did they think of this?"

4 So I totally agree, it is about the
5 transparency.

6 MR. SERTICH: And, in general, I have been
7 taking notes about the different comments about the
8 presentations of what you want to see. So we'll continue
9 to evolve as we get more comments on that.

10 CHAIR JACOBS: Thanks, Tony.

11 Thanks, Ruth.

12 --o0o--

13 **Item 12. Update on the status of the Mental Health**
14 **Services Act's Housing Loan Program and**
15 **discussion regarding CalHFA's future**
16 **participation in the Housing Loan Program**

17 CHAIR JACOBS: Now, we're going to jump to
18 Number 12, MHSA.

19 Who is giving the presentation?

20 MR. SERTICH: Yes. So, again, I'm going to
21 have Debra Starbuck come up, with Chuck Anders from the
22 Department of Health Care Services to talk about the MHSA
23 update.

24 MS. BOATMAN PATTERSON: And if I could set this
25 up briefly for the Board members.

1 During a period of time when we weren't doing
2 a whole lot of new multifamily lending because of the
3 housing crisis and the credit crisis, there was an
4 opportunity for us to administer a special-needs program,
5 which was the Mental Health Service Act program. That
6 program was given its initial allotment of cash.

7 And so Debra is going to walk through kind of
8 how that program started and kind of where we are, to set
9 us up so that we can now have those policy discussions
10 and those stakeholder meetings about going forward where
11 we want to be.

12 And so I wanted Debra to come today to be able
13 to present that to the Board because there's several
14 pieces of legislation dealing with veterans housing,
15 dealing with mental-health housing. And so special-needs
16 housing and permanent supportive housing is all at the
17 forefront of all of our minds, and we have been operating
18 this program for several years now. And so this gives
19 the Board an opportunity to hear what we've been doing
20 with our special-needs program over the last several
21 years.

22 So thank you, Debra.

23 MS. STARBUCK: Thank you.

24 Let me see if you can hear me. Is that clear
25 enough?

Hi, Janet.

Some of you, I haven't seen in a long time. I've been with the Agency since 1994 and HCD for six years before that. So some of you may recognize me.

This is Chuck Anders from the State Department of Health Care Services, who has joined us to give -- well, to help us support your questions and answers that you may have about the MHSA program.

We've worked together very closely, his department and ours, over the past eight years -- actually, longer. The program has been running and we were two years prior to that working with DMH, who has now no longer been in existence; and Health Care Services has taken over their role under this MHSA agreement.

So to give you a background -- and, I'm sorry, you don't have any literature. So you've got your slide presentation that hopefully you can refer to.

The Prop. 63 approved by the voters in November 2004 was for the Mental Health Services Act program; and there was a one-time appropriation by Governor Schwarzenegger in 2006 to utilize \$400,000 of the MHSA housing funds to establish a housing loan program.

DMH at that time was given oversight of the MHSA program funds throughout the state for all the

1 counties to report to. And DMH looked to CalHFA as a
2 partner to administer the housing loan program for them.

3 The goals of the Prop. 63 and the Executive
4 Order in 2006, was to create 10,000 new affordable rental
5 housing opportunities that would provide housing for the
6 mentally ill who were either homeless or at risk of
7 homelessness and their families.

8 So at that time, we estimated that about
9 one-fourth of those 10,000 units would be used and
10 regulated as housing for the mentally ill.

11 The program was originally set up where
12 two-thirds of the funds had to be used for actual
13 permanent loan financing. And one-third or less of the
14 funds could be used for capitalized operating subsidy
15 reserves -- or "COSR funds" is how we refer to it.

16 So we worked, and the legal department gave us
17 a lot of help, and we put together all of our loan
18 documents and vetted them through DH- -- or DMH at the
19 time and the counties.

20 And it was set -- the program was set up that
21 the counties had to agree to provide continued support
22 of services for their residents for the life of the MHSA
23 financing. And the loan terms were a minimum of
24 20 years, up to 55 years.

25 We found that, over time, most of the shared

1 housing loans that we could offer -- which was intended
2 for single-family homes or duplexes or four-plexes, to
3 allow shared occupancy of two- and three-bedroom units,
4 so that they would all live and cohabitate in each of the
5 dwelling units.

6 So we did shared housing and rental housing.
7 The shared housing loans were predominantly 20-year
8 financing. And the rental housing ended up being
9 anywhere from 30 to 55 years, depending on whether there
10 was a tax-credit investor and long-term financing from
11 HCD or a local government lender.

12 Additionally, the terms of the agreements
13 between all of the parties that had to continue to
14 provide services for the MHSA residents was a memorandum
15 of understanding, which was a legal document entered into
16 by the county; the borrowing agency -- or the borrowing
17 entity; the service provider that was actually going to
18 be on-site, providing the extensive services for the
19 mentally ill; and the property management firm.

20 So the memorandum of understanding was
21 submitted with their applications to DMH to review and
22 approve. And currently, DHCS takes on that role.

23 In 2008, we actually implemented the program
24 through an interagency agreement between CalHFA and DMH.
25 And it was set up to administer the one-time allocation

1 of \$400 million over an eight-year term. The end of that
2 term is May 30th of next year.

3 To give you a flavor for what we've been able
4 to accomplish in the program to date, I've got a chart
5 here for you that illustrates. The turquoise bars are
6 the total units that have been developed, utilizing -- or
7 leveraged by MHSA funding; and the dark-blue bar
8 represents the percentage or number of units that are
9 regulated to MHSA residents.

10 And you'll see, it's about one-fourth of the
11 unit. So the first column, you've got 67 projects have
12 been funded to date, family projects. Twenty senior
13 projects. Fifteen family senior projects, where a part
14 of the property may be regulated to seniors, and the rest
15 of the project to families. Then we have 35 projects
16 that are part family and part of the units are for
17 transitional age youth. And then we have 14 projects
18 that are strictly transitional age youth.

19 So all together, MHSA funds have been leveraged
20 to create over 8,500 units at this point.

21 And as a note, 208 of those are actually units
22 regulated for veterans within those. And we've funded
23 2,171 MHSA regulated units. And of those, 30 are
24 regulated specifically for veterans.

25 The goal of the program, by the time that we've

1 administered everything, up until May 30th of next year,
2 is to have 2,500 or more MHSA regulated units. And we
3 expect that it will be closer to 2,700.

4 Over the past seven years, we've learned a lot
5 since the program was originally established; and we
6 hope -- originally, we had hoped that we could leverage
7 MHSA funds with CalHFA financing, and we could be the
8 construction retake-out lender.

9 Unfortunately, with the collapse of the bond
10 market, it became unfeasible for us to offer any
11 competitive rates. Therefore, we lost the fee that we
12 expected to get on the CalHFA financing piece.

13 So the loss of that loan-fee revenue means that
14 we've obviously been operating the program at a loss
15 since 2008.

16 This will continue until such time as the
17 program ends, which is May 30th. And by May 30th, that
18 deadline means that that's the cutoff date by which we'll
19 accept any further loan approvals for consideration by
20 senior loan committee. So anytime after that, we still
21 have to close our loans; monitor during construction,
22 which can be a 12- to 24-month period; and then do the
23 perm loan conversion, which can be another six to eight
24 months after that, with a final cost audit.

25 So CalHFA still has a role of about three more

1 years after next year's expiration date.

2 The Department of Health Care Services assumed
3 DMH's role in 2012. And we learned through this
4 communication that the original contracts with DMH were
5 between the counties and DMH, and the loans are between
6 CalHFA and the borrowers.

7 So one of the things that has been difficult to
8 work through is getting a clear communication line with
9 the counties, because we don't contract directly with the
10 counties. State DCHS now has that responsibility.

11 So there's reasons why we haven't really
12 pursued or looked at extending of the current interagency
13 agreement, both from a fee-loss perspective and a little
14 bit of dysfunctionality in the way the current system is
15 set up.

16 Some of the counties would much prefer to see
17 us work directly with the counties and contract with
18 them, if we were to continue or run another MHSA program.

19 So counties were -- some of the counties were
20 finding it difficult to use their MHSA funds, either
21 because they felt that our program guidelines and terms
22 were too onerous for them, too restrictive on how they
23 could use their housing funds, or they didn't have
24 partners in their counties or communities to help them
25 create the MHSA units.

1 In some of the more rural counties, there's a
2 lack of nonprofit developers, especially in Northern
3 California, to partner with and help them use their MHSA
4 funds.

5 So there was legislation that was pushed
6 through: Assembly Bill 1929. And the counties were
7 authorized to request the return of any encumbered MHSA
8 funds from state MHSA --

9 MR. ANDERS: DHCS.

10 MS. STARBUCK: -- DHCS, I'm sorry, and CalHFA.

11 And we anticipated more counties requesting the
12 return of their funds. But to date, we've only had three
13 counties. There's been Colusa County, who requested just
14 over 322,000 back; Mendocino County, 1.3 million; and
15 Merced County only had 8,421 left over, that they've
16 requested be returned to them.

17 So I think we may see a few more counties
18 requesting the return of their funds, but they have to go
19 through their boards of supervisors to get authority on
20 how they're going to utilize the funds once it goes back
21 to the county level.

22 So, effectively, the program as we know it ends
23 on May 30th of next year. And we need to advise the
24 counties and developers of this situation because a lot
25 of them are not aware of the existence of the interagency

1 agreement.

2 So we anticipate publishing some deadlines and
3 advising developers and counties -- because the counties
4 work with the developers for probably six to eight months
5 before we ever see the MHSA application. So we need to
6 give them enough time to get them posted at the 30-day
7 local-level publication requirements that they have to go
8 through with their boards as well, and then submit their
9 applications in time.

10 So the deadlines that you see on your slides
11 should allow projects to apply for both first- and
12 second-round tax credits next year.

13 The March 1st deadline is a little sooner than
14 many developers would like, but that's the time frame by
15 which we would need to receive their application, do our
16 due-diligence, concept meeting, underwrite the deals, and
17 present them to senior loan committee by May 26th, which
18 would be the last date that we would approve any MHSA
19 funding for funds we currently hold on deposit.

20 If there are any funds remaining at that time,
21 we will give the developers -- or the counties, I'm
22 sorry -- the option of either requesting their funds
23 back, or they could supplement existing capitalized
24 operating subsidy reserve accounts for MHSA-funded
25 projects. Or if there's a need for a stronger

1 replacement reserve or operating expense reserve, we
2 could also do that.

3 So going forward, we believe that there is a
4 public policy need for ongoing special-needs-type housing
5 program. And there is an indication, based on initial
6 conversations with the counties and their departments
7 of mental health, to continue operating some form of
8 special-needs loan program that could help them utilize
9 any remaining MHSA funding that they have, set aside for
10 housing; or new appropriations, because they get funded
11 annually. And they have a three-year plan.

12 Many of the counties find that they have met
13 their housing goals and needs for developing mentally ill
14 housing. But there are still some of the larger counties
15 that have shown a clear indication that they would like
16 to be able to continue appropriating funds to CalHFA
17 directly, to administer for more MHSA financing.

18 So we would like some feedback from the Board
19 regarding where we go from here. And we anticipate
20 reaching out and working closely with HCD to see what
21 programs we could try to partner with or further the
22 goals of both HCD and CalHFA. Maybe combine it with some
23 veterans housing program money, because the counties that
24 have approached me, have suggested many new projects that
25 they have in their pipeline for both veterans and

1 mentally-ill portions of their affordable housing
2 projects.

3 We envision partnering directly with the
4 counties to help them further their special-needs goals.
5 We did speak with quite a few counties. And initially,
6 they've indicated a willingness. They, of course, all
7 need more information before they're going to commit to
8 anything.

9 We envision having stakeholder meetings with
10 both the county and developers.

11 Been asked to speak at HCD's policy meeting
12 coming up on June 11th, I believe; and also at the
13 California Behavioral Health Directors Association
14 governing board meeting, which is the day before, on
15 the 10th.

16 So following those two meetings and reaching
17 out, we'll have more information as to how they think
18 we should potentially structure such a program, and then
19 we would reach out to the counties individually for some
20 more feedback. Because they're going to talk to their
21 boards and their developers.

22 The proposed role that DHCS would play is
23 subject to whatever they find the counties are looking
24 for, and how they might fill that role.

25 Currently, they review and approve all of the

1 special-needs service plans that the counties prepare,
2 and also their annual service plan budgets. But I
3 understand that after these funds are used, the counties
4 have the authority to approve those at the local level.
5 So state DHCS will evaluate what their role might be in
6 the future and how they could partner with us.

7 So looking forward, we looked at how our income
8 generated from the program affected our operating -- or,
9 you know, how we operated the program staffing levels and
10 determined what fees we might have to charge if we were
11 to continue with some form of special-needs loan program.
12 And the current program was structured with a 1 percent
13 administrative fee to CalHFA, off the \$400 million. And
14 we also got a 1 percent loan origination fee for just the
15 loan portion, which was approximately two-thirds of the
16 \$400 million. And .42 percent annual servicing fee we
17 were only getting on the loan as well.

18 In order to cover staffing costs, we believe
19 that we would need to offer a 5 percent fund
20 administration fee, which we found is pretty typical for
21 the costs for a state agency to administer a fund, and
22 the 1 percent origination fee would be based both on
23 the loan and the capitalized operating subsidy reserve
24 amount.

25 The .42 percent annual servicing fee would also

1 be based on both the loan and the COSR funds. The reason
2 being that the administration of the COSR money over time
3 is far more labor intense and requires a lot more staff
4 time than the loan operating budget reviews and rents
5 annually. And as more years ago by, the counties
6 anticipate giving CalHFA additional funds to supplement
7 their COSR funds that are going to start running out in
8 12 to 15 years.

9 So we, at this current program, do not get any
10 additional fees for supplemental COSR deposits that we
11 have to then administer.

12 The major counties that I've already discussed
13 this proposed fee structure with was San Francisco, L.A.,
14 Orange, Riverside, San Bernardino, and San Diego. And
15 initially, they are on board with the fee structure.
16 They understand that we were operating the program at a
17 loss.

18 Late yesterday, I did get correspondence from
19 San Francisco. And if this was our fee structure, they
20 actually believe that they could operate it for the same
21 costs at local level through the Mayor's Office of
22 Housing. So they may not be interested in such a program
23 through CalHFA.

24 Staffing assumptions that we took into account
25 when looking at this fee structure would estimate a

1 \$10 million to \$15 million total allocation from all of
2 the counties that participate. And the full-time
3 employees that we've assumed to administer \$10 million a
4 year, would be about four, which is two loan admin and
5 two loan officers or a specialist and a loan officer.
6 And at \$15 million, we would be looking at four to six
7 full-time employees.

8 Based on the consultant's report and the
9 operating costs for the Agency to date, and the costs for
10 salaries and benefits, we estimate that the proposed fees
11 here that are shown for the fund administration and the
12 origination fees would cover those salaries adequately,
13 and leave a little bit over.

14 So I have not reflected the computation for the
15 income on the servicing fee because currently, the admin
16 fee is meeting the needs of the Asset Management Division
17 that does the annual reviews of the COSRs. But as more
18 deposits are made and more time is needed to review these
19 projects, we will need more to cover staff hours.

20 So this gives you an overview of the program
21 from its inception. I know there's not a lot of details,
22 but it fills in some of the information that you may have
23 been asking yourselves about the program.

24 And we foresee three more years of hard work,
25 still, to administer the balance of the funds. But we

1 would like the Board's input on where you think we should
2 go from here after the program that we currently see ends
3 next year.

4 MR. PRINCE: So, I do have to disclose that we
5 did three permanent supportive housing developments with
6 CalHFA, which I think was a great experience and a great
7 outcome. And so I have multiple thoughts.

8 I can start on a couple of questions, and then
9 some of your next steps.

10 MS. STARBUCK: Uh-huh.

11 MR. PRINCE: Okay, so \$351 million, divided by
12 2,200 units, is, like, 160,000, 170,000 per unit.

13 Two-thirds for capital is 110,000.

14 Is that the right -- am I coming up with the
15 right number? And it seems like we didn't leverage the
16 MHSA high enough, in my mind. Because I think we were
17 probably at 20,000 per unit in Fresno. And so I'm kind
18 of curious, like, did people not use tax credits for the
19 most part? What happened?

20 MS. STARBUCK: Well, with the shared housing,
21 there is no tax credits.

22 MR. PRINCE: Okay.

23 MS. STARBUCK: And those are a hundred percent
24 MHSA. So that's going to skew the results that you're
25 looking at overall.

1 The majority of the rental-housing properties
2 were tax-credit deals. And as you know -- because you've
3 done tax-credit deals -- the costs for doing those has
4 gone up. The investors.

5 The developers are taking their full fees that
6 the tax credit authorizes. The per-unit cost for
7 development are higher, given the -- probably the
8 amenities that are offered in the projects, because there
9 is requirements for a separate office and community space
10 for the service providers to meet with the MHSA
11 residents. And some of the amenities are provided
12 on-site. Some of the counties are actually using some of
13 the office space to operate their mental-health services
14 divisions on-site of some properties.

15 So that was the average cost that we came up
16 with. Some were far cheaper to develop than others, the
17 high-cost areas.

18 MR. PRINCE: Well, I just find that to be an
19 interesting --

20 MS. STARBUCK: Yes.

21 MR. PRINCE: Over here, I'm trying to do the
22 math.

23 So I saw the stakeholder idea, which I think is
24 a great idea; right?

25 And then -- and I think it would have to be,

1 like, a safe environment, where all of us can come there
2 without being defensive; right?

3 MS. STARBUCK: Right.

4 MR. PRINCE: Because I'm pretty darn sure that
5 we, as the developer, didn't do things always well. And
6 so I can't assume -- if it's a new program, there's a
7 learning experience, I guess is what I'm trying to say.

8 So I think it would be interesting to see if
9 you can create that stakeholder group to have that
10 conversation, and get feedback about how CalHFA could do
11 a better job, how we as developers can do a better job,
12 and make sure it's a safe environment, so you get some
13 good outcomes; right? And have that conversation.

14 MS. STARBUCK: I agree.

15 MR. PRINCE: I think that CalHFA should
16 continue to look at -- my feedback would be to continue
17 to look at how to do these special-needs programs and
18 these special-needs loans.

19 And so I kind of applaud you, thinking about
20 it. So that would be my kind of input, is, yes, I would
21 do the stakeholder meeting to get the feedback about how
22 to make sure that the transaction goes well, from both
23 sides, the developer and I guess the third-party, but
24 you've already been talking with the county DMH people.

25 MS. STARBUCK: Correct.

1 MR. PRINCE: But I think it would be great for
2 CalHFA to continue to explore this program -- this kind
3 of -- I don't know the right term -- but this revenue
4 stream, or whatever the right term would be.

5 MS. STARBUCK: Okay.

6 Any other questions?

7 MS. GUNN: I just have a question on -- you
8 said that your units have a restriction for veterans?

9 MS. STARBUCK: I'm sorry, for veterans?

10 MS. GUNN: Right, for veterans. Of course,
11 Vets Affairs.

12 MS. STARBUCK: There have been some units that
13 have been regulated to veterans, on top of the MHSA
14 units; but that wasn't the primary goal of the program.

15 MS. GUNN: Right. And so my question is, was
16 there some sort of policy put out, or request put out for
17 the veterans specificity?

18 MS. STARBUCK: No.

19 MS. GUNN: Or is that just a byproduct that
20 occurred --

21 MS. STARBUCK: It's a byproduct.

22 MS. GUNN: -- because those developers wanted
23 to...?

24 MS. STARBUCK: Going forward, we would try to
25 work with HCD to utilize their program funding for

1 veterans' homeless housing. But initially, that was just
2 a byproduct, and we were trying to keep track of how many
3 veterans were being served in relationship to how the
4 MHSA funds leverage the program funds that they had in
5 the deal.

6 MS. GUNN: Okay.

7 MR. PRINCE: And you recently did a survey,
8 right? I seem to remember --

9 MS. STARBUCK: Yes.

10 MR. PRINCE: -- it coming across.

11 I was really surprised, within our MHSA units,
12 despite the high percentage of veterans within our
13 homeless population, there is a very small number of
14 veterans served by our program. I really was surprised
15 by that. And so I thought it was interesting for me to
16 learn that locally, because I don't think -- and I don't
17 think we would have asked the question until you guys
18 did, so I thank you for doing that.

19 But my sense was that -- well, at least for
20 Fresno, we did not have a high participation of veterans.

21 MS. FALK: I would just like to say that I
22 think this is a great program. It's created housing that
23 wouldn't have ever happened without these funds and
24 without -- and for a segment of the population that's so
25 needy. So I would love to see CalHFA continue.

1 I know that it was a very steep learning curve.
2 MS. STARBUCK: Very.
3 MS. FALK: And now you're there. So it would
4 be a shame to not utilize that going forward, because
5 you've really learned a lot about how these things work,
6 and have that expertise.
7 My only concern would be is if -- I know that
8 always the loan-servicing fees are the hardest for the
9 projects to absorb on an operating basis.
10 MS. STARBUCK: Right.
11 MS. FALK: So to keep those as absolutely low
12 as possible, because there is no way to -- especially as
13 time goes on, if the rents aren't going up enough to
14 cover them, it's a big burden.
15 MS. STARBUCK: I agree.
16 And we do need to look at that further when
17 we get some feedback from developers and see how it would
18 affect their cash flows, definitely.
19 MR. PRINCE: One of the things that happened in
20 Fresno -- which I would think happened throughout the
21 state -- is the kind of tension between surveying
22 chronically homeless individuals, maybe the most
23 vulnerable, versus the local mental-health board wants
24 to really solve Prop. 63 as the answer for their adult
25 children who had mental-health issues, and they were

1 thinking about what happens when they pass away. So
2 there's this tension between chronically homeless, really
3 frail people with severe mental illness, versus still
4 vulnerable but not in the same spot.

5 I thought -- I find that tension to be really
6 interesting. I assume it's happening throughout the
7 state.

8 MS. STARBUCK: It was.

9 MR. PRINCE: And I think that that's probably
10 more of the mental-health board members really thinking:
11 "This is for my kid; and my kid is not one of those
12 really chronically homeless individuals." And so it's
13 just been interesting how that plays out.

14 MS. STARBUCK: It was a learning curve. Even
15 for developers and counties, that was a problem. There
16 was funding available for chronically homeless through
17 HCD and some other programs. And some counties overlaid
18 the chronically homeless units on the MHSA units, and
19 then the counties had a difficult time finding an
20 adequate number of people that met the Prop. 63 homeless
21 or at-risk of homelessness requirements. The chronically
22 homeless was too restrictive for them.

23 And we actually had a project in Lompoc that
24 had to be restructured. And we actually worked with
25 HCD for six -- no, nine months to buy back some of the

1 Governor's Homeless Initiative units with MHSA, and
2 convert them from chronically homeless units to MHSA
3 units because they had a larger population that they
4 could fill the units with that were not chronically
5 homeless.

6 So it has been a learning curve for all
7 agencies involved in these projects; and we hope to take
8 that learning curve and, you know, use the momentum from
9 it and apply that to the next program.

10 And so when we do talk to developers about
11 projects, we look at how they're overlapping their units,
12 whether it's tax-credit restrictions or Governor's
13 Homeless Initiative with the MHSA, so that the counties
14 are very aware of what those limitations and restrictions
15 are going to do to how they fill those units.

16 CHAIR JACOBS: Any further questions, comments?

17 MS. SOTELO: I just have two comments.

18 One is, I think the program is a great program,
19 and I like the interplay between localities deciding what
20 programmatic priorities they have, and CalHFA be the
21 underwriter, and kind of looking at it as a third-party
22 underwriter that provides services to the county. So the
23 MOU changes that you're making, I think, are important
24 changes that more better-align with the county priorities
25 as opposed to just looking at it with a state -- you

1 know, statewide glasses.

2 One thing I would caution against is, you know,
3 we don't want to become, as CalHFA subject-matter experts
4 on how to provide services for homeless individuals with
5 mental illnesses, or, you know, become kind of the policy
6 leaders in those kind of arenas and venues, because there
7 are so many other agencies and departments that do
8 that --

9 MS. STARBUCK: Right.

10 MS. SOTELO: -- and do that well.

11 And so from a staffing perspective, I want
12 our competitive advantage to be that we are the best
13 underwriters, the most efficient, prolific underwriters
14 in the market place, in the state market place; and we
15 can really get a loan done like nobody's business, and
16 close it quickly and efficiently. And, you know, that
17 is our competitive advantage, and that is the service
18 that we're selling.

19 MS. STARBUCK: Correct.

20 MS. SOTELO: So I see this program as the
21 opportunity to do that. And so in that vein and in that
22 light, one thing I would recommend to staff is to take a
23 look at the COSR and the management of the COSR as not
24 purely an underwriting activity, but really, it's more of
25 a monitoring activity.

1 You know, the way you size it is certainly
2 underwriting; but the way you disburse it and how you
3 control it and how you manage it is, to me, more of a
4 county-related activity or something that could happen
5 at a local level, as opposed to handling it through the
6 state system, just because right now it's breaking even,
7 and it pays for itself with the percentage of what you're
8 getting from the loan. But that's not going to be the
9 case, you know, moving forward. And you've clearly
10 identified that.

11 So giving it back to the counties and having
12 them control and disburse it creates, I think, more
13 efficiencies for the county, and maybe addresses Janet's
14 concern about projects not having to carry the increasing
15 burden of cost associated with monitoring those projects.

16 MS. STARBUCK: Definitely.

17 We've actually considered as one of the options
18 for a program going forward, would be for CalHFA to
19 underwrite the financing, and then assign the loan and
20 full management responsibilities back to the county.

21 MS. SOTELO: Yes.

22 MS. STARBUCK: That's an option we could do for
23 them. And we just need to find the level of interest
24 across the state because some counties aren't set up to
25 do any of it.

1 MS. SOTELO: Right.

2 MS. STARBUCK: They don't want to administer
3 ongoing funds. They don't have a close working
4 relationship with their housing departments, for whatever
5 reason.

6 So every county is different. And we'll just
7 have to take the feedback that we get and see what type
8 of programs we can offer for them that are cost-effective
9 for the Agency, where we're not losing money.

10 MS. BOATMAN PATTERSON: And I want to remind
11 the Board as well, that we do have an Asset Management
12 Department; and that the COSRs and the administration
13 of the COSRs are very similar to some of our Section 8
14 occupancy and monitoring. And so we've kind of run it,
15 streamlined, as part of how we already do business. And
16 so that was one of the things that we did find out, was
17 that that side of the house is actually -- the program is
18 paying for itself on that side of the house.

19 MS. SOTELO: Good.

20 MS. BOATMAN PATTERSON: It's on the lending
21 side of the house that we've kind of lost our shirts.

22 But we will keep that in mind. But I think
23 what we want to do is, we want to start that dialogue and
24 get that feedback of how can we be the best partner and
25 what flexibility can we give and offer to make sure that

1 we're meeting the public policy goal of the state of
2 California.

3 MS. SOTELO: Right, right.

4 MR. PRINCE: And I think I heard you say
5 something I'd love for you to help me understand.

6 So I do think -- yes, we have to be strong
7 underwriters, and I totally agree with what you said;
8 but I do also think we should be policymakers. And so --
9 and maybe it was just Fresno, is what I maybe heard --
10 but I think serving the chronically homeless
11 is really important if we're going to end veteran
12 homelessness, if we're going to end chronic homelessness.
13 And I think that then we learn lessons and we can
14 actually end homelessness -- despite L.A. having no
15 growth. And so --

16 MS. SOTELO: I was going to say, L.A. has got
17 56,000 homeless, 15,000 of which are veterans, and we've
18 just produced 1,500 units for veterans. So we've got a
19 long way to go.

20 MR. PRINCE: Yes.

21 MS. SOTELO: So I'm a huge advocate of, you
22 know, from a policy perspective, building housing, and
23 building housing for homeless and building housing for
24 people living in chronic homelessness.

25 The reality is that, is CalHFA the right policy

1 leader to do that programmatically? And I think that
2 there are other leaders like HCD and the Veterans
3 Department, the Department of Health Services that can
4 put forward programmatic dollars and policies that make
5 sense.

6 And we can execute them and we can buy off on
7 them. And we are a partner in solving the problem, but
8 we're not the subject-matter experts; and I don't expect
9 our staff to be the subject-matter experts for that.

10 MS. STARBUCK: Yes. And that's where the state
11 DHCS wants to evaluate what their role could be. They
12 have got the expertise and the staffing that know that
13 part of it.

14 MS. SOTELO: Right.

15 MS. STARBUCK: And that's why it's been an
16 effective partnership. It just hasn't been great
17 communication for the counties because of the way it was
18 structured and set up.

19 Do you have any questions for Chuck Anders of
20 state DHCS?

21 MR. PRINCE: My last comment along that because
22 I told you I agree with you -- and I thank you for your
23 clarification -- but, I mean, many times communities tend
24 to go to the low-hanging fruit; right? And so whoever is
25 pushing it, is pushing -- meaning, the right priority and

1 the right population that has the highest return on
2 investment for the public funds, whoever it is. But I
3 think it has to happen. So if it's us just implementing
4 the vision and policy, I'm totally fine with that. So I
5 just want to thank you for your clarification.

6 I hate challenging you. It just makes me
7 nervous.

8 MS. SOTELO: Oh, no, this is totally
9 transparent public policy.

10 MR. PRINCE: I know. It's like going into the
11 O.K. Corral with a rubber knife against you. So that's
12 why I was a little nervous about challenging you.

13 MS. SOTELO: No, I -- no, we're all great
14 advocates of housing, so that's why we're all here.

15 CHAIR JACOBS: Thank you, both, for presenting
16 today. And we look forward hearing from you in the
17 future.

18 MS. STARBUCK: Okay.

19 MR. ANDERS: Thank you.

20 CHAIR JACOBS: Let's take the quickest, most
21 accurate five-minute break, and come back. We've got a
22 lot still on the agenda and we need to get through.

23 So five minutes, no more.

24 //

25 *(A recess was taken from 11:54 a.m.)*

1 to 12:04 p.m.)

2 --o0o--

3 **Item 7. Discussion, recommendation, and possible**
4 **action regarding the adoption of a resolution**
5 **to amend Resolution 15-01 authorizing the**
6 **Agency's single family bond indentures, the**
7 **issuance of single family bonds, short-term**
8 **credit facilities for homeownership purposes,**
9 **and related financial agreements and**
10 **contracts for services**

11 CHAIR JACOBS: All right, so we're on

12 Item Number 7 -- 7 through 10.

13 Tim, go for it.

14 MR. HSU: Okay, so the big changes that we're
15 making here is that --

16 MS. BOATMAN PATTERSON: Agenda Items 7, 8, 9
17 and 10.

18 MR. HSU: I promise to go really fast.

19 The big changes that we're making here is that
20 we talked at the last board meeting about our efforts to
21 replace TCLP; and we have successfully gotten enough
22 capacity to replacing all the outstanding TCLP. As it
23 turns out, we've got twice as much as we needed, which
24 is great. So we selected four banks to proceed with the
25 substitution.

1 As we were working through this substitution,
2 we realized that our sort of annual, typical financing
3 resolutions didn't have sort of enough clarifications in
4 terms of authority to complete the execution of this
5 transaction.

6 So we didn't include a red-line for the Board.
7 But if you look at this PowerPoint slide, what the
8 change -- so this particular resolution is an amendment.
9 It amends and restates 15-01, which is the single-family
10 bond financing resolution that the Board approved in
11 March.

12 So what are some of the amendments and
13 restatements?

14 So it clarifies our delegated authority to
15 staff or to our ED, our authority to replace TCLP, which
16 I don't think anybody ever questioned that the Board
17 wishes us do that. But I think this clarifies in this
18 particular resolution our authority to do that.

19 And also, it gives us the ability to execute
20 amendments to prior indentures and supplemental
21 indentures to effect both this particular replacement, or
22 any debt-restructuring efforts that we may embark on.

23 And that lastly, this is Article III, which
24 generally gives us authority to execute necessary and
25 all related documents, it gives us the authority to do

1 this for all bonds, meaning, that not just bonds that
2 were issued this year, but when we were doing debt
3 restructuring or when we are managing our legacy debts,
4 it gives us the authority -- it clarifies our authority
5 to be able to execute documents related to those old
6 debts.

7 So those are the key changes. They're not
8 huge; but it will help us to make sure that we have the
9 authority to complete this very important task of
10 replacing or substituting out TCLP, which is, for the
11 new Board members, a federal facility that we acquired
12 some five to six years ago, that has helped us stabilize
13 our balance sheet over the last five or six years.

14 So those are the changes that I would love the
15 Board's consideration in adopting as a resolution.

16 MS. BOATMAN PATTERSON: Tim, are you just going
17 through Item 7, or are you going to go through 7 and 9 at
18 the same time, and then 8 and 10 at the same time?

19 MR. HSU: I think our tradition is to go
20 through them one by one.

21 MS. BOATMAN PATTERSON: Okay.

22 MR. HSU: So that the Board would have to vote
23 for each resolution one by one.

24 CHAIR JACOBS: Any questions?

25 MS. FALK: I'll move approval.

1 MR. SCHAEFER: I have a question before we do
2 that.

3 Tim, could you tell me -- help me understand,
4 because I'm trying to orient myself, "execute provisions
5 of Article III for all bonds," what is the distinction
6 there, do you know? Can you help me with that?

7 MR. HSU: So typically, in this financing
8 resolution, Article I is related to debt restructuring.
9 So the Board delegates authority to staff the ability
10 to issue refunding bonds, for example, or, as I said,
11 restructure legacy debt.

12 Two, it allows us to issue new bonds for
13 financing new lending activities.

14 Three, before this particular amendment says
15 that we have the ability to execute related and all
16 necessary documents related to Article I and II. But
17 Article I and II are really just related to issuance of
18 bonds or refunding bonds this particular year.

19 But what we are doing, oftentimes, is that we
20 are -- let's say, so, for example, if we have a contract
21 on a deal that we did last year, there are times in which
22 we need to somehow modify that, if people want to novate
23 contracts with a different party.

24 So we noticed that, as we're making this
25 amendment. And we are asking for the ability to execute

1 on all prior bonds as well.

2 MR. SCHAEFER: Thank you. That answers my
3 question.

4 MS. BOATMAN PATTERSON: And this was
5 recommended as cleanup from bond counsel.

6 MR. HSU: I appreciate you saying that, Tia;
7 but it's on me. Because I believe one Board member asked
8 last time if this is -- that resolution that you guys
9 passed, 15-01, if it had everything that I needed to
10 finish what I was doing, and I said yes.

11 So I was wrong.

12 CHAIR JACOBS: We have a motion.

13 Do we have a second?

14 MS. CABALLERO: I'll second.

15 MS. OJIMA: Who was second?

16 MS. CABALLERO: *(Indicating.)*

17 MS. OJIMA: Thank you.

18 Mr. Caballero?

19 MS. CABALLERO: Aye.

20 MS. OJIMA: Mr. Schaefer?

21 MR. SCHAEFER: Aye.

22 MS. OJIMA: Ms. Gunn?

23 MS. GUNN: Aye.

24 MS. OJIMA: Ms. Falk?

25 MS. FALK: Aye.

**and related financial agreements and
contracts for services**

MR. HSU: So can I skip to agenda Item 9?

CHAIR JACOBS: Item 9. Sure.

MR. HSU: I'm sorry, I didn't organize this.

So 7 and 9 deals with amendments of the
bond-financing resolutions that the Board passed back in
March.

So what 9 is about -- and I should admit that
I'm chagrinned that we have to make amendments at all
since we just passed them at the last Board meeting.
Suffice it to say that we've been very busy between last
Board meeting and now.

So what agenda Item 9 and Resolution 15-10 is
about, is that it amends and restates Resolution 15-02.
And the reason why we're doing this here is that one of
the things that we hope to be able to come back to the
Board to tell you a lot more about, is this U.S. Treasury
program to give state HFAs a very low cost of funds to
finance HUD Risk-Share loans with state HFAs.

It's still in this sort of program-formulation
stage; but as we talked to Treasury and HUD about this
program, we realized that it's quite possible that we
need to bond-finance uninsured loans.

So the resolution that we passed -- well, the

1 Board passed last time, actually requires that all our
2 bond-financed lending activities carry at least a
3 risk-share insurance, or comparable insurance, on the
4 loan.

5 So, again, sort of, when we sell bonds, a
6 hundred percent of those loans need to have carried at
7 least this risk-share insurance.

8 What we realized is that because of their
9 limitations, it's quite possible that, say -- I'm just
10 going to make up numbers here -- for example, if we make,
11 let's say, a hundred-dollar acquisition loan and the
12 perm converts into a \$40 loan, it's quite possible that
13 we would take that \$60, that peels away upon, let's say,
14 tax-credit investments coming in, that that piece needs
15 to be uninsured. But the whole thing still needs to be
16 bond-financed because of the need for tax credit and
17 meeting the 50 percent basis.

18 So this particular resolution is giving Tia and
19 staff the ability to bond-finance those situations where
20 we might have to sort of pair a loan that's insured by
21 HUD, which would be first lien, and a second loan that's
22 uninsured; but it's really just during the acquisition
23 period which it's uninsured, but all of it needs to be
24 bond-financed for tax credit.

25 So that's the key thing that this resolution

1 does. And in addition, we also made this clarification
2 that Article III of this bond-financing resolution is
3 for all bonds. And that was the question that Tim was
4 asking.

5 So, again, I ask the Board to approve this
6 resolution as well, so we can continue work on this
7 program with Treasury and HUD.

8 CHAIR JACOBS: Thanks, Tim.

9 Any further questions on that?

10 MS. SOTELO: No.

11 I move approval of the action, Resolution
12 15-09.

13 CHAIR JACOBS: 15-10.

14 MS. SOTELO: I'm sorry, 15-10.

15 CHAIR JACOBS: Do we have a second to that?

16 MS. FALK: Second.

17 CHAIR JACOBS: Great.

18 JoJo?

19 MS. OJIMA: Who seconded?

20 CHAIR JACOBS: Janet.

21 MS. OJIMA: Thank you.

22 Ms. Caballero?

23 MS. CABALLERO: Aye.

24 MS. OJIMA: Mr. Schaefer?

25 MR. SCHAEFER: Aye.

1 MS. OJIMA: Ms. Gunn?
2 MS. GUNN: Aye.
3 MS. OJIMA: Ms. Falk?
4 MS. FALK: Aye.
5 MS. OJIMA: Ms. Avila Farias?
6 MS. AVILA FARIAS: Aye.
7 MS. OJIMA: Mr. Gunning?
8 *(No response)*
9 MS. OJIMA: Mr. Prince?
10 MR. PRINCE: Aye.
11 MS. OJIMA: Thank you.
12 Ms. Riggs?
13 *(No response)*
14 MS. OJIMA: Ms. Sotelo?
15 MS. SOTELO: Aye.
16 MS. OJIMA: Mr. Jacobs?
17 CHAIR JACOBS: Aye.
18 MS. OJIMA: Resolution 15-10 has been approved.
19 //
20 **Item 8. Discussion, recommendation, and possible**
21 **action regarding the adoption of a resolution**
22 **authorizing the Agency's single family**
23 **non-bond strategies**
24 CHAIR JACOBS: Okay, so jumping back, Tim.
25 MR. HSU: So now going back to agenda Item 8,

1 which is Resolution 15-09.

2 So this resolution is something that we talked
3 to the Board about back in March.

4 What we have started noticing is that more of
5 our lending activities, more of the Agency's lending
6 activities are actually not bond-financed; they're
7 actually being financed in different ways that came
8 about, in large part, because of the things that we
9 experienced over the last four, five years.

10 So, for example, what we talk about a lot about
11 the single-family side is this so-called TBA program.
12 So while TBA sounds strange and intimidating, all it is,
13 is that it's a securitization of loans that you sell into
14 the marketplace.

15 So what happened over time is that these
16 different kinds of financing mechanisms have come to the
17 Board on sort of a one-off basis as we need them. And
18 then there are times in which we end up changing them
19 because we became too narrow in scope, or whatnot, and to
20 the Board.

21 So the idea emerged that why don't we do an
22 annual re-upping or reauthorization of all of these
23 non-bond-financed lending activities to the Board, so
24 that the Board, in one sitting -- and what we'll do, is
25 that this will come in March to you, just like the

1 bond-financing resolutions, so that you can see sort of
2 in one setting, that "Okay, well, some of this stuff is
3 not going to go to bond; some of this stuff is not going
4 to bond," and you can see them all together at the same
5 time.

6 So that was the idea. Although we didn't quite
7 make this resolution go to the March, but perhaps that
8 was a good thing, because otherwise maybe you'd have to
9 amend it this time. But we're coming to the Board this
10 go-around to ask for the authority to do non-bond finance
11 lending activities. But like I said, some of these
12 authorities have been passed by the Board or adopted by
13 the Board in the past.

14 CHAIR JACOBS: One question. Just given Ken's
15 presentation to us last time, we were achieving pretty
16 solid volumes in the single-family conduit. Is this
17 going to be sufficient dollar amounts for that?

18 MR. HSU: So, we didn't put -- so, Article I of
19 this particular resolution allows us to generally do MBS
20 securitizations. So we didn't specifically identify TBA
21 as such, because I think of a TBA as sort of like a
22 subset of MBA securitization.

23 We didn't put a cap on this, because this
24 doesn't require us to issue bonds. So, generally, if we
25 were to issue bonds, there could be, let's say, CDLAC

1 allocations, there could be even at some level, let's
2 say, we actually have a legislation that actually caps
3 the total amount of bonds that we can have outstanding at
4 \$13 billion. There's certain limitations on bonds
5 because it requires tax exemption. But when we're doing
6 this kind of mortgage-backed security securitization and
7 selling to a secondary market, there is really no natural
8 cap on that. But if the Board desires a cap, we can talk
9 about that.

10 MS. BOATMAN PATTERSON: I think he was
11 talking -- he was looking at the caps that you have for
12 your first-lien whole and subordinate loans. He was --

13 CHAIR JACOBS: If the size of program isn't
14 enough.

15 MS. BOATMAN PATTERSON: Though, that's not the
16 TBA model.

17 CHAIR JACOBS: Got it. Okay.

18 MR. HSU: So Article I is this whole
19 mortgage-backed security securitization, which doesn't
20 have a cap. Article II, however, allows us to take some
21 of our money to fund, let's say, some first-lien loans or
22 some subordinate loans. And that has these caps that you
23 see here, that for first-lien loans not to exceed
24 \$20 million, and subordinate loans not to exceed 5.

25 And this portion of it, it is in large part,

1 some of the discussions that we've been having with the
2 Board over the last year or so, about our ability to free
3 up some of our cash to do things like this, without
4 having to fear that we need the cash for this collateral
5 posting risk that we will talk about a little bit when we
6 go into the budget.

7 So the cap is -- again, the cap is on the
8 ability to fund these whole loans, which we can't really
9 easily lay off and do securitization, and there's no cap
10 on loans that we are able to securitize.

11 And then last, but not least, is that in
12 Article III, we have this sort of companion ability to
13 execute all necessary related documents to effect
14 Articles I and II. And in there, we have something
15 that's a little bit different that's worth highlighting.
16 In there, there is this idea that CalHFA might actually
17 provide a warehouse line to someone, which is strange.
18 Usually, we borrow, we borrow, we borrow; and we lend, we
19 lend, we lend. We usually don't lend to someone a
20 warehouse line.

21 And the reason why it is there, is that one of
22 the challenges that we've had in our Single Family
23 program, is that US Bank is actually the only master
24 servicer who serves the HFA space across the country.
25 But there are actually other HFAs that actually do

1 servicing. And the one that we're attempting to
2 establish a relationship is Idaho Housing. They're a
3 good master servicer. They are a little bit easier to
4 deal with, and they actually have a fee model that could
5 actually be more beneficial to us. However, they don't
6 have the sort of short-term liquidity wherewithal to
7 warehouse loans before they become securities.

8 So their relationship with other HFAs is that
9 the client HFA provides the warehouse line, and Idaho
10 provides everything else. So it's a bit of a hybrid
11 model. And the economic side of it is that instead of
12 them paying for servicing released, again, they have
13 capital restraints, so they can't really -- they don't
14 have the money to warehouse, they don't have the money
15 to pay for that servicing released. So what they do is
16 that they split the servicing fee with us, which I think
17 is more beneficial to CalHFA, especially how -- I know
18 this is all public record -- how little US Bank pays us
19 for servicing released.

20 So, anyway, so that is the whole, sort of in
21 a nutshell, this non-bond-financed resolution for
22 single-family. And I ask the Board to adopt this
23 resolution as well.

24 CHAIR JACOBS: Any questions or a motion?

25 MS. SOTELO: When will you know about the Idaho

1 relationship? When will there be a decision on that?

2 MR. HSU: Should any of the Board members go to
3 take advantage of our new budget here for traveling and
4 go to NCSHA, you will realize that this is like one of
5 the hottest topics in the HFA space about the dearth of
6 master-servicing capacity in our space.

7 As I understand it, they're currently trying to
8 absorb Connecticut Housing as a client. And Connecticut
9 Housing, for various reasons, is actually a very prolific
10 single-family lender. Because I think the state is a
11 little bit polarized, and you either have the Scarsdales
12 of the world and you have the people who work in those
13 mansions. And they have a really robust single-family
14 program.

15 They're trying to absorb Connecticut Housing.
16 And as far as I know, we'd like to think that we're next
17 in queue.

18 MS. BOATMAN PATTERSON: I've been courting to
19 Gerald Hunter, their executive director. So I told him,
20 "We're next, right? We're next."

21 And I think Ken just got back from the Housing
22 Finance; and he had a good meeting with them, so...

23 MR. HSU: So, again, this idea that we might
24 actually get someone a warehouse line is -- I like to
25 emphasize that -- that's not -- we have never done that

1 before. And the only reason why to do this, is to sign
2 up a master servicer that's much easier to work with and
3 might potentially create a revenue stream for us that's
4 better than the model with a more typical master
5 servicer.

6 CHAIR JACOBS: Understood.

7 Do we have a motion?

8 MS. FALK: I'll move.

9 CHAIR JACOBS: Thank you, Janet.

10 MS. SOTELO: I'll second.

11 CHAIR JACOBS: JoJo, the roll?

12 MS. OJIMA: Thank you.

13 Ms. Caballero?

14 MS. CABALLERO: Aye.

15 MS. OJIMA: Mr. Schaefer?

16 MR. SCHAEFER: Aye.

17 MS. OJIMA: Ms. Gunn?

18 MS. GUNN: Aye.

19 MS. OJIMA: Ms. Falk?

20 MS. FALK: Aye.

21 MS. OJIMA: Ms. Avila Farias?

22 MS. AVILA FARIAS: Aye.

23 MS. OJIMA: Mr. Gunning?

MS. OJIMA: Resolution 15-09 has been approved.

--o0o--

**Item 10. Discussion, recommendation, and possible
action regarding the adoption of a resolution
authorizing the Agency's multifamily
non-bond strategies**

MR. HSU: And onto the companion non-bond
finance resolutions for Multifamily.

I actually really think it's great that the
Board has now a travel budget and you can attend some of
these NCSHA conferences, and you can hear firsthand some
of the issues that people are dealing with. And as I
mentioned earlier, one of the sort of hottest topics on
the multifamily side is this sort of U.S. Treasury
program to fund -- to provide a low cost of funds on
HUD Risk-Share loans with state HFAs.

And Article I of this particular resolution is
attempting to capture our ability to do this. Should we

1 be able to do this program with U.S. Treasury and HUD,
2 we refer to these things as externally sourced non-bond
3 funds.

4 So these are basically examples of us selling
5 the loans. So we make a loan, and it has HUD risk-share
6 insurance on it with state HFAs, and you sell this loan
7 to U.S. Treasury, and they give you a cost of funds
8 that's better than what we can borrow in the bond market.

9 So I think we have said before, we refer to
10 this as "synthetic Ginnie Mae." And the reason why it's
11 referred to as "synthetic Ginnie Mae" is that they're
12 attempting to give us Ginnie Mae pricing without that
13 loan being wrapped by Ginnie Mae.

14 So this Article I also sort of gives -- sort of
15 clarifies our authority to be able to sell whole loans,
16 should we need to do that, meaning, that we're not
17 selling to Treasury anymore, for whatever reason --
18 we're, let's say, restructuring our legacy portfolio,
19 our ability to sell these whole loans to someone who may,
20 for example, want CRA credits.

21 And the second article talks about our ability
22 to use some of our own funds to fund or warehouse
23 multifamily loans. In most cases, here, we're referring
24 to warehousing. There are times in which, since we're
25 a pool issuer, meaning, that we don't issue a bond for

1 every loan that comes in. So, for example, you heard
2 about Ocean View, I think, a couple board meetings, you
3 heard about Virginia Terrace in this meeting, chances
4 are, we'll close both of those bonds and issue one bond
5 to finance both of them. So it's very possible that we
6 end up having to warehouse loans as they come in, and
7 then pool them to issue bonds.

8 So this \$50 million is really meant for those
9 kinds of activities, in which we're warehousing and then
10 pooling them and issuing bonds at one point in time, so
11 that we can get some economy of scale.

12 And the third article, which I didn't say
13 anything here in the PowerPoint, is this sort of ability
14 to execute all related and necessary documents to effect
15 Articles I and II.

16 I'll ask for questions; and if not, I ask for
17 the Board's approval as well.

18 CHAIR JACOBS: Any questions?

19 My lingering question is the name for the
20 synthetic Ginnie Mae program.

21 MS. BOATMAN PATTERSON: I think we kicked
22 around Cal Advantage. We kicked around Cal Advantage.
23 We're still playing with it. We'll figure it out.

24 CHAIR JACOBS: I think just for marketing, we
25 need to just have a great name and get it out there.

Do we have a motion?

MR. HSU: Yes, I think the word "synthetic" is not marketable.

CHAIR JACOBS: No, not at all.

We need a really good, catchy name that the community is going to like.

MS. BOATMAN PATTERSON: We need a motion.

CHAIR JACOBS: Motion, anyone, for 15-11?

MS. GUNN: I'll move it.

MS. FALK: Second.

CHAIR JACOBS: We have a motion and a second.

JoJo?

MS. OJIMA: Thank you.

Ms. Caballero?

MS. CABALLERO: Aye.

MS. OJIMA: Mr. Schaefer?

MR. SCHAEFER: Aye.

MS. OJIMA: Ms. Gunn?

MS. GUNN: Aye.

MS. OJIMA: Ms. Falk?

MS. FALK: Aye.

MS. OJIMA: Thank you.

Ms. Avila Farias?

MS. AVILA FARIAS: Aye.

MS. OJIMA: Mr. Gunning?

MS. OJIMA: Mr. Prince?

MR. PRINCE: Yes.

MS. OJIMA: Ms. Riggs?

(No response)

MS. OJIMA: Ms. Sotelo?

MS. SOTELO: Aye.

MS. OJIMA: Mr. Jacobs?

CHAIR JACOBS: Aye.

MS. OJIMA: Resolution 15-11 has been approved.

MR. HSU: It's just a little bit more than five minutes per resolution. So I'm very proud of myself.

Thank you very much.

CHAIR JACOBS: Now, it's amazing, we, a while back, asked for really great work on a business plan that really looked like a business plan. And Janet has been asking for this and Dalila -- a number of people have. And it was delightful to read through this package and see this really looked like a business plan. So, we're really pleased.

for Fiscal Year 2015/2016

CHAIR JACOBS: Don?

MR. CAVIER: Good afternoon, Chair Jacobs and Members of the Board. I'm Don Cavier, the Chief Deputy Director of CalHFA. I'm happy to be here. And I'm here to present the fiscal year 2015-16 Business Plan and operating budget for your approval.

But prior to jumping right into the new Business Plan, I want to take a few minutes to update the Board on the status of our existing Business Plan and the key action items associated with it.

So with the Board's permission, I'm going to start by including a current Business Plan update, followed by the new Business Plan. Then I'm going to turn it over to our Director of Financing, Tim Hsu, to give us an overview on Agency resource and liquidity projections for the coming year. And then we will wrap it up with the operating budget for fiscal year '15-16. So that's what it's going to look like.

The 2014-15 Business Plan contained five overarching goals centered around dealing with the residual impacts of the financial crisis and moving the Agency forward from an era of crisis management to an era of financial stability and active lending.

First and foremost was the need to stabilize

1 the Agency's balance sheet by addressing credit and
2 liquidity issues, mitigating loan losses and
3 delinquencies, and reestablishing the Agency's lending
4 programs.

5 Additionally, the Agency adopted goals for
6 collaboration with sister organizations like HCD and
7 other state agencies, to align the Agency's housing
8 strategies with those of the strategies of the state as
9 a whole.

10 Lastly, we sought to continue our efforts in
11 the *Keep Your Home California* program to help prevent
12 avoidable foreclosures through working with eligible home
13 buyers that had a financial hardship.

14 The 2014-15 Business Plan identified 12 key
15 strategies and 60 action items designated to accomplish
16 the established goals of the Business Plan.

17 While some of the action items were more
18 important than others in meeting the established goals
19 of the Business Plan, this chart reflects the status of
20 all action items, regardless of their importance.

21 In summary, 70 percent of the action items in
22 the Business Plan have been accomplished, or are partly
23 complete and in progress. Conversely, about 30 percent
24 of the action items have yet to be started. That's for
25 a variety of reasons, including staffing resources. We

1 had change in key staff in the organization that were
2 tasked with leading some of those initiatives. Shifts
3 in program priorities, as well as changes just in the
4 general business environment.

5 The next set of slides is going to give you
6 kind of a more detailed breakdown of some of these key
7 strategies and the action items.

8 The first strategy was to increase stability of
9 the Agency's capital structure and liquidity position.
10 Through a series of debt-restructuring efforts, including
11 monetizing some of our assets, bond redemptions and
12 refundings, the Agency realized additional cash-flow,
13 debt-service savings, and reduced our balance-sheet risk.

14 Under the strategy for reducing balance-sheet
15 risk by mitigating losses through our loan portfolio,
16 through the diligent efforts of both our Portfolio
17 Management and Loan Servicing departments, we have
18 successfully reduced our REO activity as well as our
19 delinquency rates to five-year lows.

20 And I think right now, we have 51 REOs, and
21 that's down from as high as 1,500 a few years ago. So
22 an incredible effort on their part.

23 And in doing so, this has resulted in -- both
24 of these activities have resulted in recent upgrades by
25 S & P and Moody's for our credit ratings, and has enabled

1 Tim and his group to secure the financing necessary to
2 take out this TCLP lines of credit with the U.S.
3 Treasury. And so I think we can't give enough thanks to
4 the groups that have done that work.

5 Next, we have reorganized and increased
6 operational efficiencies and infrastructure to better
7 position the Agency for future business opportunities.
8 One of the first items was to establish a formal
9 succession planning effort. That never got started.
10 We have identified that Cal HR has some programs in place
11 to facilitate that, but we need to just prioritize its
12 implementation.

13 Similarly, a master plan for a flexible
14 workforce has not been fully developed, but a substantial
15 level of cross-training did occur within the organization
16 during the year, as work shifted between our
17 Portfolio Management department and our Loan Production
18 department, as we're starting to get back into lending.
19 So a lot of staff started crossing back over onto the
20 lending side.

21 Additionally, we've used a lot of our
22 Multifamily -- or several of our Multifamily staff to
23 support some of the new TBRA collaborations with HCD,
24 getting some of those programs up and running.

25 Regarding work-flow assessment, for the better

1 part of the year, the Agency instituted a hiring freeze,
2 so that we could undergo an organizational assessment.
3 And while the assessment is not fully complete, senior
4 management has used the assessment process to help us
5 establish kind of what the work-flow and staffing needs
6 are for the different departments.

7 And as we move forward into the final phases
8 of this organizational assessment, we continue to make
9 refinements to our processes and to recognize that the
10 whole idea of looking for efficiencies and streamlining
11 the organization is like a never-ending process. It's
12 something you've got to continuously do. And so we're
13 going to keep moving forward in that.

14 Developing long-term strategies to monitor and
15 mitigate enterprise risk, we have partially completed
16 that. In response to the organizational assessment, we
17 shifted our risk manager, Tony Sertich, to support that
18 assessment, in working with the consultant. And so,
19 largely, the items that were identified under that
20 strategy didn't really get completed.

21 But we did to our biennial FISMA report, which
22 is the required risk assessment of Agency business
23 processes that's filed with DOF. And a handful of risks
24 were identified during that process, and we've addressed
25 all but a couple of them; and I think they're in the

1 process of being completed.

2 Related to I.T., integration of data
3 collection, flow, and reporting, none of the action items
4 under that initiative were completed. And that was
5 largely due to the immediate needs for the Agency to move
6 from what was an unstable platform, where our systems
7 were sitting, onto a stable SQL platform that is better
8 enabling our systems to talk to one another. So as we're
9 moving forward, looking for efficiencies and looking to
10 do exactly what's on there, the first step was to put us
11 onto a stable platform to make that happen.

12 Additionally, as our Single Family and
13 Portfolio Management programs were kind of working
14 diligently to not only reduce our -- mitigate our loan
15 losses, but to get back into lending, there was a variety
16 of programming efforts that needed to occur to get that
17 lending activity back up and running.

18 So as it relates to the strategy to generate
19 income via our Multifamily lending opportunities, the
20 Multifamily lending programs are expected to close two
21 of the five acquisition/rehabilitation loans anticipated
22 in this year's Business Plan, and five of the six Conduit
23 Issuance financings. However, they also are expected to
24 close over 21 MHSA loans, which were not anticipated in
25 last year's business planning.

1 While the program has fallen short of our
2 established lending goals for our Multifamily products,
3 we're optimistic that the recent changes to our
4 Multifamily loan programs, coupled with the
5 implementation of an in-depth training strategy for our
6 Multifamily department, will position the program for
7 success in the current market.

8 For fiscal year '15-16, we anticipate a
9 significant increase in lending activity for both HUD
10 Risk-Share and the Conduit Issuance financing.

11 As far as our Single Family program lending,
12 we're expected to exceed our Business Plan goals for
13 '14-15 by closing approximately 1,055 first mortgages,
14 and 4,700 down-payment assistance loans.

15 They're also on pace to close approximately --
16 I think it's 1,500 Mortgage Credit Certificates as well.

17 Sorry about that. I'm a little slow on this
18 thing.

19 All right, generating income via our Asset
20 Management. Really, the key action items that were
21 completed, or are partially complete here, are
22 administering the HCD's Tenant-Based Rental Assistance
23 program. We began making our first payments under that
24 program in March. Additionally, there are five
25 developments that we're working with, that have received

1 the 811 program subsidy. And currently, that represents
2 about 90 subsidized units and about \$3.1 million in
3 subsidy over the five-year demonstration period.

4 Savings from our Single Family Loan Servicing
5 operations. Staff are continuing to make changes to the
6 servicing system, as needed, and cross-training staff to
7 gain efficiencies. Additionally, staff have assessed the
8 feasibility of CalHFA serving as a master servicer. And
9 given our current efforts to increase our lending side of
10 the fence, we believe that the timing is not really ripe
11 for us to sit as a master servicer. But instead, like
12 Tim mentioned, moving forward with identifying some
13 potential master servicers to kind of expand our world
14 with respect to that and increase the amount of money
15 that we can make on our side, and provide better
16 processing terms and times. Some of the hits on US Bank
17 have been related to just the length of time it takes
18 them to close things.

19 Next, we had reorganized state-level housing
20 policy and resources; and one of the main strategies
21 under that was collaboration with HCD on live projects.

22 So asset-management functions are at the heart
23 of the collaboration efforts between the CalHFA and our
24 sister organizations. And to date, CalHFA and HCD have
25 developed and implemented a common audit handbook for

1 asset management, and are collaborating with HUD on the
2 HUD TBRA and 811 programs. We are continuously trying to
3 find additional efficiencies as it relates to the asset
4 management work that's done between multiple agencies.

5 Related to the Governor's Reorganization Plan,
6 we have filed a program-implementation document that's
7 been submitted to the Governor's office. That's where it
8 stands at this point.

9 Also, our Affordable Housing Cost Study was
10 completed and published in October of 2014.

11 As we also worked to coordinate functions to
12 meet the California's affordable-housing needs, CalHFA,
13 HUD -- or not HUD -- HCD, BCSH, and CDLAC and TCAC have
14 monthly meetings to review policies, programs,
15 organizational structures. Ideas from these meetings are
16 used to better align our activities and to meet the
17 housing needs of California.

18 The organizational review, as I mentioned, is
19 still in process. It's coming to, you know, probably
20 close to its end, but it still got a little ways to go.
21 But a lot of good things are coming from that.

22 CalHFA continues to work with HCD and other
23 state agencies to support the Governor and the
24 Legislature to develop tools and help provide resources
25 to meet California's housing needs.

1 And on our *Keep Your Home California* program,
2 it continues to collaborate with EDD to include flyers
3 in all unemployment insurance benefit packages. It
4 continues to partner with over 170 outreach events; and
5 to continue to monitor its progress, to make adjustments
6 where needed. We've made our most recent *Keep Your Home*
7 *California* program changes in April of 2015.

8 We've increased the marketing efforts on the
9 program to help ensure that we move this money in an
10 efficient manner; and we've enhanced a digital marketing
11 campaign.

12 Currently, there are more than 240
13 participating servicers. The number of servicers
14 participating in the Principal Reduction Program grew
15 22 percent in 2014, with an additional 26 being
16 registered.

17 And I think the biggest point to make is that
18 overall, families that are assisted by this program,
19 after 24 months after the assistance, about 93 percent
20 of them are still in their homes. And so I think that's
21 a real testament to the success of the program.

22 Any questions before I move into the actual
23 Business Plan?

24 *(No response)*

25 MR. CAVIER: We're good? Okay.

1 The proposed fiscal year 2015-16 Business Plan
2 builds upon the momentum established this year and
3 emphasizes growing the Agency's balance sheet through
4 Single Family and Multifamily lending programs, while
5 continuing to develop operational efficiencies that
6 ensure that our activities support State housing policy.

7 Additionally, we will continue to administer
8 and refine the *Keep Your Home California* program in order
9 to maximize the use of the funds to assist eligible home
10 buyers to avoid foreclosures and stay in their homes.

11 Generating income via the Single Family lending
12 opportunities. One of our first action items is that
13 we believe we're going to close about \$600 million in
14 first-mortgage loans. We're targeting about \$75 million
15 in down-payment assistance loans; and we expect to
16 generate \$6 million in new revenues, and about
17 10.6 million in long-term assets.

18 We're going to add a new mortgage-broker
19 business line, which is going to be kind of a kickstart
20 to increasing our levels to this level.

21 And we're going to complete our new lender
22 manual, which was on our list last year as well.

23 We plan to issue between at least 1,300
24 Mortgage Credit Certificates; but like I mentioned
25 previously, we're already on target to hit 1,500. But

1 that's kind of where we set the bar for next year.

2 On our Multifamily program, we're expecting to
3 close about \$100 million in Multifamily lending, another
4 hundred million in Conduit Issuance financings. We
5 expect to generate about \$1.2 million in new revenue; and
6 about \$5,300,000 in long-term assets.

7 Increase internal capacity via training
8 program, that's going to kickstart for that department,
9 I believe in the next couple weeks. It will start and go
10 for about a three-month period of time.

11 We're going to create portfolio-preservation
12 strategy, looking at the loans within our portfolio and
13 how we plan to keep them, and keep that affordability
14 going and recapitalize those properties.

15 Adopt policies for our Earned Surplus funds.
16 So those funds that we're sitting on within our
17 indentures and how we might use those to support
18 additional development in terms of using it as a gap
19 financing tool.

20 Strengthening our capital --

21 MS. FALK: May I ask a question?

22 CHAIR JACOBS: Don?

23 MR. CAVIER: Yes.

24 MS. FALK: Just on those last two, is that
25 something that's going to come to the Board for adoption?

1 MR. CAVIER: Yes. I believe so. Yes.
2 We're still currently kind of fully scoping it
3 all out.

4 MS. FALK: I mean, when it's done.

5 MR. CAVIER: We've had some meetings on it
6 recently; but I'm thinking, yes, it will come to you.

7 Okay, strengthening our capital reserves,
8 improving liquidity position. Tim has already talked
9 about taking out the Temporary Credit and Liquidity
10 Program funds from the U.S. Treasury. And we expect to
11 have all that taken out in June or early July.

12 MR. HSU: June.

13 MR. CAVIER: Okay, June, yes.

14 *(Applause)*

15 MR. CAVIER: Another initiative, or a key
16 initiative, is to develop internal capacity to hedge MBS
17 sales to increase fee income. We currently hedge that
18 through FirstSouthwest. And if we can do some of that
19 internally, we can get another 50 basis points of
20 earnings on some of that.

21 It does come with a little bit of risk, but
22 that's what we're looking at in trying to balance what
23 our ability to do that and take that risk would be.

24 Refine tools to manage allocation of capital
25 and risk. That's kind of, again, looking at where our

1 capital is and what level of risk we're willing to take
2 with it, after having just come out of the financial
3 crisis.

4 The next goal, aligning lending activities
5 with State housing policy and increase operational
6 efficiencies. One of the efficiencies that we're
7 pursuing currently is consolidating all of our Sacramento
8 staff into the 500 Capitol Mall building. We currently
9 have a facility in West Sacramento with our loan-
10 servicing group. We're going to -- we have room for them
11 in our existing building, so we're going to move them
12 there, and then pursue a sublease of that West Sacramento
13 space.

14 Additionally, we've already completed it; but
15 we've further consolidated the Culver City office, I
16 believe carving off 3,000 square feet for a sublease,
17 for some of that space that was unneeded as well. And so
18 kind of just getting more efficient and more lean. So
19 that's one of the initiatives.

20 Eliminating unneeded vacant positions. That's
21 something we'll talk a little bit more about in the
22 budget. Again, ones that have gone on for a very long
23 time, that have been unfilled, we've kind of tried to
24 rein that in some.

25 Finalize organizational structure and

1 functional roles. And, again, that's part of our
2 organizational assessment that we're doing.

3 Continuing to refine our budget and business
4 development plan. That's something I'm very interested
5 in, is to further develop both our budget as well as our
6 business-plan process.

7 Next would be developing long-term strategies
8 to monitor and mitigate enterprise risk. We mentioned
9 this in last year's business plan, and it was put on hold
10 as we moved through the organizational assessment,
11 because we shifted staff to help support that. We want
12 to look at that again. But truth be told, that was --
13 you know, we published this a couple weeks before we
14 decided to take our risk manager and make him the
15 Multifamily director. So we're still going to be working
16 this one out, and how far we'll get with it this year.

17 MS. SOTELO: Can he do two jobs?

18 MR. CAVIER: Yes. That's kind of what I told
19 him, actually.

20 Okay, agency-wide I.T. integration of data
21 collection, flow, and reporting. Again, this is a
22 carryover from the current-year Business Plan. But we've
23 kind of looked at it a little differently, and kind of
24 really targeted some key things that we want to get
25 accomplished this year. And one of the them being an

1 I.T. governance structure, so we can ensure that I.T.'s
2 priorities align with the Business Plan, and in kind of
3 a logical patterned way, where we're not just jumping
4 from thing to thing. And I'm going to help work with
5 our chief information officer to kind of scale that out
6 with the heads of the business department in terms of the
7 sequence of events, and what things need to happen first,
8 and help get the priorities aligned, so that we're not
9 working on something that's not needed for six months,
10 when we need something immediately in three months.

11 And so it sounds pretty commonsensical; but
12 with a large organization, with a lot of moving parts,
13 you have to put some real effort into making sure you're
14 doing that.

15 Developing records management policy and
16 updating record retention. I know Victor James and his
17 staff are working heavily on the policy development and
18 record-retention activities. And we're going to be
19 implementing that this year, trying to scale back on the
20 amount of things that we're storing, and physical copies
21 of, and moving to more of an electronic environment, to
22 where we can; and just getting a policy that is very well
23 understood throughout the organization.

24 Identify and train I.T. liaisons in all
25 business units. And this is another key initiative, in

1 the sense that a lot of times, I.T. lacks the
2 understanding of the individual business unit and their
3 needs. And what we've noticed is within the
4 organization, departments that have this liaison, tend
5 to have a better process and outcome as it relates to the
6 systems they use. And so we want to foster, you know,
7 kind of that liaison role within each department, to make
8 sure that the business needs are clearly understood by
9 the I.T. staff.

10 Expand and approve electronic loan file
11 submission process. And this goes back to our Single
12 Family programs and the way that we've received the
13 applications for those. And so we're consistently
14 working and looking at the system as it relates to the
15 speed at which those are received and processed.

16 Currently, we have a few glitches in that
17 process that we're trying to work out. So that's going
18 to be a key item for us this coming year.

19 Enhanced program delivery of affordable housing
20 through continued collaboration with HCD and other
21 partners. You know, in collaboration with the Department
22 of Health Care Services and HCD, we wanted to determine
23 the next phase of the MHSA program, which you heard about
24 earlier.

25 Assess goals with performance measures and

1 viability of both the TBRA and 811 programs -- those are
2 pilot programs -- and see what the long-term outcome for
3 those are.

4 Continue to explore integrated gap-financing
5 efforts among state affordable housing entities. That's
6 working together with HCD and other partners to identify
7 funds that we can use to help create the funding stack
8 for deals, and to get more deals out using the tools that
9 we do have.

10 And collaborate with HCD and CalVet to expand
11 veteran housing opportunities. I think that's something
12 that we've all talked about, and it's important to
13 everyone.

14 Maximizing use of *Keep Your Home California*
15 funds. Again, they're very similar to last year's. We
16 continue to try to move the last, you know -- billion
17 dollars, is it?

18 MR. HSU: We've used a billion dollars.

19 MR. CAVIER: You've used a billion dollars,
20 yes.

21 MR. HSU: So we have about 800 left?

22 MR. CAVIER: Yes. Left.

23 So try to maximize the use of those and get
24 those out as fast as possible to those families that need
25 it.

1 Increase the marketing efforts. Collaborate
2 with other private and public entities to maximize the
3 leverage of potential foreclosure-prevention resources.

4 Measure program outcomes, and assess barriers
5 to eligibility.

6 And with that, I will take some questions.

7 MS. CABALLERO: I don't have a question, but
8 this is really well done. I like the way you organized
9 it.

10 MR. CAVIER: Thank you. I appreciate it.

11 MS. CABALLERO: It's really understandable. I
12 appreciate it.

13 MS. BOATMAN PATTERSON: They put a lot of work
14 into this.

15 MS. CABALLERO: Well, it's pretty clear. I
16 mean, I think the goals and the objectives are -- I think
17 they're great.

18 MR. CAVIER: Sorry for the rough start. Got a
19 little nervous, but I'm finding it, I'm getting there.

20 MS. CABALLERO: Don't even tell us you had a
21 rough start, because I don't think any of us noticed.

22 But I just want to say as part of this, that
23 one of the things that I asked of Tia and Tim and I are
24 trying to work it out, is kind of a one-on-one briefing
25 on this organization can make money, and how we make

1 money both in terms of historically and going forward.

2 And I know that Susan Riggs wants to be part of
3 it. And I mentioned it once. And Mike also wants to be
4 part of it. So it may make sense for us to do it here at
5 a board meeting, just as kind of -- yes, because I just
6 need to understand, you know, what's the spread on how
7 we make money, so that when we go into a discussion about
8 where should we go in the future, I'll have a better
9 understanding. And some of it, some of the words are
10 still Greek to me.

11 MR. CAVIER: Right.

12 MS. CABALLERO: So I'm looking forward to that.

13 And this is real helpful in terms of where the
14 organization is going to go next year.

15 MR. CAVIER: Thank you.

16 So with that, I'm going to turn it over to Tim
17 to walk us through, and I'll run his PowerPoint for him.
18 Hopefully, I'll do a better job than I did for myself.

19 MR. HSU: So this is the chart that I showed
20 last year, and I think it resonated with some of the
21 Board members.

22 So what it's attempting to do, is show the
23 sources and uses for our operations in the last
24 12 months.

25 So the first column you see here is the last

1 three months of the previous fiscal year; and then the
2 next column is the nine months into the fiscal year. So
3 as you can tell, we're not completely at the end of this
4 particular fiscal year that we're living through.

5 So it's showing you a 12-month span. So what's
6 highlighted in yellow is that you can see that we started
7 that 12-month period with \$186 million.

8 So, actually, I forgot to intro that. This
9 whole presentation that we're talking about here, is a
10 presentation about the resources that we have, about the
11 cash and securities that we have, that's away from all
12 these bond indentures, which is kind of what the
13 Secretary was talking about.

14 The bond indentures were sort of a mechanism
15 for us to make loans, issue bonds, and earn a spread.
16 So that, over time, we have created a sort of general
17 obligation credit, in which you have released some of
18 the assets from, let's say, bond indentures that we have
19 closed out, into this sort of general obligation of
20 CalHFA. Not general obligations of the State, but
21 general obligations of CalHFA.

22 To be sure, some of these assets that is
23 sitting here, do have a lot of, if you will, liens on
24 them. So we do have to pay operating expenses out of
25 them; we do have HUD Risk-Share. When HUD -- part of

1 the reason why a lot of state HFAs created a
2 general-obligation rating long ago, about in the early
3 nineties, was that HUD wanted a counterparty that is
4 rated as a counterparty for the HUD Risk-Share program.

5 Anyway, so this pot of money that I'm going to
6 talk about today is solely on this, sort of not
7 encumbered by the bond indenture, so that we can use it
8 to keep the lights on.

9 So the story that I'm trying to show here,
10 without trying to go through them line by line, is that,
11 in large part, the cash that has come in, that exceeded
12 the cash that we started with, we have been using it to
13 do debt management.

14 So one of the things I spent a lot of time
15 talking about last time, was that our cash position,
16 which I'll show you in the next slide here -- our cash
17 position some two or three years ago, was actually much
18 higher -- and I'm just going to use the word "cash" as a
19 catch-all for cash and securities.

20 Some two or three years ago, our cash position
21 was actually much higher. Near -- it was about just a
22 hair over \$300 million. And then one of the things I
23 spent a lot of time talking about last time -- perhaps
24 too much time -- was, why is it that we ended up spending
25 a lot of that cash, and bring down our cash position to

1 closer to where it is now, which is about \$180 million or
2 so.

3 And to make a long story short, what we ended
4 up doing, was that we ended up taking some of that cash
5 that's unencumbered by the bond indentures, and actually
6 putting back into the bond indentures, so the bond
7 indentures can redeem out some of these VRDOs, which
8 are backed by TCLP, and also it increased some of the
9 coverage ratios of the bond indentures. So that sort of
10 helped to improve the credit ratings there, getting the
11 credit upgrades, and then sort of the virtuous cycle of
12 completing the de-leveraging, because we put some money
13 in the bond indentures.

14 So what you can see is that this page 3 here,
15 our collateral demands some two or three years ago was
16 much higher. Had we experienced another downgrade, the
17 amount of collateral -- or margin call for you day
18 traders out there -- would have been \$200 million. And
19 today, that's about half of that.

20 So because of this risk of margin call, it's
21 now half of what it used to be, we now hold a lot less
22 cash than we used to. And, again, most of that delta,
23 or that difference in cash, was spent by shoring up the
24 bond indentures and getting rid of these VRDOs.

25 On page 4 -- so page 3 was sort of a tally of

1 our collateral posting risk and the total amount of cash
2 that we held. So what you see on page 4 is, these are
3 sort of five quarters of couplings of the first column
4 being the sort of the free and available cash and
5 securities we had; and then the second column of these
6 little couples, is the amount of collateral we were
7 posting at the end of each quarter.

8 So what you can see is that our free cash has
9 gone up; while in the last five quarters, our collateral
10 posting has stayed very, very flat.

11 So at the end of the first quarter this year,
12 the total free cash we had was about \$170 million, and
13 we were posting about \$50 million. So together, we had
14 about a total of about two hundred twenty.

15 And if you go to page 5. So how is that
16 \$220 million being sort of spoken for? How is it being
17 allocated?

18 So as we talked about, some \$50 million of
19 that is being used as collateral that we post with our
20 counterparties on these swaps that we have. So some
21 \$170 million can be allocated, if you will. So as we
22 talked about -- oh, actually, I didn't talk about this --
23 on page 2, I show that about \$35 million -- we received
24 about \$35 million dollars in the past 12 months, which is
25 in excess of what we started out with, which we're going

1 to continue this sort of a path of using cash that we
2 received in excess of what
3 we expected for debt management. So some \$35 million
4 would be used with debt management.

5 And last year, we set aside a total between
6 the swap risk that we have and also operating costs,
7 \$140 million. But this year, we're setting aside
8 \$50 million for a collateral posting, and \$70 million for
9 the combination of operating and also possible increases
10 in our collateral posting risk.

11 So together, 50 plus 70 is 120.

12 So we're now holding \$20 million less than we
13 did last year, for those two -- for that one risk. And
14 sort of the event of what we -- part of the reason why
15 we hold some cash for operating, is that what we've shown
16 you previously -- and we'll show you some of that this
17 go-around, too -- is that we do receive enough cash
18 resources that come in every fiscal year to pay for our
19 operating costs. But like any good operating company, we
20 advance-fund some of that operating costs on a quarterly
21 basis as we receive cash in. So we don't -- if you will,
22 we're not living sort of paycheck by paycheck, if you
23 will. We advance-fund on a quarterly basis our operating
24 costs, operating expenses. And that's part of the reason
25 why we have this cash set aside for operating costs. So

1 that is \$70 million.

2 And then we also have set aside \$20 million for
3 special lending. So this kind of ties to, what you might
4 recall earlier, Matt's question about the amount of
5 single-family whole loans that we can do for -- you know,
6 single-family first-lien whole loans that we can do. So
7 this is tied to that particular set-aside. And we also
8 had a \$5 million set-aside for single-family subordinate
9 loans, so that ties to that set-aside.

10 So what's left over is about \$40 million.

11 And you might recall, we had said that we can
12 do up to \$50 million for warehousing Multifamily; but as
13 you can tell from here, that is a not-to-exceed number.
14 We just don't have that much resources. So what is left
15 over for warehousing, for single and multi is
16 \$40 million.

17 So this is sort of an --

18 MS. BOATMAN PATTERSON: Let me interrupt you
19 right there.

20 So we'll be bringing to the Board, but we've
21 been in discussions with the transportation agency and
22 Caltrans about an affordable housing program, the Roberti
23 Act and 710; and so we'll be bringing something to the
24 Board for approval about trying to administer that
25 program for them. We've been working very diligently

1 with them, in partnership with them.

2 And so potentially, that \$20 million in lending
3 would potentially be that money that would be available
4 for a whole-loan program, in partnership with our sister
5 agency.

6 MR. HSU: So this stack here may seem -- on
7 its face, it seems somewhat esoteric, but it's tied to
8 various things, some of which we have requested from the
9 Board today.

10 I wish that we would have a bit more money so
11 we could do even some more of these stuff. But as you
12 can see, while it might seem on the surface that we have
13 quite a bit of unencumbered cash -- again, sort of away
14 from the bond indentures -- not that they are completely
15 free and clear of any lien -- they could get used up very
16 quickly on all these things that we are trying to do all
17 at the same time.

18 And on page 6. So this is also a projection
19 that we've done in the last couple years. On the first
20 column, what you are seeing is a projection of the
21 resources that we have entering into this fiscal year.
22 So this first column here, tied to Don's report but on
23 revenue projections and also budgeting.

24 So you can see, in this particular -- this
25 fiscal '15-16, the amount of new income, from new

1 lending, and "new era" income, is \$9.4 million.

2 So what we mean by "new era," is that all the
3 lendings that we have done since 2013, we don't always
4 earn everything that we earn on that lending activity in
5 that year alone. Sometimes we end up making a loan that
6 earns a spread. Like the Secretary was talking about
7 earlier, where sometimes we end up making a DPA loan that
8 when the homeowner refinances, it comes back as a payoff.

9 So we started this idea that there is not just
10 the money that we make this year from the lendings we do
11 this year, but there is a tail from previous years' good
12 behaviors or good activities.

13 So you can see that this light orange is
14 actually growing over time because of this buildup. And
15 also in the light blue is the current income that we
16 receive from the new lending activities.

17 So you can see -- and I think I've said this,
18 I think I've been very open to the Board about this in
19 previous years -- that the legacy resources are certainly
20 declining. And that's why I've said that we are more and
21 more dependent on the new lendings we do and that's why
22 they're so, so important.

23 Having said that, you can see that, yes, it is
24 true that the legacy, which is topped off by the light
25 green, is declining over the next two years. So this

1 goes out to 2018. While that's true, you can also see
2 that the lending activities from the new lending
3 activities are also growing. So this 28 percent of
4 \$12 million out in the last column represents 28 percent
5 growth from this \$9.4 million, which is what we expect
6 from this coming fiscal year's lending activities.

7 Last, but not least, is that --

8 MS. SOTELO: Tim? Tim, I'm sorry, before you
9 move on.

10 Tia, is this part of looking at the trajectory
11 of the lending income compared to where you're headed
12 with the operating cost? Have you looked at that, and is
13 that maybe your plan for what you're trying to do with
14 the scope of operational efficiency consultants?

15 MS. BOATMAN PATTERSON: This chart doesn't
16 reflect that.

17 MS. SOTELO: Right.

18 MS. BOATMAN PATTERSON: But that is something
19 that we'll be looking at. And so what we're trying to
20 do, is we're trying to have a line or demarcation between
21 legacy income and then new income or new revenues. And
22 so we're trying to -- because that was one of the things
23 that we talked about is that we want to make sure that
24 new money coming in is able to sustain us. And so trying
25 to get what that line is and what that trajectory looks

1 like. But then, yes, we'll also be looking at that
2 operations to enhance that.

3 MS. SOTELO: Efficiency.

4 MS. BOATMAN PATTERSON: Exactly.

5 MR. HSU: So one of the things that we're
6 talking about is that it's hard to pay our staff a
7 receivable. So this whole chart here is cash as
8 received.

9 So back on the charts that Don had, he had this
10 idea of long-term assets. So what that was, was that we
11 said that while this is the present value of these assets
12 we're generating in this particular fiscal year; but on
13 this chart, I'm not showing the present value of future
14 receipts because, again, I can't pay my staff or pay
15 anybody a receivable. Everybody wants to pay their bills
16 in cash.

17 So what this chart here is showing, it is just
18 simply cash received in that particular time period. It
19 may be immediate fees that we earned from making that
20 loan, or, let's say, a spread that we earned from last
21 year's lending.

22 Okay, so then the last chart, which is a little
23 bit not completely related to all the previous charts,
24 but it's a chart that shows one thing that we've been
25 saying in a graphical way of how our single-family

1 production has picked up.

2 The axes are actually a little bit messed up
3 here; but what you're seeing is that on a cumulative
4 basis, we have made about \$113 million of Fannie Mae MBSs
5 since this whole TBA program started.

6 And what you can see in the bars, however, in
7 the bars you can see sort of how much we've made, sort of
8 on a monthly basis. And you can see quite easily how
9 much of a difference the last three or four months have
10 been relative to all the prior months.

11 And this year is not as good of a picture, in
12 the sense that these are actually MBSs that have been
13 created, sold, and settled. And we have done extremely
14 well in the last couple months in terms of reservations.
15 So there is a very healthy pipeline. Again, this is
16 stuff that had been bundled and securitized, sold,
17 settled, and we received cash for them.

18 So this is just a way to sort of paint a
19 picture of why we're so optimistic about what we're doing
20 on the Single Family side.

21 MR. CAVIER: Okay. So with that, I'm going to
22 move into the operating budget.

23 And Agency resources, as you can see from the
24 pie chart, are primarily generated from loan-origination
25 fees, principal and interest payments on existing loans,

1 and compliance monitoring fees.

2 The majority of the Agency's resources are
3 currently generated from legacy activities, as we just
4 discussed. But as we move into the coming fiscal year,
5 we believe there is a real opportunity to start to
6 reverse that trend and to start to grow our "new era
7 revenues," as we're calling it.

8 For the fiscal year '15-16, we anticipate
9 available resources to cover operating costs to be at
10 about \$62.5 million.

11 And the next chart reflects how we propose to
12 use those. As you can see, staff anticipates that the
13 resources available to us next year will exceed operating
14 costs by approximately \$19.8 million. These surplus
15 funds will be used to support future lending, debt
16 management, and operational costs.

17 In order to implement the goals and activities
18 outlined in the Agency's Strategic Business Plan, staff
19 is recommending the adoption of an operating budget of
20 \$42.8 million, of which \$29.8 million will be used for
21 personal services, which represents the costs for
22 salaries and benefits and temporary services.

23 Additionally, the budget includes \$12.5 million
24 for operating expenses, and 476,000 for strategic project
25 contracts.

1 This slide provides a detailed multiyear
2 budget comparison. The 2015-16 budget represents a
3 141,000-dollar decrease in that appropriation compared to
4 the prior year.

5 Salary and benefit costs have decreased
6 \$388,000, compared with the prior year, due primarily
7 to the eliminations of 12 and a half full-time, vacant
8 positions that were determined to be unneeded in the
9 budget cycle. With this action, the Agency has
10 systematically reduced unneeded headcount by 38 positions
11 over the last three years.

12 Savings from the eliminated positions were
13 largely offset by a required two and a half percent
14 cost-of-living increase that is scheduled to go into
15 effect for all bargaining units, with the exception of
16 our exempt staff.

17 Net costs for general expenses, communication,
18 travel, training, and facilities are up slightly,
19 compared with the prior year. I think the net is about a
20 \$34,000 increase.

21 Consulting and professional services have
22 increased \$300,000 as the Agency is implementing a
23 comprehensive training program to develop our Multifamily
24 department and to help complete the final stages of our
25 organizational assessment.

1 The cost for Central Administrative Services,
2 which represents State overhead allocation to the Agency,
3 has increased due to a one-time credit that we got this
4 year for overpayments that we were billed in prior years.
5 And so we got the benefit of that credit this year; but
6 next year, it jumps back up a little bit.

7 Let's see. Information technology costs are
8 down slightly. And strategic project costs are -- our
9 contract costs are down \$743,000, compared to last year,
10 due to the completion of that large-scale I.T. contract
11 to replatform the Agency systems.

12 This last chart is what Tia was mentioning at
13 the beginning of the meeting about the Board having its
14 own budget to work with, in the coming year, both for --
15 you know, mainly for training and travel to Agency events
16 or things that we need your participation in, to kind of
17 help the Board be more engaged, and to have the
18 opportunity to learn firsthand what's going on with the
19 HFAs around the country.

20 Another big chunk of the budget as proposed,
21 is the \$25,000 for the gentleman sitting to my right
22 here, who is doing all this great work, taking down
23 every word I stumble over. And basically, just to give
24 you guys the chance to participate more than you have
25 before.

1 So with that, that concludes the presentation.
2 And I'm available for any questions you might have.

3 CHAIR JACOBS: Thank you, Don.

4 Do we have any questions?

5 *(No response)*

6 CHAIR JACOBS: I'm looking to Janet because the
7 budget is more --

8 MS. FALK: Oh, no. I just want to commend the
9 staff. I think that this is great that we're spending
10 our time talking about our revenues, and not our
11 expenses, which is where the problems are and the issues
12 are.

13 So thank you very much. It was a great
14 presentation, and the whole putting it together.

15 Also, thank you, Tia, for having the budget and
16 the Business Plan together because the two things really
17 do work in concert and need to be seen together; they're
18 not separate.

19 CHAIR JACOBS: Yes, for the private-sector
20 folks, it really makes sense now.

21 MR. CAVIER: Yes.

22 MS. BOATMAN PATTERSON: So one of the things
23 when I first was put on the Board and I was a voting
24 member and I was sitting in you-all's seat, and the
25 budget came before me that first year, I abstained.

1 And I abstained because it wasn't a budget, it was an
2 expenditure plan.

3 And so I think for the last couple of years,
4 we've kind of worked through some of the kinks and worked
5 through presentation and how we would put those projected
6 revenues along with those expenses to complete a larger
7 picture. So I have to give my "hats off" to staff, who
8 I think did a phenomenal job.

9 Bringing Don on, I have to pat myself on the
10 back, because I'm like, "Yay."

11 But Don and Kelly, and Don's staff who came
12 together to do the project process and the drill that
13 we went through, we had a couple of off-sites where we
14 talked about our Business Plan and how we would pull that
15 all together. And so we were a little behind this year,
16 so we rushed to try to make that happen. But I'm very
17 pleased with Tim and Tony, and Don and Kelly and
18 everybody who stepped up -- Lori -- just to make this
19 happen. So I call you out to thank you for that, because
20 I think they did a stellar job.

21 MS. SOTELO: It definitely shows. The
22 collaboration and teamwork definitely shows.

23 And your leadership, Tia, I can't say enough
24 about it. So congratulations on all the hard work.

25 CHAIR JACOBS: So there is, in fact, a

1 resolution here to --

2 MS. FALK: I just want to make one more
3 comment, if I may.

4 CHAIR JACOBS: Yes.

5 MS. FALK: I've talked to Tia about this. I
6 mean, this is -- as I said, this is really great.

7 And then the next step, is that we start
8 looking out, like, three years ahead to see what the
9 revenue projections are and where we might be. So that
10 we can really plan for what's coming up.

11 MR. CAVIER: Yes.

12 MS. FALK: I know that's on your agenda. It
13 doesn't have to be until next year, but...

14 MR. PRINCE: I thought the next step was to
15 spend \$20 million.

16 MS. BOATMAN PATTERSON: We're working on that.

17 CHAIR JACOBS: Any motions? 12 and 13, the
18 Business Plan and budget?

19 MS. FALK: I'll move approval.

20 CHAIR JACOBS: Of one or both?

21 MS. FALK: Both.

22 CHAIR JACOBS: Both?

23 Do we have a second?

24 MS. SOTELO: I'll second the approval of those.

25 CHAIR JACOBS: JoJo?

1 MS. OJIMA: Ms. Caballero?

2 MS. CABALLERO: Aye.

3 MS. OJIMA: Mr. Schaefer?

4 MR. SCHAEFER: Aye.

5 MS. OJIMA: Ms. Gunn?

6 MS. GUNN: Aye.

7 MS. OJIMA: Ms. Falk?

8 MS. FALK: Aye.

9 MS. OJIMA: Ms. Avila Farias?

10 MS. AVILA FARIAS: Aye.

11 MS. OJIMA: Mr. Gunning?

12 MR. PRINCE: Yes.

13 MS. OJIMA: Mr. Prince?

14 MR. PRINCE: Oh, I'm sorry. You're so quiet
15 over there. I thought I heard my name. I'm sorry.

16 MS. BOATMAN PATTERSON: That was not
17 Mr. Gunning. That was Mr. Prince.

18 MR. PRINCE: We just need a mike for you next
19 time. It's hard for me to hear over here. I'm sorry.

20 MS. OJIMA: Ms. Riggs?

21 *(No response)*

22 MS. OJIMA: Ms. Sotelo?

23 MS. SOTELO: Aye.

24 MS. OJIMA: Mr. Jacobs?

25 CHAIR JACOBS: Aye.

1 MS. OJIMA: Both Resolutions 15-12 and 15-13
2 have been approved.

3 CHAIR JACOBS: Really excellent work.

4 --o0o--

5 **Item 13. Reports**

6 CHAIR JACOBS: We've got reports.

7 Does anybody have any questions about reports
8 in the handouts?

9 *(No response)*

10 --o0o--

11 **Item 14. Discussion of other Board matters**

12 CHAIR JACOBS: Any other matters anyone wishes
13 to bring up?

14 MS. BOATMAN PATTERSON: We have for the Board
15 to hand out, the overview of the first part of the
16 organizational assessment. So JoJo is going to hand that
17 out. And what we will do as well is we will have that
18 posted on our Web site.

19 We gave you the scope of work; but this is the
20 piece that talks about kind of historically where we
21 were; and we're entitling it, "The Organizational and
22 Program Assessment Overview for the California Housing
23 Finance Agency."

24 So this is an excellent document that we've
25 kind of been living through.

1 And I have to thank Tony, who -- he has
2 actually been kind of my wingman. Because Tony took,
3 when our director of Administration left in October, the
4 administration of the contract and served as project
5 manager for the -- working very closely with the
6 consultant that we brought on board; and he rallied
7 staff, and it was like herding cats, but he oversaw, as
8 the internal staffer, the organizational assessment. He
9 continues to do that.

10 And he did such a good job, we moved him over
11 to Multifamily.

12 So thank you, Tony -- because Tony was
13 instrumental in making sure that this got done.

14 In July, what you will see is, we will have the
15 organizational consultant available. And we will bring
16 him before the Board meeting, so that you guys can have
17 this between now and then to review. And then he will
18 be able to give you a more comprehensive report on
19 perhaps some of the recommendations that he made at our
20 July Board meeting.

21 CHAIR JACOBS: And this goes to the entire
22 scope of what we saw?

23 MS. BOATMAN PATTERSON: This goes -- this is an
24 overview of basically where we are. And then it talks a
25 little bit about the liquidity analysis, about kind of

1 our legacy income and our tail. And it's the foundation
2 right before he gets to the recommendations. But it kind
3 of lays out the historical context, the staffing, the
4 staffing ratios and some of that kind of background
5 material, which will be helpful going forward.

6 CHAIR JACOBS: That sounds great.

7 Any other matters anyone wishes to bring up?

8 *(No response)*

9 --o0o--

10 **Item 15. Public Testimony**

11 CHAIR JACOBS: Are there any members of the
12 public who wish to speak?

13 *(No response)*

14 --o0o--

15 **Item 16. Adjournment**

16 CHAIR JACOBS: All right, seeing none, let's
17 adjourn this meeting.

18 Thank you.

19 *(The gavel sounded.)*

20 *(The meeting of the Board of Directors*
21 *concluded at 1:21 p.m.)*

22 **END**

23

24

REPORTER'S CERTIFICATE

I hereby certify that the foregoing proceedings were duly reported by me at the time and place herein specified;

That the testimony of said witnesses was reported by me, a duly certified shorthand reporter and a disinterested person, and was thereafter transcribed into typewriting.

I further certify that I am not of counsel or attorney for either or any of the parties to said deposition, nor in any way interested in the outcome of the cause named in said caption.

IN WITNESS WHEREOF, I have hereunto set my hand on the 1st day of June 2015.

DANIEL P. FELDHAUS
