STATUTORY REPORTING REQUIREMENTS

Section 51005 of the Health and Safety Code requires that the Agency provide certain information under the fifteen categories specified in Section 51005(b) as part of the Annual Report due under Section 51005(a).

Section 51005(a): the report shall...include a statement of accomplishment during the previous year with respect to the agency's progress, priorities, and affirmative action efforts. The agency shall specifically include in its report on affirmative action goals, statistical data on the numbers and percentages of minority sponsors, developers, contractors, subcontractors, suppliers, architects, engineers, attorneys, mortgage bankers or other lenders, insurance agents, and managing agents.

Pursuant to Proposition 209 (also referenced as Article 1, Section 31 of the California Constitution), the California Housing Finance Agency (CalHFA) does not give preferences in awarding contracts based upon race or gender.

Pursuant to federal and state law, the Agency requires affirmative marketing for all housing developments to assure that housing opportunities generated by CalHFA provide attractive housing options in diverse locations for low income, disabled and senior households, and are open to all regardless of race, sex, sexual orientation, marital status, religion, national origin, ancestry, familial status or disability.

The following information is submitted in narrative form as it relates to the requirement of the referenced code sections [paragraph numbers correspond to the subparagraphs of Section 51005(b)]:

- (1) The primary purpose of the agency in meeting the housing needs of persons and families of low or moderate income pursuant to Section 50950.

The Agency meets the housing needs of persons and families of low or moderate income to the extent that it satisfies its specific objectives as outlined in Section 50952:

- (a) Acquisition of the maximum amount of funds available for subsidies for the benefit of persons and families of low or moderate income occupying units financed pursuant to the statute.

Multifamily - CalHFA has acquired the maximum amount of funds from the federal rental housing subsidy (Section 8) contract authority. CalHFA also requires the sponsors request and accept renewals on all rental housing subsidy contracts that are part of the approved financing on any given multifamily development. The Agency's Board of Directors created the Housing Assistance Trust loan program, which is designed to provide loan funds at below-market rates and terms to assist local governments and nonprofit organizations to provide additional below-market rental units. In addition, the Agency has combined its financing with participation and contributions from governmental entities utilizing federal, state, county and local resources such as FHA insurance, Low Income Housing Tax Credits (LIHTC), California Debt Limit Allocation Committee (CDLAC), Community Development Block Grant (CDBG), Home Investment Partnership (HOME), tax increment and other redevelopment agency funds, State Department of Housing and Community Development funds, and local resources.

Homeownership - Utilizing the maximum amount of tax exempt bond authority available from the California Debt Limit Allocation Committee, the Agency assisted 4,791 low or moderate income families in purchasing their first home with a CalHFA first mortgage during Fiscal Year 2007-2008. Despite a declining real estate market, the Agency purchased first mortgages totaling \$1.175 billion. Further assisting them in their purchases was additional financial assistance in the form of deferred payment second

mortgages at low simple interest rates through the CalHFA Housing Assistance Program (CHAP), the California Homebuyer's Downpayment Assistance Program (CHDAP), the Extra Credit Teacher Home Purchase Program (ECTP), the Self-Help Builder Assistance Program (SHBAP), the High Cost Area Home Purchase Assistance Program (HiCAP), the Fannie Mae HomeChoice Program (for disabled people) and grants through the School Facility Fee Down Payment Assistance Program (SFF).

Under its Affordable Housing Partnership Program (AHPP), CalHFA's Homeownership programs were also combined with other sources of funding provided by State and local governments as well as nonprofit housing organizations. During Fiscal Year 2007-2008 543 California families purchased homes utilizing both CalHFA first mortgages and AHPP financing.

- (b) Housing developments providing a socially harmonious environment by meeting the housing needs of both very low income households and other persons and families of low or moderate income and by avoidance of concentration of very low income households that may lead to deterioration of a development.

Multifamily - The present multifamily rental programs of the Agency integrate very low and low income housing opportunities with market rate rentals whenever possible. All of CalHFA's housing developments are planned and designed to visually and physically integrate all elements of a complex into a socially harmonious environment. All residential units within a development are of the same or similar design. There are no visual or physical differences between units to be occupied by the very low income, low income or market rate tenants. The Agency requires that asset management personnel maintain high quality rental units. Housing developments are required to distribute low or very low income units throughout the development.

Homeownership - The Agency's loan programs are designed to distribute funds, as market conditions permit, to meet housing needs throughout the state. The programs are designed to provide financing to low and moderate income first-time homebuyers purchasing homes in all counties. Through the Agency's "over-the-counter" single family Loan Reservation System (LAS), lenders can reserve a loan without the housing development being preapproved or designated as low income housing. This encourages widespread utilization of funds and minimizes concentrations in any one area.

- (c) Emphasis on housing developments of superior design, appropriate scale and amenities, and on sites convenient to areas of employment, shopping, and public facilities.

Multifamily - CalHFA developments and amenities are visually (architecturally) reflective of comparable market projects within a locale, being indistinguishable as a low income project. In addition, local participation typically includes architectural design requirements that keep the design comparable to others apartment buildings in the neighborhood. Whenever market conditions allow, CalHFA has encouraged the development of larger units to accommodate larger low income and other families. Within a development, a proportionate share of all unit types is reserved for low-income families. A percentage of the units in CalHFA developments are specifically designed for the physically disabled and integrated within developments to be indistinguishable from other units.

Homeownership - The Homeownership Division purchases loans throughout the State, continually providing funds to finance the purchase of new and existing homes. This ensures that affordable financing is available to assist low and moderate income households to enjoy the amenities and benefits of home ownership in developments located close to employment, shopping and public facilities. All properties must be in good condition and satisfy any requirements dictated by a HUD approved appraiser.

- (d) Increasing the range of housing choices for minorities in lower income households and other lower income households, rather than maintaining or increasing the impact of low income areas, and cooperation in implementation of local and areawide housing allocation plans adopted by cities, counties, and joint powers entities made up of counties and cities.

Multifamily- In compliance with applicable laws, the Agency requires affirmative marketing and adequate placement for all projects to assure that housing opportunities assisted by CalHFA and other financing mechanisms provide attractive housing options in diverse locations for low income families, disabled, and senior households.

- (e) Reducing the cost of mortgage financing for rental and cooperative housing to provide lower rent for persons and families of low or moderate income.

Multifamily - Through the sale of tax-exempt bonds, other financing mechanisms and through voter initiatives, the Agency delivers competitive interest rate mortgages to developers who then pass along this benefit to lower income tenants through reduced rents. For nonprofit sponsors of multifamily housing, CalHFA offers a predevelopment loan program.

- (f) Reducing the cost of mortgage financing for home purchase, in order to make homeownership feasible for persons and families of low or moderate income.

Homeownership - In addition to limiting interest rates, origination fees and loan processing costs on all CalHFA first mortgages the Agency also provides first-time homebuyers additional assistance through various other programs. Through the Self-Help Builder Assistance Program (SHBAP), the Affordable Housing Partnership Program (AHPP) with localities and nonprofits, the CalHFA Housing Assistance Program (CHAP), the School Facility Fee Down Payment Assistance Program (SFF), the California Homebuyer's Downpayment Assistance Program (CHDAP), the Extra Credit Teacher Home Purchase Program (ECTP), the High Cost Area Home Purchase Assistance Program (HiCAP) and the Fannie Mae HomeChoice Program, qualifying families can become homeowners with little or no down payment.

The HELP Program facilitated local government agency programs by making funds available for local subordinate loan programs. Local governments borrowed the funds for such a purpose at 3.5% interest for up to ten years.

Through the Self-Help Builder Assistance Program (SHBAP) the Agency provides lower interest rates to low-income households whose participation in the construction of the homes results in "sweat equity", which fulfills or offsets the down payment requirement. The Program was designed to provide assistance to nonprofit developers for land acquisition, site development and unit construction in mutual self-help projects and to reduce the cost of mortgage financing for the low income home buyers who participate in the construction.

The Agency's basic Homeownership Program offers up to 97% LTV first mortgage financing at a fully amortizing fixed interest rate as well as a five-year interest only—35-year term loan, designed to reduce initial loan payments during the critical first years of a loan to give the borrowers' income time to grow and stabilize. The Agency offers a rate of 50 basis points below the moderate-income rate for low income borrowers for

30-year fixed rate loans. This low-income rate also applies to the AHPP and ECTP programs. The Agency provides a 3% interest rate on the 30-year fixed rate loans to the borrowers (homebuilders) in the Self-Help Builder Assistance Program and 4% for the borrowers in the Fannie Mae HomeChoice Program.

- (g) Identification of areas of low vacancy rates where construction is needed, of areas of substandard housing where rehabilitation is needed, and of areas of credit shortage where financing is needed for transfer of existing housing, so as to maximize the impact of financing activities on employment, reduction of housing costs, and maintenance of local economic activity.

Multifamily - Inherent within any multifamily development are the benefits derived from the building of the project, i.e., construction and related employment, etc. As part of its underwriting considerations, the Agency examines critical factors such as vacancy rates, market demand and cost feasibility.

Homeownership - The Agency has identified federally-designated targeted areas in need of mortgage credit, new housing construction or rehabilitation and community revitalization. CalHFA identifies these areas by comparing jobs with housing to help create balance and to maximize the impact of financing activities sponsored by CalHFA's Homeownership Programs. Under federal tax laws, CalHFA is required to commit 20% of any new bond issue to federally-designated targeted areas for 12 months.

A number of local governments and nonprofits also partner with CalHFA by assisting low-income borrowers in such areas through the Affordable Housing Partnership Program (AHPP). The Agency developed the HiCAP Program to address areas with high housing costs, high employment demand and low affordable housing opportunities. The Agency also operated the Residential Development Loan Program (RDLP); project-specific funding that provided a 3% interest rate loan with a maximum term of five years to local government agencies for site acquisition and predevelopment expenses attributed to affordable infill, owner-occupied housing developments. The Program also directly linked RDLP-financed developments to CalHFA's California Homebuyer's Downpayment Assistance Program to assist with both down payment and, as necessary, closing costs by providing subordinate loans to first-time homebuyers.

- (h) A balance between urban metropolitan, nonmetropolitan, and rural metropolitan housing developments, and between family housing and housing for the elderly and handicapped, in general proportion to the needs identified in the California Statewide Housing Plan.

Multifamily - CalHFA is required by statute to utilize the Statewide Housing Plan for the allocation of Agency funds. Please see pages 22 through 26 of this Supplement for detailed data on the Agency's accomplishments in furtherance of the Plan.

Homeownership - CalHFA attempts to meet the housing needs of first-time homebuyers on a continuous basis by making financing available for the purchase of newly constructed and existing homes in every county of the state. Through the Homeownership Program, CalHFA develops loan programs and strategies to ensure the equitable distribution of funds throughout California.

- (i) Minimization of fees and profit allowances of housing sponsors so far as consistent with acceptable performance, in order to maximize the benefit to persons and families of low or moderate income occupying units financed by the Agency.

Multifamily - As a means to assist nonprofit-sponsored multifamily rental developments, CalHFA's Board of Directors approved the deferral of commitment fees in certain instances until the construction loan has been closed. The effect of this action means these organizations, which have limited cash resources, may use their available funds for other critical purposes in the early stages of development.

Homeownership - The Homeownership Program provides profit, nonprofit and self-help developments a reliable source of below market rate financing. Both spot reservations and new construction forward commitments are available. However, fees collected by lenders from borrowers are restricted by CalHFA to maximize the benefit to homebuyers.

- (j) Full utilization of federal subsidy assistance for the benefit of persons and families of low or moderate income.

Multifamily - See (a) on page 1.

Homeownership – The difference between the market interest rates and the Agency's tax-exempt rates may, in effect, create a “subsidy”. Additional subsidy benefits to home buyers have been provided through the CalHFA Housing Assistance Program (CHAP), the California Homebuyer’s Downpayment Assistance Program (CHDAP), the Self-Help Builder Assistance Program (SHBAP), the School Facility Fee Down Payment Assistance Program (SFF), the Extra Credit Teacher Home Purchase Program (ECTP), High Cost Area Home Purchase Assistance Program (HiCAP), the Fannie Mae HomeChoice Program, and the Affordable Housing Partnership Program (AHPP), with local governments and nonprofits providing financial support utilizing local, state and federal resources for mortgage and down payment assistance.

- (k) Full cooperation and coordination with the local public entities of the state in meeting the housing needs of cities, counties, and Indian reservations and rancherias on a level of government that is as close as possible to the people it serves.

Multifamily and Homeownership - The Agency markets its programs in a manner which seeks out development projects and individual loan commitments that provide funds for the purchase of homes sponsored by local public entities and nonprofit or for-profit developers working with cities and/or counties. The Agency provides incentives for these developments. In addition, the Agency also works with local governmental entities, State agencies and nonprofits that provide other sources of subsidy or financing to help make affordable housing available to low income families. CalHFA outreaches directly to cities and counties in an effort to acquaint relevant officials with programs offered by the Agency. The Agency also offered a special interest rate reduction for first mortgages when local governments provide down payment assistance to low income, first time homebuyers through the Affordable Housing Partnership Program (AHPP). As of June 30, 2008, more than 332 local government entities and nonprofit housing organizations have been approved to provide financial assistance to first-time homebuyers securing Agency first mortgages.

- (l) Promoting the recovery and growth of economically depressed business located in areas of minority concentration and in mortgage-deficient areas.

Multifamily - CalHFA works in cooperation with local public entities, such as housing authorities and redevelopment agencies, to coordinate financing to meet local housing needs and promote the revitalization of urban areas.

Homeownership - The Homeownership Program promotes the growth and recovery of business by providing permanent mortgage financing to all areas of the State and in particular to federally designated targeted areas. The provision of permanent loan financing can assist in securing construction financing, resulting in construction jobs and economic stimulation within these areas. In addition, the Agency offers higher income and sales price limits in federally-designated targeted areas (economically distressed areas) and waives the first-time homebuyer requirement to encourage mortgage financing in these areas.

- (m) Revitalization of deteriorating and deteriorated urban areas by attracting a full range of income groups to central city areas to provide economic integration with persons and families of low or moderate income in those areas.

Multifamily - Development of CalHFA projects in or adjacent to redevelopment areas has resulted in replaced and/or rehabilitated substandard housing and the increase or preservation of the supply of housing units available. CalHFA projects have stimulated revitalization by providing visual activity of constructive neighborhood improvement, resulting in a wider range of housing opportunities and choices within depressed areas of the city and discouraging migration outside the inner city neighborhoods. This development has increased the quality of housing units available, provided the type of mixed income and market rate projects that have attracted a diversity of groups for a more dynamic economic integration and transformed vacant and/or blighted lots into useful housing infrastructure. Local government assistance is most helpful in accomplishing these results.

Homeownership - The Agency distributes to CalHFA lenders throughout the State the special Federal income and sales price limits established for federally-designated targeted areas, to encourage a range of income groups to buy homes. Lower interest rates and the availability of CalHFA down payment assistance programs also contribute by improving affordability for low/moderate income buyers in these areas. All of the above contributes to revitalization of these targeted areas.

- (n) Implementation of the goals, policies, and objectives of the California Statewide Housing Plan.

Multifamily and Homeownership – The above-referenced programs, through program design and marketing, are designed to meet the goals of the Plan.

- (o) Location of housing in public transit corridors with high levels of service.

Multifamily – Some new construction and resale housing commitment bids are for housing developments in public transit corridors that have high levels of service. Rehabilitation sites are typically in areas which enjoy public transportation opportunities.

- (p) Reducing the cost of mortgage financing for rental housing development in order to attract private and pension fund investment in such developments.

The Agency's low interest rate mortgage financing for rental housing developments attracts private equity investment, especially in those circumstances where the federal low income housing tax credit is available. Pension funds have not yet been equity investors in any Agency-financed rental housing developments.

The California State Teachers' Retirement System (STRS) currently provides \$51.2 million of standby liquidity for bonds. The use of variable rate bonds has greatly reduced the Agency's cost of funds.

- (q) Reducing the cost of mortgage financing for second unit rental housing, as defined by Section 65852.2 of the Government Code, in order to make rental housing more affordable for elderly persons and persons and families of low or moderate income.

As outlined in the Agency's June 23, 1993 Report to the Legislature, the Agency does not have a loan program for second units. Prior attempts to market such a program were not successful.

- (2) The occupancy requirements for very low income households established pursuant to Sections 50951 and 51226.

Sections 50951, 51226 and 51226.5 contain various priority requirements for housing development financing. If adequate subsidies are available, certain percentages (which vary depending upon the type of financing and type of developments, and whether they are federally insured) of the total units financed must be made available to very low income households

This information is provided in Tables IV-2 and IV-3 on pages 56 and 57.

- (3) The elderly and orthopedic disability occupancy requirements established pursuant to Section 51230.

Section 51230. Percentage of units allocated for occupancy by elderly persons.

This information is provided in Table III-4 on page 23 and in Table III-5 on page 24.

Subsequent to Section 51230's enactment, the number of laws governing handicapped accessibility for multifamily rental housing have greatly increased. The Agency requires that the design of all newly constructed units comply with the applicable accessibility requirements.

(4) The use of surplus moneys pursuant to Section 51007.

Section 51007. Subject to any agreements with holders of particular bonds, all moneys available for carrying out the purposes of this part and declared by the agency to be surplus moneys which are not required to service or retire bonds issued on behalf of the agency, pay administrative expenses of the agency, accumulate necessary operating or loss reserves, or repay loans to the agency from the General Fund shall be used by the agency, with respect to existing housing developments, to provide special interest reduction programs, financial assistance for housing developments or subsidies for occupants or owners thereof, or counseling programs, as authorized by this division.

As of June 30, 2008, there were no funds derived from the issuance of bonds by the Agency which can be declared surplus moneys. All moneys available to the Agency are, subject to agreement with the bondholders, required to service or retire bonds issued on behalf of the Agency, repay loans, pay administrative expenses of the Agency, and accumulate necessary operating or loss reserves.

(5) The metropolitan, nonmetropolitan, and rural goals established pursuant to subdivision (h) of Section 50952.

This information is provided in the tables on pages 15, 16, 17, 21, 22, and paragraph (h) on page 4.

(6) The California Statewide Housing Plan, as provided by Section 50154.

See paragraph (h) on page 4. In general, CalHFA programs seek to implement the goals, policies and objectives of the Plan and attempt to meet the housing needs outlined in the Plan.

(7) The statistical and other information developed and maintained pursuant to Section 51610.

The California Housing Loan Insurance Fund (Fund) insures loans made by the Agency and other lenders which finance the acquisition of residential units in California. The Fund continues to enjoy a claims paying rating of A+ from Standard and Poors and Aa3 by Moodys.

For 2007-08, the Fund insured 2,633 mortgages totaling \$738.6 billion. At fiscal year end, there were 10,884 active mortgage certificates for \$3.0 billion.

During this fiscal year, the Fund paid 54 claims totaling \$4.7 million.

At fiscal year end, there were 236 insured loans reported delinquent 120+ days totaling \$60.9 million.

(8) The number of manufactured housing units assisted by the agency.

Within the Home Mortgage Purchase Program, the Agency has provided financing for 1,052 manufactured housing units since 1983. In 1995, the CalHFA Board approved a Mobile Home Park Acquisition pilot program. It was actively marketed for two years, and suspended in the 1997 CalHFA Business Plan because of a lack of demand for the program. The Agency periodically explores new innovations in the area of manufactured housing seeking to apply this product type to CalHFA programs.

- (9) Information with respect to the proceeds derived from the issuance of bonds or securities and any interest or other increment derived from the investment of bonds or securities, and the uses for which those proceeds or increments are being made as provided for in Section 51365, including the amount by which each fund balance exceeds indenture requirements.

All proceeds from the issuance of the Agency's bonds have been applied to the housing programs identified in the Agency's Five-Year Business Plan and its Annual Report, to service the bonds and pay administrative expenses, to establish required reserves and to repay Agency loans. In addition, as indicated in the Annual Report and pursuant to Section 51365, the Agency has allocated over \$105 million of its reserves to provide for special assistance housing programs for its Homeownership and Multifamily programs. These funds are not surplus moneys but moneys required to be maintained as investments to meet program obligations and necessary operating and loss reserves.

The Agency's financial statements are prepared in accordance with Generally Accepted Accounting Principles (GAAP) and follow the Standards of Governmental Accounting and Financial reporting as promulgated by the Governmental Accounting Standards Board ("GASB"). In June of 2002, the Agency adopted Statement of Governmental Accounting Standards ("SGAS") No. 34. As described in the notes to the Agency's June 30, 2008 financial statements, all net assets of the Housing Finance Fund, whether or not currently held under the liens of bond indentures, are properly reported as "restricted" in accordance with GASB Statement No. 34 and State statutes.

The Agency's bond issues are structured to comply with bondholder agreements and the requirements of credit rating agencies, bond insurers and other financial institutions providing credit enhancement or security in support of the issuance of the Agency's bonds. In addition, the Agency's financings have been increasingly guaranteed by the pledge of the Agency's general obligation, which is currently rated Aa3 by Moody's Investors Service and AA- by Standard & Poor's. Under State statutes, all assets of the Housing Finance Fund, whether or not held under the liens of bond indentures, are continuously appropriated in support of the Agency's financial obligations. This appropriation comprises the support for the Agency's rated general obligation. As of June 30, 2008, the Agency's general obligation was pledged to \$1.5 billion of its bonds and to its entire \$4.7 billion of interest rate swaps.

The Agency's interest rate swap portfolio is comprised of 140 swaps with 14 different financial institutions acting as counterparties. The estimated net market value of these swaps as of June 30, 2008 was a negative \$180.5 million. The swap portfolio has a negative value because of interest rate changes since the date the swaps were obtained. This negative value represents the payments the Agency would owe to its counterparties in the event the swaps had to be terminated. One event that would cause a mandatory termination and an immediate obligation of the Agency to pay the termination value of its swaps would be a loss or severe reduction of the Agency's general obligation credit ratings.

In addition, the Agency's swaps do not perfectly hedge the Agency against interest rate risks. For example, the Agency must reserve against the possibility that its \$5.6 billion of variable rate bonds will carry higher interest rates at some time in the future. There are certain tax risks for the hedged \$3.9 million portion of tax-exempt variable rate bonds. In return for significantly higher savings (approximately 0.50% per year), the Agency has chosen through these interest rate swaps to retain exposure to the risk of changes in tax laws that would lessen the advantage of tax-exempt bonds in comparison to taxable securities. The Agency bears this same risk for its \$254 million of tax-exempt variable rate bonds, which are not swapped to a fixed rate. In addition to tax, risk there is counterparty risk, mentioned above; whereby the Agency could owe \$180.5 million or an even larger amount should interest rates continue to fall. There is also mismatch risk where, primarily because of unexpectedly fast loan prepayments, bond amortization outpaces the amortization of the corresponding swaps.

Another obligation of the Agency is in the form of insurance. The Agency and bondholders do require the maintenance of mortgage insurance on the majority of Homeownership loans. However, the current mortgage insurance policies do not all provide for 100% coverage and federal law (the Homeowner's Protection Act of 1998) prohibits the Agency from requiring mortgage insurance for loans that meet certain tests. As a result, the Agency is, in effect, self-insured for a portion of its Homeownership portfolio. The Agency's reserves represent the pool from which self-insured claims are paid, as well as losses due to earthquake, flood or other natural hazards.

The multifamily portfolio also has casualty risks for the portion of loans that are not insured. The current earthquake and flood insurance policy coverage limit is \$50 million, with a 5% deductible. A multifamily project can participate in this earthquake policy, purchase a policy directly, or receive a waiver from the Agency. It is expected that a new earthquake policy will take effect in November 2008 in the amount of \$50 million.

Since the term "reserve" has different meanings in different financial settings, the term may be a misnomer as it relates to the Agency's funds if there is an assumption that the reserves are in excess of the Agency's needs.

For instance, the Agency's bond issues have been designed so that not only are amounts set aside to meet bondholder debt service and expenses, but also so that the Agency's source of administrative funds initially flow through what have been characterized as its "reserves". In other words, this year's "reserves" will be expended as next year's operating expenses. This process has been designed to provide adequate administrative support for the 30- to 40-year life of CalHFA's long-term bonds. This structure is critical in complying with the obligations of the bond programs since the Agency has no taxing power and is statutorily prohibited from relying on the State of California to meet its future operating costs. These internal funds will ultimately be required to meet future operating costs. Upon the maturity of the current bond portfolio 30 to 40 years from now, it is conceivable that there would be no remaining assets.

(10) Any recommendations described in subdivision (d).

Section 51005(d). The agency shall assess any obstacles or problems that it has encountered in meeting its mandate to serve nonmetropolitan and rural metropolitan areas, and...include...a quantification and evaluation of its progress in meeting the housing needs of communities of various sizes in rural areas.

The Agency implemented the USDA Rural Development Leveraging/Participation Program and the USDA Rural Housing Guaranteed Loan Program, to provide another available source of financing in rural areas. The CALHFA Housing Assistance Program (CHAP) and the California Homebuyer's Downpayment Assistance Program (CHDAP) provide down payment assistance and are available in rural areas throughout California. The Agency also increases the level of financing to 100% Loan-to-value to assist with financing in rural areas.

Regarding multifamily rental lending, CalHFA's Housing Assistance Trust (HAT) loan programs provide encouragement for developers and nonprofits to develop low-income housing. This now includes a new program that provides gap financing for tax-exempt construction loans meeting certain requirements.

Additional information is provided in the tables on pages 15, 16, 17, 21, 22.

- (11) Section 51227. At the close of each fiscal year, the agency must ascertain that not less than 25 percent of the total units financed by mortgage loans during the preceding 12 months were made available to very low income households. In addition, at the close of each fiscal year the agency must ascertain that not less than 25 percent of all units financed by mortgage loans are occupied or available to very low income households.

This information is provided in Tables IV-2 and IV-3 on pages 56 and 57.

- (12) The revenue bonding authority plan adopted pursuant to Section 51004.5.

This information is provided in Table VI-4 on page 64.

- (13) The statistical and other information required to be provided pursuant to Section 50156.

The California Housing Finance Agency shall provide to the Legislature and the Legislative Analyst, in each annual report required by Section 51005, information concerning all units produced, assisted, or insured using agency funds. This information shall include, but shall not be limited to, the sales prices of these units, the number of units within various price ranges or price classifications, the rents being charged for the units, the number of rental units within each price range, the number of households by income level purchasing the units, and the number by household income occupying the rental units.

This information is provided in Tables I-1 on page 13 and II-1 through IV-3 on pages 14 through 57.

- (14) An analysis of the agency's compliance with the targeting requirements of subsection (d) of Section 142 of the Internal Revenue Code of 1986 (26 U.S.C. Sec. 142) with respect to any issue of bonds subject to those requirements under Section 103 of the Internal Revenue Code of 1986 (26 U.S.C. Sec. 103), including the numbers of rental units subject to this reporting requirement by categories based on the number of bedrooms per unit.

This information is provided in Table III-6 on pages 25 and 26.

- (15) The statistical and other information relating to congregate housing for the elderly pursuant to Section 51218.

At the close of each fiscal year, commencing with the fiscal year ending June 30, 1988, the agency shall, as part of its annual report required to be prepared pursuant to Section 51005, report on its progress in implementing this article. The report shall contain a discussion of the affirmative steps the agency has taken to ensure that congregate housing for the elderly is developed. The report also shall contain recommendations for legislation or other action that would assist the agency in implementing this article.

Although the Agency continues to finance rental properties for seniors under other authority, no bonds or projects have been financed specifically as a result of Article 5.7. CalHFA continues to evaluate the financial viability of affordable assisted living projects.
