STATUTORY REPORTING REQUIREMENTS

Section 51005 of the Health and Safety Code requires that the Agency provide certain information under the fifteen categories specified in Section 51005(b) as part of the Annual Report due under Section 51005(a).

Section 51005(a): the report shall...include a statement of accomplishment during the previous year with respect to the agency's progress, priorities, and affirmative action efforts. The agency shall specifically include in its report on affirmative action goals, statistical data on the numbers and percentages of minority sponsors, developers, contractors, subcontractors, suppliers, architects, engineers, attorneys, mortgage bankers or other lenders, insurance agents, and managing agents.

Pursuant to Proposition 209 (also referenced as Article 1, Section 31 of the California Constitution), the California Housing Finance Agency (CalHFA) does not give preferences in awarding contracts based upon race or gender.

Pursuant to federal and state law, the Agency requires affirmative marketing for all housing developments to assure that housing opportunities generated by CalHFA provide attractive housing options in diverse locations for low income, disabled and senior households, and are open to all regardless of race, sex, sexual orientation, marital status, religion, national origin, ancestry, familial status or disability.

The following information is submitted in narrative form as it relates to the requirement of the referenced code sections [paragraph numbers correspond to the subparagraphs of Section 51005(b)]:

- (1) The primary purpose of the agency in meeting the housing needs of persons and families of low or moderate income pursuant to Section 50950.

The Agency meets the housing needs of persons and families of low or moderate income to the extent that it satisfies its specific objectives as outlined in Section 50952:

- (a) Acquisition of the maximum amount of funds available for subsidies for the benefit of persons and families of low or moderate income occupying units financed pursuant to the statute.

Multifamily - CalHFA has acquired the maximum amount of funds from the federal rental housing subsidy (Section 8) contract authority. CalHFA also requires the sponsors request and accept renewals on all rental housing subsidy contracts that are part of the approved financing on any given multifamily development. The Agency's Board of Directors created the Housing Assistance Trust loan program, which is designed to provide loan funds at below-market rates and terms to assist local governments and nonprofit organizations to provide additional below-market rental units. In addition, the Agency has combined its financing with participation and contributions from governmental entities utilizing federal, state, county and local resources such as FHA insurance, Low Income Housing Tax Credits (LIHTC), California Debt Limit Allocation Committee (CDLAC), Community Development Block Grant (CDBG), Home Investment Partnership (HOME), tax increment and other redevelopment agency funds, State Department of Housing and Community Development funds, and local resources.

Homeownership - Utilizing the tax exempt bond authority available from the California Debt Limit Allocation Committee, the Agency continues to provide assistance to low and moderate income families in purchasing their first home. During Fiscal Year 2009-2010, despite the declining real estate values and tightened underwriting guidelines from lenders, the Agency met and exceeded the goal set for purchased first mortgages to low income borrowers. In addition, in an attempt to fill the void left by the bond

market the Agency also continued to offer the Cal30 Loan Program utilizing forward commitments issued by Fannie Mae to fund first-time homebuyer loans underwritten to “My Community Mortgage” standards.

Further assisting new first time homebuyers in their purchases was additional financial assistance in the form of deferred payment second mortgages at low simple interest rates through the California Homebuyer’s Downpayment Assistance Program (CHDAP) and grants through the School Facility Fee Down Payment Assistance Program (SFF).

- (b) Housing developments providing a socially harmonious environment by meeting the housing needs of both very low income households and other persons and families of low or moderate income and by avoidance of concentration of very low income households that may lead to deterioration of a development.

Multifamily - The present multifamily rental programs of the Agency integrate very low and low income housing opportunities with market rate rentals whenever possible. All of CalHFA's housing developments are planned and designed to visually and physically integrate all elements of a complex into a socially harmonious environment. There are no visual or physical differences between units to be occupied by the very low income, low income or market rate tenants. The Agency requires that asset management personnel maintain high quality rental units. Housing developments are required to distribute low or very low income units throughout the development.

Homeownership - The Agency’s loan programs are designed to distribute funds, as market conditions permit, to meet housing needs throughout the state. The programs are designed to provide financing to low and moderate income first time homebuyers purchasing homes in all counties. Through the Agency's "over-the-counter" single family Loan Reservation System (LAS), lenders can reserve a loan without the housing development being pre-approved, or designated as low-income housing. This encourages widespread utilization of funds and minimizes concentrations in any one area.

- (c) Emphasis on housing developments of superior design, appropriate scale and amenities, and on sites convenient to areas of employment, shopping, and public facilities.

Multifamily - CalHFA developments and amenities are visually (architecturally) reflective of comparable market projects within a locale, being indistinguishable as a low income project. In addition, local participation typically includes architectural design requirements that keep the design comparable to others apartment buildings in the neighborhood. Whenever market conditions allow, CalHFA has encouraged the development of larger units to accommodate larger low income and other families. Within a development, a proportionate share of all unit types is reserved for low income families.

Homeownership - The Homeownership Division purchases CalHFA down payment assistance subordinate loans from authorized lenders throughout the State as well as reviews and approves first mortgages for their purchase and securitization by our Master Servicer (Bank of America, N.A.). This continually provides funds to finance the purchase of new and existing homes. It also ensures that affordable financing is available to assist low and moderate income households to enjoy the amenities and benefits of home ownership in developments located close to employment, shopping and public facilities. All properties must be in good condition, meet State Health & Safety Codes, and satisfy any requirements dictated by a HUD approved appraiser.

- (d) Increasing the range of housing choices for minorities in lower income households and other lower income households, rather than maintaining or increasing the impact of low income areas, and cooperation in implementation of local and areawide housing allocation plans adopted by cities, counties, and joint powers entities made up of counties and cities.

Multifamily - In compliance with applicable laws, the Agency requires affirmative marketing and adequate placement for all projects to assure that housing opportunities assisted by CalHFA and other financing mechanisms provide attractive housing options in diverse locations for low income families, disabled, and senior households.

- (e) Reducing the cost of mortgage financing for rental and cooperative housing to provide lower rent for persons and families of low or moderate income.

Multifamily - Through the sale of tax-exempt bonds, other financing mechanisms and through voter initiatives, the Agency delivers competitive interest rate mortgages to developers who then pass along this benefit to lower income tenants through reduced rents. For nonprofit sponsors of multifamily housing, CalHFA offers a predevelopment loan program.

- (f) Reducing the cost of mortgage financing for home purchase, in order to make homeownership feasible for persons and families of low or moderate income.

Homeownership - In addition to limiting interest rates, origination fees and loan processing costs on all CalHFA first mortgages the Agency also provides first time homebuyers additional assistance through various other programs. Through the Affordable Housing Partnership Program (AHPP) with localities and nonprofits, the School Facility Fee Down Payment Assistance Program (SFF), the California Homebuyer's Downpayment Assistance Program (CHDAP) and the Fannie Mae HomeChoice Program, qualifying families can become homeowners with little or no down payment.

The HELP Program facilitated local government agency programs by making funds available for local subordinate loan programs. Local governments borrowed the funds for such a purpose at 3.5% interest for up to ten years.

Through the Self-Help Builder Assistance Program (SHBAP), the Agency provides lower interest rates to low-income households whose participation in the construction of the homes results in "sweat equity", which fulfills or offsets the down payment requirement. The Program was designed to provide assistance to nonprofit developers for land acquisition, site development and unit construction in mutual self-help projects and to reduce the cost of mortgage financing for the low income home buyers who participate in the construction.

In 2009-10, the Agency's basic Homeownership program offered up to 95% LTV first mortgage financing at a fully amortizing 30-year fixed interest rate. The Agency provided a 4% interest rate on the 30-year fixed rate loans to the borrowers (home builders) in the Self-Help Builder Assistance Program.

- (g) Identification of areas of low vacancy rates where construction is needed, of areas of substandard housing where rehabilitation is needed, and of areas of credit shortage where financing is needed for transfer of existing housing, so as to maximize the impact of financing activities on employment, reduction of housing costs, and maintenance of local economic activity.

Multifamily - Inherent within any multifamily development are the benefits derived from the building of the project, i.e., construction and related employment, etc. As part of its underwriting considerations, the Agency examines critical factors such as vacancy rates, market demand and cost feasibility.

Homeownership - The Agency has identified federally-designated targeted areas in need of mortgage credit, new housing construction or rehabilitation and community revitalization. CalHFA identifies these areas by comparing jobs with housing to help create balance and to maximize the impact of financing activities sponsored by CalHFA's Homeownership Programs. Under federal tax laws, CalHFA is required to commit 20% of any new bond issue to federally-designated targeted areas for 12 months.

A number of local governments and nonprofits also partner with CalHFA by assisting low-income borrowers in such areas through the Affordable Housing Partnership Program (AHPP). The Agency also operated the Residential Development Loan Program (RDLP), project-specific funding that provided a 3% interest rate loan with a maximum term of five years to local government agencies for site acquisition and predevelopment expenses attributed to affordable infill, owner-occupied housing developments. The Program also directly linked RDLP-financed developments to CalHFA's California Homebuyer's Downpayment Assistance Program to assist with both down payment and, as necessary, closing costs by providing subordinate loans to first-time homebuyers.

- (h) A balance between urban metropolitan, nonmetropolitan, and rural metropolitan housing developments, and between family housing and housing for the elderly and handicapped, in general proportion to the needs identified in the California Statewide Housing Plan.

Multifamily - CalHFA is required by statute to utilize the Statewide Housing Plan for the allocation of Agency funds. Please see pages 22 through 26 of this Supplement for detailed data on the Agency's accomplishments in furtherance of the Plan.

Homeownership - CalHFA attempts to meet the housing needs of first time homebuyers on a continuous basis by making financing available for the purchase of newly constructed and existing homes in every county of the state. Through the Homeownership Program, CalHFA develops loan programs and strategies to ensure the equitable distribution of funds throughout California.

- (i) Minimization of fees and profit allowances of housing sponsors so far as consistent with acceptable performance, in order to maximize the benefit to persons and families of low or moderate income occupying units financed by the Agency.

Multifamily - As a means to assist nonprofit-sponsored multifamily rental developments, CalHFA's Board of Directors approved the deferral of commitment fees in certain instances until the construction loan has been closed. The effect of this action means these organizations, which have limited cash resources, may use their available funds for other critical purposes in the early stages of development.

Homeownership - The Homeownership program provides profit, nonprofit and self-help developments a reliable source of below market rate financing. Both spot reservations and new construction forward commitments are available. However, fees collected by lenders from borrowers are restricted by CalHFA to maximize the benefit to homebuyers.

- (j) Full utilization of federal subsidy assistance for the benefit of persons and families of low or moderate income.

Multifamily - See (a) on page 1.

- (k) Full cooperation and coordination with the local public entities of the state in meeting the housing needs of cities, counties, and Indian reservations and rancherias on a level of government that is as close as possible to the people it serves.

Multifamily and Homeownership - The Agency markets its programs in a manner which seeks out development projects and individual loan commitments that provide funds for the purchase of homes sponsored by local public entities and nonprofit or for-profit developers working with cities and/or counties. The Agency provides incentives for these developments. In addition, the Agency also works with local governmental entities, State agencies and nonprofits that provide other sources of subsidy or financing to help make affordable housing available to low income families. CalHFA outreaches directly to cities and counties in an effort to acquaint relevant officials with programs offered by the Agency. The Agency also offers a special interest rate reduction for first mortgages when local governments provide down payment assistance to low income, first time homebuyers through the Affordable Housing Partnership Program (AHPP). As of June 30, 2010, more than 287 local government entities and nonprofit housing organizations offering 522 programs that have been approved to provide financial assistance to first-time homebuyers securing Agency first mortgages.

- (l) Promoting the recovery and growth of economically depressed business located in areas of minority concentration and in mortgage-deficient areas.

Multifamily - CalHFA works in cooperation with local public entities, such as housing authorities and redevelopment agencies, to coordinate financing to meet local housing needs and promote the revitalization of urban areas.

Homeownership - The Homeownership program promotes the growth and recovery of business by providing permanent mortgage financing to all areas of the State and in particular to federally designated targeted areas. The provision of permanent loan financing can assist in securing construction financing, resulting in construction jobs and economic stimulation within these areas. In addition, the Agency offers higher income and sales price limits in federally-designated targeted areas (economically distressed areas) and waives the first-time homebuyer requirement to encourage mortgage financing in these areas.

The Agency, in cooperation with participating financial institutions and seller/servicers, continued offering the CalHFA Community Stabilization Home Loan Program (CSHLP) featuring competitive interest rates to stimulate and stabilize communities hit hard with real estate owned (REO) inventory.

- (m) Revitalization of deteriorating and deteriorated urban areas by attracting a full range of income groups to central city areas to provide economic integration with persons and families of low or moderate income in those areas.

Multifamily - Development of CalHFA projects in or adjacent to redevelopment areas has resulted in replaced and/or rehabilitated substandard housing and the increase or preservation of the supply of housing units available. CalHFA projects have stimulated revitalization by providing visual activity of constructive neighborhood improvement, resulting in a wider range of housing opportunities and choices within depressed areas of the city and discouraging migration outside the inner city neighborhoods. This development has increased the quality of housing units available, provided the type of mixed income and market rate projects that have attracted a diversity of groups for a more dynamic economic integration and transformed vacant and/or blighted lots into useful housing infrastructure. Local government assistance is most helpful in accomplishing these results.

Homeownership - The Agency distributes to CalHFA lenders throughout the State the special Federal income and sales price limits established for federally designated targeted areas, to encourage a range of income groups to buy homes. Lower interest rates and the availability of CalHFA down payment assistance programs also contribute by improving affordability for low/moderate income buyers in these areas. All of the above contribute to the revitalization of these targeted areas.

- (n) Implementation of the goals, policies, and objectives of the California Statewide Housing Plan.

Multifamily and Homeownership – The above-referenced programs, through program design and marketing, are designed to meet the goals of the Plan.

- (o) Location of housing in public transit corridors with high levels of service.

Multifamily – Some new construction and resale housing commitment bids are for housing developments in public transit corridors that have high levels of service. Rehabilitation sites are typically in areas which enjoy public transportation opportunities.

- (p) Reducing the cost of mortgage financing for rental housing development in order to attract private and pension fund investment in such developments.

The Agency's low interest rate mortgage financing for rental housing developments attracts private equity investment, especially in those circumstances where the federal low income housing tax credit is available. Pension funds have not yet been equity investors in any Agency-financed rental housing developments.

- (q) Reducing the cost of mortgage financing for second unit rental housing, as defined by Section 65852.2 of the Government Code, in order to make rental housing more affordable for elderly persons and persons and families of low or moderate income.

As outlined in the Agency's June 23, 1993 Report to the Legislature, the Agency does not have a loan program for second units. Prior attempts to market such a program were not successful.

- (2) The occupancy requirements for very low income households established pursuant to Sections 50951 and 51226.

Sections 50951, 51226 and 51226.5 contain various priority requirements for housing development financing. If adequate subsidies are available, certain percentages (which vary depending upon the type of financing and type of developments, and whether they are federally insured) of the total units financed must be made available to very low income households

This information is provided in Tables IV-2 and IV-3 on pages 50 and 51.

- (3) The elderly and orthopedic disability occupancy requirements established pursuant to Section 51230.

Section 51230. Percentage of units allocated for occupancy by elderly persons.

This information is provided in Table III-4 on page 23 and in Table III-5 on page 24.

Subsequent to Section 51230's enactment, the number of laws governing handicapped accessibility for multifamily rental housing have greatly increased. The Agency requires that the design of all newly constructed units comply with the applicable accessibility requirements.

(4) The use of surplus moneys pursuant to Section 51007.

Section 51007. Subject to any agreements with holders of particular bonds, all moneys available for carrying out the purposes of this part and declared by the agency to be surplus moneys which are not required to service or retire bonds issued on behalf of the agency, pay administrative expenses of the agency, accumulate necessary operating or loss reserves, or repay loans to the agency from the General Fund shall be used by the agency, with respect to existing housing developments, to provide special interest reduction programs, financial assistance for housing developments or subsidies for occupants or owners thereof, or counseling programs, as authorized by this division.

As of June 30, 2010, there were no funds derived from the issuance of bonds by the Agency, which can be declared surplus moneys. All moneys available to the Agency are, subject to agreement with the bondholders, required to service or retire bonds issued on behalf of the Agency, repay loans, pay administrative expenses of the Agency, and accumulate necessary operating or loss reserves.

(5) The metropolitan, nonmetropolitan, and rural goals established pursuant to subdivision (h) of Section 50952.

This information is provided in the tables on pages 15, 16, 17, 21, 22, and paragraph (h) on page 4.

(6) The California Statewide Housing Plan, as provided by Section 50154.

See paragraph (h) on page 4. In general, CalHFA programs seek to implement the goals, policies and objectives of the Plan and attempt to meet the housing needs outlined in the Plan.

(7) The statistical and other information developed and maintained pursuant to Section 51610.

The California Housing Loan Insurance Fund (Fund) insures loans made by the Agency and other lenders which finance the acquisition of residential units in California. The Fund continues to enjoy a claims paying rating of BBB from Standard and Poors and Aa1 by Moodys.

For 2009-10, the Fund insured nine mortgages totaling \$1.6 million. At fiscal year end, there were 9,236 active mortgage certificates for \$2.5 billion.

During this fiscal year, the Fund paid 1,260 claims totaling \$136.7 million.

At fiscal year end, there were 2,050 insured loans reported delinquent 120+ days totaling \$574.0 million.

(8) The number of manufactured housing units assisted by the agency.

Within the Home Mortgage Purchase program, the Agency has provided financing for 1,052 manufactured housing units since 1983. The Agency periodically explores new innovations in the area of manufactured housing seeking to apply this product type to CalHFA programs, however the Agency purchased no manufactured housing properties in Fiscal Year 2009-10.

- (9) Information with respect to the proceeds derived from the issuance of bonds or securities and any interest or other increment derived from the investment of bonds or securities, and the uses for which those proceeds or increments are being made as provided for in Section 51365, including the amount by which each fund balance exceeds indenture requirements.

All proceeds from the issuance of the Agency's bonds have been applied to the housing programs identified in the Agency's Two-Year Business Plan and its Annual Report, to service the bonds and swaps and to pay administrative expenses, to establish required reserves and to repay Agency loans. Over the past two fiscal years all available reserves derived from the proceeds of bonds are being used for loan losses and additional costs related to bonds and swaps. There are no excess fund balances that exceed indenture requirements.

The Agency's financial statements are prepared in accordance with Generally Accepted Accounting Principles (GAAP) and follow the Standards of Governmental Accounting and Financial reporting as promulgated by the Governmental Accounting Standards Board ("GASB"). In June of 2002, the Agency adopted Statement of Governmental Accounting Standards ("SGAS") No. 34. As described in the notes to the Agency's June 30, 2010 financial statements, all net assets of the Housing Finance Fund, whether or not currently held under the liens of bond indentures, are properly reported as "restricted" in accordance with GASB Statement No. 34 and State statutes.

The Agency's bond issues are structured to comply with bondholder agreements and the requirements of credit rating agencies, bond insurers and other financial institutions providing credit enhancement or security in support of the issuance of the Agency's bonds. In addition, the Agency's financings and swap agreements have been increasingly guaranteed by the pledge of the Agency's general obligation, which was rated A1 by Moody's Investors Service and A by Standard & Poor's. Under State statutes, all assets of the Housing Finance Fund, whether or not held under the liens of bond indentures, are continuously appropriated in support of the Agency's financial obligations. This appropriation comprises the support for the Agency's rated general obligation. As of June 30, 2010, the Agency's general obligation was pledged to \$1.2 billion of its bonds and to its entire \$3.4 billion of interest rate swaps.

The Agency has used a significant amount of reserves accumulated over many years during this economic cycle and real estate market downturn. The Agency reported operating losses in the Housing Finance Fund over the past two fiscal years totaling more than \$ 300 million. Contributing to this operating loss were swap termination payments of \$ 82 million, including those made to Lehman Brothers as a result of their bankruptcy, basis mismatch amounting to \$56 million and loan related losses of \$143 million

The Agency's interest rate swap portfolio is comprised of 112 swaps with 13 different financial institutions acting as counterparties. The estimated net market value of these swaps as of June 30, 2010 was a negative \$330 million. The swap portfolio has a negative value because of interest rate changes since the date the swaps were obtained. This negative value represents the payments the Agency would owe to its counterparties in the event the swaps had to be terminated. One event that would cause a mandatory termination and an immediate obligation of the Agency to pay the termination value of its swaps would be a loss or severe reduction of the Agency's general obligation credit ratings.

Basis mismatch is the difference between the actual interest rates paid to bondholders on floating rate securities (variable rate demand obligations and auction rate securities) and the variable rates received from swap counterparties on interest rate swaps entered into to hedge the Agency's variable rate exposure. The mismatch is the result of higher interest rate resets on variable rate bonds, including rates resulting from failed auctions. Interest rate compression has further exacerbated this situation and created a larger basis mismatch because of the unusually high SIFMA/LIBOR ratio.

Another obligation of the Agency is in the form of mortgage insurance. The Agency and bondholders require the maintenance of mortgage insurance on the majority of Homeownership loans. However, the current mortgage insurance policies do not all provide for 100% coverage and federal law (the Homeowner's Protection Act of 1998) prohibits the Agency from requiring mortgage insurance for loans that meet certain tests. The Agency's reserves represent the pool from which self-insured claims (frequently referred to as "Gap" insurance) are paid, as well as losses due to earthquake, flood or other natural hazards.

The Agency has established reserves in the Supplementary Bond Reserve Account of \$135 million to cover anticipated indemnification payments to the California Housing Loan Insurance Fund for loans subject to Gap insurance. The indemnification payments are for losses up to 50% of the outstanding principal balance of each loan for which either the primary mortgage insurance covers less than 50% of loan principal or primary mortgage insurance may not be required because the loan-to-value ratio was below 80% at loan origination or because the borrower demonstrated equity of 20% or more in the property.

(10) Any recommendations described in subdivision (d).

Section 51005(d). The agency shall assess any obstacles or problems that it has encountered in meeting its mandate to serve nonmetropolitan and rural metropolitan areas, and...include...a quantification and evaluation of its progress in meeting the housing needs of communities of various sizes in rural areas.

The Agency implemented the USDA Rural Development Leveraging/Participation Program and the USDA Rural Housing Guaranteed Loan Program, to provide another available source of financing in rural areas. The California Homebuyer's Downpayment Assistance Program (CHDAP) provides down payment assistance and is available in rural areas throughout California.

Regarding multifamily rental lending, CalHFA's Housing Assistance Trust (HAT) loan programs provide encouragement for developers and nonprofits to develop low-income housing. This now includes a new program that provides gap financing for tax-exempt construction loans meeting certain requirements.

Additional information is provided in the tables on pages 15, 16, 17, 21, 22.

- (11) Section 51227. At the close of each fiscal year, the agency must ascertain that not less than 25 percent of the total units financed by mortgage loans during the preceding 12 months were made available to very low income households. In addition, at the close of each fiscal year the agency must ascertain that not less than 25 percent of all units financed by mortgage loans are occupied or available to very low income households.

This information is provided in Tables IV-2 and IV-3 on pages 50 and 51.

- (12) The revenue bonding authority plan adopted pursuant to Section 51004.5.

This information is provided in Table VI-4 on page 58.

- (13) The statistical and other information required to be provided pursuant to Section 50156.

The California Housing Finance Agency shall provide to the Legislature and the Legislative Analyst, in each annual report required by Section 51005, information concerning all units produced, assisted, or insured using agency funds. This information shall include, but shall not be limited to, the sales prices of these units, the number of units within various price ranges or price classifications, the rents being charged for the units, the number of rental units within each price range, the number of households by income level purchasing the units, and the number by household income occupying the rental units.

This information is provided in Tables I-1 on page 13 and II-1 through IV-3 on pages 14 through 51.

- (14) An analysis of the agency's compliance with the targeting requirements of subsection (d) of Section 142 of the Internal Revenue Code of 1986 (26 U.S.C. Sec. 142) with respect to any issue of bonds subject to those requirements under Section 103 of the Internal Revenue Code of 1986 (26 U.S.C. Sec. 103), including the numbers of rental units subject to this reporting requirement by categories based on the number of bedrooms per unit.

This information is provided in Table III-6 on page 25.

- (15) The statistical and other information relating to congregate housing for the elderly pursuant to Section 51218.

At the close of each fiscal year, commencing with the fiscal year ending June 30, 1988, the agency shall, as part of its annual report required to be prepared pursuant to Section 51005, report on its progress in implementing this article. The report shall contain a discussion of the affirmative steps the agency has taken to ensure that congregate housing for the elderly is developed. The report also shall contain recommendations for legislation or other action that would assist the agency in implementing this article.

Although the Agency continues to finance rental properties for seniors under other authority, no bonds or projects have been financed specifically as a result of Article 5.7. CalHFA continues to evaluate the financial viability of affordable assisted living projects.
