## **Overview**

This semi-annual update, Mental Health Services Act (MHSA) Housing Program Semi-Annual Update April 2013, was prepared by the Department of Health Care Services (DHCS) in compliance with Assembly Bill 1183 (Committee on Budget, Chapter 758, Statutes of 2008). This update reflects financial activity in the MHSA Housing Program from October 1, 2012, through March 31, 2013, including fiscal information regarding both approved and pending MHSA Housing Program applications.

The MHSA Housing Program provides both capital and operating subsidy funding for the development of permanent supportive housing for individuals with serious mental illness and who are homeless or at risk of homelessness. Affordable housing with necessary supports has proven effective in assisting individuals in their recovery.

The program is jointly administered by DHCS and the California Housing Finance Agency (CalHFA). CalHFA underwrites requests for capital funds and capitalized operating subsidies, while DHCS evaluates each applicant's proposed target population and supportive services plan. Once funds are awarded, CalHFA oversees all development and financial aspects of the project and DHCS oversees the provision of services, including continuing assessment as to whether the MHSA Housing Program continues to meet the needs of the target population.

DHCS continues to partner with CalHFA, and the California Mental Health Directors Association (CMHDA), to complete the goal of the MHSA Housing Program of creating 10,000 additional units of permanent supportive housing for individuals with mental illness and their families who are homeless or at risk of homelessness.

Since the implementation of the MHSA Housing Program in August 2007, over \$400 million in MHSA funds have been made available to county mental health departments to meet the supportive housing needs of the local mental health community identified in each county's MHSA Three-Year Program and Expenditure Plan (Three-Year Plan). These MHSA Housing Program funds are projected to result in 2,500 units of permanent supportive housing for individuals with serious mental illnesses.

## **Study Methodology**

This report contains updated financial data for the MHSA Housing Program drawn from the attached application tracking and fiscal data maintained by CalHFA.

## **Findings**

Since the program's inception in 2007, 172 applications have been received (referenced in column 4: Attachment A under "Application Date," Attachment B under "MHSA Senior Loan Committee Approval Date," Attachment C under "Application Date," and Attachment D under "Certificate of Occupancy Date") from 37 counties and two cities. Of these applications, 149 have received loan approval (referenced in column 4:

Attachment B under “MHSA Senior Loan Committee Approval Date,” Attachment C under “Application Date,” and Attachment D under “Certificate of Occupancy Date”), creating 2,325 units of supportive housing for the homeless, mentally ill (referenced in Attachment A: under “MHSA Units” in column 6; Attachment B: under “MHSA Units” in column 8; Attachment C: under “MHSA Units” in column 6; and Attachment D: under “MHSA Units” in column 6). This semi-annual update reflects financial activity in the program from October 1, 2012, through March 31, 2013, including fiscal information regarding both approved and pending MHSA Housing Program applications. During this report period, 12 new housing applications were received (referenced in column 3 by denoting “\*\*\*” in Attachment A, B, and C), 8 applications and 95 housing units received approval (Attachment B- last row), 14 loans closed (Attachment C- last row), and 12 developments and 205 MHSA units became ready for occupancy (Attachment D- last row).

California recently experienced an economic crisis which negatively impacted California’s housing industry and greatly reduced the availability of other affordable housing resources. Although development resources were limited, counties continued to find ways to develop permanent supportive housing. Several counties began to explore the shared housing model – tenants lease a bedroom and have shared common living space – as an alternative to developing rental apartments. Before the housing crisis, this was an alternative that was primarily utilized by small counties. Now, even larger counties are purchasing single family homes for MHSA tenants to live in.

### **Future Updates**

DHCS will provide the next MHSA Housing Program Semi-Annual Update in October 2013; this will be the final report. The final report will provide a more in-depth review of the MHSA Housing Program, including lessons learned and best practices.
