CalHFA Board Meeting

Nov 17, 2010
Moody's rating action on Oct 26, 2010

- Downgraded the Agency's G-O to A2 from A1
  - Negative Outlook

- Confirmed HMRB at A3
  - Negative Outlook

- Removed from Credit Watch for Downgrade
Rating rationale

- **On negatives**
  - Erosion of the Agency’s fund balances, profitability and liquidity as a result of single family mortgage loan delinquencies and foreclosures, risks related to the Agency’s high level exposure of variable rate debt, and uncertainty about future financial growth

- **On positives**
  - CalHFA continues to have a sound balance sheet sufficient to meet its obligations
  - Two recent steps taken have been significant credit positive
    - First, in April 2010, the Agency placed a cap of $135Mn on the Agency’s general funds that would be made available for “gap” mortgage insurance.
    - Second, in October 2010, at CalHFA’s request the California legislature approved a loan from the State to CalHFA to refinance CalHFA’s borrowings for the Bay Area Housing Plan
Rating rationale (continued)

- On positives
  - Management actions remain a positive factor
  - Actions by CalHFA's management have contributed positively to the rating assessment
    - The decision to cap the funds available for gap insurance relieved a source of liquidity pressure on the issuer rating
    - Has substantially enhanced its single family asset mgmt and reduced timelines for moving defaulted loans through the pipeline
    - Successful renegotiation of interest rate swap collateral provisions to move trigger to lower rating levels
    - Successful application for the large HHF award should also contribute to efforts to reduce single family losses
    - Successful in obtaining legislative authorization for refinancing from other state resources its short-term borrowing for the Bay Area Housing initiative, relieving a near-term liquidity pressure
Negative Outlook

- **What could stabilize the ratings or change the ratings - up**
  - Successful management of single family mortgage loan delinquencies and foreclosures (combined with successful implementation of HHF), so as to contain or reduce losses
  - Reduced variable rate bond exposure
  - Reduced swap portfolio and/or reduced impact of collateral posting

- **What could change the ratings - down**
  - Failure to close the anticipated refinancing of the Bay Area Housing
  - Increases in single family losses
  - A downgrade of Genworth Mortgage Insurance Company
  - Higher levels of mortgage delinquencies or foreclosures, possibly triggered by a second downturn in general economic trends
  - A significant downgrade of HMRB, impairing the ability of HMRB to reimburse the operating account for swap payments
  - Increase in swap collateral posting due to further declines in interest rates or ratings downgrades, unforeseen counterparty events, or lack of successful transition from TCLP liquidity facilities
